**RECOGNISING** that the implementation of such cooperation shall be in accordance with the policies and priorities of the respective Parties, and in accordance with the conditions as mutually determined from time to time between the Parties;

**DESIRING** to further strengthen the bilateral relations between the Republic of India and the Federal Republic of Nigeria;

**HAVE AGREED** as follows-

**ARTICLE 1**

'The aim of the MOU is to enhance defence cooperation through the exchange of experiences and knowledge between the Parties.

**ARTICLE 2**

The Parties entrust the implementation of this MOU to their respective Ministries of Defence.

**ARTICLE 3**

The cooperation between the defence authorities of the Parties will include following defence and military activities :

- a. Exchange of expertise in military training and information technology;

- b. Mutual utilisation of military and educational courses and programmes like seminars, symposia, workshops, etc.;
- c. Facilitate contact and cooperation between defence-related agencies, institutions, organizations and / or industries in their respective countries in respect of technology transfer, exchange of technical information, joint projects & ventures, sourcing of components, co-production, joint marketing, technical assistance, research and development, subject to full compliance of the applicable issues, rules and regulations;
- d. Exchange information that is mutually beneficial;
- e. Exchange of visit of personnel, ships and aircrafts;
- f. Endeavour to cooperate in joint exercises and training; and
- g. Collaborate in other spheres' of Defence Cooperation for purpose of mutual benefit.

#### **ARTICLE 4 FORMATION OF JOINT COMMITTEE**

The two parties shall form a joint committee. The committee would meet when necessary to study future military cooperation between the two Parties.

#### **ARTICLE 5 PROTECTION OF CLASSIFIED INFORMATION**

Subject to their laws, the Parties shall protect classified information exchanged in the following manner:

The parties shall not disclose any classified information obtained under this or, any MOU, other than to members of their own staff who have been cleared to the appropriate level by their respective Governments, and to whom such disclosure is essential for the purposes of giving effect to this MOU or to an/ other further MOU and only after having taken all reasonable precautions to adhere that such members of staff shall at all time maintain strict secrecy. The Parties shall not use any classified information obtained during any bilateral cooperation between them to detriment or against the interests of the other party.

**ARTICLE 6**  
**FINANCIAL ARRANGEMENT**

The financial arrangement and the terms thereof shall be mutually determined and adopted by the Parties in conformity with their respective internal legislations.

**ARTICLE 7**  
**DISPUTES**

Any differences or disputes between the parties arising from the interpretation or implementation of this MOU shall be settled amicably through consultation and negotiation between the representatives of the respective Ministries of Defence. It shall not be referred to any tribunal or third party.

**ARTICLE 8**  
**FUTURE MOUs**

In regard to any particular matter covered by the provisions of this MOD, the parties may enter into such further arrangements of a general or specific nature as would in their opinion promote the effective implementation of this MOU.

**ARTICLE 9**  
**AMENDMENTS**

The MOU may be amended at any time by mutual consent of the Parties in writing and this amendment shall be deemed to be an integral part of this MOU, with effect from the date of such amendment.

**ARTICLE 10**  
**DURATION**

The MOU shall remain in force for a period of five (5) years and shall be automatically extended for two (2) years at a time unless terminated earlier by either Party upon six (6) months prior written notice to the other Party of its intention to terminate this MOU.

**ARTICLE 11**  
**TERMINATION**

This MOU may be terminated by either Party by giving six (6) months notice in writing of its intention to terminate this MOU. Upon expiry of the period of

six (6) months, the MOU shall stand terminated. Notwithstanding the termination of this MOU, the activities already in progress shall continue until completed.

Classified information exchanged between the parties prior to the effective date of termination shall continue to be protected under Article 5 notwithstanding the termination of this MOU.

**ARTICLE 12  
ENTRY INTO FORCE**

This MOU shall enter into force on the date of the last Note whereby one Party conveys to the other, through diplomatic channel, the fulfillment of the formalities required by their respective internal juridical instrument necessary for the entry into force.

**IN WITNESS THEREOF**, the undersigned, being duly authorized by their respective Governments have signed and sealed this MOU.

**Done** at Abuja on this 15<sup>th</sup> day of October 2007 in two originals in English language/ both being equally authentic.

**471. Memorandum of Understanding on Mutual Cooperation between the Foreign Service Institute, Ministry of External Affairs of the Republic of India and the Foreign Service Academy, Ministry of Foreign Affairs of the Federal Republic of Nigeria.**

**Abuja (Nigeria), October 15, 2007.**

**The Foreign Service Institute of India and the Foreign Service Academy of Nigeria** (hereinafter referred to as "the Parties") in the spirit of cooperation that has traditionally existed between the two countries and desiring to promote greater cooperation between the two institutions;

**Have** reached the following understanding:

**Article 1**

The Parties shall cooperate in mutually beneficial areas of activity, which inter alia may include:

1. Exchange of information of structure and content of training programmes for diplomats;
2. Identification of experts in mutually agreed areas;
3. Exchange of information on the use of IT in diplomacy;
4. Joint research in mutually agreed areas;
5. Mutual assistance in designing IT-based course content for distance learning.

**Article 2**

The Parties shall exchange information and publications on training programmes, curricula of studies and other activities of common interest.

**Article 3**

The Parties shall promote contacts and exchange of trainees, students, faculty members, experts and researchers.

**Article 4**

The Parties will encourage coordinated research on the subject of mutual interest.

**Article 5**

The Parties will decide the specifics and logistics of every project they undertake together. For this purpose, a protocol laying down the financial terms and conditions of the proposed exchanges will be concluded, if necessary.

**Article 6**

This Memorandum shall enter into force on the date of its signature and shall remain in force for a period of three years. Thereafter, it may automatically be renewed for similar three-year periods at a time, unless terminated by either party by giving a written notice of 90 days to the other party prior to the date of termination of the Memorandum. The termination of this Memorandum shall not affect ongoing projects.

**Article 7**

This Memorandum of Understanding may be amended by mutual written agreement of the Parties.

**In witness whereof**, the undersigned being duly authorized thereto by their respective Governments, have signed this Memorandum and affixed their seals.

**Done** at Abuja on this 15<sup>th</sup> day of October 2007 in two originals in the English Language, both being equally authentic.

**On behalf of Foreign Service  
Institute of India**

**On behalf of the Foreign  
Service Academy of Nigeria**

**472. Memorandum of Understanding on Cooperation between the Indian Council of World Affairs, Republic of India and Nigerian Institute of International Affairs, Federal Republic of Nigeria.**

**Abuja (Nigeria), October 15, 2007.**

**The Indian Council of World Affairs [ICWA], New Delhi, and Nigerian Institute of International Affairs (NIIA), hereinafter referred to as 'The Parties';**

**Intending** to enhance mutual understanding and friendship between the peoples of the Republic of India and the Federal Republic of Nigeria through the promotion of friendly institutional relations;

**Have** reached the following understanding:

**Article 1  
General Guideline**

The Parties agree to develop exchanges and cooperation on the basis of mutual respect, equality and mutual benefit.

The Parties agree to establish a non-governmental group of eminent persons from both sides from the fields of diplomacy, culture, economy and trade, academics, sciences, social sciences, communications and the media to facilitate an Annual India-Nigeria Dialogue and cooperation between the civil societies of India and Nigeria.

With a desire to make such dialogue and exchange fruitful, the Parties shall, through mutual understanding, decide upon the number of participants from each side, and shall each nominate their respective Co-Chairpersons.

The list of eminent members from both sides shall be communicated through mutual exchange of letters.

The Annual Dialogue will be hosted alternately in India and Nigeria by the ICWA and the NIIA, respectively. The first dialogue will be hosted by ICWA in New Delhi.

**Article 2  
Contents of Cooperation**

Cooperation under this Memorandum may include:

1. Promotion and support of those activities contributing to better understanding and relations between India and Nigeria;
2. Promotion and support for the exchange of visits by eminent persons in the fields of diplomacy, culture, academics, economy and trade, education, sciences, social sciences, communication and the media;
3. Cosponsoring of bilateral seminars, symposiums and panel discussions on issues of common interest;
4. Exchange of publications;
5. Other forms of cooperation as may be agreed upon by both parties through consultations.

**Article 3**  
**Sharing of Expenses**

On the basis of reciprocity, the sending Party shall cover international travel expenses while the receiving Party shall cover local transportation and hospitality expenses of the participants as well as local organizational costs.

**Article 4**  
**Others**

Other issues not covered in this Memorandum shall be decided through mutual consultation between the Parties.

**Article 5**

The Memorandum shall come into effect from the date of its signature. This Memorandum of Understanding may be amended by mutual agreement whenever necessary.

**Done** at Abuja on this 15<sup>th</sup> day of October 2007 in two originals in English language, both being equally authentic.

of International Affairs**

**473. Protocol for Consultations between the Ministry of External Affairs of the Republic of India and the Ministry of Foreign Affairs of the Federal Republic of Nigeria.**

**Abuja (Nigeria), October 15, 2007.**

**The Ministry of External Affairs of the Republic of India and the Ministry of Foreign Affairs of the Federal Republic of Nigeria**, hereinafter referred to as the "Parties".

**IN THE SPIRIT** of the friendly ties and cooperation between the two countries;

**WITH THE PURPOSE OF** promoting bilateral relations in various fields;

**PROCEEDING FROM** the common interests for strengthening international peace and security;

**ACKNOWLEDGING** the usefulness of exchange of opinions and consultations between the two countries at different levels;

**HAVE AGREED** as follows:

1. The parties shall hold regular consultations to review the implementation of agreements reached between the two States and to strengthen the process of wide ranging exchange of views on international and bilateral issues and interaction in the international arena.
2. The above mentioned consultations shall cover all important issues affecting the interests of both parties, such as
  - Issues under discussion at the United Nations and other international fora.
  - Issues connected with the prevention of conflicts and peaceful settlement of international disputes.
3. Consultations shall be carried out, in principle, annually at different levels and alternately in New Delhi and Abuja and also, if necessary, at the United Nations and other International fora.
4. The Parties shall also cooperate on matters of mutual interest at the

level of diplomatic (Consular) missions in third countries.

5. The Parties shall facilitate cooperation in research on foreign policy issues, exchange of archival documents and preparation of compendia of documents and materials pertaining to their bilateral relations.
6. The provision of this protocol shall be without prejudice to any other treaties or agreements to which any of the parties has obligations.
7. The Protocol may be modified or amended by mutual consultations.
8. This agreement shall enter into force on the date of signature and shall remain in force for a period of five (5) years. After the expiry of this period, it shall automatically be renewed for successive periods of one (1) year each unless either party notifies the other in writing of its intention to terminate this Protocol prior to the expiry of any such period.

**IN WITNESS WHEREOF** the undersigned being duly authorized thereto by their respective Governments have signed this Protocol.

**Done** at Abuja on this 15<sup>th</sup> day of October 2007 in three originals, two in English and one in Hindi language, all being equally authentic.

## **SOUTH AFRICA**

### **474. Press Release of the Ministry of External Affairs on the meeting between Minister of State Anand Sharma with South African President Thabo Mbeki in Pretoria.**

**New Delhi, May 21, 2007.**

Mr. Anand Sharma, Minister of State for External Affairs, today called on H.E. Mr. Thabo Mbeki at the Presidential Residence in Pretoria.

2. They had a wide-ranging discussion on bilateral relations and also the trilateral engagement in the IBSA context.
3. President Mbeki described relations with India as 'historic' and 'strategic'. He said he was looking forward to meeting Prime Minister Manmohan Singh at the forthcoming meeting of the G-8 and outreach countries in Heiligendamm in Germany and Congress President, Mrs. Sonia Gandhi, on her forthcoming visit to South Africa.
4. President Mbeki fully endorsed the significant decisions arising out of the International Conference on "Peace, Non-violence and Empowerment : Gandhian Philosophy in the 21st Century" held in New Delhi on January 29-30, 2007.
5. President Mbeki underlined the need for India and South Africa to continue to work together in multilateral fora including the UN with a view to ensuring that the structures reflected contemporary realities and not the power balance of the past. Mr. Anand Sharma thanked the South African Government for the understanding and support for India's candidature to the UN Security Council.
6. Discussions touched upon a range of other issues of shared interest and concern, including developments in India's neighbourhood and the regional situation in Africa.
7. Earlier in the day, MOS, Mr. Anand Sharma delivered the keynote address at the CII Conclave on Project Partnerships in Johannesburg. He met Minister for Public Enterprises, Mr. Alec Erwin and ANC Secretary General, Mr. Kgalema Motlanthe. Mr. Sharma will also visit Cape Town.

## UGANDA

### **475. Press Release of the Ministry of External Affairs on the visit of Minister of State Anand Sharma to Uganda, 28-29 June 2007.**

**New Delhi, June 29, 2007.**

Minister of State for External Affairs, Shri Anand Sharma, delivered the key note address at the Conclave on India-Africa Project Partnership 2007 which was inaugurated in Kampala by the President of Uganda, H.E. Mr. Yoweri Kaguta Museveni, earlier today. Shri Sharma who is on a two-day visit to Uganda was received on arrival on 28 June by the Deputy Prime Minister of Uganda, Mr. Kirunda Kivejinja, and by acting Minister of Foreign Affairs, Mr. Henry Oryem Okello. Shri Sharma called on President Museveni on 28 June. During that meeting, a range of issues of mutual interest were discussed.

### **476. Press Release of the Ministry of External Affairs on the announcement for flood relief assistance to Uganda.**

**New Delhi, October 8, 2007.**

U Prime Minister has sent a letter to the President of Uganda, H.E. Dr. Yoweri Kugata Museveni conveying condolences on the loss of life and property due to unprecedented floods in Uganda.

U As a token of India's solidarity with the Government and people of Uganda, PM has also announced an emergency assistance of Rs. 1 crore. This amount can be used to provide relief supplies from India or for local procurement.

## United States of America

### **477. "U.S.-Indian Relations in the Global Context" - A Conversation with Foreign Secretary Shivshankar Menon and U.S. Under Secretary for Political Affairs, Nicholas Burns at the Carnegie Endowment for International Peace.**

**February 22, 2007.**

**Jessica Mathews:** Ladies and gentlemen, I'm Jessica Mathews, president of the Carnegie Endowment for International Peace. And it's a great pleasure to welcome all of you here. It's my very special pleasure and privilege to welcome our two distinguished guests: Foreign Secretary Shankar Menon, on the occasion of his first official visit to the United States, and an old friend, Undersecretary of State Nicholas Burns who has been a great friend of the endowment for a long time, and whom we've had the pleasure of welcoming here before. It's great to have you back here. Mr. Secretary, I hope your visit is proving very successful, and I hope this will not be the last time we can welcome you here at the endowment.

This afternoon's meeting is an unusual format, and one we think will be particularly interesting and revealing for all of you, and fun for the participants. As many of you know, the endowment is in the process of undertaking a fundamental redefinition of its own mission. From our beginnings as America's oldest international foreign policy think tank, we have embarked on a journey that will one day make us - we hope - the world's first truly global think tank. We've begun it by opening new offices in Beijing and Beirut, and next month in Brussels, in addition to our headquarters here in Washington and our office of long standing of 14 years in Moscow. One day, we hope to extend the Carnegie presence to New Delhi as well.

Our journey of transformation, however, is not just about opening new offices, but rather it's fundamentally about the way research is done and the way foreign policy is both analyzed and made. It is rooted in the conviction that in an increasingly globalized world, a single national outlook is necessarily too restrictive. We think that effective public policy research and effective public policy must be a genuine two-way street with analysis

and deep local knowledge and insight, which is made possible by a sustained presence on the ground as its basis. And so, today's format is very much a metaphor of what we are doing and trying to become.

So you can understand why I particularly look forward to this conversation about the United States, India, and the world. I am glad that the endowment has the honor of hosting this unique event. What we're going to do is listen to the two secretaries each speak for five to ten minutes, and then Ashley Tellis, the distinguished senior associate at the endowment will moderate a discuss among the two secretaries, and then we will throw it open to all of you. At the end, we will finish a little before our scheduled closing time to allow time for a press conference and to which any of you who wish to stay are certainly invited, although it will be speaking roles for members of the press.

So with that, let me turn the microphone over to Secretary Menon, and welcome you once again to the endowment. Thank you for being here with us.

**Foreign Secretary:** Thank you. Thank you very much. I am impressed to see so many of you here, some old friends. I guess this is an unusual format. First time, I've done this. But I think the ease of this probably reflects the ease of our engagement, the way we have now started to work with each other. We've learned to work with each other. I am honored to be here, to be among you.

I've just been here two days, and it's been a really hectic two days, I think, because of the transformed nature of our relationship. We've had some very good discussions, all of yesterday, and we found the time just wasn't enough. We, today, have a full spectrum engagement between India and the U.S. And this transformed relationship, I think, is evident in all the subjects that we discussed. I mean, I could go through a long list, but most of you here I think know the subjects better than we do.

I found it really quite impressive to see not only the quality of what we were doing, but how what we were doing was relevant for India, for the U.S. For India, I think because the question really should be why weren't we doing this before?

How come we have come to the full spectrum engagement today? The straightforward answer is that we have leaders with a vision of what we should be doing together, of our place in the world, what we want to be, and a vision of how important India-U.S. relations are. But it also is more. I

think it reflects the fact that India has changed, the world has changed. India has changed very rapidly in the last few years. But we, today, together, have capabilities that we didn't have before. So we have what Prime Minister Manmohan Singh likes to call partnership of principle and pragmatism. It's a coincidence of principles - I mean, you know here are two greatest democracies in the world working together; we both have open markets; we want to open ours further. There is a lot more that we need to do. We are trying to build a knowledge economy in India; you are a knowledge economy. And there is so much complementarity; there's so much that we can do that in a sense, the U.S. is today very, very important, central almost to India's own development aspirations. And that's a very important part of what we were doing. We were discussing an agricultural knowledge initiative, for instance; we have an energy dialogue; we're talking about various sectors - civil nuclear energy also - energy security. These are all issues where we're talking about things that are of direct relevance to the way we see ourselves developing in the world.

But what's also changed is the world around us. That has changed so rapidly and so quickly that wherever I look, whether it's in our immediate neighborhood, subcontinent, Asia, or on the bigger global issues, I see convergence. And I think that came out very clearly yesterday when we were talking, and in the other conversations one has had. Here again, one could go through a long list, but I think what struck me was that we came at these problems, these issues, and the broader the issue, the longer term it was, actually almost the more the convergence. So that actually gives me hope for the future. It seems to me that this is something that is going to grow and that will become stronger and stronger as we move along.

As we see the world changing, us changing, I think we have opportunities today that we've never had before, and I'm glad that we're determined to take them, that we're determined to do whatever we can. I'll turn this over to you, rather than going through my list of issues. And then maybe we could talk about them one by one.

**Nicholas Burns:** Shankar, thank you very much. And ladies and gentlemen, good afternoon. I first want to thank Jessica Mathews and Ashley Tellis, and I want to thank Carnegie for the invitation for Foreign Secretary Menon and I to share the stage. And just to congratulate Jessica, what you've been able to accomplish here at Carnegie, this great vision of becoming a global think tank, badly needed in an interconnected world, and we're very proud that an American institution has this capacity to reach out well beyond our shores. So we respect what you're trying to do and support you very

much.

I also want to say, as I look out in the audience, two very good friends of mine and predecessors of mine, Mark Grossman, Arnie Cantor (sp), I see. I hope Tom Pickering is not here; if he is, Ambassador Pickering, good afternoon. But good to see both of them. And I should say, on this issue of India, I think Mark Grossman was a pioneer for the United States of America, as someone who really understood very early on the strategic importance of India to the United States. And after that terrible event, the tsunami just a day after Christmas in 2004, it was Mark who led the American government effort to work with India and Japan and Australia in the immediate assistance. So I just wanted to pay that tribute to Mark, and to Arnie, very distinguished predecessors. And to say to Raminder Jassal who is the very great deputy chief of mission of the Indian mission here how glad we are to work with him.

I would just add my voice to Shankar's in saying that it's interesting to say the two of us sitting up here together. I don't think you would have seen this at Carnegie in 1997 or 1987 or 1967 or '57. We had the ultimate unfulfilled relationship, the United States and India. If you go back and trace the development of the relationship between our two countries, ever since the independence of India after partition in 1947, there was always this feeling in the United States that India should be a natural partner; and I believe that Indians felt that way about our country in the early years. And yet, we never quite managed, through successive American and Indian governments, to achieve that.

And I do think it was the vision of President Clinton in the mid-1990s to say that India should be this kind of global partner of the United States. And when President Bush came into office in 2001, just to give you an American perspective, I think he doubled the bet, and he said it will be. And it was through Bob Blackwell and David Mulford, our two outstanding ambassadors in Delhi, through Mark Grossman, Secretary Powell and Secretary Rice. I think President Bush made sure that all of us involved in the relationship were going to try our very best to try to vault it forward and develop a more strategic, comprehensive global basis for the partnership.

And Shankar and I met for several hours yesterday before lunch, and during lunch, and after, and it was really quite extraordinary the breadth of the dialogue between us. Prime Minister Singh and President Bush have essentially written for us a framework, which is truly global, not just bilateral or regional, and which is about as broad as any relationship that we have

in the world today. I think on July 18th, 2005 when the prime minister was here for that very historic visit, he and President Bush agreed on essentially joint ventures between the two governments in 16 different areas - space research to joint space cooperation and flight, to a true engagement on energy, to a new CEO forum of a different type than we'd ever done before with any other government, which has worked very well for both of our governments.

Shankar met the secretary of Agriculture today and talked about our hope that we could participate in a second green revolution in India, as the prime minister and his government attempt to modernize the agricultural sector, and as we think that our land grant universities in our Midwest can play a role in that at the request of the Indian government. Shankar met with the secretary of Commerce today, and we have a hi-tech, very much export-driven relationship, where I hope that we in government can essentially get out of the way and lower the barriers to trade and investment, and allow our companies to do what they can do so well. I was in Hyderabad in mid-December and saw this happening, saw the extraordinary number of American joint ventures in Hyderabad. The biggest Microsoft office outside of Redmond, Washington, in Hyderabad, and you can really see there, as you can see in Bangalore, and many other Indian cities, the promise of this knowledge engagement between the United States and India, and especially between our private sectors. So we are committed to this relationship.

I think right now, the United States considers India without any question one of our most important global strategic partners. I would say, just as an American citizen, thinking ahead 20 or 30 years, I would hope that Americans would be able to say 10, 20, 30 years from now, India is one of our two or three most important partners in the world bar none. And I think it will be in an increasingly complicated, complex, and multilateral driven world, where the challenges will largely be ones of connecting countries to deal with multilateral challenges. I think India and the United States are seeing not just our intersection of values as the two greatest democracies in the world, but in the intersection of interests, which are driving our two governments to see each other as natural partners.

I would just say one word about this bilateral engagement. There is no question that the symbolic centerpiece of it has been our civil nuclear accord. And it's a year and a half past the time when the prime minister and president decided that we would break free from 30 years of conventional wisdom that had separated us, that had prohibited our industries from working together, that put us at cross purposes on the great non-proliferations

debates of the last three decades. And they had the boldness and the courage politically to break away from the easy restrictions that have been imposed upon us, and that we had actually imposed upon ourselves. And I think we corrected a mistake that we had made many years ago, and we have now made it possible, through the bipartisan support of the Democratic and Republican leadership in the House and Senate of the United States, through those very dramatic and sizeable votes in the autumn.

We are making it possible now for the United States to be the sherpa of India, as India will gain universal international approval in the nuclear suppliers group for free nuclear cooperation in fuel, and in nuclear reactors for the future. This will bring enormous benefits to India. And it will bring enormous benefits to the United States of America. It's in both of our interests to do that. So we're proud of what we've accomplished.

We've got a little bit ways to go now, in completing our bilateral accord, and then in seeing India go forward with the IAEA and the nuclear suppliers groups. But we've pledged to be India's supporter in this process, and I think we've been a good friend to India.

And I would just say two more things before we get to the conversation and engagement with this audience. I think what is also remarkable about the development of this partnership over the last several years is the fact that on a regional basis in South Asia, India and the United States are now working together politically in a way we have not worked together before, going all the way back, in 60 years time. I think one of the great changes that I've seen in America's national security consciousness, and the way we view the world.

And I saw this - I was away for eight years as a diplomat in Europe, and came back to this place to take up Mark's baton in 2005 - the newfound strategic importance of South Asia. There is no question that South Asia is a place of vital strategic engagement for our country - success in Afghanistan, our truly vital partnership with Pakistan, and our strategic vital partnership with India. And that is new over the last ten years or so for both the Clinton and Bush administration, and it has changed the way we see the opportunities positive and negative in the world.

And the way that we work together with India, just in the last past two years, in Bangladesh where I know India and the United States are sending the same message - democracy, success through elections, political stability, rejection of terrorism and violence in that very large and important country. I know we're sending the same message, in fact, we're working

together in Sri Lanka, where we're trying to convince the government and the Tamil Tigers to engage in a true negotiation. Of course, we Americans don't deal with the Tamil Tigers because we think they're a terrorist group responsible for the deaths of innocent civilians. We work with the government and hope the government can see it's way forward to make that bridge to negotiations. And in Nepal, where the United States and India are both helping internationally to manage this transition from one system to another, but with democracy at its center and with non-violence at the center. And I think it's the quality of what we've been able to do as partners in those three issues that is really a step forward for our two countries.

And finally, I'd say my final comment would be that a strong bilateral partnership, a strong regional partnership, the true strategic engagement comes globally. There are few countries that can manage a global agenda in the way that India and the United States can, given the size of our countries, given our vision, and given the power of our societies - our private sectors as well as our governments. And as America looks around the world, we need democratic partners in a very dangerous world. And we see India as one of our most valued partners.

Prime Minister Singh and President Bush were the first two world leaders to champion Kofi Annan's new project for democracy, the two first contributors to support a global effort to promote democracy in countries where it does not now exist. Our two countries are in the forefront of the fight against HIV/AIDS and we're putting our money and efforts behind that. Our two countries are saying that democratic capitalism can and must exist with a fight for social justice and poverty alleviation, whether it's in our own countries and our own parts of the world, but also specifically in Africa, in South Asia, and in Latin America.

Our two countries, I think, are the two countries that can lead a revitalization of the United Nations system with a new secretary general. And we Americans certainly understand that we can't live without the United Nations, that we need to have a positive outlook towards the United Nations, that we shouldn't seek to always speak about what's wrong with the United Nations, but try to support it positively. And you've seen this Indian-American engagement in supporting Ban Ki-Moon, in supporting UN reform, and I think particularly in trying to revitalize UN peacekeeping which is so important in Africa where no other country or organization can do what the United Nations can do.

And this multilateral engagement will extend itself in the future, I'm convinced, to tackle the most important issues before us. If the future global agenda is going to focus on global climate change, on defeating trafficking of women and children, on defeating the narco-traffickers, international crime cartels, and defeating terrorist groups - India and the United States are both victims of terrorists - and keeping them away, those terrorist groups, from chemical, biological, and nuclear technology, which would be truly dangerous, if that's the coming global agenda, then we need a multilateral approach to be successful and our two countries are well positioned to be in the center of that effort. So I see an intersection of interests, as well as the foundation of an intersection of values. And we Americans, in our government, and I think beyond in the Congress, you can see it and you can feel it. You can feel that this partnership is one that is decidedly in our national interest, and we suspect that's the same for the Indian government people as well.

**Ashley Tellis:** Let me take the liberty of asking both of you, each of you, one question that builds on the themes that you flagged. Secretary Burns, you mentioned correctly that the civil nuclear agreement has been the pinnacle, the symbolic pinnacle of everything you've achieved so far. And yet, you also indicated that there is so much that is yet to come, because this partnership has a foundation that is often not seen from the outside and not appreciated as much from the outside. Could you speak to two areas, which are likely to become important in the next year - the prospects for counterterrorism cooperation between our two countries and the prospect of defense cooperation?

**Mr. Burns:** I'd be happy to do it very briefly, and I suspect we'll get some conversation from the audience on this. When Shankar and I sat down yesterday to take account of where we are and where we're going, I said it was the opinion of my government that having successfully fought the good fight in the United States to convince the Congress and the American people that we ought to break free from our conventions on civil nuclear cooperation and go forward. We thought that the next horizon would be dominated by two issues.

First, can the United States and India join together, both in South Asia and beyond to be partners in the fight against terrorist groups wherever they are, whether they're global terrorist organizations or regionally based? Because both of us are victims and, unfortunately, potential victims of terrorism. And we certainly feel in Washington there is a lot more that our

two countries can do to cooperate together on an intelligence and national basis to be successful together.

Secondly, it seemed to us that the next frontier would also be in military relations. I know that former Defense Secretary Bill Cohen and former Undersecretary of State Tom Pickering were both in India at the Bangalore Air Show recently. We had the largest ever American industry presence at Bangalore. We have put our best foot forward to show that whether it's on the technology basis, whether it's on a doctrinal basis in terms of the strategic dialogue, increased exercises and training experiences for our navies, our air forces, and our armies, there is a lot that our armed forces can and should be doing together in disaster relief, in international peacekeeping, because we have democratic armed forces under civilian control. We are peaceful nations and we seek to preserve peace and stability, both where we live in our own regions, but globally.

And so we felt that those two areas, counterterrorism cooperation and military and defense cooperation were the next horizons for this relationship, where there was room for growth. And we put that thought forward yesterday, and we sure would like to work with the Indian government on that basis.

**Mr. Tellis:** Secretary Menon, let me ask you one question, again based on the theme that you touched on, which is the growing partnership in areas that go beyond the bilateral - international institutions and international regimes. Can you say something to how India now looks at the prospects of working with the United States to strengthen the global non-proliferation regime, an issue that became very much in public attention as the result of the civil nuclear agreement?

**Foreign Secretary:** Well, I think that's an area that we discussed yesterday. It is related to our bilateral civil nuclear understanding as well to the implementation of that. Over the last few years, you have seen that we have harmonized essentially our export controls on the non-proliferation side, whether it's for weapons of mass destruction or whether it's for the delivery vehicle, with the best international standards. In some cases, we think we're even better. Our record, we think, speaks for itself. And we have an interest, as India, we have an interest actually in non-proliferation which is deep and abiding. And this is something where we intend to work together to see how we can realize this, because this is going to be, and already is, one of the biggest dangers in the future.

As Nick said, the issues of the future are the ones that we really see eye to eye on, and we have to work together. India is ready to be a partner in the development of a new non-proliferation consensus. And I think we do need one. I don't think it's enough to go back to the old ways, to the tried ways, because they haven't succeeded. I think that's apparent to most of us that we need to work together to develop a new international consensus. And that's something that we look forward to doing with our partners, and that's something that I think we'll do.

Just to add to what Nick said, we looked at where we can go over the next year, over 2007, and how we already have a transformed relationship. But we thought we could take it to a newer level and a higher level if we were to work on defense, on counterterrorism. A lot of the global issues we're already working on, but we're going to see how we can add new impetus to that. Democracy, for instance, is a big issue; pandemics is an issue that cuts across; energy security. We're approaching it in various ways, bilaterally but also internationally. Yesterday, when I started the day actually discussing issues like this with Undersecretary Dobriansky, human rights - these are issues where we have natural affinities; we have very similar approaches to them.

And for me, the amazing thing is the synergy across these issues where this is very unusual in a partnership. In a partnership, normally, you just pick one or two where you think you have common strengths and common interests. But all of yesterday and today has convinced me that this runs across the board. So it's really a question of how much effort and skill and time can we devote to each of these issues? The potential is tremendous. But I think right now, our priority is to get the civil nuclear understanding done quickly and all that goes with it, and to make sure that as the Indian market opens, American companies have an equal chance and an open chance there in the process of competition. And I think that's what we will do right away; that's our immediate priority. But there are all these other fields available to us to work together, and we look forward to doing that.

**Mr. Tellis:** Thank you very much. What I intend to do is to open it now to the floor so that these 118 odd individuals who are here today get a chance to interact with you. I will simply recognize you as you raise your hands. Do us the favor though of identifying yourself so that the secretaries can recognize who you are. And then, I will just leave it to the two of you to jump in as required on the question. So I want to assure you that everything that has happened so far has not been scripted. This is not a quartet, and

they haven't practiced their parts. This is a jazz riff, so we basically just play it as we go along. So let me - yes, ma'am.

**Q: Nina Donaghy (sp), Fox News:** Secretary Burns, if I could just take the liberty of asking not about India, but about Iran, as it's in the news today. Obviously, the IAEA report is out; it's concluded that Iran did not comply with the December resolution. Secretary Rice has said therefore that prospects of another resolution is very, very real. Can you respond to that?

**Mr. Burns:** I'd be happy to. This is an issue, of course, where we've had a longstanding discussion with the Indian government. Of course, we have different perspectives because we live in different parts of the world and have a different history to our relations with Iran. But I think there has been a tremendous international effort over the last two years to send one message to the Iranians. And that is that all of us I think are comfortable and would want to help promote the development of the civil nuclear industry in Iran. The Iranian people deserve that and have a right to it. But none of us around the world, with the possible exception of Syria and Cuba and Belarus would like to see Iran become a nuclear weapon state. And so, Mohamed ElBaradei's report today - the IAEA report - was decidedly conclusive about Iran. It is not meeting its commitments to the IAEA; it is not allowing the requisite number of inspectors to visit the enrichment processing plant at Natanz. Iran has not met the conditions of the UN Security Council Resolution 1737. It has not suspended its enrichment program.

I know what you'll see next. You'll see an effort by Russia and China, United States, Britain, France and Germany, to now develop a second Security Council resolution. Secretary Rice had good discussions in Berlin this morning with the Russian and German foreign ministers and Javier Solana. They have agreed to now meet. In fact, I'll be going off to London on Monday to meet with the other countries to help write that resolution. I expect work in the Security Council will start following that. And we would expect to see Iran repudiated again by the United Nations Security Council for the fact that it won't come to the negotiating table. It is effectively thumbing its nose at the international community by proceeding with its experiment to string together a cascade -(audio break, tape change) -- all of us in a multilateral format. We want that day to come, and if the Iranians would just meet the conditions that the Security Council has established, all the members of the Security Council, they'll have that negotiation, and Secretary Rice has said that she will lead the American delegation to that negotiation.

So it's Iran's refusal to talk which right now has gotten Iran in a lot of hot water, and I think what you're finding is Iran is increasingly isolated, and we hope Iran is going to choose negotiations because if it doesn't, it's just going to see an escalation of the financial sanctions, the Chapter 7 sanctions, and all the efforts that are being made now by international banking institutions, by the EU, by the Japanese government, to start to restrict the ability of those countries - of the inclination of those countries to deal on a business-as-usual basis with the Iranians.

So we hope the Iranians will choose negotiations. And beyond the Perm-5, remember that Brazil and Egypt and Argentina and Japan and India voted with the Perm-5 countries a year ago, two weeks ago, at the IAEA, to urge Iran to choose diplomacy and choose negotiations.

**Mr. Tellis:** Yes?

**Q: I'm Raghobir Goyle for India Globe and Asia Today:** A question for both of you. It was, first of all, a great session, and my question is that, Mr. Secretary, now India and U.S. are the best allies or the best relations they have in, I think, 50-plus years, don't you think that United States needs a good friend at the U.N., and don't you think, Mr. Secretary, that India deserves the United Nations Security Council's seat today than ever? And for both of you, sir.

**Mr. Burns:** I think I'll let Shankar lead on that, and I'll follow.

**Foreign Secretary:** My answer is simple: Yes. (Laughter.)

**Q:** (Off mike.)

**FOREIGN SECRETARY:** That's a different question.

**Mr. Burns:** Let me say it this way - let me - it's a very good question. I think we're seeing a much greater effort by India and the United States to engage each other at the U.N. and to be partners with the U.N. And we Americans understand that the U.N. institutions can't forever reflect the world as it was in September and October of 1945 - that there has to be a modernization, not only of the effectiveness of the General Assembly but of the Security Council. And we have been open to ideas that would lead to a modernization of the Security Council, of its membership. We haven't yet, of course, spoken fully to that issue, and we haven't yet seen a realistic proposal to modernize because I think our view is that among the various institutions of the U.N., the one that's working exceptionally well is the Security Council.

And so we wouldn't want to see some dramatic expansion in the numbers of countries becoming permanent members. We would favor, as Secretary Rice said I think as early as her second month as secretary of State, a gradual but also modest expansion in the membership. We've been open to that. We have of course looked at all the various proposals and there hasn't been one that's been successful. So I think we'll have to wait and see before the United States pronounces itself, on that issue specifically, a successful - or a solution that's proposed that has the ability to garner 128 votes in the General Assembly, which is what you need to get to change the rules and procedures of the Security Council.

Now, having said that, there is no question that India is playing, and shall continue to play, a bigger role globally. And you've seen India now be invited - having been invited to the last several meetings of the G-8 countries in St. Petersburg, in Scotland before that, and the United States wishes very much to see India play that role in the future - play a much larger role in all these great international institutions that are at the heart of the international system.

**Q:** Thank you very much. I'm Daryl Kimball with the Arms Control Association. For what it matters, I think India should have a seat at the Security Council too, but that's not what my question is about. My question is about the ongoing -

**Foreign Secretary:** I didn't either. (Chuckles.)

**Mr. Burns:** You didn't -

**Q:** You didn't find that either, no.

But my question is about the ongoing talks about the civil nuclear energy deal, which of course is yet to be seen whether this is the right course to go. And I understand that there continue to be some differences between the two sides about the details of the so-called 123 Agreement, and I understand that the Indian side delivered recently a response to an earlier U.S. draft, and the Indian officials have publicly been saying that they would like to have programmatic consent rights on U.S.-origin material for reprocessing or enrichment. Indian officials have said they're not happy with the provisions in the Henry Hyde Act that essentially set up a termination clause if India resumes nuclear testing, and India is insisting on India-specific safeguards, which I would like Secretary Menon to maybe elaborate on because it seems - it's difficult for me and many others to understand how India-specific safeguards can be made consistent with U.S. law, which

requires permanent, facility-specific safeguards on the civil facilities and on the materials that the IAEA Board of Governors has to approve. So my question is what are those India-specific safeguards you're talking about?

And for Secretary Burns, it seems to me the U.S. law doesn't give your side very much room to compromise on these issues. How do you see the two sides squaring the circle on these still-important issues?

**Foreign Secretary:** Just to be clear about where we are on the civil nuclear understanding, it seems to me we have the understanding already. That was done between the two leaders. It was done in July 2005; it was done in March 2006. So our job now is to put it on paper; of actually expressing it in legal terms. That's never easy, even if you have a basic understanding of what you're doing. But it's not our job now to try and renegotiate that in the terms, in the words that we put into the 123.

The India-specific safeguards agreement is something we will discuss separately with the IAEA, and we're going through that process. We've started those discussions. We hope to work it through. Whether that is compatible with U.S. law, what relationship it has to U.S. law, is something I can't answer, quite frankly. That's something - we will work that out, and the U.S., as a member of the board, as a member of the IAEA, will be as much a part of that whole process as the others on the board and in the IAEA. And that's something that I think Nick will have to speak to.

But as far as I can see, there is nothing in the basic understanding between us in - of July 18th, March 2nd that contravenes either Indian law or U.S. law. I think that's clear. And if what we are doing is legal in both our systems, I don't see a problem. I think it's really just a test of the ingenuity of how we actually express this. I know how efficient we are and how quickly we can do it, and the quicker the better, as far as I'm concerned, because it is an important sign, I think, of our willingness to think outside the box to transform this relationship, and to start dealing with each other and talking in new ways, which reflect the new reality.

**Mr. Burns:** I agree very much, Daryl, with Shankar. The big issues have been decided. You know, we've crossed the highest mountains in these negotiations. And it's important to remember what happened in July '05 and March '06. In both instances, we literally negotiated to the very final minute in the anteroom before we walked in - the two foreign ministers and their aids - to see the two leaders. And in both instances, it was the prime minister of India and the president of the United States who made the agreements themselves.

So we have crossed over the biggest issues, and they've been decided, not always seeing the subsequent steps in which we are now immersed as diplomats, to be a mere codification of what has already been decided.

And so you mentioned the 123 talks - I'm optimistic. Shankar and I had a good discussion yesterday about the 123 talks. I'll likely go to India in a couple weeks' time to continue that. And I think we will get those done because the big issues have been decided and we're going to be creative diplomats to find a way to square circles, which is what we're paid to do. I don't worry about that.

We also, the United States government, we support the Hyde bill. This was a very good process. We started out in March and April of last year with a healthy degree of skepticism from both houses and both political parties. I think we were able to overcome that skepticism. We were certainly. We were able to accommodate a lot of good ideas from the House and Senate, frankly some that we hadn't thought of that I think strengthened the bill, and we fully support what the Democratic and Republican leadership did in the autumn, and we're very proud of it.

So now the process is we'll complete our 123 Agreement. India will go on, I'm sure, to complete its IAEA safeguards agreement. We'll take that to the NSG. We will be successful in the NSG, I'm certain of it, after having consulted with all the countries in the NSG the way we have. And then the Congress of the United States, in our system, will have one more chance to vote on a majority basis, and if we are true to the Hyde agreement - and we will be - then that vote, I would hope, would be positive. And if we can do all that by the end of 2007, Shankar and I can retire - (laughter) - and ride off into the sunset. I think we can. I don't think we're going to have to have a major problem in doing that, but it does take time, as Shankar mentioned, to get through the legal technicalities and the technical technicalities, and we'll do that.

**Mr. Tellis:** Okay. Please write your memoirs when you get to that point. (Laughter.)

Tesi (sp), please.

**Q: Tesi Schaffer from CSIS:** It's lovely to see you both and to see you together. I wanted to ask about an issue that both of you cited as the next horizon, and that is terrorism. What kind of cooperation do you envisage as being kind of the heart and soul of how India and the United States work together on this issue? Are you thinking primarily of operational things,

training, capacity building, financial controls? Are you looking more in bilateral terms or more on the U.S. and India as part of the mobilization process for a larger effort? Is there a particular regional focus to this? Are you looking mainly globally? Help us understand a little bit where you think this effort is going.

**Mr. Burns:** Tesi, I'd say just very briefly that from an American perspective, we see India and the United States as having a common interest in trying to thwart terrorism in our own regions and globally, and we're both victims but we're also powerful countries with strong societies who should be able to surmount this challenge.

So I would - what have we done effectively with Japan, with the European Union? There are two agreements that we have that have worked rather well that might provide some kind of intellectual template for what India and the United States could do together.

Most of the attention of the world is focused on the hard side of the fight against terrorism: military action. But that's actually just a small part of the international effort. What we've done well with Japan and some of the other Asian countries and with the EU is we've had intelligence cooperation, we've had law enforcement cooperation, we've been able to use our economic systems to dry up the ability of terrorist groups to launder their money through our financial systems, and we've had diplomatic cooperation to keep terrorism as a leading issue, whether it's bilaterally, regionally or globally.

And I think if India and the United States can do that, and if we can do it in a way that meets the interests of both of our countries, we will have succeeded because those are the four areas outside of military action that are going to be the heart of the effort against terrorism. Military action will be sporadic. It's not usually the way to fight terrorism. It's these four areas. And we see India as a victim of terrorism in its own region, and if we're going to be a friend of India, we have to respond to that and assist India. And I know we expect the same in return. As American faces this threat, we want friends like India to be supportive of us in these very practical ways.

**Foreign Secretary:** My simple answer to what you said is all of the above because I think we have to deal with both sides of the issue - both the supply side and the demand side, unfortunately, which means we have to, I think, deal with the causes of terrorism, do it through intelligence cooperation, do it through knowing the enemy, and then seeing how we

can actually make it hard for the terrorists to survive to do what they're doing to us.

As he said, we're both victims, but we're also capable of dealing with this, and we are going to have to deal with this issue. There is no way that we can avoid this. We've had a terrible incidence of it just last week in India, of terrorism. And that kind of thing I think only renews our determination to fight it and not to succumb to it. But that's an area where I think we think that there is potential for us to actually increase our cooperation and do a lot more together.

**Mr. Tellis:** Deepti?

**Q:** Hi. **Deepti Choubey; I'm with the Nonproliferation Program here at the Carnegie Endowment:** And, Secretary Menon, considering the huge responsibility that comes with being a nuclear power, what is India's plan to join with and help the international community in confronting the most serious challenges to the nonproliferation regime? You've talked about this. New consensus on nonproliferation? Could you further elaborate what that effort looks like and what role you see for India on that in issues like disarmament?

And Secretary Burns, you've talked about a coming global agenda that includes the intersection of WMDs and terrorism. What are your hopes for what the Indian relationship will yield on nonproliferation challenges that have to do with state actors?

**Foreign Secretary:** Well, on disarmament, I think the goal is clear: universal, complete disarmament of nuclear weapons. That's what we would like, but obviously that's not happening tomorrow. And there are things we can do before that which we think are worth talking about, agreeing among the states that have nuclear weapons, and among the rest of the international community because we think everybody should have a say. This is everybody's survival that's at stake here.

Last year in the United Nations General Assembly we introduced a paper on how we see this process going forward, starting with simple things like de-alerting, things like that. But more than that, moving on to a commitment, to no first use, for instance; that would be very useful; that would help. And there's a whole series of other steps that could be taken. But this is a conversation, which I think has been going on for a long time. I think our minds have been focused much more clearly on the issues concerned in the last few years as the threat of the spread of these weapons increases

and becomes - as it becomes more and more likely. And that's something we look forward to talking about with the United States as we go forward.

We don't think anybody has a single answer. We can tell you our views, but these are just our views. What's going to work? I don't know. It's something we have to work out together. And this, unfortunately, is not something that just one of us or just the two of us can do together. It's something that's going to need much more. That's why we speak of a new international consensus on nonproliferation.

**Mr. Burns:** One of the arguments that we made to the Senate and House last spring and summer was that by breaking with the taboo and by bringing India into the mainstream of the nonproliferation system in the way that we've suggested we should do it, that actually strengthens the International Nonproliferation effort, and we believe that we've taken an important step.

And if you look at some of the problem states in the world now - North Korea and Iran are two good examples - it's ironic that at various times - you know, for instance, Iran has been in the system but been cheating inside; India has been outside of the system but playing by the rules. And so, the message to the Iranians and North Koreans is, if you actually play by the rules, if you are a responsible steward of nuclear technology, if you actually abide by what the IAEA wants you to do, which neither North Korea or Iran have done, then there is way forward in the international system.

And so it was ironic because a lot of people asked us at the beginning of this process, isn't this a bad message, the India-U.S. nuke deal, to the North Koreans and Iranians? We saw it in exactly the opposite way. And I think that recent events have proven that. The North Koreans now have taken a step forward in the six-party process, and we want to see them continue to meet their commitments to us.

The Iranians are well on the outside and are largely being repudiated by the international system, and I think we're very grateful for the support that India has given us, the six parties and North Korea, and frankly very grateful for what India done on the Iran question. Now, I think it's also important that we hold India to the same standard we hold any other country that has relations with Iran that trades with Iran. All of our European allies have diplomatic relations with Iran and trade with it. Japan has diplomatic relations and trades with it, and there has been a quality in our debate of asking India to meet bars that no one else is meeting. And so if you establish a level playing field and ask all of our friends to send the right message to Iran and not to have a business as usual relationship, I think India has met

that, and we've been very satisfied with the cooperation that we've had.

**Q: Kumar from Amnesty International:** Mr. Burns, you mentioned that you have common message, same message to Bangladesh, Sri Lanka and Nepal, but you missed Pakistan. I wonder if the both of you have the same message to Pakistan on - (inaudible) - human rights nuclear issues.

Second part of the question, in case if there is a change of comment, which is definitely going to take place here in about a year and a half too, and the same way on India, how will this relationship be affected if there is a change of comment on both sides?

**Mr. Burns:** I missed that. Same way in India?

**Q:** No, I mean, once it may, I mean, down the road, two years, three years - (laughter) - we don't know, you never know, people lose power - (laughter)(Off mike.)

**Mr. Burns:** I would say that, I wouldn't link these issues, and I didn't link them and purposely didn't link them. On Sri Lanka, Bangladesh and Nepal, there's a human rights imperative, there's a counter-terrorism imperative, and there's an imperative for stability that runs through each of them, and in which India and the United States have found some common ground and have tried to use our respective positions to preach stability, peaceful resolution of disputes, attention to human rights, in each of the countries. I didn't list Pakistan there because I don't think it's accurate to say that India and the United States have some kind of a joint approach towards Pakistan. India has a unique relationship, and Sean (ph) Carr can talk about that.

We have a unique relationship. Pakistan is one of our most important partners worldwide in this fight against al Qaeda, against the Taliban. We have a strategic relationship with President Musharraf, and so one of the successes that we think we've arrived at in this administration is that we've effectively dehyphenated America's policy towards South Asia. We used to have a relationship towards India-Pakistan. We now have a strategic partnership with Pakistan - with India - and we have a very close working relationship and partnership with Pakistan. But they're very, very different. And you saw when President Bush went to South Asia last year, to Afghanistan and then India and then Pakistan, the agenda was very different in each place, the words were different, the rhetoric was different, but the commitment of our country to a good relationship with all three was there. And so I purposely didn't group Pakistan with the other three because I think it's an entirely different set of affairs.

**Foreign Secretary:** Just to try and answer your question, our relationship with Pakistan, you know, it's gone up and down. Right now, it's changing. It's evolving rapidly. So far in the last three years, it's been in a positive direction. But our goal in this is really to have good neighborly relations with Pakistan, but to achieve that today, we see several issues that we need to deal with. We need to deal with terrorism, we need to deal with pending issues; we've listed them all. We have a way of dealing with them today which we didn't have in the past. We have a composite dialogue with Pakistan. In the middle of March, I hope to go and meet the Pakistani foreign secretary and talk to him about these issues.

We would like to have a Pakistan that's peaceful, prosperous, at peace with itself on our border. It's in our interest as India. We need a peaceful - (inaudible) - if we are to grow, at the eight to ten percent that we want to grow our economy at. So it's in our own interests to seek a better relationship with Pakistan, to seek a resolution of our issue, of all issues that there are between us, and we will certainly do that.

Now, to the extent that the international community, the international environment helps this process, and it has been helping this process over the last few years, we welcome it. But we are going to make this effort anyway in our own interest with Pakistan. And so, to your question, I hope that answers your question because I am still a bit confused about the question.

**Q: Howard Wiarda from CSIS:** Let's assume that I'm a Henry Kissinger-ish geopolitical thinker, and I'm sitting in Beijing as a Henry Kissinger grand strategic thinker, and I'm a balance of power thinker. And I look around at my map and I see a new, invigorated United States-Japan relationship, and now suddenly a new United States-India relationship, and I start to think this has major implications, not just in terms of bilateral relations but globally. And maybe I think that calls for a new alliance with Russia or a new alliance with Pakistan or - (inaudible). Could you comment both on how you see this relationship beyond the bilateral matters affecting global politics and also how you think it might affect alliance relations in the Asian part of the world?

**Mr. Burns:** You know, from the moment you stood up and said the word Kissinger, we both looked at each other and knew exactly where you were going with that question - (laughter) - because, you know, it's probably the most frequently asked question of certainly me when people ask about India, why are you doing this? Are you doing this to contain China? And the answer is no.

The U.S.-India partnership is going to be global based on the intersection of our interests of two democratic countries. It's going to be very different, I would imagine, than our respective relations with China. Sean (ph) Carr is an expert on China. Our view is that China, it's not possible to contain China in the conventional sense, nor is it desirable. We've established a very different construct. Bob Zoellick, our former deputy secretary, said about two years ago we ought to work with China on a global basis but also encourage China to be a stakeholder in the international system. So we're beginning to see that happen.

I would say that United States relations with China are as good in the political realm right now than in any time since modern China, communist China was created in 1949. Difference of opinion about human rights and religious rights within China, problems and challenges on the economic side with our trade imbalance, with international property rights, but a beginning convergence of a way to work together on a political side.

Examples: North Korea. I was in Beijing in November to try to put forward the notion that there ought to be a way to stimulate the six party talks, and my good friend Chris Hill has carried all the water and done such a brilliant job for us. Why did we succeed last week? In large part, because China took the lead, because China used its influence with North Korea, because China worked a common purpose with the United States. And the way we worked together, Chris Hill and his Chinese counterpart, was truly new in our relationship.

Second example, Iran. China and the United States, for a year and two months, have been partners in trying to convince the Iranians to negotiate with us, both of us, together, and the Russians and others, and we sponsor a Security Council resolution to sanction Iran, together. We'll be together in London on Monday, when I meet with my Chinese counterpart to talk about a second resolution.

Third example, Sudan. President Hu Jintao was in Khartoum just two weeks ago, and he put forward a point of view which was remarkably similar to the American point of view: please, President Bashir, allow the African Union and the United Nations to come in with a hybrid joint peacekeeping force, to protect the people of Darfur against the Janjaweed militia and the Sudanese military.

And so we don't have a perfect relationship, the U.S. and China, but we have a growing global relationship, and our view is that our relationship

with India stands on its own. We have this relationship because of the mutual interests between us, but it's not meant to contain China.

**Foreign Secretary:** I'd only add that I don't think these relationships are mutually exclusive or that this is in any way meant to change our engagement with China, which has been going on for several years and has shown very positive results in the nature of our relationship. I think it's a different world from the time when this kind of Kissingerian analysis worked, maybe in a bipolar world, maybe that it was a zero sum game. I don't think it is anymore.

Prime Minister Manmohan Singh likes to say that there's enough space for the rise of China and India simultaneously, and I think that's true. I think this is a different kind of world we're working in, where what we do with each other, what we do in our own interests together does not necessarily have to be negative or seen negatively from Beijing. I don't see why it should be.

**Q: Selig Harrison, Woodrow Wilson Center:** Mr. Secretary, I was somewhat surprised that you stopped with no first use and de-alerting -

**Foreign Secretary:** I can go on - (chuckles) --

**Q:** I wish you would, because Article VI envisages a bargain in which non-proliferation depends upon the existing nuclear powers, making a good-faith attempt to reduce gradually their own nuclear weapons. We did that up to 1991. It has stopped. And I wonder how India would feel about - whether India is going to tell the United States and Russia, with both of whom it has very strong relationships, that it would like to see the beginnings of a reduction of nuclear weapons and a return to nuclear arms control, and would India be prepared to take part in that process of nuclear arms reductions at some point?

**Foreign Secretary:** That's precisely what we have said. I think our views are no secret to anybody else. We have been saying it for some time -- since Rajiv Gandhi's plan for the nuclear-free world in 1988, and ever since then, I think - and that's exactly what I said just now. I said the goal is a world free of nuclear weapons, and the only way you can there is by reducing the weapons.

We would be quite ready - as part of a verifiable, clear agreed time frame, which leads the world to that goal, we would be quite ready to put our weapons on the table, too, but I think it's - unfortunately, as I said, it's not

up to us. I think it's something that we need to agree among ourselves, and not just the states that have nuclear weapons -- also the international community as a whole.

Our views on this are clear, and you know, as long as we approach this problem as a normative problem - what do you want -- I think you will get very strong, clear statements from all of us, but they would all be different, and that's precisely the problem: how do you try and reconcile that and still arrive at this goal, which we are all committed to, whether in terms of Article VI in the NPT or in -- as we would say, in the special session - the first special session on disarmament, where we thought there was the clearest statement of what we should be doing.

Do you want to add to that?

**Mr. Burns:** I think you have done it. (Laughter.) You have answered Selig's question.

**Mr. Tellis:** I had promised Secretary Burns and Secretary Menon that I would get them out of here by 5:30 because, as you can imagine, they have utterly packed schedules. What we had planned to do was to give them 15 minutes to take questions from the press, and what we might be willing to do is - do you have a preference? Should we just continue this - giving the press priority?

**Mr. Burns:** Happy to do it. That's - whichever way you.

**Mr. Tellis:** Okay. I would be happy to recognize questions from members of the press, and if we don't get those, then we will just continue this, but

**Mr:** (Off mike, laughter.)

**Mr. Tellis:** Excellent, excellent. But please, let's - we will just continue in the way imagined. Yes, Dan.

**Q: Dan Horner, from McGraw Hill nuclear publications,** and I would also like to ask about the nuclear deal -- a general question for both ambassadors, and then a clarification from Ambassador Burns, if I could.

On the general question, the statement made that the big issues have been resolved, and these are essentially technical codification, but similar statements were made almost a year ago, and predictions that the agreement would be wrapped up within a couple months, so it would seem then that the fact that it hasn't indicates that the differences over things like

the language on fuel assurances and nuclear testing are actually significant differences between the two sides, and isn't that the case? If you could just address that. And then, the clarification that - Ambassador Burns said the nuclear deal corrects a mistake - if you could just clarify what exactly the mistake was. Was it the cutoff of the fuel supplies? The tariff for after the Indian test, or the requirement for the full scope of safe guards, or the NPA, or what exactly was the mistake that was being corrected? Thanks.

**Foreign Secretary:** Well, on the first question, I think one of the necessary conditions was to have the Hyde Act. So if you start measuring time, I think you should really start the clock from December. Otherwise, I accept the accusation that maybe we are not efficient enough. Maybe we should have been quicker, we should have been better at our jobs, but what we are doing is something unprecedented. It's something we have never done before, and so you must give us a chance to be careful, to think it through, to work this through together. The important thing to remember is that we are doing this together and that the basic understanding is clear. I don't think there is any renegotiation or worry about that, but we will do our best to produce the best agreement possible, technically, and that's with both of us.

**Sec. Burns:** I agree with Shankar's point that I think what has been unique about this is the charged atmospheres in both of our capitols, and in our politics. When we came - when President Bush came back from his summit with Prime Minister Singh last March, there was widespread opposition in the op-ed pages by a number of people in the room to what we were doing, and it did take us and the United States a full six months to work through the congressional process of hearings. And we were very pleased to get to the end of it and see such a sizeable vote in the house and in the Senate in response, but it took us six months in the United States to do that, and we had to answer a lot of questions, and had to go through a process to try and improve the understanding.

But I want to say there is no problem with fuel assurances. The president - President Bush provided assurances personally to the prime minister of India on the provision of fuel, and we have actually codified them and written them down. There's four of them. And there is no disagreement between India and the United States on those assurances that I'm aware of, and in my talks with Foreign Secretary Menon and Ambassador Shyam Saran just recently, I think we have - that's resolved. I'm not aware of any problem concerning nuclear testing. The positions of both sides are clear. We have a right to our

respective position. I don't think that it's going to conflict with our ability to complete the 123 agreement.

Your second question, what was the mistake? I think that India was in isolation for too long. India is part of the effort, in our view, to strengthen the nonproliferation system and campaign, and we let India languish for too long outside that system. That's just what I meant by that. Thank you.

**Q:** Hi, my name is **Judy Matthewson**, I'm a report with **Bloomberg News**: and I'm still going to try and drill down a little further on the 123 agreement. You have made it very clear that it is highly detailed work, but can you give any kind of timeframe for when you expect to reach an agreement or what any of the remaining sticking points might be?

**Foreign Secretary:** The quicker the better.

**Sec. Burns:** I agree.

**Q:** And can you elaborate all?

(Cross talk.)

**Mr. Burns:** -- to that extent.

**Q:** But can you talk - are we talking weeks or months?

**Foreign Secretary:** We have to do the work. Let us do it, and we will tell you.

**Q:** Undersecretary Burns **Carol Giacomo from Reuters:** You have already taken a question on Iran, so I am going to follow up. On the second resolution, what specifically does the United States want to see in a second resolution? How do you react to the fact that the Russian U.N. ambassador said in New York today something to the effect that Russians really don't want a second resolution? Is this just Russian negotiating style? And what do you consider to be the impact of Russia's decision to delay the delivery of fuel to Bashir for contractual reasons?

**Sec. Burns:** Thank you Carol, for your very good questions. On the third question, obviously it's a Russian decision as what they do on Bashir, but we have noted the announcement from Moscow a couple of days ago that there would be a delay, and that is not incompatible, obviously, with the effort that we would like to make to convince the Iranians that the Iranians need to do more to merit this type of cooperation, but we respect what Russia is doing.

You know, President Putin put forward the idea a year and a half ago of an international fuel consortium that might help the Iranian people achieve the growth of a civil nuclear industry and yet not have the sensitive aspects of a fuel cycle -- (unintelligible) -- in Iran, but have them conducted offshore. We thought that made a lot of sense. It's still an idea; that is, if the kernel of our concept of negotiations with Iran, it's still an idea that could come forward, and that might be a way to bridge the differences between Iran and the P-5, so I would say that, but I don't want to speak for the Russian government. They can speak for themselves on Bashir.

I know that Secretary Rice said publicly this morning -- and I have since confirmed this in a private conversation with Secretary Rice -- that she had a good meeting this morning with Minister Lavrov, Foreign Minister Steinmeier, and Javier Solana, and they have agreed that the next logical step is to write a second security council resolution - Chapter VII resolution, and they have asked the political directors, including yours truly, to go to London to do that on Monday, and I think you will see that process play out over next week and probably the week following. But it would be the hope of the United States that we would pass a resolution rather quickly, and based on the conversations we have had with Russia, China, and the three European governments -- and I have had many of them over the last week - I think we will be able to arrive at that. I think it's too soon. I understand why you asked. It's too soon to predict what the specific ingredients of such a resolution would be, but we would hope would build on the first resolution.

We were quite startled, frankly, by the impact of that first resolution. It was a modest resolution - 1737 -- and it seems to have produced a very strong debate inside the Iranian government, which has divided that government between those who know that Iran has to come forward and negotiate, and those, probably led by President Ahmadinejad, who are resisting any type of international conversation, and who want to defy the IAEA and the U.N. Security Council. So, it has been interesting to watch that debate. It has been interesting to see official newspapers criticize the president of Iran, and may that debate continue, and may the Iranians come forward at some point and accept the offer, which we are leaving on the table, to negotiate.

So, in addition to any kind of resolution, we will very certainly say, and this also came out of the agreement that we - in the meeting this morning, that this offer stands, that we haven't taken it off the table. We do want Iran to come forward. We are ready to talk to Iran -- the Russians, the Chinese, the Europeans, and Americans together in a multilateral format, and we hope the Iranians will pick up that offer.

**Q: Colonel Datar, Foreign Policy Association.** Question for Nick Burn. With your positive use on India's cooperation and its age-old excellent relations with Iran, how about inviting India to become member of the multilateral dialogue team?

**Sec. Burns:** I don't know if India wants to be part of the team - (laughter) - especially the Indian government. I can tell you, it's labor intensive. (Laughter.)

Look, I think that what we have managed to do internationally is create concentric circles around Iran. You have the P-5 effort, and this is a Security Council effort of the Permanent Five -- with Germany, because Germany had been a charter member of the E.U. effort of 2003-04. And then you have the IAEA board of governors, of which India, of course, is a member, where all of us on February 4, 2006 spoke in a very forthright way to urge Iran to comply with the IAEA. So, that's another circle, and you've got a wider circle than that in the international public opinion. Nobody wants to see Iran become a nuclear weapons power. Name the country. I think I named three, maybe four. Let's see: Syria, Belarus, Cuba, and Venezuela. The gang of four. Outside of those four countries, is there another country in the world that has - you know, just anxious to see Iran develop nuclear weapons? So, Iran's very isolated. It's got concentric circles around it, and each country, I think, is comfortable in which circle it's in. I know we're very comfortable to be in that P-5, Perm-5 circle.

**Q:** Thank you.

**Sec. Burns:** You're welcome.

**Mr. Tellis:** Well, thank you Secretary Burns. Thank you, Secretary Menon. It has been extremely generous of the both of you to give us an hour and a half of your time from your schedule, and for gracing the occasion to have this conversation. Thank you very much for doing this, and thank you, all of you, for coming here. Thank you. (Applause.)

**478. Press Conference by Foreign Secretary Shivshankar Menon at the Embassy of India.**

**Washington (D. C), February 23, 2007.**

**Mr. Gautam Bambawale:** Welcome to all of you. I don't think Foreign Secretary Mr. Shivshankar Menon needs any introduction. Just a few rules before we start off with an opening statement by the Foreign Secretary and then open it up immediately to questions and answers. Just like to remind you to silence your cell phones, please. If you could please silence your cell phones, and also could I request that when you stand up and ask questions if you could identify yourselves and the organization that you represent. With that, I think I'll turn it over directly to Foreign Secretary Mr. Menon for an opening statement after which we'll open it up to Q and A. Thank you.

**Foreign Secretary:** Thank you, Gautam. I thought I'd just tell you briefly about what I've been doing for the last three days in Washington. As you know, this is my first visit here as Foreign Secretary. The reason I was here at this time was because we had decided to hold the High Technology Cooperation Group at this time which is - many of you were, I think, present yesterday. You know the group. It's a very important industry-government combined meeting because in a sense, the issues that it addresses cut across several sectors. High technology has been the key to open up the India-U.S. relationship in the past.

It also is important to many of the things we're trying to do together in many of the sectors, whether it's the Agricultural Knowledge Initiative, whether it's energy in which we have an energy dialogue, whether it's defense, whether it's most of the areas of cooperation that we're looking at, whether it's our trade, high technology is very important. It's also very important to India's development and therefore it's something that we attach particular priority to.

The meetings that we've had yesterday and today of the group have been useful because we've looked through - there were several forward looking proposals for simplifying licensing, for instance, for various forms of validated inducer systems, so that it would be easier for companies to trade in high technology items. The U.S. Commerce secretary himself came yesterday. I think some of you were there when he pledged his wholehearted support to this process.

And today we had a session - where yesterday the industry had gone into

break-out sessions in all four sectors: in nanotechnology, biotechnology, in defense and also in information technology. And today, the results of those groups came to the governmental group and we looked at what the governments need to do and how to facilitate this trade. So they've set themselves targets, they've also set some time frames for them to follow ourselves, meaning the governments and industries to achieve these goals. So we are very satisfied with the progress that we have achieved in these meetings. They were productive, open, but I also use the fact that I was here in Washington to have fairly extensive meetings in State Department and with other parts of the U.S. government.

In State, I met with Under Secretary Dobriansky, Under Secretary Burns, Deputy Secretary Negroonte today. In all these, naturally, the stress was obviously on bilateral relations, on the transformation that's taken place in the relationship in the last few years, and on how to carry this forward.

We discussed the situation in our region, in Asia, in the subcontinent, as well, and global issues because what we have to day with the U.S. is a global partnership which extends to a whole series of issues of long-term and global significance -- issues like energy, security, counterterrorism, non-proliferation, visas, climate change. These are issue which I think not just ready for India and the U.S. to cooperate but where we can make major contributions, I think, to the global conversation and the global attempt to deal with these issues.

I also spent considerable time at the Department of Commerce yesterday morning with Deputy Secretary Sampson, today with Under Secretary Levine and with Acting Under Secretary Mark Foulon where we discussed what could be done to improve trade, the investment climate and what we could do.

We also briefly discussed the Doha round and WTO, which as you know is not my specialty or my subject, but we discussed it very briefly. And I also called on Mr. Hubbard, the assistant to the president for economic policy, because he along with Mr. Montek Ahluwalia as you know, had been at the CEOs forum, for which has been a very successful way of identifying and addressing some of the economic issues that we need to solve if we want to take the relationship forward even faster. I don't want to go into too much detail here.

I called on the Commerce Secretary Gutierrez who has just had a very successful meeting, a visit to India last week and you heard him speak

about it I think yesterday. I also called on the agriculture secretary because that's an area which for us is central to our developmental concerns of what we want to make of India. If we do want to transform our society and economy we will need a second agricultural - second green revolution and that scenario where there's a lot of work that we can do together with the U.S. Both these were important.

I leave Washington convinced not just of the potential of this relationship and of how important it is for us and how much potential it has to address not just our concerns but regional and even global issues, but also convinced that while we've set in place a framework and we have taken the first steps, I think, to realize some of the potential of this relationship, there is much more that we can and will do, and the determination is there on both sides to do whatever we can to carry this forward.

I'd be happy to answer any questions. I'm going to take a minute.

**Q:** (Off mike.) In the light of what Nick Burns said yesterday, do you sense from the American side that there is a willingness to discuss the substitution for the NPT, and is this something that India would actively work towards and support?

**Foreign Secretary:** I think we've said quite clearly that we are ready to be part of a new international consensus on non-proliferation, and we think there is a need for one. We would like to see a consensus that builds on essentially the ideas that Prime Minister Rajiv Gandhi put forward in 1998 of a nuclear weapon-free world and of moving towards it in predetermined, verifiable time frame which we could agree among ourselves. But the precise shape of this new consensus I'd be reluctant to start spelling out now because that's something that we will have to negotiate among ourselves.

I get the feeling that other states too are looking at (newer new ?) solutions, because I think there are varying levels of happiness or unhappiness with the existing non-proliferation system or regime if you call it that. But we are certainly -- we are ready to do this, and we've been talking to our friends and our partners and to see whether this is possible.

**Q: Chidanand Rajghatta, the Times of India:** Foreign Secretary, are there Indian entities which are still under sanction and is there any progress - if there are, is there any progress towards getting these removed and do you foresee a sort of zero sanctions situation which would be an expression of good faith?

**Foreign Secretary:** We would like one very soon. Certainly there are some

entities which are still on the list. We have raised this and it's our expectation that as we move along this process they will be removed from the list and that we will move to a system which is much more open and much easier.

**Q:** Do you recall top of the head what are the key ones which worry us?

**Foreign Secretary:** I don't have a list with me right now. I think it's published, I think it's available.

**Q:** Mr. Foreign Secretary, *Aziz Hannifa with India Abroad*. Could you speak to what some people may call India's balancing act vis-à-vis Iran? Stephen Rademaker, who was till recently one of the more - a very senior administration official then left the administration, went to work for Senator Majority Leader Bill Frist -- former Senate manager - had apparently said in India that India was sort of cajoled and coerced regarding those IAEA votes, and the fact that then Mr. Pranab Mukherjee made the first bilateral visit to Iran, and then of course, India was very quick off the tracks in terms of banning high technology to Iran. Why I ask is even though the administration -- and Nick did this last afternoon also -- has gone to bat and said that there are European allies of the U.S. which have much closer relations. In the Congress there are even driving forces like Congressman Lantos, who simply go ballistic and very nuance vis-à-vis India's Iran relations are watched very closely. So could you speak to this so-called balancing act that India seems to be playing?

**Foreign Secretary:** To start at the beginning of your question, I think Mr. Rademaker later denied that he'd said anything like that.

Secondly, we have a policy towards Iran of --at least as far as the nuclear issue, which is that you were talking about -- we have a larger policy, but as far the nuclear issue is concerned, it's quite clear to us that Iran needs to address the international community's concerns, and the best way to do that would be with the IAEA. That's something that we've made quite clear with our conversations with everybody. We say this to everybody who talks to us about the issue.

Now, obviously it is in our interest that these issues be resolved peacefully and quickly and through negotiations for the obvious reasons: we have something like more than three million people in the Gulf, in that region; we have a vital interest in the peace and security of that area. It's important to our energy supplies and so on. But the basic fact is we would like to see this resolved peacefully through negotiations and the international community's doubts set at rest as quickly as possible. How that can be

called a balancing act I don't understand. I think that's sheer reasonableness and it's a very clear policy. It hasn't changed at all.

**Q: Raghbir Goyal, *India Globe & Asia Today*.** Mr. Minister, yesterday you had a wonderful speech at the Commerce and also at the Carnegie, but you did not mention as for the cross border terrorism we're concerned from Pakistan into India, and also there must be a concern Taliban and al-Qaeda are growing in Afghanistan. And my second question will be, sir, a terrorist who was convicted by the Supreme Court of India -- his petition is still with the president of India and the whole India wants to be hanged or whatever definition it was given by the Supreme Court still hanging and is not going anywhere. Why that action has not been taken by the president when the Supreme Court of India says do so?

**Foreign Secretary:** As far as the second question is concerned, that's still a question which is going through the last stages of the judicial process in India. The president is part of that process, and his appeal for mercy, the president will make up his mind. I cannot say why or why not and when he will do it, it's up to him to decide when to do it. And that's -

On the earlier question, I didn't speak on cross-border terrorism to the HTCG because, frankly, I don't expect them to stand up and do very much about it. I mean, it would be unfair to load them with this. But as an issue, it's something we have discussed with the United States of America, with Under Secretary Nicholas Burns, and we've gone through that in some detail.

Ultimately terrorism is an issue that we need to address at home and with our neighbors, and that's the best place to deal with it, and that's where we will deal with it. But our concerns, what we think about it, what our plans are, that sort of thing - yes, we have shared that in some detail with Under Secretary Nicholas Burns.

**Q: Devasish Ray TV Asia.** Just commenting on the recent visit of President Putin to India, I had a little chat with Congressman Gary Ackerman, and I asked him to comment on it, and he said that he was very jealous of relationship the U.S. had with India. What do you comment on that?

**Foreign Secretary:** Sorry. I missed this.

**Q:** I asked Congressman Gary Ackerman what he thought about the recent visit and he said, we are very jealous with concern to the relationship between India and the U.S. How would you like to comment on that?

**Foreign Secretary:** Well, I'm sorry. I didn't understand. I mean, for us, the

relationship with the U.S. is very, very valuable. I've just tried to explain how important it is in terms of India's own development, how important it is for India in terms of how it looks at the world and deals with the world, and I think the potential of that relationship is tremendous, so we'd be jealous about it also. We'd be jealous in protecting it.

**Q:** Thank you. My name is **Luke Engan with *Inside U.S. Trade***, and I wanted to follow up briefly on your Doha round remarks. I realize that you said it's not your area of expertise and so I'm curious which U.S. official raised this topic and what exactly they were asking of you. Thank you.

**Foreign Secretary:** It's been discussed in commerce and with USTR I think we have an ongoing conversation. The Commerce minister met with the USTR in London just a few weeks ago -- two weeks ago and were planning more meetings. We have working-level meetings going on with the USTR's office on the various sectors, which are going on right now.

As far as WTO is concerned, I think we as India have a great interest in an open rule-based trading system. For us it's very important. It's important to our own development, it's important for our trade, for our investment. We have an interest in an open system because we have seen the effects of closed trading systems and we're not part of the major regional trading blocks. We would not like to see the world market broken down.

**Q:** I'm sorry. I wanted to ask specifically about your own visit over the past couple of days and what conversation has happened during that time.

**Foreign Secretary:** Well, we discussed in general terms because, as I said, this is not the subject that we deal with directly and there are the people who are negotiating this, but we discussed our desire to see that the Doha round is brought to an early conclusion, and we discussed some of the issues which are holding it up, and we made it clear that we're very interested in seeing this process through quickly.

**Q: Sridhar Krishnaswami- of the Press Trust of India.** Yesterday, Mr. Burns remarked at the Carnegie that terrorism will be one of the main topics that the United States will be interested in asking up as the next horizon in the bilateral relationship. I was wondering how much of a meaningful dialogue can we have with the U.S. on terrorism given their own perceptions as it pertains to Pakistan?

**Q:** Just to follow up on that question. Apparently the U.S. wants to move much beyond the pretty high level of intelligence sharing and terrorism cooperation that U.S. and India have. Could you speak to that -- because

that probably involves intelligence sharing on cross border terrorism, et cetera, which in extent would also involve Pakistan because of satellite imagery and all that kind of thing -- because there seems to be appeals to push by the U.S. that they want to really move beyond, and some say we need some sort of a quid pro quo to push forward the nuclear agreement?

**Q:** Sir, and let me - (laughs) - also add, while you are at it - (cross talk, inaudible) -- no. You know, for the first time in a long time, yesterday Burns accepted that we do have a terrorist problem in the south as far as India is concerned. But still they will not go and pin down Pakistan as being a source of terrorism. So how meaningful are you going to get with the U.S. on dealing with terrorism as it pertains to South Asia?

**Foreign Secretary:** Well, I think we already have a very meaningful relationship with the U.S. on counterterrorism. We have a joint working group on counterterrorism, we have an existing exchange of information of intelligence, but there are the steps that we've discussed -- certainly funding, other things we have gone to in some detail together. And it's because of the confidence that we've gained from the experience that we have had already that you heard Under Secretary Nicholas Burns talking as he did yesterday when I think he spelled out some of the steps also in some detail of how we hope to work together.

In our view, terrorism - you cannot be segmented. There are no such things as - this is really terrorism across the board. Wherever it comes from, whoever does it, you have to deal with it and you have to eliminate it. There is no other way. And that is quite clear to everybody. I think this has been our view for many years and all our partners know that that is our view. We are happy with our experience of working with the U.S. in counterterrorism, and we hope to take it to a new level in the future.

**Q:** Just a quick follow up, because there seems to be this dichotomy where India seems to be taking the philosophical type of - you spoke about the fact yesterday also about the roots of terrorism and things like that, while the U.S. quickly seems to be, these are the bad guys, we got to go bash them - (unintelligible).

**Foreign Secretary:** I don't see a dichotomy. I think we need to deal with it every which way we can.

**Q: K P Nayar from the *Telegraph*.** In Delhi and in Washington we all the time hear about what a great relationship India has with the United States, but there is a flipside to that relationship. Chidu Rajghatta referred to the

entities list and the sanctions, we have problems on GSP, on anti-dumping. I'm not talking about commercial disputes, but state-supported problems that create impediments in trade. It's a year since MEA gave the Americans details of those two Indian scientists who were sanctioned for helping Iran's missile nuclear program. They are still under sanctions. Nothing has happened.

The United States does not support India on permanent membership to Security Council, the United States is the only country to veto the Indian candidate for secretary general's job. When the Americans want to do something in defense they go overboard, but when India wants something, it takes up to four years to negotiate a deal. I could go on and on -

**Foreign Secretary:** I know. (Laughter.)

**Q:** So what I would like you to do is to look at this part of the relationship which is less edifying so that we have a more balanced picture of what the relationship is like.

**Foreign Secretary:** Well, I think you have to look at things in perspective. Much of what you mentioned is problems of intimacy. There was a time when you were doing very little trade with the U.S., when you had very little to do with the U.S., and many of the things you mentioned then were not even issues.

These are issues today because you have a relationship that is so much better than you've ever had before. Your relationship today is better than it ever probably ever has been in history and there is no denying that. So no matter how long the list of problems of intimacy that you manage to produce, I don't think I'd change my judgment; that this is a relationship which is not just very important, it's better than it has ever been before and it has a potential for getting even better in the future. And I think that's the context in which you need to look at the individual issues that you might mention.

**Q: Prerna Kumar, CNN-IBN.** What is the status of the negotiations on the 123 agreement? Did you bring a draft with you this time?

**Foreign Secretary:** We're still discussing 123 agreement and we're hoping - because the task is actually of reducing the understanding between the two governments which was expressed in July 2005, March 2006. We're reducing that into an agreement, into a legal agreement. We're still engaged in that task.

**Q:** What do you predict is the timeline? Mr. Burns said I think end of 2008.

**Foreign Secretary:** Well, as I said yesterday, we'd like it as soon as possible and we're working at it.

**Q: Foster Klug with the Associated Press.** Secretary Gutierrez yesterday in his speech mentioned India's -- responsibility was the word he used -- in opening up its nuclear market to U.S. companies. Did you feel or were you aware of any pressure from U.S. officials to make sure that that market was open to U.S. that they enjoyed a wind fall from this?

**Foreign Secretary:** No, no pressure at all. But what I would like to say is that when the market opens it will an open transparent market where everybody -- U.S. companies, all companies -- will be free to compete equally.

**Mr. Gautam Bambawale:** I think we'll just take a couple of more questions. Is there a second one there in the back? Yes.

**Q:** (Unintelligible) - we keep hearing about this agricultural initiative, the second green revolution, et cetera, in the U.S. It seems to me that we still haven't reaped the full benefits of the first revolution, and particularly there's one segment which I'm fairly familiar with which I want to talk about. This is for instance, fruits and vegetables. We grow 100 million ton of fruit and vegetables, 40 percent of which perish. So it seems to me more than generating a second green revolution there are problems, A, within India - - storage, marketing, et cetera -- and B, tariffs. Just to pick one item, I don't know if you saw the flush of stories about the roses in Valentine's Day, which kicked off with some - a column I'd written. You have Indian farmers who now buy farms in Ethiopia and Kenya and export out of there because they cannot export directly from Bangalore to Baltimore, which would be the logical (flight ?) for me - or, for instance, tomatoes. You have a tomato disaster that -- people not picking tomatoes because it's one rupee a kilo there and it's 2.99 a pound here. So it seems to me that more than the second green revolution, people would be happy if you can sort of finish the first one and bring down barriers.

**Foreign Secretary:** I don't think we're saying second green revolution as being the same as the first as doing the first twice. I don't think that's what we mean.

I think what we did was we had this group which was headed by Dr. M.S. Swaminathan and Norman Borlang, and they've actually identified the set of measures among which are the things that you mentioned: the question of getting fruit and vegetable to the market, also access to the markets;

exactly the kinds of things that you mentioned, but they actually mentioned many more aspects. Part of it agricultural education for instance and upgrading the state agricultural colleges, but it goes right through the whole technology of agriculture and of improving it; not just what we did originally which is fertilizers, irrigation and improve seed varieties which is green revolution number one, but this time I think they did a much more holistic approach to agriculture and how we can -- and what we can do together with the U.S. to improve this. But many of the things you mentioned are actually included in that. I think afterwards we'll show you what they agreed, because that's just -

**Q:** Just in the barrier aspect, particularly because -

(Cross talk.)

**Foreign Secretary:** The barrier aspect comes two ways. One is in our trade policy forum and in our bilateral talks with the Commerce Department we raised this. You know, mangoes, for instance we've discussed, we hope to have solved soon, but let's see, we're still trying. Exactly. I mean, you're right; it's waiting. But it also comes up in terms of agriculture in the WTO and the Doha round. Agriculture is a big part of it, and some of it is market access which will be solved there also.

But that's a generic solution. Those are solutions across the board where tariffs are being addressed for agricultural produce. In both ways we are trying to solve these problems, but as I said, the Agricultural Knowledge Initiative and the agricultural initiatives that we're talking about bilaterally with the Department of Agriculture yesterday when I called on the secretary, for instance, include most of the things that you have said.

**Mr.Gautam Bambawale:** We'll take two last questions. One here, please, in front and then one at the back there.

**Q:** I wanted to take it back to High Technology Cooperation Group and ask you how satisfied you were with the response in terms of the United States' commitment to remove outdated controls on technology exports that date from the Cold War? Did you get everything you want in that area or was there some sort of a short fall? And also on the other side of India the harmonizing with Australia group in Wassenaar? After the technical process is over of determining what gaps exist, could you describe the process in India and if there are significant barriers there to implementing that? Thank you.

**Foreign Secretary:** Well, on the licensing here in the United States, we're obviously happy with what we've got. There is more to be done though in the future and we recognize that -- both sides recognize that, so we will keep working at it. This is a group that's been in existence now -- this is the fifth meeting of the HDC -- so this is a work in progress, so I don't think we'll say, yes, we're satisfied, it's all over now, we can go home. No. There is more that needs to be done.

But I think as you heard yesterday, the U.S. exports subject to licensing -- U.S. exports to India subject to licensing have declined from something like 24 percent to less than one percent in this decade, so that's quite a change from 1997, I think -- 1999 to 2006. That's quite a change.

But there's still more work to be done. On the Australia group, Wassenaar group, I think Indian industry, chemical industry especially is still looking at what it would mean for it, and that's a process of consultation that we have to go through -- what the Australia group - and we will then see how - we feel that we are to a very large extent already harmonized in terms of our own export controls and what the Australia group needs for it. Wassenaar, we're discussing it, we're seeing how we can - what we need to do, whether there is a difference or not. That also needs to be established, whether we - in fact in some respects, some of our controls and standards are a little higher.

**Q:** I want to follow very, very briefly on Wassenaar. I just heard from Assistant Secretary - (unintelligible) - that this is the area in which India has the most gaps from the multilateral -- among the four multilateral regimes.

**Foreign Secretary:** As I said, we're studying. I think we're still looking at that to establish where exactly because in some areas we think we're ahead; some maybe we're behind. We still have to work that out for ourselves and then we see what we do about it.

**Q: Shahzeb Jillani - from BBC.** Just a follow up question on the nuclear agreement: What are some of the issues which are sort of unacceptable or India has reservations about which you may have raised in your meeting during this visit?

**Foreign Secretary:** Well, we hope to solve them all. I think there is not much point negotiating this through the media. I think we'd rather do it directly with the government.

**Q:** Did you bring a proposed draft?

**Foreign Secretary:** We're still discussing that. We'll see.

**Mr. Gautam Bambawale:** Well, thank you very much for having been here this evening.

**479. Joint Statement issued after the meeting of the Indo-US Joint Working Group on Counterterrorism.**

**New Delhi, February 28, 2007.**

The Indo-US joint working group on counterterrorism met today to discuss cooperative strategies to fight the global menace of terrorism. The US delegation, led by the Acting Coordinator for Counterterrorism, Frank Urbancic met over a full day with KC Singh, Additional Secretary for International Organizations at the Ministry of External Affairs, who hosted the delegation.

They discussed, inter alia, regional counterterrorism efforts, threat assessments in South Asia and the Middle East, bioterrorism, weapons of mass destruction, and the on-going Anti-terrorism Assistance Training Program. The two parties also discussed terrorist finance and money laundering, the ideological dimensions of terrorism, information sharing and widened cooperation for preventing terrorist acts.

They also agreed to find new ways to forge institutional linkages to foster closer interaction and cooperation.

They concurred that no country today is safe from terrorism, and the cooperation between India and the United States not only strengthens the fight against the scourge of terrorism, but is a symbol of the way in which like-minded democracies can work together as partners in countering the global menace of terrorism.

The next meeting of the counter-terrorism joint working group will take place in Washington in the fall.

**480. Press Release of the Ministry of Defence on the First India - US Defence Joint Working Group meeting.****New Delhi, April 10, 2007.**

The first India \_ US Defence Joint Working Group meeting was held in New Delhi today. The meeting was co-chaired by Mr S Banerjee, Director General (Acquisition), Ministry of Defence and Mr Richard P Lawless, Deputy Under Secretary of Defence (Asian and Pacific Affairs), US Department of Defence. The discussions were held in the most cordial and friendly atmosphere.

The Joint Working Group was envisaged in the New Framework for India - US Defence Relationship, signed by the then Defence Ministers of India and US, Mr Pranab Mukherjee and Mr. Donald Rumsfeld, in June 2005. The Defence Joint Working Group conducts midyear review of the work overseen by the Defence Policy Group, which is the apex dialogue mechanism for the India-US defence relationship.

**481. Press Release of the Ministry of External Affairs on Foreign Secretary's visit to Washington.****New Delhi, April 24, 2007.**

Foreign Secretary Shri Shivshankar Menon will make a two-day official visit to Washington on April 30 and May 1, 2007. In Washington, FS will meet Ms. Paula J. Dobriansky, US Under Secretary of State for Global Affairs and Democracy, to continue the India-US dialogue on global issues of common concern in the format of the 5th Meeting of the India-US Global Issues Forum. FS will also meet US Under Secretary of State for Political Affairs, Mr. Nicholas R. Burns for discussions on India-US bilateral agenda - including the bilateral civil nuclear energy cooperation agreement<sup>U</sup>.

---

<sup>U</sup> The visit apparently took place in the background of persistent media reports from USA that America had expressed concern at the delay in negotiating the nuclear cooperation agreement. Press Trust of India quoted the US newspaper *USA Today* suggesting on April 13 that "the landmark nuclear accord between New Delhi and Washington risks collapse as Indian demands, including the right to continue testing nuclear weapons,

---

undermine the U.S. rationale for seeking the deal". India was making demands that would increase, "not lessen," its military nuclear capabilities and at the same time it developed closer ties with Iran, the report quoted senior administration officials and nuclear experts as saying. The news agency further quoted Henry Sokolski head of the Nonproliferation Policy Education Centre that "The Indians are being greedy," and expressed the fear that the agreement might not be implemented before the Bush Administration left office. Nicholas Burns, Under Secretary of State, who was in charge of the negotiations, acknowledged that three rounds of talks produced little. "I don't question India's goodwill," he told the paper. "But there is a fair degree of frustration in Washington that the Indian Government has not engaged seriously enough or quickly enough with both the United States and the IAEA." They said India wanted "permission to buy uranium-enrichment and plutonium-reprocessing technology from the U. S." - both have military applications and sale is prohibited in most cases by U.S. law. New Delhi has also sought no limits on testing nuclear weapons. PTI further quoted that the US administration reportedly told New Delhi that the United States reserved the right to terminate nuclear cooperation if India tested weapons again. Robert Einhorn, a proliferation expert at the Center for Strategic and International Studies in Washington and former senior State Department official in the Clinton administration, said the Department of Atomic Energy of India "may want the deal to fall through" to shield itself from competition from foreign contractors with nuclear engineering expertise, such as General Electric and Westinghouse. However, US Under Secretary of State for Commerce and International Trade told a seminar in Washington organized by Woodrow Wilson Centre and Federation of Indian Industry that the two countries were engaged in finalizing the 123 agreement that was under discussion. He did not agree with the perception that the ball was in India's court and somehow New Delhi was unwilling to return the "serve". "What both countries are trying to do is to move the relationship ahead in an important area. It is unprecedented for both India and the United States. Both sides are moving and both sides are undertaking steps that their systems, their regulations are not familiar with. So it will take a while", he said. He added both countries had responded in good faith to the nitty-gritty of implementation and his country had no concern. "I don't think there is any concern on the US side, but the sooner we get it done the better. There is a lengthy pipeline in this project. Let us not waste an extended period of time," he said, adding there was indeed "enormous support" for this nuclear initiative in the US business community. Meanwhile visiting Brazilian Foreign Minister Celso Amorim who met the Prime Minister on April 13, told a press conference in New Delhi that Brazil as chairman of the NSG had had discussions with India and found it committed to non-proliferation. He said that the attitude of other members of the NSG to India was changing. Keeping open the option of cooperation in peaceful uses of nuclear energy, he however, pointed out that this would have to take place in the framework of Brazil's full-scope safeguards agreement with the IAEA. It may be recalled that during their meeting in Brasilia last year, the leaders of India, Brazil and South Africa agreed that international civilian nuclear cooperation, under appropriate IAEA safeguards, among countries committed to nuclear disarmament and nonproliferation objectives, could be enhanced through "acceptable forward looking approaches" consistent with their national and international obligations. Pointing out that the US - India civil nuclear cooperation agreement was still to be concluded, Mr. Amorim said Brazil would proceed according to its international obligations. At the same time, India had to take its discussions with the IAEA forward. "We don't feel threatened in any way," he said about India's still-in-the-works nuclear deal with the USA. Brazil was comfortable with its own geo-strategic situation, he said.

**482. Press Conference by Foreign Secretary Shivshankar Menon during his visit to Washington.****Washington (D. C), May 1, 2007.**

**Mr. Rahul Chhabra:** Welcome. It gives me great pleasure to welcome the Foreign Secretary of India, Mr. Shivshankar Menon, here in Washington. He's been here for two days now and had several meetings across the two days. I request him to brief us on these meetings and so please keep your questions to the end. We also have Mr. Ronen Sen, Indian Ambassador to the United States here with us, along with DCM Mr. Jassal. Just a note to keep your cell phones on silent mode, please. Thanks. I request Foreign Secretary Menon to now take the mike.

**Mr. Shivshankar Menon:** Good evening, ladies and gentlemen. As you know, I've been here yesterday and today. I thought I'd just give you a brief rundown over what I did, and then I'd be happy to answer any questions that you might have.

We started the day yesterday with the India-U.S. Global Issues forum. We did the fifth meeting of the forum. This is a forum with Undersecretary Paula Dobriansky. This is a forum where we discuss issues of global significance, things like democracy, environment, and climate change. We have discussed HIV/AIDS, for instance, and these are areas where over time, we have developed several - we've found several areas of congruence where we can work together. We've developed several projects. For instance, the idea of the UN Democracy Fund - we first discussed it - it first came up in this forum. We also set up the Asia Pacific Partnership for Clean Development and Climate, which as you know is working on much more energy efficient technologies for steel, for cement, for energy production as well. So we had a broad discussion of these issues. We found that there were several areas where we think we can cooperate together, India and the U.S., and we're looking forward to doing that in the years to come.

After that, yesterday evening and most of today I spent with Undersecretary Nick Burns. We did three things. We discussed some bilateral issues, we covered regional issues, issues in our region, in South Asia, also in Asia as a whole, and some other issues, some larger issues. And we also discussed the 123 Agreement, the India-U.S. civil nuclear bilateral cooperation agreement. In all these, we had very productive discussions. On the 123, we think we've made considerable progress forward, and we now expect

to welcome Undersecretary Burns to India later this month, in the second half of this month, and we hope to finalize this as soon as we can.

On the regional issues, I think maybe it's best if I leave these things for you to ask questions about them, and I'll tell you, depending on your interest. But overall, as far as I'm concerned, it's been a very productive, very useful two days in Washington, DC, and I think we've made progress on all fronts. I think it's a measure, really, of how the relationship has been transformed in the last few years, that we come in, do our business, move our relationship along in all respects, in terms of exchanging views, in terms of working together, seeing where there is congruence between our policies, and also in moving forward our bilateral agenda in which the 123, as you know, is a very important part. I am open to questions.

There is one other thing. I called on the Secretary of State, Secretary of State Rice, in the afternoon. I had a very good meeting with her where we looked at the broader relationship and expressed satisfaction at how it had developed over the last few years, and her own contribution, as you know, to this process has been considerable. In fact, a lot of it wouldn't have been possible without her, without her guidance and help to the relationship. I'd be happy to answer questions.

**Mr. Chhabra:** Please introduce yourselves and then we'll have the questions. We'll start with Carol.

**Q: Carol Giacomo from Reuters.** Could you tell us specifically how you have resolved the three issues at the - the three obstacle issues at the heart of the 123 Agreement: testing and United States requirement that if testing occurs, U.S. material would be - cooperation would be halted, reprocessing, and the question of prior consent?

**Mr. Menon:** I have a deal with Nick Burns that we're not going to get into the issues until we've solved them all. When we have an agreement, we'll tell you all about it.

**Q: Are you as -**

**Mr. Menon:** And I'm not going to get into individual issues at this stage. Frankly, there's no point because there's no point trying to negotiate issues, no matter how close we are or even if we've solved them, through the media.

**Q:** The United States, in a statement, has suggested that you could finalize

this by the end of the month. You said you'd made progress; are you as confident that it could be over by the end of May?

**Mr. Menon:** I think we're both confident that we can do this, and we both want to do it very quickly, the quicker the better.

**Q: Aziz Haniffa from *India Abroad*.** I'll give it a try too; knowing the quintessential diplomat you are, you're not going to share your constructive ideas, nor the progress, extensive progress, but this is sort of déjà vu all over again. Nick Burns, about three or six months ago, also said that 123 is a formality, it's a technicality, you know. What's this you keep asking about 123? And then for the first time, we've had the quintessential diplomats like Nick Burns publicly talking and using the word frustration. I'm going to try, as Carol did. What I mean is, there are domestic political compulsions in India, too, so how confident are you that because there is a certain concern in industry, et cetera, that, and I'm sure Ambassador Sen is also hoping this is completed on his watch.

**Mr. Menon:** I think it's doable and I'm sure that we can do this, but as I said, we've made considerable progress. We still have issues to settle, and until we settle them all, I'd rather not get into saying which ones, how much, where, but I think it's doable, and we'd like to do it as quickly as possible.

**Q:** Sir, let me try my -

(Laughter.)

**Mr. Menon:** Okay, three times, okay?

**Q:** Yeah, three times.

**Mr. Menon:** One, two and three, that's right.

**Q:** One, two three.

**Mr. Menon:** Yes, that's it, that's good.

**Q:** Sir, from a phase of being frustrated, supposedly you've moved into a phase of finalizing as soon as we can. Could you please walk through what made you, between three days back when Americans were frustrated and today? You have apparently come with a lot of constructive ideas.

**Mr. Menon:** I think you should ask the people who were frustrated, and I don't think I ever said that.

**Q:** So the Indians have never been frustrated in this process?

**Mr. Menon:** Did I ever say that?

**Q:** No, no, no, no. I'm just asking you.

(Laughter.)

**Mr. Menon:** That's three.

**Q:** Four, five, six, then.

**Mr. Menon:** Four, five, six coming?

**Q: K. P. Nayyar from the *Telegraph*.** I won't deal with -

**Mr. Menon:** Very good, very good.

**Q:** A few weeks ago in Geneva the CoD appointed a new coordinator to fast track discussions on fissile material cut-off, which means then FMCT may well be a reality in a couple of years. Meanwhile in India, we are still in the second stage of Homi Bhabha's plan. My question is, given India's problems with the mining of natural uranium, and considering that the material situation on the ground in Geneva has changed last month, what assurances can you give that the July 18th statement, the commitment in the July 18th statement to work with the Americans on FMCT will not impede India's efforts to achieve a credible nuclear - minimum nuclear deterrent?

**Mr. Menon:** I think when we said that we are interested in working towards an FMCT which is non-discriminatory, which is verifiable, and as you said, which is credible, I think we had made all these calculations. I think none of this is new. What we are doing here in the 123 is trying to open up a whole new source of energy to us. But what we're doing in the 123 has very little, in fact has nothing to do with our domestic, indigenous three-stage nuclear power program, nor does a commitment to an FMCT, which we entered into, knowing where we were, knowing all the factors that you've mentioned. Frankly, we see the FMCT as a possible contribution, depending on the kind of FMCT that emerges from a process of negotiation, we see it as a possible contribution to nuclear disarmament, which is, as you know, one of the most important parts of general and complete disarmament, which is what we would like to see. So I don't see any contradiction between these three elements that you mention, and I don't anticipate this as affecting our minimum credible deterrent in any way.

**Q:** You mentioned that verifiable FMCT but the American position on verification itself has undergone a fundamental change where they no longer believe in international verification where they depend on

**Mr. Menon:** I think the reason there has to be a negotiation of an FMCT is because everybody has different positions, and if we all had the same position, we wouldn't need negotiation.

**Mr. Chhabra:** Judy?

**Q:** Sir, critics of the deal -

**Mr. Chhabra:** Please introduce yourself.

**Q:** Oh, I'm sorry. My name is Judy Matthews, and I'm a reporter for **Bloomberg News**. Oh, thank you. Critics of the deal in the U.S. Congress point to the arrest in March of two Indian nationals who were accused of exporting forbidden technology to India, and they point to India's relationship with Iran and say that they have fears that U.S. technology could wind up in Iranian hands. What do you say to those fears? How do you address those?

**Mr. Menon:** Actually, we've seen reports and we saw an indictment, not of two Indian nationals, one Indian national, I think, and we actually asked today, we asked at State for information about this because we'd like to know what there is, and if there is something that we should be looking at, investigating, we'd like to get to the bottom of it. So we actually asked for information; we're hoping to get it. Then maybe I'll be in a better position to answer what you're saying.

The other issue about Iran, I'm not quite sure where these stories are coming from because nothing that India does with Iran is in any way in contravention of either of the UN Security Council resolutions, and much of what we do is what is normal between states and is done with Iran by several other states.

**Q:** I'll just try to rephrase the question which Aziz and Ms. Carol did ask. When we talk about considerable progress, on a scale to one to 10, where would you mark this considerable progress?

**Mr. Menon:** When it's done, I'll tell you exactly where we were on -

**Q:** That would be after the fact, sir.

**Mr. Menon:** It will be. It'll have to be.

**Q:** All right, sir.

**Mr. Menon:** Because 10 would have to be only when it's done.

**Q:** So you're not saying it's seven, you're not saying it's two? All right.

**Q:** Mr. Secretary, two quick questions. One, as far as these mangoes are concerned today, a big inauguration at the Commerce Department. With the shipments of mangoes from India, you think all the - (unintelligible) - are now all between the United States and India, or do we still have some outstanding issues as for trade and economic issues of concern?

**Mr. Menon:** You'll have to ask the Ambassador.

**Mr. Aziz:** He has already indicated his preference for a certain variety-  
Laughter.

Ambassador Sen: I think this is an important symbolic because we regard the mango as something not of Indian origin, but I think we have the best mangoes in the world, whichever part of India that comes from. Yes, I've got myself into some problem by expressing my preference for the mango of only one particular part of the country, and we can have animated discussions in India, as you know, all of the thousand varieties of mangoes, but it's something, it's emblematic of this relationship, this changed relationship that for a year or so, when this was first taken up and discussed between President Bush and Prime Minister Manmohan Singh, that we've already - (unintelligible) - of this issue, which has been pending for something like one or two decades - more than that, actually, more than two. Two and a half decades. And so it's manifestation of, you know, a new sense of confidence, a new sense of globalism, working together, so from that point of view, it's more. Then it's also something which is of - which could be a plan that could benefit the Indian farmer. So it is a relationship which is, some people say that it would benefit the - (inaudible) - but this is also a manifestation of the fact that in the course of globalization, this is going to be an inclusive process and benefit all nations.

**Q:** Second, Mr. Secretary, for Bangladesh. As far as Bangladesh is concerned it is going the Pakistan way, just like foreign leader General Musharraf for dictators' path, and two states now we have supporting terrorism against India, and I have not heard much as far as India's positions concern on the situation in Bangladesh because there had been supporting terrorism into India because all those terrorists came from Pakistan, from ISI.

**Mr. Menon:** Where is the question?

**Q:** The question is, sir, what India's position is as far as Army rule now in Bangladesh and four prime ministers, two from each countries, are now living outside of their countries, two from Bangladesh and two from Pakistan, and they have been charged with -

**Mr. Menon:** Well, in the first place, no two countries are identical, so I don't think you need to make that statement. Secondly, two prime ministers, I think, maybe from Pakistan are abroad, but only one from Bangladesh is abroad right now. It's up to them where they stay, what they do. We want a peaceful, stable, moderate Bangladesh. That's in our interest. We want to be a good neighbor to Bangladesh. We would like to see the restoration of democracy in Bangladesh as soon as possible. The present caretaker government is doing things which need to be done: the electoral roll, for instance, putting in place a system so that the people of Bangladesh have a chance to express their will freely, fairly, through an election, and we would encourage that.

For the rest, we will, as a good neighbor, work with Bangladesh to try and address the kinds of problems that we have. We have major issues in the subcontinent between India and Bangladesh as well, the basic issues, of course, of development. We have other issues; you mentioned one, extremism. We have issues of water. But these are all issues which we think, as neighbors, we can address and we will address with the authorities in Bangladesh.

**Q:** I apologize if I'm asking a question that's being repeated because I've been late. I'm with NDTV. We'd just like to know why the U.S. is accusing India of dragging its feet in negotiations and what are the stumbling blocks left now preventing an agreement from being reached?

**Mr. Menon:** Yes, you're asking a question that's been asked before.

**Q:** I apologize, again, to everybody.

**Mr. Menon:** Well, I think if you look at what the State Department said today about the agreement, I think they've said that, as I am saying, that progress has been made, and we hope to finalize it and that that's our goal. We hope to do that as quickly as we can. So I'm happy with the progress that we've made. I don't see that this - or let me put it positively: as far as I'm concerned, this is doable, and I think we've shown over the last 24 hours in our discussions that we both want to do it, and we want to do it as quickly as possible.

**Mr. Chhabra:** There's a question there.

**Q: Jitendra Joshi with AFP.** I just wanted to follow up on the question about Bangladesh. Could you expand a little on the substance of your discussions of regional issues with Mr. Burns and/or with Secretary Rice, whether you discussed Pakistan and any kind of joint U.S.-India action to restore stability to the region?

**Mr. Menon:** I think we shared our perceptions on the situation in the region, as I said, and that included Bangladesh, included Afghanistan - it also included countries which were further afield, and it also included issues which were further afield, broader issues, including some at the UN and so on. So we had a fairly broad-ranging discussion, but don't forget, I've only been here two days, you know, there's only so much we can do in these talks. It was a pretty full agenda because we did regional issues, we did bilateral issues, we did global issues, and we did the 123 Agreement as well, so that kept us quite busy.

**Q:** You met Steve Hadley?

**Mr. Menon:** No, I didn't.

**Q: Shahzeb Jillani from BBC.** The U.S. has publicly, obviously, characterized the negotiation - there's a sense of frustration in Washington. You obviously have not used that phrase to characterize the negotiation. Would it be fair to say that you are cautiously optimistic?

**Mr. Menon:** It's up to you. What did you hear from me?

(Laughter.)

**Q:** I'm asking -

**Mr. Menon:** I mean, I don't characterize myself, I think that's up to you. You've heard what I said. It's up to you what you want to call it.

(Off-mike.)

**Mr. Menon:** Yes? You like it? You've got another characterization.

**Q:** Are there any issues in this agreement which are left for the G8 meeting and the expected meeting between the Prime Minister and the President on the sidelines of G8 in June?

**Mr. Menon:** I think we, as I said, we expect Undersecretary Nick Burns to

come to India before that, towards the end of May, in the last, second half of May. So we will have another opportunity to discuss these issues. I think the G8 is much beyond that.

**Mr. Chhabra:** Thank you. Thank you.

**Mr. McCormack:** Well, Foreign Secretary Menon had dinner last night with Nick Burns and he met yesterday with Paula Dobriansky. He's going to have further meetings today with Nick Burns and Richard Boucher. The Secretary, I think, is going to stop by those meetings. She'll have a chance to chat with him.

Our focus is going to be primarily on the nuclear issue with India, how we can move forward on the 123 agreement. The initial read from the dinner last night was that the Foreign Secretary came here with some constructive ideas. That doesn't mean that we are going to be able to move this as quickly as we had hoped -- we'll see -- as a result of these meetings. But we're confident in the long run that we will get this deal done. So that will be the focus of the discussions. I expect they're going to talk about other things as well, the broader U.S.-India relationship.

**Question:** The Secretary has any special message for him or for the Government of India as far as this nuclear issue is concerned?

**Mr. McCormack:** Only that we're committed to working in good faith to get an agreement, that we are confident that the Indian side is ready to work in good faith to get an agreement, that we will get one done and that it's going to require some creativity and some compromise on both sides in order to get an agreement done if we're going to be able to move this as quickly as we would have hoped. We're at a point now where we're going to see whether or not the agreement can be moved forward quickly or not.

**Question:** Can I follow up on that?

**Question:** Yes, please.

**Mr. McCormack:** Yeah.

**Question:** Did Under Secretary Burns have any talks yet with the Indian Foreign Secretary?

**Mr. McCormack:** I think they've started this morning. He had some discussions this morning.

**Question:** This morning?

**Mr. McCormack:** Yeah, he had dinner with him last night.

**Question:** Okay. And do you have any readout on that, on whether -- I mean, presumably he's got some kind of a sense of this so far. Do you have a sense of how it's going and whether you think you are going to --

**Mr. McCormack:** Not from this morning, but what I was conveying to you, sort of our overall sense that the Indians came here with some constructive ideas and that there's a possibility that we could move the process forward based on these ideas, although that's not a foregone conclusion. It was based on my discussion with Nick this morning about his dinner last night.

Thank you.

**483. Speech by the External Affairs Minister Pranab Mukherjee at the Conference on "Business in and between India and the US- Legal and Regulatory Framework".**

**New Delhi, May 4, 2007.**

Mr. Lalit Bhasin, Ladies and Gentlemen,

I am very happy to be invited to speak at the opening of this conference on the legal and regulatory framework for business in India and the US. This initiative taken by the Indo-American Chamber of Commerce and the Centre for American and International Law is a timely one. I am aware of the commendable work done by both the organizations in their respective areas and I am glad that they have chosen to focus on an issue that is topical. I hope that the conference will provide an opportunity for meaningful discussions that, in turn, would result in recommendations to the two Governments and help us further strengthen our bilateral strategic partnership.

The recent upsurge in India-US relations has caught everybody's attention. Developments over the last few years, including the landmark reciprocal visits by Prime Minister Manmohan Singh and President Bush within the space of eight months in 2005-2006, have unfolded the full extent of the transformation underway between the two countries. There is a considerable

degree of expectation and excitement, not just in New Delhi and Washington, but in different capitals around the world. The agenda that the two countries are engaged in today is an impressive one, covering a wide range of economic and trade objectives, energy and environmental concerns, science and technology collaboration and defence and security cooperation. It is no wonder, therefore, that the strategic partnership between the two countries has truly matured into one of considerable substance.

At the same time, observers of the relationship, especially in the last two years, have devoted a significant proportion of their attention to the landmark India-US nuclear understanding. I am not trying to diminish the importance of this initiative in any way. In fact, much of the attention it has received is a reflection of its tremendous importance, including its impact in changing perceptions both among the public at large and within our two governments and we remain committed to implementing the understanding expeditiously in a way that it adheres as closely as possible to the framework of the July 2005 Joint Statement and the March 2006 Separation Plan.

However, behind all of this and away from the public eye, there has been a quiet but steady consolidation of many other vital aspects of our relationship, especially in our trade, investment and economic cooperation, the high technology and S&T cooperation, the energy dialogue, and cooperation in agriculture. These are also aspects of our partnership that have important developmental implications for us and where we feel the India-US partnership can be leveraged to fulfill some of our national development objectives. In that sense also, one must appreciate the full extent of the unique turn that this relationship has taken.

The economic aspect of our interaction, in fact, always provided a strong underpinning to our relationship, even when the level of political engagement was not quite where it is today. However, in recent times, the pace and scale of its expansion, engineered partly by India's own economic growth and partly through a series of active and joint government initiatives, have been quite impressive.

The US is today India's leading foreign investor and our largest trade partner. Ambassador Blackwill's erstwhile description of our trade being "as flat as a chapati" is now a thing of the past. We are now the fastest growing export market for the US with our bilateral trade growing by over five times in a period of 16 years from a modest \$5.6 billion in 1990 to \$31.92 billion in 2006. While the balance of trade has been in India's favour with Indian exports to US growing in excess of 16% last year to stand at \$22 billion,

US exports to India have also picked up in recent years. In 2006, they stood at over \$10 billion, almost 26% higher than the previous year's figures. In fact, over the last five years, US exports to India have doubled. Of course, we feel that a further easing of high technology restrictions on India can help narrow the trade deficit further and we remain engaged with the US to achieve this objective as a priority.

In the area of foreign investment too, US foreign direct investments since 1991 has been more than \$5.5 billion, accounting for more than 13% of the total FDI in the last 15 years. Besides, Foreign Institutional Investment from the US has also been on the rise - over 1/3rd of the FIIs are from the US. What is notable is that foreign investment is no longer a one way street. Reports of overseas investments by Indian companies, including through acquisitions, have become routine. In fact, Indian investments abroad last year matched investments made in India and a number of Indian business groups, such as the Tatas and Mahindras, are increasing their footprint in the US.

Even before the July 2005 visit of the Prime Minister, the two Governments had begun to focus on a reinvigorated economic partnership. A decision was taken to re-energize our economic dialogue that would focus on key areas that required high level attention. The results are there for all to see. We saw an important legacy issue of Dabhol set to rest. India and the US signed an open skies treaty that is set to have effect in areas much beyond the aviation sector alone. It is not just impacting on figures of aircraft procurements, but is also reflected in tourism figures. An agreement with the US Trade Development Agency in February 2005 to facilitate infrastructure investment has led to the USTDA partnering or promoting activities in areas such as patent training, agricultural biotechnology, cold chain system improvement, aviation cooperation, coal bed and coal mine methane clearinghouse and in oil and gas sectors. In the area of agriculture, we are implementing the bilateral Agriculture Knowledge Initiative which is premised on our experience of green revolution and the compelling need to revive that process to redress the imbalance in this sector which has not kept pace with overall growth of the Indian economy. Last, but not the least, the Indo-US CEO's Forum is fulfilling a vital role in providing practical recommendations on removing bottlenecks and bringing about policy changes that would bring the desired transformation in the way we do business with each other.

Given the fact that both countries are knowledge economies with very strong

technical and scientific manpower, high technology naturally underpins almost everything that we have started together in the past few years. The US is India's largest technology collaborator and the High Technology Cooperation Group, a private-public partnership focusing on the key areas of biotechnology, nanotechnology, information technology and defence technology, is charged with working towards facilitating and easing licensing restrictions in respect of India. As a result, from 24% of total U.S. exports to India requiring a license, we have today a situation where less than 1% of US exports have to be licensed. An important development in this area was also the signing of an S&T Cooperation Agreement in 2006. The Agreement has an IPR protocol that will help redress, along with India's Patent Act, the imbalance in patent generation within India. Space is another important area where our skills and comparative cost advantages can benefit both sides in partnership. Apart from cooperation on space science, earth navigation and space education, we have an agreement that will allow two US instruments to be included in our Lunar Mission Chandrayaan-I demonstrating the tremendous potential in this area.

A very important aspect of all that we do together in the economic sphere is our dialogue on energy. Secure and sustainable energy sources are vital for ensuring India's high economic growth rates and enable it to address the developmental challenges of the poorest of its citizens. We need to tap all sources of energy and keep our options in this regard open. It is an appreciation of this need that is at the heart of the India-US civil nuclear understanding and the larger energy dialogue which focuses on oil and gas, coal, power and energy efficiency and renewable energy and new technologies. The benefits are already visible. India became a partner in the US-led international Future-Gen near-zero emission power plant research project in April 2006. The US has also supported India's participation in the Integrated Ocean Drilling Programme, which we are likely to join shortly. In non-conventional energy, the focus has been on the development, deployment and commercialisation of technologies for sustainable and renewable fuels. In civilian nuclear energy, India joined the ITER fusion energy research project with the support of US and other key partners. These efforts are complemented by the participation of India and the United States - along with Australia, China, Japan and ROK - in the Asia-Pacific Partnership on Clean Development and Climate that seeks to provide technology and market solutions to energy requirements while meeting environmental challenges.

Ladies and Gentlemen, I have attempted to lay out the extent of the India-US economic partnership. The challenge lies in keeping the momentum going. We as Government are committed to the objective of realizing the full potential of this relationship. The natural affinities and complementarities between us have never before been so closely supplemented by a strong political convergence. I am hopeful that industry will continue to provide the lead in this area. We, in the Government, remain committed in the role of a facilitator. I also hope that at the end of this Conference, we will have a set of recommendations for the two governments. I wish the organizers and participants well. With those words,

I thank you very much.

**484. Press Release issued by the Prime Minister's Office regarding telephonic conversation between the Prime Minister and President Bush.**

**New Delhi, May 7, 2007.**

The Prime Minister received a telephone call from President George Bush this evening. The two leaders discussed matters pertaining to the agenda of the G-8 Outreach Summit due next month. The Prime Minister conveyed India's commitment to work with other countries to deal with the problems of climate change and global warming. He said that the problems of environment cannot be solved by perpetuating poverty in developing countries. The two leaders discussed the Clean Development Mechanism and agreed that the emphasis has to be on greater energy efficiency and the development of new technologies.

The two leaders also emphasized the importance of a successful conclusion of the Doha Development Round of multilateral trade negotiations. The Prime Minister said that India has a strong vested interest in the successful functioning of a multilateral trading system, and that India would like the Doha Round to adhere to the original understanding that it will be a development round. The Prime Minister said India would like to work with all like-minded countries to make a success of Doha negotiations.

The two leaders expressed happiness at the strengthening of the bilateral relations and reviewed developments pertaining to negotiations on bilateral civil nuclear cooperation. They also discussed other regional matters.

The President invited the Prime Minister to visit the United States again. The Prime Minister accepted the invitation and said mutually convenient dates will be worked out.

**485. Question in the Lok Sabha; “Combating illegal activities on high Seas”.**

**New Delhi, May 16, 2007.**

**Will be Minister of External Affairs be pleased to state:**

- (a) Whether the United States has asked India to join a world wide network to combat illegal activities in the high seas;
- (b) If so, the details thereof; and
- (c) The reaction of the Government thereto?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

- (a) No proposal has been received from US Navy in this regard.
- (b) – (c): Do not arise.

**Shri Chandrabhushan Singh:** Mr. Speaker, It has been repeatedly reported in newspapers that there were detailed discussions of Admiral Michel Maoulin with the defence personnel here. Why the Government wanted to keep it secret; and not giving the details? I want to know if our policy is pro-America? If it is so, the hon'ble Minister may like to give some information.

**Shri Pranab Mukherjee:** I have just answered the question. So far as India and the United States Defence cooperation is concerned, that is a different question altogether. I have never said that there is no Defence cooperation between India and the US. The question is: “(a) whether the United States has asked India to join a worldwide network to combat illegal activities on the high seas; (b) if so, the details thereof.”

There has been no proposal of joining an international, worldwide activity because there is no necessity as in 1982, the United Nations itself had a Convention; the United Nations laws on the crimes on the high seas. There is 1988 SUA Convention which deals with the maritime crimes on the high

seas. India being a signatory to both these international Conventions, there is no question of participating in any global exercises initiated by any individual country. I think, in response to that question I have stated.

If the hon. Member has specific question in regard to India-US maritime cooperation, I will be very glad to answer that question.

**Shri Chandrabhushan Singh:** Sir, in the second supplementary I ask you a straight question. The illegal activities that take place in our waters, why is our Navy unable to control them and why have they not been controlled?

**Shri Pranab Mukherjee:** This is a much larger question and that is why the international cooperation is sought for. It is very important that we should protect specially the sea lane which passes through the Indian Ocean because from Malacca Straits onwards it carries nearly 60 per cent of the world's energy supply. Therefore, the safety and security of this sea lane is very important.

But a large number of maritime crimes take place. Therefore, it is the international practice to seek the cooperation of the littoral countries, where actually the offences are taking place. For that, the international conventions under the United Nations are there. Indian Navy, Indian Coastguard and Indian Maritime Police are competent to deal with this and we have done so. In fact, in the past when a Japanese ship was hijacked, Indian Navy intercepted and released that. Similarly, when one of our ships was taken over by the pirates in the coast of Male, with the cooperation of the other littoral countries we have been able to rescue that. This type of practice and international cooperation are ongoing.

**Shrimati Maneka Gandhi:** Sir, previously a very limited form of crime on High Seas takes place. One of the biggest crimes now is the transport of wild life. For instance, to many countries, through Chennai, we are sending sea horses and other things, sometimes it is being caught by the Customs but most of the times, it is left out. The second place, for instance, is the line of Panama flag ships outside the Orissa coast, and they are all illegal. The coastguard is singularly ill-equipped.

Could the Minister tell me what has been done to stop the wild life crime on High Seas? Is there any question of bilateral pact with any countries because a lot of this crime is going on to China, to Malaysia, to Philippines and *vice versa*? Would the Minister please tell me about that?

**Shri Pranab Mukherjee:** Sir, human trafficking and trafficking of wild life

are the crimes against the international law. We are a party in all these international Conventions including the Conventions of 1982 and 1988, and we have the cooperation.

In respect of the effectiveness in addition to the Coastguard, it is incorrect to say that Indian Coastguards are ill-equipped. Yes, there may be a difference between the actual desire and the actual achievement, and always we are trying to do so. But if the hon. Member takes the trouble of going through the development of Indian Coastguards, which was established in 1978 and the development that has taken place till today, she will find that there has been a substantial development.

In addition to that, very recently we have developed cooperation between the Coastguard and the Marine Police, another institution under the Home Ministry to take care of the crimes which take place within the territorial waters but not within the jurisdiction of either the coastguard or the Navy. Despite that, sometimes this type of information comes that some wild life smuggling or trafficking takes place. Surely as and when we get the information, we get the intelligence, we intercept and we take appropriate action.

**Shri N.N. Krishnadas:** Sir, the three borders of our continent is surrounded by sea. So, illegal activities on High Seas are of more concern to our country.

Recently, a lot of incidents have been reported by the dailies and some other media. The fishermen from our seaside are captured by LTTE and some other illegal organisation also. Sir, from Kerala sea border also, a lot of fishermen are missing.

**Mr. Speaker:** You are going far way from the Question.

**Shri N.N. Krishnadas:** What are the steps being taken by the Government of India to combat this type of illegal activities and to find out the missing fishermen from our sea border areas?

**Mr. Speaker:** From USA, you have come to Kerala.

**Shri Pranab Mukherjee:** We have a bilateral agreement between India and Sri Lanka to protect the fishermen of India and Sri Lanka. Most of the times it is found out that the fishermen of one country cross the territorial waters of the other country. We have the arrangement between Pakistan and India in respect of such things which take place in the Gujarat coast.

Sometimes when the fishermen are arrested by other country, we make all efforts to get them released. This is a continuing exercise.

**Shri Saleem Shervani:** Sir, a number of times, when people indulging in illegal activities on the high seas or smuggling, are chased by our Coast Guards or the Navy, they dump their goods in the seas. Do we have any schemes by which we can try to retrieve these goods that had been dumped or put a value to these goods that had been dumped?

**Shri Pranab Mukherjee:** Sir, very recently we have done one, and we have received the appreciation that certain contrabands, explosives were being transported — of course, it was not dropped by interaction, it was dropped because of the accidents — and our Coast Guards and Navy combined, did an operation, to retrieve it. Sometimes, if it is possible to retrieve it, we do it. It is part of the exercise.

**486. Response of Official Spokesperson to questions following media reports<sup>U</sup> regarding a visit by US Under Secretary of State for Political Affairs Nicholas Burns.**

**New Delhi, May 17, 2007.**

In response to questions following media reports, the Official Spokesperson said:

"No particular date had yet been finalized. We are in the process of exchanging suggestions and examining them. We will let you know when a visit is scheduled."

---

<sup>U</sup> The Spokesperson was referring to the media briefing in Washington by the State Department Spokesperson McCormack who said; "Burns will go to New Delhi when we are ready to seal the deal. And we are not at that point yet," when asked to comment on when Burns will be going to New Delhi. "Nick's going to do what he thinks is appropriate and most effective in order to get a deal done. And at what point he travels to India, he's going to make that call. But he's going to do what he thinks is most effective in getting a deal. I know that there were some press reports about whether or not he was going this week or next week. I'm not aware that he has any travel plans, at this point, to go to India," McCormack said. "Now, if this comes up within the context of the 1-2-3 agreement, where are we in that? We are working on it. We are making progress on it. It's not completed yet. But I understand that, over the course of the past several weeks, there have been some positive discussions on concluding that agreement. "We certainly want to do that. We understand from the Indian government that they want to conclude that agreement as well," he added. McCormack was reminded that earlier this month at the time of the Indian Foreign Secretary's visit he was very optimistic that the deal can be closed by the end of this month. "I don't know if I said that it would be closed by month's end. I very rarely apply timelines to diplomacy. It inevitably proceeds more slowly than we would normally like. Sometimes we're surprised by that," McCormack said. "But there's a commitment here to get this agreement done. We would like to do it sooner rather than later. But these are important issues, important issues for us. They're important issues for India. They're important issues for the international system that deals with matter of nonproliferation and nuclear energy," he added. "So we want to get it done in a timely manner, but we also want to get it done right," McCormack said.

**487. Media Briefing by Foreign Secretary Shivshankar Menon on the visit of US Under Secretary of State Nicholas Burns and talks on the Civil Nuclear Energy Agreement.**

**New Delhi, June 2, 2007.**

**Foreign Secretary (Shri Shivshankar Menon):** I thought I would brief you on Under Secretary Burns' visit while it is still fresh in our minds.

We have had Under Secretary Burns here for the last three days. We have had three intense, productive, constructive days of discussions with him. Apart from the talks with Special Envoy Shyam Saran and me on the 123 Agreement, he also called on our leaders. Earlier this evening, he had a courtesy call on Prime Minister. Yesterday evening, he called on the External Affairs Minister, Shri Pranab Mukherjee. He has also met I think a wide range of leaders across the political spectrum.

We used the opportunity not only to do the 123 Agreement, but also to talk about regional issues, about global issues that interest us, and about the broader India-US relationship which, as you know, has been transformed over the last few years. Maybe, I will just run you through those discussions and then I would be happy to answer any questions that you might have.

On the 123 Agreement which took up most of the time, we have had, as I said, constructive and productive discussion. There were several issues which were still open when we started this discussion. We have managed to remove some from the table. We still have a few issues left where there is some distance for us to travel. Our goal in this exercise is to produce a bilateral cooperation agreement for civil nuclear energy which reflects fully the July 18, 2005 Joint Statement and the March 2, 2006 Joint Statement between Prime Minister and President Bush, and the statement the Prime Minister has made in Parliament.

We are still in the process of discussing the various issues. So, I do not want to go into the specific issues. In fact, I would not. We have an agreement among ourselves that we will not negotiate through the media, we will negotiate with each other. But I can tell you that as a result of the last three days' discussions, we have come much closer in our understanding of the issues that still divide us and we have managed to remove most of the issues from the table. It is our hope that when we do this agreement, which we both want to do rapidly, we will thereby make a major contribution to our own energy security to producing the energy that

India needs for her own development, in a clean and environment-friendly manner.

While in New Delhi, as I said, Under Secretary Burns called on the Prime Minister earlier today. This was a courtesy call. They reviewed the relationship as a whole, expressed satisfaction at the developments in the relationship, and looked forward to its further development. He called on the External Affairs Minister yesterday where the External Affairs Minister extended an invitation to Secretary of State Rice to visit India. It is possible that she will be coming within the next few months to India. We are working on that. They also covered regional and other issues and the broader relationship between our two countries. He called on the National Security Advisor also yesterday evening where again they covered both the 123 Agreement and the broader relationship.

All told, I think this has been a positive and useful visit. It has taken us some of the way forward towards the Agreement that we want, towards our goal or the 123 Agreement which actually reflects in legal terms the understandings that our leaders have arrived at previously.

Am I satisfied with the visit? Yes, I think we have achieved what we could, what we set out to do in this particular round. We have agreed that we will continue these discussions until we bring the discussions to a successful conclusion.

I would be happy to answer any questions that you might have.

**Question:** You said that you do not want to negotiate through media. But could you at least tell us the areas where you have reached agreement?

**Foreign Secretary:** Rather than doing that what I would like to do is to just say that we have made considerable progress towards this goal of an agreement which reflects July 18, 2005 and March 2, 2006 Joint Statements and what Prime Minister said in Parliament. But there are still issues where there is a gap. Maybe now, thanks to these discussions, we both understand each other's positions much better. We know what is possible. We even, in some cases, see a way forward towards resolving. But we need to sit and think about it. We will do a little thinking, they will do their thinking. This is normal. I think this is part of the negotiating process. So, I do not want to get into which issue is at which stage of resolution.

**Question:** I have pretty much the same question....

**Foreign Secretary:** I will give you the same answer.

**Question:** If you could at least tell us in 'yes' or 'no'. We know that the right to reprocess spent fuel has been at the heart of the differences we have had with them. Is that still an issue?

**Foreign Secretary:** That is one of the issues we discussed.

**Question:** You said that Mr. Burns met the Prime Minister. Was there any message from President Bush to the Prime Minister? Is any meeting between President and the Indian Prime Minister scheduled?

**Foreign Secretary:** I think they both will be in the Heiligendamm together on the 8th of June for the Summit. Now I think they are in the process of trying to schedule the meeting. But certainly they will have an opportunity to talk while they are there together.

**Question:** Did he get any letter or any message from President Bush?

**Foreign Secretary:** No, he did not.

**Question:** Have you set any dates or deadlines for finalizing the agreement?

**Foreign Secretary:** We are optimistic that we will have an agreement. But, as you know, I have never tried to set dates for this, or to set deadlines because I do not think that is the right way to negotiate something that is so complicated where the issues are really interlinked. Therefore, to start saying that we have done one issue and not done the other, actually does not reflect the situation properly. Many of these issues are interlinked. It is a complicated agreement. It is the first time I think we are trying to have such an agreement, both of us. Both, I think, have the will to bring it to a successful conclusion. But I do not think that setting dates or deadlines is really the way to go about.

**Question:** You said that both sides are trying to give a legal expression to the two Joint Statements. Are the United States and India on same page as far as the whole set of commitments which ...(inaudible)... It is an acknowledged fact that ...( inaudible)... is an integral part of the July ...( inaudible)...

**Foreign Secretary:** I think that is exactly what we are establishing with this agreement. When we have the agreement we will say, "they are on the same page entirely." I think we are closer and closer to being entirely on the same page. That is what this negotiation process is about. But the

problem here is I think that, as I said, these are interlinked issues. So, it is not possible to say, 'Yes, on this issue we are on the same page, on this issue we are not', because they all affect each other.

**Question:** Is it difficult to reach the (123) agreement within the legal framework if there is no agreement at the political level?

**Foreign Secretary:** This is a chicken-and-egg situation. We have a political understanding already. I think it is a question of reducing that to a legal framework. I think that is what we are doing.

**Question:** You said there was a gap in understanding in some of the issues. Do you want to tell us what that is?

**Foreign Secretary:** No.

**Question:** Is there any thought that we could be running out of time? Is there a possible timeframe (that) you are looking at to wrap up the discussions? When could the next round of talks be held?

**Foreign Secretary:** We both like to do it very quickly, the quicker the better, quite frankly. But, as I said, we are not setting deadlines for ourselves. I do not think we are saying that we will do it by this date or that date. What we have agreed today is that we will meet again, we will discuss this again. We both need a little time to think over what we have done over the last few days. Then we will re-engage whenever it suits both of us.

**Question:** How many rounds of talks have been completed between the two countries so far?

**Foreign Secretary:** Formal rounds - four. But this is a subject that we have been discussing in various conversations whenever we met at various levels. Yes, four is the formal number of rounds that we have had. But I do not think it reflects the reality of the nature of the engagement.

**Question:** Have any dates been finalized for Prime Minister's visit to the US?

**Foreign Secretary:** I think we have not set dates for the Prime Minister's visit yet. What we are now looking at is a visit in the next few months by the Secretary of State. We still have to agree dates. But I think when the External Affairs Minister extended the invitation yesterday we were looking at dates sometime towards the end of July and beginning of August.

**Question:** *You don't want to tell the issues on which there is no agreement. Can you tell the issues on which agreement has been reached?*

**Foreign Secretary:** *If I tell that then you know the other too.*

**Question:** *What is the distance between agreement and no-agreement?*

**Foreign Secretary:** *Agreement is on a large number of issues. The differences are very much narrowed down, much less than before. Each time we talk we try to enlarge the area of agreement; and this has increased a lot than before.*

**Question:** *What is the percentage of agreement and disagreement?*

**Foreign Secretary:** *We cannot calculate the percentage.*

**Question:** *According to you how far is Delhi?*

**Foreign Secretary:** *I am already in Delhi. I was saying that I don't want to into percentage nor into the distance. When it is done we will tell you that it is done. But the talks will continue.*

**Question:** Mr. Menon, since we want to know something more than you want to tell us, Mr. Burns is not here and you are not addressing the Joint Press Conference, shall we understand something more out of that? What does it mean?

**Foreign Secretary:** It only means that Mr. Burns has to catch a flight and he has gone to the airport. That is what it means.

**Question:** One of the issues you have to resolve is the sequencing arrangement like when we deliver on the IAEA safeguards and other things etc. Is this technical delegation level talks the forum where the problems would be addressed or they will be addressed at some other level?

**Foreign Secretary:** I think what we are trying to do is to do all these processes simultaneously. Obviously we need a bilateral civil cooperation agreement before we have something that needs to be safeguarded. But we have begun our contacts with the IAEA to discuss an India-specific safeguards agreement and those discussions have gone well, positively. Once we have a bilateral civil cooperation agreement with the US, we would then I think be in a position to actually move further forward on the IAEA safeguards agreement and go to the NSG for the necessary exemption. I think ultimately our goal is to have it all done, and the quicker we can get all three done, the better.

**Question:** Has any date been agreed for the next round of talks?

**Foreign Secretary:** No, we have not agreed a date.

**Question:** Sir, by any chance was the letter written by the Senators raised in the discussions?

**Foreign Secretary:** No.

**Question:** *The next talks will be between you and Burns or at some other level? The problems that India has with the Hyde Bill, it is evident if America agrees with the Indian objections, then America will have to go back to the American Congress. If India agrees with America then it is answerable to its own Parliament. What is the middle way?*

**Foreign Secretary:** Let me be precise. The US Administration has assured us that nothing in the Hyde Act prevents them from implementing their obligations under July 18, 2005 and March 2, 2006 Joint Statements. Our task is to reduce those understandings into a legal agreement. So far we are well on the way to doing so. As I said, we are close to actually doing so. When we finish that task, we will be able to confirm to you whether or not anything in the Hyde Act prevents the US Administration from fulfilling its obligations as we understand them under those two Joint Statements. I think that is the position today. Our job is to reflect those understandings in the agreement. So far we have been assured nothing prevents that. So far we are moving forward steadily.

**Question:** *What are the issues for which America will have to answer its own Congress and India its own Parliament?*

**Foreign Secretary:** *When you will see the agreement, every thing will be clear. Thank you very much.*

*(The text in italics is translation from the Hindi text)*

**488. Press Release issued by the Ministry of External Affairs on the visit of US Acting Under Secretary of State for International Security and Non-proliferation John Rood.**

**New Delhi, June 14, 2007.**

A delegation led by Mr. John Rood, US Acting Under Secretary of State for International Security and Non-Proliferation held bilateral talks with an Indian delegation led by Shri K.C. Singh, Additional Secretary (International Organisations) in the Ministry of External Affairs. Discussions covered a wide range of issues, including global nuclear non-proliferation challenges, export controls and regional and global efforts to prevent proliferation. During his visit, Mr. Rood also called on Foreign Secretary, Shri Shivshankar Menon and Special Envoy of Prime Minister, Shri Shyam Saran.

**489. Ambassador Ronen Sen's address at the Centre for Strategic and International Studies - Japan Institute of International Affairs Conference: "Building Strategic Asia - The United States, Japan and India".**

**Washington (D. C), June 28, 2007.**

I greatly appreciate the initiative taken by the Center for Strategic & International Studies (CSIS), to hold a conference in collaboration with the Japan Institute of International Affairs (JIJA), on the role of India, Japan and the United States in the strategic architecture of Asia.

India has had historical connections with East Asia and with South-East Asia. A Portuguese observer once described South East Asia as the place where two monsoons meet. Ships from India would ride the south-west monsoon in April to South-East Asia and return to India on the north-east winds in October. These links were buttressed by the trade winds of the China Seas to East Asia. There were also the strong influences of Buddhism and the epics of Ramayana and Mahabharata that linked India with the Asia-Pacific region. These ties were weakened, initially by European colonialism, and later by cold war politics and our retreat into a protected economy.

These old links between India and the Asia-Pacific region are now being revived and revitalized due to a number of reasons. First, India's economic reforms and integration into the global economy have made the restoration of our ties with the Asia-Pacific region an inevitable and natural consequence. Second, at the intellectual level, the Nalanda Initiative involves the reconnection of India with a number of East and South-East Asian countries in areas of historic relations. Third, at the strategic level, India's Look East policy envisages Japan as a key partner in East Asia. Fourth, there are growing economic complementarities and political convergences between India and Japan, and this relationship between the two large Asian countries has a legacy of goodwill, unencumbered by any historical baggage. Finally, and I would like to stress this, we also recognize the United States as a major Pacific power. At a time when India-US relations are rapidly expanding in scope and content, it is only natural that this Pacific facet of the United States should correspondingly be factored into India's Look East policy.

It is in this overall background that the idea of trilateral cooperation between India, the US and Japan has been gaining ground in recent times. I would, however, like to spell out in somewhat greater detail my perception of the rationale for such trilateral cooperation, flowing from which we can perhaps evaluate the future prospects of such cooperation.

India, the United States, and Japan have shared values and aspirations of democracies based on the rule of law. The US and India have taken initiatives to promote democracy, by taking the lead in setting up the UN Democracy Fund. India, Japan and the US cooperate closely in the Community of Democracies and in other forums.

All the three countries also recognize that democracy and development are not just compatible but are inextricably linked. India has demonstrated that, not just in developed but also developing countries, free markets work best and are most sustainable in free societies. India's foreign trade is growing at more than double the rate of its high economic growth, but our growth will be propelled more by our domestic demand than by our exports. Democratic and free market economies also contribute to stability. Both the US and Japan are thus aware that India's inevitable rise as a major world economy will be a factor of stability in Asia and globally.

India-US bilateral merchandise trade is over \$ 32 billion, and India-Japan merchandise trade has doubled from just about \$ 4 billion in 2002 to \$ 8.6 billion in 2006. While Indian exports to the US grew by 16% last year, US

exports to India grew by 26%. Coincidentally, Japanese exports to India grew at an almost identical rate of 26.8% in 2006. A Japan-India CEOs Forum was established on the lines of the India-US CEOs Forum set up in 2005. All three countries realize that the potential for economic cooperation is just beginning to be tapped. Japan is playing an important role in upgrading of India's infrastructure, particularly in urban transport and fast rail cargo corridors between major cities.

In harnessing high technologies for socio-economic development there are significant potential avenues of mutually beneficial cooperation between the USA, the world's greatest center of innovation, Japan; with its centers of excellence in modern technologies, and India, which has a large and growing pool of talented scientific and technical manpower. The successful conclusion of a India-US agreement on civil nuclear energy cooperation would give additional momentum to cooperation in other areas of high technology, including biotechnology, nanotechnology and defence technologies. India has ongoing space collaboration with both the US and Japan, based on research and development in this field by all three countries.

Energy security is another key element of convergence of interests of India, Japan and the US. All three countries are highly dependent on imported hydrocarbons. All three have high stakes in diversifying their energy portfolios with new and clean sources of energy. All three are partners in the ITER fusion project, the FutureGen clean coal initiative, the Asia-Pacific Clean Development Partnership and similar projects. All three countries also have vital stakes in the security of sea lanes in the region.

India, the US and Japan attach the highest priority to preventing the spread of weapons of mass destruction, especially nuclear weapons. The three countries also attach top priority to combating terrorism. India has joint working groups on counter-terrorism with the United States as well as Japan.

One of the visible instances of recent collaboration between India, Japan and the United States was the committing of their defence assets to managing the immediate aftermath of the tsunami disaster in the Indian Ocean for relief and rehabilitation. In June 2005, the Defence Ministers of India and the USA signed a Defence Framework Agreement setting out the common interests of both countries in maintaining security and stability, defeating terrorism, protecting the free flow of commerce and preventing the spread of weapons of mass destruction and associated materials, data and technologies. In May 2006, the Defence Ministers of India and Japan

issued a Joint Statement mapping out the common vision of both countries for enhanced security cooperation. The Navies of India, Japan and the US have held bilateral exercises. In April this year the first trilateral naval exercises between the three countries were conducted south of Japan.

The intersection of the shared interests of the three countries finds its reflection in multilateral institutions. India and Japan have staked their rightful claim to permanent membership of the UN Security Council. India, Japan and the US are all full Dialog Partners of ASEAN and members of the ASEAN Regional Forum. India and Japan also work together in forums like the East Asia Summit and Asia-Europe Meeting (ASEM). Both Japan and the US were Observers at the Summit meeting of South Asian Association of Regional Cooperation (SAARC) in New Delhi in April this year.

During the visits of our Prime Minister, Dr. Manmohan Singh, to the United States in July 2005, and his visit thereafter to Japan in December 2006, extraordinary decisions were taken to raise these relationships to unprecedented levels which underscored the strategic parameters of India's bilateral and global partnership between these two countries.

It is thus evident that the trilateral interaction of India, the United States and Japan did not emerge from a decision to forge a new grouping or alliance. The trilateral cooperation is essentially evolving from the recognition of the growing convergence of ideals and interests of the three democracies and the desirability of channeling these in a constructive and cooperative direction. All the three countries have a tradition of contributing to the international system. Whether it is foreign aid, technical assistance or responding to global challenges, none of the three have pursued a mercantilist approach. This determines in many ways the agenda for a developing trilateral relationship. Issues ranging from countering terrorism, responding to pandemics, protecting the environment, addressing illegal trafficking in drugs, arms and people, promoting stability and prosperity, are thus among the many avenues of enhanced cooperation between India, Japan and the United States.

**490. Statement by Official Spokesperson in response to questions regarding reported statement by US Secretary of State.**

**New Delhi, June 29, 2007.**

There can be no question of India's firm and abiding commitment to non-alignment. The Non-Aligned Movement<sup>1</sup> played a significant role in ending apartheid and colonialism. Today, its relevance continues in promoting South- South cooperation and the democratization of the international system. India remains committed to its ideals.

- 
1. The statement came in response to the observation of the US Secretary of State Ms. Rice who while speaking at the 32<sup>nd</sup> anniversary celebrations of the US-India Joint Business Council meeting in Washington on June 28 had said "I know there are some who still talk about non-alignment in foreign policy. But may be that made sense during the Cold War when the world was divided into rival camps." The External Affairs Minister speaking in Jalpaiguri (West Bengal) also on June 29 said "We don't believe that the movement has lost its relevance. It has acquired contemporary relevance in fostering cooperation among the developing nations, particularly known as South – South Cooperation." He went on to remind that "India is a founding member of the NAM and believes that the movement has contributed substantially to the struggle against colonialism and apartheid policies in the post-Second World War period. There is no apparent contradiction in expanding cooperation and democracy of the world and the NAM." At the same time, Mr. Mukherjee said India was equally interested in developing and widening cooperation with the U.S.
- On the question of India – US civil nuclear cooperation Ms. Rice described it as one of the "keys" to the bilateral partnership that was "a win-win" for the two nations. She said she was "certain" that the two countries "will be in a position to complete this deal by the end of the year." "This is a huge step forward. We're not quite there yet. But with will and determination and more hard work to do, I am certain that we will reach final agreement and be in a position to complete this deal by the end of the year" the Secretary of State said, adding "I think that this is a win-win if ever there were one." "It was only a matter of time before two leaders who were visionary enough realized that they had to break this particular logjam so that the US-India relationship can flourish," Secretary Rice said, adding "and I myself am dedicated to getting it done and we need to get it done by the end of the year....It is possible and when we have done this, we will open even more doors in business and science, in agriculture and development, for energy and the environment, and of course, perhaps most importantly, to help strengthen and safeguard international security".

**491. Press Release of the Ministry of External Affairs on the telephone conversation between Prime Minister and President George W. Bush.**

**New Delhi, August 14, 2008**

United States President George W. Bush today called the Prime Minister to convey the greetings of the Government and people of the United States on the 60th Anniversary of India's Independence.

2. President Bush also conveyed his Administration's sympathies on the recent floods in India.
3. While thanking the US President, Prime Minister said that India was well on the way to fulfilling the dreams and aspirations of its founding fathers, and of its people.
4. The two leaders also took the opportunity to review the status of Indo-US relations in several areas, including in the area of civil nuclear energy cooperation. They expressed their satisfaction at the mutually beneficial and cordial nature of relations currently existing between the two countries.

**492. Meeting of External Affairs Minister Pranab Mukherjee with the U. S. Secretary of State Condoleezza Rice.**

**New York, September 26, 2007.**

External Affairs Minister Pranab Mukherjee met U.S. Secretary of State Condoleezza Rice here on September 26 to review bilateral issues. Meeting on the sidelines of the United Nations General Assembly session, the two discussed "a gamut of items of cooperation" and international issues of concern.

After the parleys between the two sides which stretched for 45 minutes, Mr. Mukherjee said it was a "good meeting." Ms. Rice and Mr. Mukherjee expressed satisfaction at the growing bilateral relations and cooperation in various fields. "The two leaders reviewed bilateral relations across the gamut of items of cooperation. They also considered the international situation and exchanged views on issues of concern."

**493. Remarks by External Affairs Minister Pranab Mukherjee at Council on Foreign Relations, New York, on "India's Foreign Policy and Future India-US Relations".**

**New York, October 1, 2007.**

Ambassador Carla Hills, Dr. Richard Haas, Ladies and Gentlemen,

Thank you for inviting me to the Council on Foreign Relations. I thought I might share some thoughts with you on India's foreign policy and the future of India-US relations. Yogi Berra is sometimes credited with having said that it is difficult to make predictions, especially about the future! I am, nevertheless, sufficiently confident that, extrapolating current trends and developments, the future of India-US relations is strong and the graph is on the ascendant.

India's approach to the world is naturally a function of our values, our history and geography, and of how we define our interests. Our strategic perspectives in the last sixty years have been a product of the historical aberration that was the early twentieth century. Throughout history, India had been a society that was open, pluralistic and intensely engaged with the rest of the world. Yet, in 1947, independent India found herself restricted by the Cold War world and reduced by colonialism to poverty, disease and famine. In the beginning of the 18th century, India accounted for about a quarter of the world's wealth, roughly equal to that of all of Europe combined. By independence, our share in global output had plummeted to less than 4%. It is thus not surprising that our primary objective, since independence, has been to improve our people's lives by regaining our position as a major global economy within a pluralist, secular, socially equitable and democratic framework. In making this effort, India has also decisively demonstrated that democracy and development are not only compatible but also necessary for ensuring sustainability.

The primary task of Indian foreign policy since 1947 has naturally been to enable the transformation of India's society and economy, restoring traditional patterns of dealing with the world, and building strategic autonomy of choice.

Judging by the results, our foreign policy choices have served the nation well. For more than two decades, India has recorded average annual GDP growth of around 6%. In the last four years, this has risen to over 8%, with the result that India is now the fourth largest economy in the world in

purchasing power parity terms. Historically unprecedented transformations and improvements in the people's living standards have taken place in India in the last few decades. Yet, much remains to be done. If we are to abolish mass poverty in India, we need to grow at 8 to 10% every year until 2020. Our record suggests that the goal is achievable, given considerable effort and the right policy responses, as well as a supportive and peaceful international environment.

Among the reasons that give us this confidence in India's future efforts to develop, one of the major factors must be the democratic nature of our polity. Democracies by their very nature are predictable. This may seem paradoxical, given the fact that democracies tend to be fractious and full of competing political agenda and ideologies. However, because democracies are based on a popular mandate and governments are answerable to the people, there is an underlying continuity in the policies of elected governments.

The predictability of India's foreign policy can also be ascribed to the fact that it is based on principles and a broad national consensus. Our world-view, reflecting the vision of leaders like Mahatma Gandhi, Jawaharlal Nehru, Indira Gandhi and Rajiv Gandhi, also bears the indelible influence of our civilizational heritage and our historical experience. As a secular polity, India shares the values of fundamental human rights and freedoms with other liberal democracies. Thus, quite apart from its size, population, economy and politics, India's civilizational values make it a natural bulwark against fundamentalism and terrorism and a factor of peace and stability in Asia.

Other reasons for confidence in India's future are our demographic trends and human resource base, which are two of our strongest assets. Some 550 million Indians out of our billion plus population are below the age of 25. The middle class of over 300 million people is growing steadily. Our universities produce over 2 million undergraduates each year. India's comparative advantage in knowledge driven economic activities is a direct result of our demographics and education policies. We seek today to replicate the successes of the IT industry in the fields of biotechnology, pharmaceuticals and other knowledge intensive areas.

Ladies and Gentlemen,

In the evolving geo-political and economic situation in the world, India needs a stable, peaceful, democratic and prosperous periphery for its own and

the region's future. If India is to grow rapidly and transform herself, we need a supportive and peaceful regional environment. This is why the present situation in Myanmar concerns us deeply. We urge a broad-based and inclusive process of national reconciliation and peaceful reform to lead Myanmar's political evolution. Bloodshed in this situation is unacceptable. India will work with like-minded countries to make a peaceful outcome possible in Myanmar.

Indeed, in its neighbourhood, India today sees difficult transitions to democracy all around: in Pakistan, Afghanistan, Nepal and Bangladesh. We have strongly supported the positive movement towards democracy and development in Afghanistan and Nepal in the last four years. Over 3500 Indians are in Afghanistan, engaged in that country's peaceful reconstruction. In each of these neighbors, it is for the people themselves to make their choices about the nature and direction of their own governments. India's interest is in a stable and peaceful periphery, and we will continue to work with our neighbors to achieve this goal.

One of our primary strategic challenges is to restore traditional linkages within our region and between the region and the rest of the world. Connectivity would enable India's reintegration into the immediate and extended neighborhood, whether in Central Asia or South East Asia or West Asia. This has led us to pursue actively cooperative arrangements such as SAARC, BIMSTEC and our dialogue with ASEAN. The web of preferential and asymmetrical trading arrangements that India has built up or is working on with her neighbors is designed to further a vision of common and indivisible prosperity. This is also what is behind India's consistent initiatives to improve relations with Pakistan, which have borne some fruit in the last three years, but which need to be pursued to their logical conclusion through dialogue in an atmosphere free of violence.

Further afield, India's political and economic ties with the Asia-Pacific region are also growing through institutional mechanisms such as the East Asia Summit. We are also pursuing high-level dialogue with major powers through the India, China and Russia trilateral forum and the India-Brazil-South Africa group, and also developing closer linkages with major powers like the United States, Japan, the European Union and Russia.

In today's world, as interdependence among the major powers grows, each of us is engaging the other. Today, India enjoys strategic partnerships of one kind or another with as many as eleven countries and the EU. Our strategic partnership with the US has strengthened our relationship

bilaterally, in the region and in the world. It is also clear that the development of closer relations between India and any one strategic partner will not be at the expense of relations with any third country.

Ladies and Gentlemen,

The Indian Ocean littoral today has greater economic and strategic value to the world economy than ever before. India has a natural and abiding stake in the safety and security of the sea-lanes of communication from the Malacca Straits to the Gulf. We have endeavoured to promote greater cooperation between Indian Ocean littoral states. Existing or emerging threats of piracy, drug trafficking, proliferation of weapons of mass destruction, closure of choke points, environmental hazards, regional conflicts and other developments are of equally vital concern to us.

As we look around the world, the defining characteristics of the Cold War era, namely, conflicting ideologies and opposing military blocs, are being transformed by the imperatives of globalization, interdependence and connectivity. When I look at the issues of the future, namely, energy security, the environment, food security, and the possible spread of WMD, it is clear to me that each issue will require all states, and particularly countries like India and the USA, to work together. The new challenges that are emerging, including protecting the electronically connected and inter-dependent world from terror and organized crime, are immensely complex. Handling this complexity requires much closer international cooperation than has been the case till now. It is also naive to expect the international system to deal with such complex and significant issues without democratizing international decision-making. Globalization and integration require that the UN and its Security Council be changed dramatically to reflect present day realities.

On a number of these emerging issues, such as disaster relief, HIV/AIDS and other pandemics, new initiatives have been taken for closer India-US collaboration. A telling example of the possible cooperation in these areas is the seamless coordination by our two countries to assist our neighboring states affected by the tsunami disaster of 2004.

If India is to realize its economic potential, it will also need alternative sources of clean energy. Foremost among them is nuclear energy. The bilateral civil nuclear cooperation agreement that India and the USA have finalized indicates the way forward, which should lead to the lifting of technology restrictions and the opening up of cooperation in this field with several countries.

Ladies and Gentlemen,

The future trajectory of India-US ties should be clear from what I have described as India's foreign policy preoccupations and priorities. Today, India and the USA have an objective convergence in several areas: in values and interests, in areas ranging from economic development to the dangers of proliferation of WMD, and in terrorism. There is much that India and the USA need to do individually and together. Each of us brings to the relationship complementary skills and attributes. We are aware of the challenges that continue to confront our own country. But these challenges also translate into opportunities. In infrastructure or energy, telecommunications or manufacturing, they create opportunities for economic partnership between India and the United States.

I anticipate that there will be underlying predictability and transparency in India US bilateral ties, because this relationship answers to the aspirations and interests of the people of both countries. The links between our two countries are multi-layered. The large and vibrant Indian-American community constitutes a vitally important bridge closely connecting many millions of citizens of both our countries. Parallels of such significant and broad-based popular stake holding in bilateral relations are rare.

Ladies and Gentlemen,

Another important aspect of our relationship with the United States is that it is of mutual benefit. India's rapid economic growth is propelled not primarily by exports, but much more by growing domestic consumer demand and increasing investments. Our growth will thus not be at the cost of other countries. It will, in fact, be a major stabilizing force in the global economy. This is reflected in recent trends in India-US trade, where US exports to India are growing much faster than US imports from India. Investments are now also flowing in both directions. In terms of the global economy, India and the United States have shared concerns on critical issues, such as energy security. Both our countries are, for instance, interested in the stabilization of oil and gas prices at reasonable levels and in reduced dependence on fossil fuels.

In advanced areas like nuclear energy and space exploration, a sound indigenous base has been built that enables India not only to absorb high technology but also to collaborate with the United States in new fields. We remember US contributions in building centers of excellence in India in science and technology and agricultural research. This collaboration led,

amongst other things, to the Green Revolution and self-sufficiency in food. India believes that advanced technologies must be used and managed with care and a sense of responsibility. Our systems of protecting advanced technology show an increasingly apparent convergence.

Ladies and Gentlemen,

I have touched briefly on some of our foreign policy concerns and priorities and on trends in India-US ties. In sum, our relationship has never been better than it is today. I am confident about its future.

Thank you.

**494. Response of Official Spokesperson to a question on telephone conversation between External Affairs Minister Pranab Mukherjee and United States Secretary of State Condoleeza Rice.**

**New Delhi, October 30, 2007.**

External Affairs Minister Pranab Mukherjee had a telephone conversation with US Secretary of State Condoleeza Rice in the late evening of 29th October, 2007. The conversation covered issues of mutual interest including the India-US Agreement for Cooperation on Civil Nuclear Energy and regional issues.

**495. Question in the Lok Sabha: “Logistic support agreement with USA”.**

**New Delhi, November 21, 2007.**

**Will the Minister of External Affairs be pleased to state:**

- (a) whether the Government proposes to enter in to a Logistic Support agreement with USA;
- (b) if so, the main features of the Agreement; and
- (c) the extent to which this Agreement is likely to affect India’s foreign policy?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

- (a) & (b) Government are in the process of considering a Logistics Support Agreement with the USA as a facilitating framework for mutual logistical support when deploying defence resources in disaster relief operations or joint exercises and without commitment for assistance in situations of armed conflict.
- (c) The Agreement will not affect the independence of India’s foreign policy. The logistical support that will be provided in disaster relief operations abroad will enhance India’s ability to assist affected countries efficiently.

**496. Joint Press Statement after the meeting of the India-US Joint Working Group on Counter-terrorism.****Washington (D. C), November 29, 2007.**

The India-US joint working group on counterterrorism met today to discuss bilateral cooperation in fighting the global menace of terrorism. The Indian delegation led by Ambassador K.C. Singh, Additional Secretary for International Organizations at the Ministry of External Affairs of India met over a full day with the US delegation, led by the Coordinator for Counterterrorism, Ambassador Dell Dailey, who hosted the delegation.

2. Both sides strongly condemned terrorism in all its forms and manifestations and underscored it as a major threat to democracy, pluralism, international peace and security. They reiterated that there can be no justification for any act of terrorism on any grounds. It is imperative for the international community to come together to combat terrorism in a long term, sustained and comprehensive manner.
3. India and the US called upon all states to abide by their commitments under the UN Global Counter Terrorism Strategy adopted by the UN General Assembly in September 2006 and called for finalization of the draft UN Comprehensive Convention on International Terrorism expeditiously.
4. They discussed, inter alia, regional counterterrorism efforts, threat assessments in South Asia, Middle East and South East Asia, bioterrorism, on-going Anti-terrorism Assistance Training Program and co-operation in the field of forensic epidemiology. Other issues discussed include terrorist finance and money laundering, ideological dimensions of terrorism, information sharing and widened cooperation for preventing terrorist acts. Both sides agreed to identify measures to strengthen institutional linkages leading to closer interaction and cooperation.
5. The next meeting of the counter-terrorism joint working group will take place in New Delhi in 2008 on a mutually convenient date.

**(ii) CENTRAL AND SOUTH AMERICA**

## BRAZIL

### 497. Briefing by Official Spokesperson on engagements of the Brazilian Foreign Minister in New Delhi.

New Delhi, April 13, 2007.

**Official Spokesperson :** .....The Foreign Minister of Brazil is in town. Yesterday, he called on External Affairs Minister, Shri Pranab Mukherjee who came to office and met him for half an hour. We had issued some briefing points thereafter but most of them seem to have either missed the deadline or some other problems happened. But, I will reiterate to you the sense of the meeting yesterday. They covered bilateral issues, particularly in the context of the forthcoming visit of President Lula of Brazil which is expected in June this year. They also reviewed cooperation in multilateral fora where Brazil and India traditionally have had close cooperation across the spectrum of multilateral issues. In particular, they covered cooperation in the IBSA context as well as members of the G-4 in the context of UN Security Council reforms, including expansion of the Security Council. They covered WTO issues and there were G-8 and Outreach issues discussed - Brazil and India both being Outreach countries. EAM also took the opportunity yesterday to brief the Brazilian Foreign Minister on the recent SAARC Summit held in Delhi. Mr. Amorim also invited the External Affairs Minister to visit Brazil and this visit is expected to take place later this year.

The Joint Commission meeting which was held- this was the third India-Brazil Joint Commission meeting - covered a very wide range of issues. You can pick up copies of the Joint Communiqué. But once again, both bilateral and multilateral issues, G-4 initiative, IBSA dialogue, G-8 and Outreach - these were the multilateral issues that were covered. Cooperation in bio-fuels was covered bilaterally as well as trade issues, you know with the target being \$10 million. The visit has also seen a call by Mr. Amorim on the Prime Minister this morning as well as a meeting with the National Security Advisor on the 12th of April with which the Strategic Dialogue between the two countries has been launched. Minister of State Shri Anand Sharma also hosted a lunch in the Brazilian Foreign Minister's honour and you may also have seen a copy of the Joint Press interaction they had this morning. That is more or less all from my side.

**498. Joint Press Interaction of Minister of State Anand Sharma with Brazilian Foreign Minister Celso Amorim.**

**New Delhi, April 13, 2007.**

**Minister of State for External Affairs :** Friends, the visit of Mr. Celso Amorim, the Foreign Minister of Brazil and members of his delegation, which includes senior officials of the Government of Brazil, representatives of various Ministries and also representatives of the business, especially some distinguished leaders in the corporate sector, has been very fruitful.

During his stay here, Minister Celso Amorim has discussed the bilateral relationship between our two countries which is clearly now a strategic partnership between the two countries. He has met with the Prime Minister this morning and had detailed discussions on identified areas of shared interest and also cooperation between the two countries which is, as I mentioned earlier, fast expanding.

Minister Celso Amorim also had a meeting with the External Affairs Minister Shri Pranab Mukherjee yesterday who is recovering from his recent accident. He has also met with the National Security Advisor. This is the first strategic dialogue between the two countries as was agreed during the historic visit of Prime Minister Dr. Manmohan Singh to Brazil last September on the eve of the first IBSA Summit.

During his stay, Minister Amorim will also share that with you, he also had meetings with our Commerce and Industry Minister Shri Kamal Nath, and a meeting which was dedicated to the Doha Development Round and the issues related to that in which the representatives of EU, USA and Japan were also present. That has also taken place during his stay here.

The discussions which we have had today have recorded the areas of cooperation, the progress which we have made. If I may just briefly mention one or two things, cooperation in the field of energy, agriculture, health care which includes pharmaceuticals, information technology, education including educational linkages of institutes of excellence, tourism, culture, has been discussed. We are keen to pursue our efforts to take the bilateral trade to ten billion dollars by 2010. We have also discussed the issue of connectivity, maritime as well as air linkages. We are now looking forward, after the visit of Minister Amorim, to have follow-up actions on what we have discussed in some of the iden-

tified areas and prepare for recording not only the progress but formal agreements in some fields during President Lula's visit.

**Brazilian Foreign Minister** : Thank you very much. My good friend Anand Sharma... (Inaudible)... several times now....(inaudible)...close partners and friends. I would just like first of all to say how happy I am to be in India once again. More important than that I would mention that President Lula ..(inaudible)...for Prime Minister Singh last year. Now again President Lula is coming to India which is very significant. The two leaders meet so often apart from the meetings in the United Nations or in the context of G-8 Plus 5 and many other contexts. So, I would like to underline that when we speak of a strategic partnership, these are not just empty words or that is not a formality. We have really developed a very intense dialogue in matters that are of great interest for Brazil and India but I would say for the world, like reform of the United Nations, especially, the reform of the Security Council. We have very important partnership also in relation to the WTO.

We are both members of the G-20 and we are starting now a very important on dialogue on strategic matters, as was mentioned by Mr. Sharma. Apart from that I think Brazil and India, together with South Africa, form the very important and very original forum which is the IBSA - India, Brazil, South Africa - which is a forum of three great democracies one in each part of the developing world. So, I think in all these aspects, I could go on and on mentioning others, breaks and so on and so forth. But from whatever angle you look at it - economic, trade or political - our countries are having an intensive dialogue.

I would also like to say that although our countries have for a long time looked at each other with admiration and interest it is only now that we are really giving concrete substance to that relationship. I think the sectors that were mentioned here by Minister Anand Sharma speak for themselves. We deal with questions that have to do with infrastructure, with space technology, with agriculture, but also with the film industry, culture and sports. I think it is a broad partnership. As I said, it would be impossible to summarise. I think the minutes will be distributed to the press so they will know precisely the different areas. But all these different activities are a part of a broader effort to bring our countries closer together. I think this bringing our countries closer together expressed in this symbolic target, symbolic but very real, of ten billion dollars bilateral trade by 2010 will be good for India, good for Brazil, and I would hope to say also good for mankind. So, I would like

once more to thank, of course, very specially the Prime Minister Manmohan Singh but also my colleagues Mukherjee, Kamal Nath and Anand Sharma for the reception I have myself and all my delegation received during this very busy but also very productive visit to India. Thank you.

**Question :** The question is addressed to both the Ministers. The G-4 Initiative appears to have lost its initial momentum and drive. To a lot of people it appears to be going nowhere. What are India and Brazil doing to reinvigorate the G-4? Is there a concrete action plan in place?

**Brazilian Foreign Minister :** First of all, I do not agree with your evaluation. I do not think it lost momentum. These are not easy things. If you think of a country and if you think of a Constitutional reform, you know how difficult it is to prepare and to undertake a Constitutional reform. If you are thinking of a situation in which the Constitutional reform which is still subject to the veto of some actors, it becomes all the more difficult. But what I was going to say is really I see the process in itself advancing. I see the process in New York coming nearer to a negotiating phase which it was not before. I have been there myself as Ambassador in New York. For a long time this subject, important as it was, was mainly devoted to speeches. Now really we are getting nearer to a negotiating phase and this is illustrated by the fact that the President of the General Assembly ... (inaudible) ... of facilitators for different aspects of the Security Council reforms. We are in permanent consultation. Next week, there will be a meeting in Brazil of senior officials of the G-4 - India, Brazil, Germany and Japan. Of course, always having also Africa in mind, we are very mindful of the importance of having African representative in a reformed Security Council permanently.

So, I do not agree with you. It is not an easy subject. You are changing the power structure in the world. So, you cannot do that in one day. But I think it was the creation of the G-4 and the attitudes taken by the G-4 that injected, not the only factor but it was probably one of the main factors, that injected a new impetus to the process. I am very confident that it will come to fruition in an adequate manner.

**Minister of State for External Affairs :** I fully endorse what Minister Celso Amorim has said. Brazil and India have been steadfast and firmly committed to the G-4 Initiative to bring about reforms in the United Nations including the expansion of the Security Council. We are in complete agreement on the steps which are required to be taken to ensure that the Security Council gets a representative character which reflects the contemporary

realities of the 21st century world with the participation of India and Brazil in the expanded Security Council and also the G-4 Initiative as you know that there are four countries, Japan and Germany. Africa, as Minister Celso Amorim has said, we have been engaging Africa together. We have had meetings on the margins of the UN General Assembly even last year. We had met together after we were directed to do so by our Heads of Governments when they met for the first IBSA Summit and later Minister Celso Amorim and Minister Nkosazana Zuma of South Africa and myself, we had met. We also met with Foreign Ministers of many countries. We do hope that the Africa Union which is seized of this issue will be able to come to some consensus. But we remain committed to take this process to its logical conclusion. As Minister Celso Amorim has said that, yes it is a complex issue. It is not only an expression of wish but we have to ensure that we give it the required strength which we are confident of doing. You cannot put a time cap as to by when we succeed. But we will succeed surely.

**Question :** You spoke about the cooperation in the energy sector. I just want to know what the progress on bio-fuels is. You have decided to set up an international market in bio-fuels, ethanol. I just want to know what is the progress on that.

**Brazilian Foreign Minister :** We agreed to create a group that will work on that. There has been already cooperation between Petrobras, the Brazilian oil and energy company, and an Indian entity OVL on that field. Certainly it will be a subject for President Lula's discussions with Prime Minister Singh. We have also created together a world forum on bio-fuels which is progressing, which is starting work on very important aspects such as standardization, adoption of rules which are of essence, if you think, in creating a world market for ethanol and other bio-fuels. I would like to just say that there is also cooperation between Embrapa, our agricultural State research company and its counterpart in India also to look at the production side. So, there is strong cooperation going on in this area of energy. It is not the only cooperation I would say in energy. We are also looking at other facts including nuclear energy for peaceful purposes. We will be seeing what are the positive and pragmatic steps that we can give in that direction.

**Question :** This question is addressed to Mr. Amorim. As you know, India is seeking cooperation, it wants changes in the energy guidelines for seeking international community's cooperation in civilian nuclear field. What will be Brazil's position on that? Will you be supporting?

**Brazilian Foreign Minister :** We are open-minded in this. As I said, in the

cooperation I think we are envisaging sending a mission of our National Nuclear Energy Commission to Delhi. I think there are good prospects for cooperation, of course, within the established safeguards agreement that we have. Brazil was very mindful of that and I am sure India will also have the same view. In this area I think the fact that we have an agreement on science and technology provides for an appropriate umbrella to start concrete actions. Probably in the beginning questions like radio isotopes for agricultural purposes, conservation of food and also for health but we both have big reserves of thorium. There are even questions that relate to how you deal with the low radiation of thorium for the populations that live there. There are many other aspects which are more on the scientific field but clearly related. As you know, Brazil has its own Constitution that we do not want to have any use of nuclear weapons for military purposes. So, it will be very restricted and under very clear safeguard provisions.

**499. Joint Communiqué issued on the occasion of the visit of the Brazilian Minister of External Relations Celso Amorim.**

**New Delhi, April 13, 2007.**

The Minister of External Relations of the Federative Republic of Brazil, H.E. Mr. Celso Amorim, accompanied by a large high-level delegation made an official visit to New Delhi on 10-13 April, 2007 at the invitation of Shri Pranab Mukherjee, External Affairs Minister of India.

During the visit, Minister Celso Amorim was received by Prime Minister Dr. Manmohan Singh, to whom he handed over a personal message of the President of Brazil, Luiz Inacio Lula da Silva, on his forthcoming Presidential visit to India. Minister Celso Amorim also met Minister of State for External Affairs, Shri Anand Sharma, Minister of Commerce and Industry, Shri Kamal Nath and the National Security Advisor, Shri M.K. Narayanan.

Ministers Celso Amorim and Pranab Mukherjee co-chaired the Third Meeting of India-Brazil Joint Commission.

In the Joint Commission Meeting, the two sides examined the wide spectrum of topics of bilateral cooperation and acknowledged the outstanding level of understanding between the two countries.

They recognised the over-arching potentiality of Indian-Brazilian relations covering areas such as commerce and services; scientific, technologic and cultural cooperation; technical standards; phyto-sanitary protection; and human settlements and expressed the desire of both Governments to further strengthen and deepen the bonds of friendship between them.

Both sides emphasized the importance of a close coordination between the two countries in international trade negotiations, in particular at the World Trade Organization (WTO). They recognized the urgent need to successfully complete the Doha Round to strengthen the multilateral trading system that is responsive to the developmental aspirations of developing countries. The Ministers reiterated the commitment of the Brazilian and the Indian Governments to continue working together in the G-20.

The Ministers reaffirmed their commitment to the ongoing G-4 initiatives to closely coordinate efforts towards realizing the necessary expansion of the Security Council in both the permanent and non-permanent categories, including developing countries as new permanent members.

They reaffirmed the IBSA Dialogue Forum as an important mechanism for political consultations and coordination as well as for strengthening cooperation in sectoral areas and to improve economic relations among India, Brazil and South Africa. In this regard, the two Ministers look forward to the Fourth Meeting of the Trilateral Ministerial Commission to be held in New Delhi as well as to the Second IBSA Summit to be held in South Africa.

They welcomed the substantial increase of bilateral trade in recent years and agreed to endeavour to take it to a level of 10 billion dollars by 2010. In this context, they emphasized the importance of creating effective mechanisms to diversify exports both ways and to promote mutual investments, as well as to increase the exchange of trade delegations. They agreed to encourage the expansion and deepening of the Preferential Trade Agreement between Mercosur and India by including new products of interest of both sides, to further widen the scope of the Agreement. They reaffirmed their willingness to participate in discussions leading to a trilateral negotiating process involving Mercosur, India and SACU.

The two Ministers expressed their satisfaction with the close cooperation between the delegations of both countries at the working level discussions of the Outreach Countries of the G-8 on intellectual property, cross-border investment, energy, climate change and development in Africa that took place in New Delhi, on April 11, 2007.

Both sides welcomed the recent launch of the Bio-fuels Forum. Minister Celso Amorim renewed the commitment of his Government to intensify the exchange of information with India on the Brazilian Bio-fuel Program. Both Ministers expressed their interest to further bilateral cooperation under the Work Program created by the Memorandum of Understanding on Technological Cooperation in the Area of Mixing Ethanol with Gasoline, signed in 2002. They attached importance to the launching of the International Forum on Bio-fuels, in New York, in March 2007. In this regard, the Ministers pledged that Brazil and India shall work together to set up an international market for ethanol fuel, so as to decrease international dependence on fossil fuels and to favor the use of clean energies.

They welcomed the agreement between Petrobras and Indian companies to explore, produce and trade oil, gas and derivatives in Brazil, India and third countries. They noted the investment in an off-shore oilfield in Campos Basin by ONGC Videsh Ltd (OVL) and welcomed further proposal.

The two sides expressed satisfaction with the ongoing agricultural cooperation in areas such as research and development, phyto-sanitary measures, plant health and animal health and agreed to expand them further.

The two sides also reiterated interest in strengthening scientific and technological cooperation and joint research programmes with India in the fields of biotechnology, information technology, pharmaceuticals, HIV/AIDS and tropical diseases, with emphasis on the elimination of tuberculosis and malaria epidemics.

Noting the potential for mutually beneficial co-operation in space research the two sides agreed to exchange visits and identify concrete areas of co-operation.

The Ministers noted with satisfaction the positive developments achieved by the Indo-Brazil Science Council and the perspectives to further enhance bilateral cooperation under the S&T Agreement signed in September, 2006. They expressed support for the creation of a Joint Industrial Research Programme in selected areas of mutual interest.

The Brazilian side expressed its interest in deepening the dialogue with Indian counterparts on policy issues related to information society and invited the Indian Government to attend the II Internet Governance Forum to be held in Rio de Janeiro, from 12-15 November, 2007.

Recognizing the importance of educational cooperation to strengthen the

bonds between Brazil and India at the present stage of the relations between the two nations, the Ministers stressed the importance to the Bilateral Exchange Programme of Cooperation in the Area of Education, signed in February, 2006. Furthermore, they stressed their common interest in strengthening cooperation between Indian and Brazilian higher education institutions, and reaffirmed the priority given to the areas of post-graduate studies, research, professional education and in the field of information and communication technologies applied to education.

They gave emphasis to the ongoing cultural initiatives as a means of promoting mutual knowledge and understanding between their peoples, and in this regard they stressed the importance of an adequate implementation of the projected Cultural Weeks in both countries. They reaffirmed the commitment of their Governments to continue cooperation in the areas established in the Programme of Cultural Exchange for the period of 2006-07. They agreed on the importance of the Memorandum of Understanding for Cinematographic Co-Production to further bilateral projects in the areas of movie production. They encouraged the exchange of professors and university students between Brazil and India.

The Ministers welcomed the decision to establish the Joint Defence Committee and to nominate Military Attaches to the diplomatic missions in both countries, in order to establish a direct channel of dialogue between Brazilian and Indian military authorities, and strengthen the Indo-Brazilian strategic dialogue.

Minister Celso Amorim invited Minister Pranab Mukherjee to visit Brazil at his earliest convenience. Minister Pranab Mukherjee accepted the invitation. Dates will be settled through diplomatic channels.

Recalling the decision taken by the President of Brazil and the Prime Minister of India in September, 2006 to upgrade the relations to a "Strategic Partnership" the two sides welcomed the commencement of the strategic dialogue which took place between Foreign Minister Celso Amorim and National Security Advisor, Shri M.K. Narayanan, on 12 April, 2007.

Both sides also utilized the opportunity provided by Foreign Minister Amorim's visit to discuss issues relating to bilateral trade as well as efforts underway to successfully conclude the Doha Round of Multilateral Trade Negotiations.

Both sides welcomed the comprehensive meetings that took place during

Foreign Minister Amorim's visit, as preparatory to the forthcoming State Visit of the President of Brazil to India.

The Minister of External Relations of Brazil expressed sincere thanks to the Government of the Republic of India for the friendly and warm reception that was extended to him and to all members of his delegation on the occasion of his visit.

### **500. Red Fort Declaration 2007 - issued during the visit of the Brazilian President Luiz Inacio Lula da Silva.**

**New Delhi, June 4, 2007.**

His Excellency Luiz Inácio Lula da Silva, President of the Federative Republic of Brazil paid a state visit to India from 3-5 June, 2007 at the invitation of His Excellency the President of India Dr. A.P.J. Abdul Kalam<sup>1</sup>. President Lula was accompanied by a high level delegation including a large official and business delegation. President Lula held intensive discussions with President Kalam and Prime Minister Manmohan Singh. External Affairs Minister, the Leader of the Opposition and the Chairperson UPA called on him.

2. The visit by the President of Brazil, within a span of eight months of the visit by Prime Minister Manmohan Singh to Brazil in September last year, is a reflection of the mutual commitment to develop and diversify bilateral relations in a comprehensive manner. It is also a

---

1. Announcing the visit of the Brazilian President a Press Release of the Ministry of External Affairs issued on June 1 recalled that President Lula had visited India in January, 2004 as the Chief Guest for the Republic Day celebrations. It said following Prime Minister Dr. Manmohan Singh's visit to Brazil in September, 2006, the bilateral relations were upgraded to a 'strategic partnership'. As part of this, a strategic dialogue was held in India on 12 April, 2007 between the National Security Adviser and the Minister of External Relations of Brazil, Mr. Celso Amorim. The Press Release further said that the third meeting of the Indo-Brazilian Joint Commission, held in New Delhi and co-chaired by External Affairs Minister and the Brazilian Foreign Minister, has covered cooperation in a number of areas such as agriculture, science & technology, trade and investment, energy, education, defence, space, nuclear energy, health, culture and sports. It was further announced that a Festival of Brazil will be organised in India in January-March, 2008 and a Festival of India will be held in Brazil in July-September, 2008. The Release said: "The trade between the two countries has been increasing significantly in recent years. In 2006, India's exports to Brazil were 1470 million dollars and imports 937 million dollars. A number of Indian companies have made investments and joint ventures in Brazil in areas such as pharmaceuticals, IT and energy. The Brazilian companies have also started

reflection of the strength of the growing strategic partnership between the two countries.

3. Both sides reviewed the state of bilateral relations and expressed satisfaction at the pace at which mutually beneficial cooperation was developing. In particular, they welcomed the 3rd meeting of the India-Brazil Joint Commission held in April 2007, co-chaired by the Minister of External Relations of Brazil and the External Affairs Minister of India. The Joint Commission developed a work plan for the cross sectoral intensification of bilateral relations.
4. Prime Minister Manmohan Singh and President Lula expressed particular satisfaction at the launching of the first meeting of the India-Brazil Strategic Dialogue that was co-chaired by Shri M.K. Narayanan, National Security Advisor of India and Foreign Minister Celso Amorim of Brazil. That dialogue enabled both sides to review the state of cooperation and chart out a course for the future, inter alia, in the areas of space, nuclear energy for peaceful use, defence and the fight against terrorism.
5. The leaders of both countries underlined the importance of providing the strategic partnership with a solid economic underpinning. In that context they expressed satisfaction at the launching of the CEO Forum which is composed of senior representatives of industry on both sides and the trade target of US\$10 billion by 2010. They stressed in the latter context the importance of simultaneously developing greater connectivity between the two countries and investment in each other's economies especially in the infrastructure sector.

---

targeting India for investment and business in areas such as infrastructure, food processing and energy."

On way to New Delhi, the Brazilian President speaking to a group of Indian journalists in London said he was "confident" of clinching a number of important agreements aimed at boosting trade and putting the Indo-Brazilian "strategic partnership" on a firmer footing. "We will leave India with some good agreements," he said, identifying pharmaceuticals, IT, energy, agriculture, food security and infrastructure as among the areas where there was enormous potential to work together. "Political relations between our two countries have become much stronger since my last visit. Prime Minister Singh has more confidence in me and I've more confidence in him," the President said. He also highlighted both nations campaign for reforms to the United Nations Security Council to reflect the new political world order. He said Brazil fully backed India's claim to a permanent seat on an expanded U.N. Security Council. In return, he expected New Delhi to support Brazil's own bid to join the "club." He criticized the big powers for dragging their feet on restructuring the Security Council. On reaching an agreement on the ongoing global trade talks, he said he was confident that a pact could be reached as early as "this month."

6. Both sides agreed to launch joint campaigns in the years ahead for the development of bilateral trade and economic relations. They stressed that development of their economic partnership requires, inter alia, the early implementation of decisions taken at the 3rd Joint Commission Meeting. Within the parameters of their national laws, rules and regulations, both sides will facilitate participation in each other's economies by their entrepreneurs, businessmen, service professionals, scientists and technologists.
7. The leaders of the two countries emphasized the need for the early holding of the first meeting of the India-Brazil Defence Committee and early development of a programme of cooperation in the peaceful use of nuclear energy consistent with their international obligations.
8. Both sides expressed satisfaction at the development of cooperation in the area of science & technology and look forward to the early adoption of the programme of cooperation for 2007-2010. They also welcomed the decision to cooperate in space sector applications that would help the developmental efforts of both countries.
9. The development of people to people exchanges and a better cultural appreciation of each other's traditions was identified as an area of particular focus. The two leaders welcomed the decision to hold the Festival of Brazilian Culture in India in January-March, 2008 and the Festival of Indian Culture in Brazil in July-September, 2008. They also urged that there should be greater exchange of tourists, students and youth between the two countries.
10. The leaders of both sides reiterated the importance of ensuring socially inclusive economic growth in their countries. The Indian side expressed great appreciation for policies implemented by President Lula which have significantly impacted poverty reduction in Brazil. For its part, the Brazilian side expressed appreciation for the policies being implemented in India for poverty alleviation which have successfully lifted scores of millions from the poverty trap. Both sides stressed that these efforts must continue and an exchange of experiences and programmes between the two countries in respect of poverty alleviation would be of great benefit to each other. They also agreed that their experiences for enhancement of the quality of life of the most vulnerable sections of their population could be shared with other developing countries and the international community in the fight against hunger and poverty.

11. Both parties noted the progress reached in the partnership between Petrobras and Indian companies to explore, produce and trade oil, gas and derivatives in Brazil, India and elsewhere. They confirmed the understanding that both Governments will continue to encourage further cooperation between companies of the oil & gas sector in both countries.
12. The two sides recognized the role of educational cooperation in strengthening bonds of friendship between India and Brazil and expressed interest in deepening the partnership between institutions of higher education in both countries.
13. Brazil and India have had a long tradition of fruitful cooperation in regional and multilateral fora including at the United Nations, WTO and the UNFCCC. This cooperation is a reflection of their common world view and common socio-economic requirements.
14. Both sides stressed the need to promote the democratization of the structures of global governance by increasing the participation of developing countries in their decision-making bodies. In that regard, they reiterated their steadfast commitment to reforming and expanding the UN Security Council, with the inclusion especially of countries from all regions of the developing world as permanent members, in order to render it more democratic, legitimate and representative. They welcomed the new momentum on the debate on Security Council reform and expressed their readiness to participate in negotiations, together with the other G-4 partners, with a view to reaching a decision on this long-standing issue at the earliest. They reaffirmed their understanding that no reform of the United Nations will be complete without reform of the Security Council. They reiterated their support for each other's permanent membership in an expanded UNSC.
15. In respect to the Doha Development Agenda, Prime Minister Manmohan Singh and President Lula stressed the importance of close coordination between the two governments to effectively realize the development dimension in every aspect of the outcome of the negotiations. They reiterated the urgent need to successfully complete the Doha Round in order to promote the interests of developing countries in keeping with the Doha mandate and reaffirmed the commitment of their governments to continue to work closely together in the G-20 and NAMA-11. In agriculture, they recalled their

commitment to an ambitious outcome in terms of elimination of distortions and subsidies in international trade in agriculture and the preservation of the food security, rural development and livelihood concerns of rural populations of developing countries. They also stressed the Hong Kong Declaration and the high ambition in market access in NAMA and reaffirmed that this ambition has to be achieved in a balanced and proportionate manner consistent with the principle of less than full reciprocity in reduction commitments.

16. Both sides reiterated the importance they attach to matters pertaining to climate change and agreed that the solution to the problem of climate change, which is essentially the outcome of the unsustainable production and consumption patterns in the developed world, can not lie in the perpetuation of poverty in developing countries. They agreed on the need to constructively discuss this important issue with all partners taking into account the specific developmental situation and requirements of developing countries and simultaneously working toward a greater share of clean and renewable energy sources in the global matrix, energy efficiency and energy security. Developing countries cannot accept approaches that impede growth and retard poverty alleviation obligations. They agreed that both sides would cooperate closely, along with other developing countries, at the UNFCCC and also within the framework of the Kyoto Protocol. The second meeting of the bilateral Working Group on Environment is to be held later in 2007 and would enable both sides to coordinate their positions to common benefit.
17. Both sides expressed satisfaction with the launching of the International Biofuels Forum, in March, 2007. They reaffirmed their mutual interest in deepening cooperation in accordance with the work program created under the Memorandum of Understanding on Technological Cooperation in the Area of Mixing Ethanol with Gasoline, signed in 2002. President Lula reiterated the commitment of his Government to intensifying exchange of information with India on Brazil's Biofuels Program. Both sides favour the use of clean energies and will join efforts leading to the creation of an international market for ethanol that can contribute to the reduction of the world's dependence on fossil fuels.
18. Both sides stressed the importance that they attach to IBSA, this unique forum of large, multi-ethnic, multi-racial and multi-religious

developing countries of the three continents of Africa, Asia and Latin America that are closely linked by the common bonds and principles of pluralism and democracy. They recalled the successful IBSA Summit held in Brazil in September 2006 and look forward to taking stock of progress made and giving fresh direction for the evolution of the IBSA framework at the second Summit to be held in South Africa in October, 2007. The Ministerial Meeting of the Trilateral Commission of IBSA in India on 16-17 July, 2007 should ensure that preparations for the second Summit are meaningful and substantive. Both sides also noted that the development of cooperation in the IBSA framework would further strengthen bilateral linkages among the three countries.

19. President Lula and Prime Minister Manmohan Singh used the opportunity of their meeting in New Delhi to have an in depth exchange of views on the forthcoming meeting of the G8 + O5 at Heiligendamm in Germany. They expressed satisfaction at the unity of approach that both sides had towards this important meeting and pledged to continue to cooperate in this forum.
20. During the visit the following agreements were signed:
  - U Agreement on Mutual Assistance in Customs Matters;
  - U Agreement on Audio Visual Co-production;
  - U Implementing Arrangement regarding Cooperation in Augmentation of Brazilian Earth Station for Receiving and Processing data from Indian Remote Sensing Satellites;
  - U Academic Exchange Programme;
  - U MOU on India-Brazil CEOs Forum;
  - U Heads of Agreement between ONGC, OVL and Petrobras; and
  - U MOU between National Council for Applied Economic Research and Institute of Applied Economic Research of Brazil.
21. President Lula expressed his gratitude to the Government and people of India for the hospitality and the warmth of the welcome received by him and his delegation.

22. President Lula invited the President and Prime Minister of India to pay official visits to Brazil. The invitations were accepted with pleasure. Dates will be settled through diplomatic channels.
23. Both sides agreed that the State visit of President Lula to India had provided a decisive impetus to the further development of the strategic partnership between India and Brazil.

**501. Speech of President Dr. A. P. J. Abdul Kalam at the banquet in honour of the Brazilian President Luiz Inacio Lula da Silva.**

**New Delhi, June 4, 2007.**

Your Excellency, Mr. Luiz Inacio Lula da Silva,

President of the Federative Republic of Brazil.

Excellencies,

Ladies and Gentlemen,

On behalf of the Government and people of India, I am very happy to extend a warm welcome to you and to the distinguished members of your delegation on your State visit to India. Your visit, following the visit of Prime Minister Dr. Manmohan Singh to Brazil in September 2006, marks a significant step in further deepening and diversifying our warm and friendly ties.

Although our two countries are divided by geography and distance, they share common democratic values and developmental aspirations. Both India and Brazil are large developing countries, each an important player in its region, both stable and large democracies as well as trillion-dollar economies.

The ethos of our polities is secular. Our societies are multi-cultural and multi-ethnic. In our developmental endeavours, we have utilized Science and Technology and particularly high technology to alleviate poverty and to reduce hunger. Brazil has made significant strides in the agricultural sector, including in agricultural research. The work done by your research and development organisations has led to significant improvements in crop productivity as well as in the genetic upgradation of livestock, three-fourths of

which, interestingly is derived from the Nellore variety of India. You have also had important successes in the manufacturing sector. This also includes your aviation industry, which has also manufactured the Embraer aircraft, which we are using for our internal tours. Your achievements in the field of industrial Science and Technology demonstrate that it is possible for developing countries also to overcome the confines imposed by shortage of resources for research and development and to achieve world-class status. We could cooperate in the development of a 100-seater passenger jet, using the core competencies of both our countries in the field of aerospace. Such a jointly developed passenger jet could be marketed worldwide.

India, too, has devoted concerted efforts to achieve scientific and technological progress since the time it attained independence. The vision of Pandit Jawaharlal Nehru, India's first Prime Minister, has enabled India to create a nationwide network of advanced research and development facilities as well as institutions of higher education. This has enabled India to emerge as one of the leading countries in the sphere of Information Technology and software development. India's manufacturing sector and our efforts in the field of space research have enabled us to not only develop and build satellites but also to launch them from our soil. The data transmitted by our communication, remote sensing and meteorological satellites is being used to improve the livelihood and the quality of life of our people. The area of automobiles and their components is another area where we can explore joint opportunities. We have also made significant progress in agriculture through our Green and White Revolutions. This is a critical sector that is currently in our focus for we wish to impart new and significant dynamism to it.

Bilateral ties between India and Brazil characterised, as they are, by regular high-level political exchanges, of which your visit is the latest manifestation, are also marked by our determination to develop our economic and commercial relations by fully utilizing our obvious complementarities. The two-way trade turnover of US \$ 2.6 billion recorded in 2006 is targeted to reach US \$ 10 billion by 2010. Corporate entities on both sides are engaged in a process of intensive bilateral interaction. The third meeting of the India-Brazil Joint Commission, which met in April 2007, has identified a wide-range of areas to broad-base and strengthen our mutually beneficial ties and it is particularly gratifying to note the growing exchanges taking place between the scientific communities of India and Brazil.

India is presently engaged in the development of bio-diesel and for this we are undertaking large-scale planting of *Jatropha*. Interestingly, the *Jatro-*

pha plant came to India from Brazil through the Portuguese connection. Brazil and India can work together in the field of bio-fuel production and its related applications. In this regard, the International Bio-fuels Forum is an important initiative taken by Brazil.

The discussions that Your Excellency has had with us today have confirmed that we not only share a similarity in our vision of the world, but also an abiding commitment to realize the full benefits of our relationship for the welfare of our people. The agreements that were signed today will further strengthen and broad base our relationship. I am confident that our strategic relationship will continue to flourish and prosper. I look forward with confidence and trust to working together with you for a better future for our people.

Excellencies, Ladies and Gentlemen, may I request you to join me in raising a toast : -

- U to the health and happiness of His Excellency President Luiz Inacio Lula da Silva,
- U to the prosperity and development of the Federative Republic of Brazil and its friendly people; and
- U to the further strengthening of the cooperation between our two nations.

## COLOMBIA

### **502. Joint Statement issued on the occasion of the visit of Minister of State Anand Sharma to Colombia.**

**Bogota, June 20, 2007.**

The Minister of State for External Affairs of the Republic of India, Mr. Anand Sharma, paid an official visit to Colombia from 19th to 21st June 2007, at the invitation of the Minister of External Relations of the Republic of Colombia, Mr. Fernando Araújo Perdomo. During his stay in Colombia, Minister Sharma called on the President of the Republic, H. E. Mr. Alvaro Uribe Vélez; and met with the Minister of Trade, the Minister of Mines and Energy, as well as with the Minister of Defense.

2. The two Ministers expressed satisfaction with the status of the bilateral relations, marked by a spirit of solidarity, cooperation and mutual respect. They exchanged views on the current political and economic situation of their respective countries. They agreed to continue regular exchange of high-level interactions, visits and dialogue.
3. Minister Sharma expressed the interest of India to receive the visit of the Colombian Minister of External Relations in end 2007 and the President of the Republic, Mr. Alvaro Uribe Vélez in the first half of 2008, on the invitation of the Government of India. The exact dates would be decided through diplomatic channels.
4. The two Ministers took note of the bilateral Agreements already signed for cooperation in IT, Science and Technology and Urban Transport. They agreed to take necessary steps to ratify and activate existing agreements, and expedite efforts towards advancement of other possible areas of cooperation such as Defence and Cultural Exchanges.
5. Aware of the importance of increasing cultural exchanges to bring people of both the countries closer, the Ministers agreed to engage in discussions that can lead to the signing of the Cultural Exchange Program with a view to organize cultural activities in the two countries for the next three (3) years.

6. The Colombian side thanked the Government of India for the annual ITEC (Indian Technical and Economic Cooperation) scholarships to Colombian candidates for training in various fields in India.
7. The two sides expressed satisfaction with the accelerated growth of trade in recent years crossing 400 million US dollars in 2006. They agreed to promote expansion of trade<sup>1</sup> through exchange of business delegations, participation in trade fairs and organization of business seminars in collaboration with the private commercial and industrial sector.
8. The Colombian side welcomed the investment by Indian companies such as ONGC Videsh Ltd. (OVL) and other companies interested in investment and joint ventures in Colombia.
9. Minister Sharma thanked the Government of Colombia for the recent measures taken towards facilitating issue of visas to Indian businessmen wishing to visit Colombia. The Colombian side agreed to examine the Indian request for longer-term business visas with simplified procedures.
10. The Ministers reiterated the commitment of their respective Governments towards the principles of democratic values, respect for human rights and the fundamental freedoms that are essential to securing the well-being and the social and economic development of the global population in an environment of peace, social justice and equity.
11. The two sides reaffirmed their firm condemnation of terrorism in all its forms and manifestations and agreed to strengthen cooperation and support to each other in combating terrorism, in international fora. In this context, they agreed to push forward the negotiations towards formalization of a Comprehensive Convention on International Terrorism (CCIT) at the UN. They condemned kidnappings and other terrorist acts carried out by illegally armed groups in both countries.

---

1. On June 16 the Official Spokesperson had told the media in New Delhi that Colombia is the third largest destination for India's exports to Latin America. Exports in 2006 were US\$ 346 million and imports US\$ 63 million. ONGC Videsh Ltd. (OVL) has acquired a producing oil field for US\$ 425 million. Reliance has also got an offshore oil block for exploration. There are 70 Colombian pilots and engineers working with Air Deccan and other airlines in India.

12. Both sides welcome the resolution adopted by the UNGA declaring 2nd October as the International Day of Non-violence.
13. The Ministers highlighted the importance of continuing with the joint efforts of the two countries in the international fora against illicit trafficking of weapons, ammunitions and explosives- a phenomenon that is closely linked with terrorism and other transnational organized delinquencies. The Ministers renewed the commitment of both the countries to the recommendations of the Program of Action of the United Nations to prevent, combat and eradicate illicit trafficking of small and light weapons. They also emphasized upon the importance of improving surveillance and mutual exchange of information in this regard.
14. The Ministers agreed upon the importance of continued support to the process of greater reforms of the United Nations and that of the Security Council with a view to make it more representative, democratic and efficient.
15. Minister Sharma expressed his gratitude for the support of the Government of Colombia to the Indian candidature to the Human Rights Council for the period 2008-2011. The Ministers thanked each other for the mutual support of the candidatures of Colombia and India for becoming Non-Permanent Members of the UN Security Council for the period 2011-2012.
16. The two sides agreed to continue consultations and cooperation on issues of common interest in UN and other multilateral fora such as the World Trade Organisation.
17. The two sides reiterated their commitment to the principles and purposes of the Non-Aligned Movement which can play a greater role in international affairs and multilateral issues in the United Nations.
18. Minister Sharma thanked the Government of Colombia for their warm welcome and hospitality during his visit.

**FERNANDO ARAUJO PERDOMO**

**Minister of External Relations  
Republic of Colombia**

**ANAND SHARMA**

**Minister of State for External  
Affairs, Republic of India**

**503. Press Release of the Ministry of External Affairs on the visit of Minister of State Anand Sharma to Colombia, 19-21 June, 2007.**

**New Delhi, June 22, 2007.**

Minister of State for External Affairs, Shri Anand Sharma, visited Bogota, the capital of Colombia accompanied by a delegation of MEA officials.

The visit opened with a call on President of Colombia Mr. Alvaro Uribe Velez in the forenoon of 20 June. The President received the Minister very warmly and spoke of the importance of India for Colombia. The Minister conveyed the greetings of President and Prime Minister of India to President Uribe and conveyed Government of India's desire to invite President Uribe to India in the first half of 2008. President Uribe welcomed the invitation and expressed his interest in attracting Indian investment and increasing political, commercial and cultural cooperation between the two countries.

Thereafter the delegations of both countries held formal discussions on a range of bilateral issues. The Colombia delegation was headed by Foreign Minister Mr. Fernando Araujo Perdomo. The discussions touched upon India's interest in further investing in the energy sector in Colombia; participation in infrastructure projects in Colombia such as railways; forthcoming visits of business delegations in both countries; cooperation in defence and security and multilateral fora. MOS extended an invitation to Foreign Minister Araujo to visit India later this year, which the latter accepted. The Ministers reviewed the international situation and exchanged views on issues of mutual interest.

Minister Sharma thereafter called on Minister of Foreign Trade, Industry and Tourism, H.E. Mr. Guillermo Plata Paez and discussed ways to enhance the bilateral trade which has reached a record US\$ 410 million in 2006; possibilities for concluding Investment Promotion and Protection Agreement; Preferential Tariff Arrangement; etc. Minister Sharma pointed out that several Indian companies in areas of engineering, software, textiles, apart from public sector enterprises such as OVL and IRCON could offer tremendous expertise which would be useful for Colombia. The Minister informed Minister Plata about the Joint Business Forums between the two countries scheduled to be held in August 2007 in Bogota and Medellin and urged the Minister to accelerate the pace of official and business visits to India from Colombia.

Minister also called on the Minister of Mines and Energy Mr. Hernan Martinez, pointing to presence of ONGC Videsh Limited (OVL) in Colombia with an investment of US\$ 425 million, and its interest in further collaboration, as well as interest of various Indian companies in the Colombian mining sector. Minister Martinez expressed Colombia's appreciation of Indian interest in the Colombian energy sector and also his desire to collaborate with India and with OVL in particular, pointing to the prospects of collaboration between the Colombian state company Ecopetrol and OVL.

Minister Sharma also called on Colombian Defence Minister Juan Manuel Santos and discussed areas of mutual interest as well as possibility of training and equipment transfer. Minister Santos expressed his interest in visiting India in September-October 2007 on the standing invitation of Rakhsha mantri to develop closer relations with India.

## ECUADOR

### **504. Press Release of the Ministry of External Affairs on the visit of Minister of State Anand Sharma to Ecuador.**

**New Delhi, June 23, 2007.**

Minister of State for External Affairs, Shri Anand Sharma, visited Quito, the capital of Ecuador accompanied by a delegation of MEA officials.

The visit opened with a call on newly elected President of Ecuador Mr. Rafael Correa Delgado. The Minister conveyed greetings from President and Prime Minister of India to President Correa and expressed appreciation of the close relations between the two countries, symbolised mostly recently by the opening of an Ecuadorian Embassy in Delhi in early 2005 and the visit of Ecuadorian Foreign Minister to India in July 2006. President Correa, himself a professional economist, welcomed Minister Sharma and praised India's rapid economic development and equitable policies. He emphasised the need for greater interaction between the two countries. Minister Sharma conveyed India's desire that President Correa visit India at a convenient time and President Correa expressed his interest in doing so.

The delegations held talks in the Ministry of Foreign Affairs. The Ecuadorian Foreign Minister Mrs. Maria Fernanda Espinosa led the Ecuadorian delegation. The discussions covered a wide range of bilateral issues and areas of mutual interest in international relations. The two Foreign Ministers thereafter signed the Agreement on Exemption of Visas for Diplomatic and Official Passports and a Cultural Agreement.

Minister Sharma thanked Foreign Minister Espinosa for the hospitality and invited her to visit India at a convenient time which the latter gracefully accepted.

During the visit, in the spirit of south-south cooperation, Minister Sharma announced India will donate a large volume of generic medicines to Ecuador. A few Indian pharmaceutical companies are present in Ecuador and the Ecuadorian public health policy is being revised to put more emphasis on generic medicines.

The Ecuadorian authorities also thanked Minister Sharma for the gesture of the Ministry of External Affairs of India in organising a special course on

Information Technology for sixty Ecuadorian students, from August to November, 2007.

Minister held separate talks with Ecuadorian authorities in the energy and public works sectors, expressing India's interest in participation in Ecuador's hydrocarbons sector and in construction of rail roads to be rehabilitated in Ecuador.

Minister Sharma addressed a gathering of government officials, diplomats, media and members of the prestigious think tank FLACSO on the topic 'Foreign Policy of India and South-South Cooperation'. He answered questions from Ecuadorian analysts and others on various aspects of India's foreign policy.<sup>U</sup>

---

<sup>U</sup> On June 15 in a briefing to the media the Official Spokesperson had said in New Delhi that the oil rich Ecuador had been exporting small quantities of crude oil to India. OVL was interested in acquiring oil blocks and had already signed a MOU with Petroecuador. Ecuador has recently reopened its Embassy in New Delhi and was keen to establish economic and technical partnership with India. The Government of India was providing ITEC assistance and training to Ecuadorian nationals. The trade between Indian and Ecuador was US\$ 100 million in 2006.

## EL SALVADOR

### **505. Joint Communiqué issued on the occasion of the official visit of Minister of External Relations of El Salvador Francisco Esteban Lainez.**

**New Delhi, March 9, 2007.**

His Excellency Mr. Francisco Esteban Lainez visited India from 4 to 9 March, 2007. He was accompanied by a high level delegation including the Presidential Commissioner of Agriculture and Cattle Raising, Mrs. Carmen Elena de Sol as well as businessmen. The delegation visited Bangalore on March 5-6 and had meetings with Indian IT companies and with officers of the local government, among others.

Minister Lainez had a meeting with the Minister of External Affairs, Shri Pranab Mukherjee. He had delegation level talks with the Minister of State for External Affairs Shri Anand Sharma, in which officials of the various Ministries of the Government of India participated. In these meetings, the two sides agreed to promote bilateral relations and cooperation in a variety of areas.

The two sides exchanged views on a number of regional and global issues. They agreed to work together in areas of common interest in multilateral fora including the United Nations and WTO. El Salvador shared India's view on the urgent need for reforms of the United Nations. El Salvador supports a broad reform of the United Nations Security Council that should cover issues related to its organization, procedures and membership, among others. In this context, the Salvadoran Foreign Minister expressed his country's support to India's aspiration to permanent membership of an enlarged United Nations Security Council, which should include more permanent and non-permanent members allowing for a better regional representation and for a more democratic and representative United Nations Organ.

The Indian side reiterated its interest to continue and expand its development partnership with El Salvador as part of its commitment to South-South cooperation. In this context, External Affairs Minister Shri Pranab Mukherjee conveyed that (1) India would set up an Information Technology Training Centre in El Salvador to contribute to the human resource development of the country (2) agreed to increase the annual ITEC training scholarships to the nationals of El Salvador from the existing ten to fifteen and (3) willing-

ness to extend a Line of Credit (LOC) of 15 million dollars for further development of economic cooperation. The El Salvador side thanked the Government of India for these gestures and expressed interest in a higher quantum of LOC. The Indian side agreed to consider further amounts after the initial LOC is fully utilized.

The two sides agreed for cooperation in the areas of Tourism, Education, Culture, Films and visual arts and exchange of cultural troupes, exhibitions, academic scholars and film festivals.

El Salvador attached special importance to cooperation in the Agriculture sector and expressed its particular interest in the production of ethanol as a source of energy derived from sugar cane and of other bio-fuel production alternatives and also in implementing an exchange programme of experts in the agro-industrial fields, particularly for the industrialization of tropical fruits like mangoes, cashew nuts and coconuts, and for other areas where India has developed internationally recognized expertise. The El Salvador side sought India's cooperation for projects for sustainable and productive horticulture, fisheries and Information Technology applied to the Salvadoran Agricultural Development Bank and also to hotel management. The Indian side agreed to facilitate cooperation with the authorities and institutions concerned in India and consider signing a MOU for cooperation.

The Salvadoran side explained the significance of its initiative to insert the issue of International Cooperation for Middle Income Countries in the international agenda and to develop mechanisms to mobilize ODA for such group of countries. The Indian side took note of the initiative and promised to consider it. The El Salvador side would provide a detailed non-paper on this matter to the Indian side.

Minister Lainez had a meeting with the Minister of Commerce and Industry, Mr. Kamal Nath. The two sides agreed on the need to enhance bilateral trade, which is much below the potential. They agreed to promote trade and encourage the companies from both sides to explore each other's market for trade, investment and joint ventures. The El Salvador side agreed to the request of the Indian side to facilitate business visas for Indian business visitors to El Salvador.

Minister Lainez addressed a meeting of senior business executives organized by the Confederation of Indian Industry.

The Indian side attached importance to the Central American Integration System (SICA), of which El Salvador is a member. The two sides agreed to

strengthen India-SICA cooperation. The El Salvador side agreed to facilitate India-SICA dialogue and to hold the next ministerial meeting at the earliest.

The Salvadoran side expressed its appreciation for the splendid hospitality and outstanding organization of all aspects during their official visit to India. The Foreign Minister of El Salvador extended the most cordial invitation to the Minister of External Affairs, the Minister of State for External Affairs of India, to Government Officials and businessmen to visit El Salvador to follow up the initiatives that have originated during this official visit and to explore new opportunities in different fields.

## **GUATEMALA**

### **506. Press Release of the Ministry of External Affairs on the visit of Gert Rosenthal, Minister of Foreign Affairs of the Republic of Guatemala.**

**New Delhi, August 24, 2007.**

The Foreign Minister of Guatemala Mr. Rosenthal is on official visit to India from 25-31 August 2007. He is being accompanied by his wife and two business delegates.

Mr. Rosenthal will have talks with Minister of State for External Affairs, Shri Anand Sharma on 29th August 2007. The two Ministers will review bilateral relations and discuss measures to strengthen bilateral cooperation.

The two Ministers will also discuss deepening of dialogue and cooperation between India and the Central American Regional Group called as SICA, which consists of eight Central American countries.

The Government of Guatemala has decided to open an Embassy in New Delhi. The Government of India has also decided to open a resident Embassy in Guatemala. The new Embassies of the two countries should start functioning in 2008.

Mr. Rosenthal will give a talk at the Jawaharlal Nehru University on the "Political and Economical integration in Central America" on 30th August 2007.

Minister of State for External Affairs Shri Anand Sharma had visited Guatemala in June this year. During this visit, Shri Sharma announced (a) a line of credit of 10 million Dollars to Guatemala, and (b) increase in the number of annual ITEC scholarships from 7 to 15 per year.

India's exports to Guatemala have been increasing significantly in recent years reaching 73 million US Dollars in 2006. Imports from Guatemala were 3 million Dollars in 2006.

The Government of India has set up an IT Training Centre in Guatemala run by TCS of India.

1988

INDIA'S FOREIGN RELATIONS - 2007

The Government of Guatemala is in touch with the Reliance Group for setting up a refinery in Guatemala.

The Indian company 24/7 has established a joint venture BPO in Guatemala which employees 500 Guatemalan staff. Indian pharmaceutical companies have established offices and operations in Guatemala.

## JAMAICA

### **507. Press Release of the Ministry of External Affairs on the visit of Minister of State Anand Sharma to Jamaica.**

**New Delhi, February 21, 2007.**

Shri Anand Sharma, Minister of State for External Affairs visited Jamaica from 17-19 February 2007. On arrival in Kingston on February 17, Minister Sharma called on the Prime Minister at her Vale Royal official residence and held discussions on matters of bilateral and multilateral interests. During the discussions the two leaders recognized the need for further strengthening of the bilateral relations and Minister Sharma renewed India's commitment for enhanced assistance to Jamaica under the Indian Technical & Economic Cooperation (ITEC) Programme. Recalling the recent extension by the Government of India of a US\$7.5 million Line of Credit for import of water pumps by the National Water Commission of Jamaica, Minister Sharma offered further extensive technical assistance for establishment of an Information Technology Centre in Jamaica and for supplies from India of equipment and medicines. Prime Minister stated that Jamaica was thankful to India for the cooperation it was receiving from India, and with a view to further strengthening the bilateral relations, Jamaica was committed to establish its resident Mission in India in the near future. Minister Sharma renewed invitation to the Prime Minister for visiting India.

2. Minister Sharma met Foreign Affairs and Foreign Trade Minister, Mr. G. Anthony Hylton, on February 19 and further discussed with him matters of bilateral and multilateral importance. Minister Sharma emphasized on the need of optimal utilization of the 15 slots earmarked for Jamaica for various technical training courses offered by the Government of India under the ITEC Programme. Training under this Programme is offered to friendly developing countries and the cost of international travel, accommodation and training is entirely met by the Government of India. Minister Sharma also welcomed more Jamaican diplomats for their training in the Foreign Service Institute of India. Minister Sharma extended

an invitation to Minister Hylton to visit India. Minister of State for Foreign Affairs and Foreign Trade, Mr. Delano Franklyn hosted an official luncheon in honour of Minister Sharma.

3. During the follow-up official-level meeting held in the Office of the Prime Minister, Mr. R. Viswanathan, visiting head of the Latin America and Caribbean division in the Ministry of External Affairs, informed the Jamaican side that the Government of India package for offer of the fresh assistance was to the tune of US\$1 million. Out of which, about US\$600,000 to US\$700,000 was likely to be spent on establishment of the Information Technology Centre at the proposed site of Camp Cape Clear in St. Mary Parish and the remaining for supply of equipment and generic medicines.
4. The visit also provided opportunity for Minister Sharma to interact with the other senior Ministers in the Government of Jamaica and the Indian Community.

## MEXICO

### **508. Joint Statement issued on the visit of the Mexican President Felipe Calderon Hinojosa.**

**New Delhi, September 10, 2007.**

His Excellency Mr. Felipe Calderon Hinojosa, President of Mexico, paid a state visit to India from 9 to 12 September, 2007 at the invitation of Her Excellency Smt. Pratibha Devisingh Patil, President of the Republic of India. This visit, the first by a Mexican Head of State after an interval of 22 years, reflects the advances made in bilateral relations in recent years and underlines the strong commitment of both countries to further develop and strengthen bilateral relations in a broad and comprehensive manner. President Calderon was accompanied by a high level ministerial delegation and a large business delegation. He held intensive and fruitful discussions with President Patil and Prime Minister Manmohan Singh, and met with External Affairs Minister, Pranab Mukherjee, the Leader of the Opposition, Lal Krishna Advani and United Progressive Alliance Chairman, Sonia Gandhi.

2. India and Mexico are old civilizations, both of which represent vibrant and pluralistic democracies that are multi-ethnic, multi-lingual and multi-religious. They are countries with a tradition of friendship and cooperation that have rediscovered each other's strengths and complementarities in the political, commercial, economic, Science & Technology, environmental and developmental spheres. They recognise each other as countries on the international scene, who actively contribute to find creative solutions to global problems. Based on their significant commonalities, the two sides have decided to establish a Privileged Partnership between their two countries with a view to leveraging their mutual strengths for each other's common benefit and socio-economic development.
3. The leaders of India and Mexico agreed on the importance of regular political dialogue and high level contacts and exchanges between their two countries. President Calderon invited President Patil and Prime Minister Manmohan Singh to pay official visits to Mexico. The invitations were accepted with appreciation, and dates would be settled through diplomatic channels. They also agreed on the

importance of fostering greater intergovernmental exchanges, particularly between their foreign ministries, as well as parliamentary contacts and a more dynamic social interaction.

4. Both sides noted that the next meeting of the Joint Commission is scheduled to be held in early 2008. They instructed the Joint Commission to prepare a coherent and comprehensive plan of action to strengthen bilateral relations. They also urged that pending agreements such as for development of civil aviation ties and facilitation of customs cooperation be finalised at an early date.
5. The leaders of both countries noted the growing engagement between the two sides in the trade and economic spheres. They underlined the importance of strengthening this trend to ensure that their new partnership in the 21st century would have a strong underpinning. In the context of further developing their trade and economic partnership, they also stressed the importance of simultaneously developing greater connectivity between the two countries and the need to encourage cooperation in investment, in the infrastructure sector, among SMEs, in pharmaceuticals, in energy, in the automobile sector, in Information and Communication Technology, in agriculture, food processing and other related sectors. The two leaders took note of the first meeting of the bilateral High Level Group on Trade, Investment and Economic Cooperation held in New Delhi on 10 September 2007 and agreed that appropriate measures should be taken so that the bilateral trade which stood at USD 1.8 billion in 2006 increases to USD 5 billion by 2010. In this context, they noted that the Mexican business delegation, accompanying President Calderon, would have meetings in New Delhi, Bangalore and Chennai. The leaders of the two countries noted with satisfaction the growing Indian investment and joint ventures in Mexico as well as with the opportunities for Mexican companies in the Indian market.
6. The two sides noted with satisfaction that the Plan of Action for cooperation among Medium and Small Enterprises had been finalised in 2006. They called for early implementation of the plan and urged the Joint Committee set up to enhance such cooperation to look at innovative ways of leveraging each other's strengths and capabilities in this critical sector that plays an important role in employment generation in both countries.

7. Both sides noted the importance of further strengthening their already useful cooperation in the Science & Technology sector and called upon the Joint Committee for science & Technology to meet at an early date to further energise cooperative endeavours in the sector and identify new areas of mutual interest where joint research & development and other programmes can take place, including in Bio-technology and Information Technology.
8. Given the importance of the agricultural sector in both economies and the advancements made by each side in specific areas in respect of agriculture and food processing, the leaders of the two countries called for greater cooperation in agricultural research and education. To this effect, appropriate legal frameworks would be agreed in the coming months.
9. Recognising the cultural richness of both countries, the leaders agreed on the need to strengthen cooperation in this field, as a means to promote deeper mutual knowledge and understanding. Specifically, both sides agreed to finalise soon the Cultural and Education Programmes for 2008 - 2010. The Indian side conveyed its deep appreciation to the Mexican side for arranging the exhibition of Mixteco Zapoteca art "Dressed up like Gods" at the National Museum, New Delhi, and the exhibition of contemporary Mexican artist Juan Soriano, in the National Gallery of Modern Art in Mumbai, inaugurated by the President of Mexico during his visit to India. The Mexican side invited the Indian side to hold a similar major exhibition of Indian culture and art in Mexico in 2009. The offer was accepted with thanks. Follow-up action would be undertaken by the Indian Ministry of Culture.
10. India and Mexico share many similarities and with a view to strengthening these bonds, the leaders of the two countries stressed the importance of greater exchanges between the peoples of the two countries. This requires strengthening of parliamentary contacts, greater exchanges amongst youth, the development of tourism and intensification of cultural cooperation. Both sides agreed to take conscious steps to enhance cooperation in all these critical areas that would help the development and strengthening of their Privileged Partnership.
11. Both sides noted that the 60th anniversary of the establishment of

diplomatic relations between their two countries would be celebrated in August 2010. It was agreed that this event would be celebrated in a manner befitting the occasion with joint commemorative activities.

12. The year 2010 also marks the 200th anniversary of Mexican independence and the 100th anniversary of the Mexican Revolution. President Calderon extended to President Patil and Prime Minister Singh invitations to participate in these celebrations. The President and the Prime Minister of India conveyed their deep appreciation and thanks for the invitations and conveyed that India would be represented at high level in these celebrations.
13. Regarding cooperation in the education sector, the leaders of the two countries noted with appreciation that contacts are developing among educational institutions on both sides. They called for strengthening of such links amongst universities and other centres of excellence and learning.
14. Mexico and India have had a tradition of fruitful cooperation in regional and multilateral fora including at the United Nations. This cooperation is a reflection of their common world view. In this context, two sides took note of the first meeting of the mechanism of bilateral consultations on multilateral issues in New Delhi in August 2007 and agreed that such meetings should be held regularly in future.
15. The two leaders reaffirmed the vital importance of an effective multilateral system. Both sides stressed the need to promote the democratization of the structures of global governance by increasing the participation of developing countries in their decision-making bodies. In that regard, they agreed upon the importance of continued support to the process of reform of the United Nations Security Council, and agreed to continue consultations on this matter. They reaffirmed that no reform of the United Nations will be complete without reform of the Security Council.
16. Both sides reaffirmed their decision to support each other's candidature for a non-permanent seat on the UN Security Council for 2011 - 12 for India and 2009 - 10 for Mexico.
17. Both sides noted their productive and substantive cooperation in the context of their participation as invitees at the Outreach Dialogue during G-8 Summits. The leaders of both countries reiterated their

determination to continue and strengthen such cooperation among the Group of Five/ Outreach Countries.

18. In respect of the Doha Development Agenda, both sides stressed the importance of close coordination between the two governments to effectively realize the development dimension in every aspect of the negotiations. They reiterated the urgent need to successfully complete the Doha Round in order to promote the interests of developing countries and reaffirmed the commitment of their governments to work closely together in the G-20.
19. Both sides reiterated the importance they attach to matters pertaining to climate change and agreed that the solution to the problem of climate change shall not foreclose the right to accelerated economic and social development of developing countries. Developing countries cannot accept approaches that impede growth and retard poverty alleviation obligations. They agreed that both sides would cooperate closely and constructively discuss this important issue with all partners, within the ambit of the UNFCCC and its Kyoto Protocol.
20. The leaders of both countries reaffirmed that terrorism constitutes one of the most serious threats to international peace and security. They strongly condemned terrorism in all its forms and manifestations, and agreed to strengthen cooperation and support to each other in international fora in combating terrorism. They stressed that there can be no justification, whatsoever, for any acts of terrorism. The two leaders reaffirmed their commitment to the United Nations Global Counter-Terrorism Strategy, adopted in 2006 by the General Assembly of the United Nations.
21. Both sides recalled with satisfaction their tradition of positive cooperation at the IAEA and other fora, with a view to ensuring the unimpeded growth and development of peaceful uses of atomic energy, through the supply of technology, equipment and material, under appropriate safeguards, and reaffirmed their will to intensify such cooperation. They reiterated the importance of ensuring that any multilateral decisions related to the nuclear fuel cycle do not undermine the inalienable right of States to pursue nuclear energy for peaceful purposes in conformity with their international legal obligations. They further agreed that international civilian nuclear cooperation, under appropriate IAEA safeguards, amongst countries

committed to nuclear disarmament and non-proliferation objectives could be enhanced through acceptable forward-looking approaches, consistent with their respective national and international obligations.

22. The two leaders had a detailed exchange of views on regional issues of mutual interest, including political and economic developments in Latin America, as well as the current situation in the Asia Pacific area.
23. During the visit, agreements on the following were signed:
  - U Extradition
  - U Mutual Legal Assistance in Criminal Matters
  - U The Avoidance of Double Taxation.
24. President Calderon expressed his gratitude to the Government and the people of India for the hospitality and the warm welcome received by him and his delegation.
25. Both sides expressed deep satisfaction with the successful outcome of the visit. The leaders of the two countries were particularly satisfied that relations between their two countries were now entering a dynamic and qualitatively new phase of Privileged Partnership.

**509. Speech by President Smt. Pratibha Devisingh Patil  
at the banquet in honour of the Mexican President.**

**New Delhi, September 10, 2007.**

Your Excellency, President Felipe Calderon,

Madam Calderon,

Distinguished members of the Mexican delegation,

Ladies and Gentlemen,

I am delighted to welcome you to India.

We have great admiration for Mexico, a country which has a rich heritage, vibrant democracy and pluralistic culture. The Mayan and Aztec civilizations of Mexico have enriched mankind. As the largest Spanish speaking country in the world, Mexico has influenced and inspired the culture, art, music and films of Latin America. Diego Rivera, Frida and Octavio Paz are well recognized and admired in India.

We are especially delighted to welcome you, Mr. President, since the visit is taking place 21 years after the last high-level visits. In this period, India has undergone a paradigm shift. It has become the fastest growing free market democracy in the world. India has achieved success in Information Technology and is gearing itself to be among the forefront of the emerging "knowledge and information society". The Indian manufacturing sector is becoming globally competitive. The new generation of young Indians has a mindset that is marked by optimism, confidence and a can-do attitude. They are determined to seize the opportunities arising from globalization.

Relations between our two countries have always been friendly and cordial. The time has come for us to give them fresh substance and depth in the new contemporary environment. There are synergies and complementarities waiting to be exploited. Our bilateral cooperation in Science and Technology, agriculture, trade, investment, energy, small and medium industries, culture and education must be significantly stepped up. We must also open up new areas of cooperation. Your visit provides us the opportunity to do this.

Trade between our two countries has been increasing rapidly in recent

years and reached \$1.8 billion in 2006. We expect this to touch \$5 billion by 2010. There are enormous opportunities for investment and joint ventures between the two countries.

Indian business considers Mexico not only as a big market in itself but also as a gateway to the markets of NAFTA and Central America. It is our expectation that Mexican companies would also take advantage of the opportunities offered by the large and growing market of India.

We must also revive the cultural and intellectual interaction between our two countries. Pandurang Khankhoje, an Indian freedom fighter, was Professor of Botany and Crop Breeding in the National School of Agriculture in Mexico. He established the "Free School of Agriculture". He met Pandit Nehru in 1949 as an emissary of the President of Mexico, leading to the establishment of diplomatic relations. The famous revolutionary leader M.N. Roy and the Indian artist Satish Gujral have also lived in Mexico and drawn inspiration. The former Mexican Ambassador to India Octavio Paz made invaluable contribution to Indo-Mexican understanding and cultural dialogue through his poems and writings.

Excellency, our two countries have had fruitful cooperation in the past on regional and international issues. We have worked together on issues of nuclear disarmament and South-South Cooperation. We both condemn terrorism unequivocally. Terrorism is not justified under any circumstances and the international community must unitedly fight this scourge that threatens international peace and security and seeks to undermine free and democratic societies.

Our cooperation continues in the contemporary context, including on matters pertaining to reform and democratization of the United Nations to make it representative of current realities. We must also unite in efforts to bring about a successful conclusion of the Doha Development Round of the WTO so as to ensure that the developmental requirements of the developing countries are fully met. Our collaboration on issues such as climate change and energy security must be strengthened.

Distance separates us but our worldviews are similar. This enables us to find common ground to address issues confronting us. We look forward to strengthening such cooperation.

Excellency, during your current state visit to India, the determination of our two countries to give depth and greater substance to our relationship is

reflected in our agreement to establish between our two countries a Privileged Partnership. It will be our endeavour that this Partnership flourishes to the benefit of our two peoples.

In conclusion, may I propose a toast: -

- U to the health of the President of Mexico and Madam Calderon,
- U to the prosperity of the Mexican people, and
- U to greater friendship and cooperation between India and Mexico.

### **510. Treaty of Extradition between the Government of the Republic of India and the Government of the United Mexican States.**

**New Delhi, September 10, 2007.**

**The Government of the Republic of India and the Government of the United Mexican States** hereinafter referred to as "The Parties";

**ENCOURAGED** by the desire to further strengthen the friendly relations between the parties;

**DESIRING** to improve the effectiveness of the cooperation between both countries in the prevention and suppression of crime;

**CONSCIOUS** of the importance of the cooperation in the fight against crime and granting each other assistance on reciprocal extradition of offenders;

**RECOGNIZING** that concrete steps are necessary to combat terrorism;

**BASED** on mutual respect for the sovereignty and equality between the States;

**Have** agreed as follows:

#### **ARTICLE 1 Obligations to Extradite**

1. Each Party undertakes to extradite to the Other, in the circumstances and subject to the conditions specified in this Treaty, any person who, being accused or sentenced of an extradition offence as

described in Article 2, committed within the territory of a Party, is found within the territory of the other Party, whether such offence was committed before or after the entry into force of this Treaty.

2. Extradition shall also be available in respect of an extradition offence as described in Article 2 committed outside the territory of the Requesting Party but in respect of which it has jurisdiction if the Requested Party would, in similar circumstances, have jurisdiction over such an offence. In such circumstances the Requested Party shall have regard to all the circumstances of the case including the seriousness of the offence.
3. In addition, extradition shall be available for an extradition offence as described in Article 2:
  - a) If it is committed in a third State by a national of the Requesting Party and this Party bases its jurisdiction on the nationality of the offender; and
  - b) If it occurred within the territory of the Requested Party; and it would an offence under the national legislation of that Party punishable with imprisonment for a term of at least one (1) year.

## **ARTICLE 2 EXTRADITION OFFENCE**

1. An extradition offence for the purposes of this Treaty is constituted by a conduct, which pursuant to the national legislation of each Party is punishable by a term of imprisonment for a period of at least one (1) year.
2. An offence may be an extradition offence notwithstanding that it relates to taxation or revenue or is one of a purely fiscal character.
3. If the extradition is requested for the serving of sentence imposed in the Requesting Party, the duration of the sentence left to be served shall be at least for six (6) months.
4. For the purpose of this Treaty, extradition shall be considered in respect of extraditable crimes included in multilateral conventions to which both States are Parties.

**ARTICLE 3**  
**Central Authorities**

1. All requests under this Treaty shall be made by the Central Authorities of the Parties through Diplomatic Channels.
2. For the Republic of India the Central Authority is the Ministry of External Affairs and in the United Mexican States the Central Authority is the Ministry of Foreign Affairs.

**ARTICLE 4**  
**Composite Offences and Dual Criminality**

Extradition shall be available in accordance with this Treaty for an extradition offence, notwithstanding that the conduct of the person sought occurred wholly or a part in the Requested Party, if under the national legislation of the Party this conduct and its effects, or its intended effects, taken as a whole, would be regarded as constituting the commission of an extradition offence in the territory of the Requesting Party.

**ARTICLE 5**  
**Extradition of Nationals**

The Requested Party shall consider the extradition of its nationals. The nationality for this purpose shall be as at the time of the commission of the offence.

**Article 6**  
**EXTRADITION OR PROSECUTION**

1. The request for extradition may be refused by the Requested Party if the person whose extradition is sought may be tried for the extradition offence in the courts of tribunals of that Party.
2. Where the Requested Party, *refuses* the extradition for the reason set out in paragraph 1 of this Article, it shall submit the case to its competent authorities so that prosecution may be considered. Those authorities shall take their decision in the same manner as in the case of any offence of a serious nature under the national legislation of that Party.
3. If the competent authorities decide not to prosecute in such a case, the extradition shall be reconsidered at the request of the Requesting Party, in accordance with this Treaty.

**ARTICLE 7**  
**Political Offence**

1. Extradition shall be refused if the offence for which it is requested is an offence of a political character, or related with an offence of political character, according to each Party's national legislation.
2. For the purpose of this Treaty, the following offences shall not be regarded as offences of political character:
  - a) offences under International Conventions to which both States are Parties;
  - b) murder;
  - c) manslaughter or culpable homicide;
  - d) assault occasioning actual bodily harm, or causing injury, maliciously wounding or inflicting grievous bodily harm whether by means of a weapon, a dangerous substance or otherwise;
  - e) the causing of an explosion likely to endanger life or cause serious damage to property;
  - f) the making or possession of an explosive substance by a person to intend either himself or another person to endanger life or cause serious damage to property;
  - g) the possession of a firearm or ammunition by a person who intends either himself or through another person to endanger life;
  - h) the use of a firearm by a person with intent to resist prevent the arrest or prevent the arrest or detention of himself or another person;
  - i) damaging property whether used for public utilities or otherwise with intent to endanger life or with reckless disregard as to whether the life of another would thereby be endangered;
  - j) kidnapping, abduction, false imprisonment or unlawful detention, including the taking of a hostage;

- k) incitement to murder;
- l) any other offence related to terrorism which at the time of the request is under the national legislation of the Requesting Party, not to be regarded as an offence of a political character; and
- m) an attempt on conspiracy to commit any of the foregoing offences or participation as an accomplice of a person who commits or attempts to commit such an offence.

**ARTICLE 8**  
**Grounds for Refusal of Extradition**

The extradition may be refused:

1. If the person sought is being prosecuted by the Requested Party for the same offence for which the extradition has been requested;
2. If the person sought has been finally acquitted or convicted and sentenced in the Requested Party or a third State for the same offence for which the extradition is requested;
3. If a person who has been convicted of an extradition offence and sentenced to imprisonment or other form of detention for a period of less than six (6) months;
4. Had he been tried in the territory of the Requested Party for the offence for which his extradition is requested, he would have been entitled to be discharged under any rule of the national legislation of the Requested Party relation to previous acquittal or sentence.
5. When the prosecution has become barred by lapse of time according to the national legislation of the Requesting Party.
6. When the Requested Party has well founded reasons to believe that the request for extradition has been presented with the intention to prosecute or punish the person sought, by reason of race, religion or gender.
7. If the offence for which extradition is requested is an offence under military law, which is not also an offence under the ordinary criminal law.

8. If the extradition for the same offence has been previously denied on the same grounds and with regard to the same person.
9. If the offence for which the extradition is requested is Punishable by death under the law of the Requesting Party, and the death-penalty is not provided for Requesting Party gives such assurance as the Requested Party considers sufficient that the death-penalty will not be imposed or carried out.

#### **ARTICLE 9**

##### **Postponement of Surrender**

1. The request shall be made in writing and accompanied by:
  - a) If criminal proceedings against the person sought are instituted in the territory of the Requested Party, or he is lawfully detained in consequence of criminal proceedings, the decision whether or not to extradite him may be postponed until the criminal proceedings have been completed or he is no longer detained.

#### **ARTICLE 10**

##### **Extradition Procedures**

The requested shall be made in writing and accompanied by:

- a) as accurate a description as possible of the person sought, together with any other information which would help to establish his identity, nationality and residence, including possible location;
  - b) a statement of facts of the offence for which extradition is requested, and
  - c) the text of national legislation:
    - i) Defining the offence;
    - ii) prescribing the maximum punishment for that offence; and
    - iii) establishment the time limit for the prosecution of the offence.
2. If the request relates to an accused person, it must also be

accompanied by a certified copy of the charging document establishing accusation, the warrant of arrest issued by a Judge, Magistrate or other competent authority in the territory of the Requesting Party and by such evidence as, in accordance with the national legislation of the of the Requested Party would justify his committal for trial if the offence had been committed within the territory of the Requested Party.

3. If the request relates to a person already convicted and sentenced, it shall be accompanied by:
  - a) certified copies of the warrant of arrest, order of conviction and sentence; and,
  - b) a statement that the conviction or sentence was final and showing the remainder of the sentence to be served.
4. If the Requested Party considers that the evidence produced or information applied for the purposes of this Treaty is not sufficient in order to enable a decision to be taken as to the request, additional evidence or information shall be submitted within such time as the Requested Party may require.

#### **ARTICLE 11** **Provisional Arrest**

1. In urgent cases the person sought may, in accordance with the national legislation of the Requested Party, be provisionally arrested by the competent authorities of the Requested Party. The application shall contain an indication of intention to request the formal extradition of that person and a statement of the existence of a warrant of arrest against him and, if available, his description and such further information, if any, as would be necessary to justify the issue of a warrant of arrest as:
  - a) time and place of the offence committed;
  - b) circumstances of the commission;
  - c) proper information to determine the identity and nationality of the person sought.
2. The request for provisional arrest shall be executed by the

competent authorities of the Requested Party in accordance with its national legislation. The Requesting Party shall be informed of the result of the execution of request.

3. The person arrested provisionally could be released if within a period of sixty (60) days of the arrest of the person sought, the Requested Party has not received the formal request for extradition and the documents required pursuant to Article 10 of this Treaty.
4. The Requesting Party may present a further request even though the provisional arrest has ended. The new request shall be made in accordance with the provisions of this Treaty.

#### **ARTICLE 12 Documents and Evidence**

1. In all cases the documents submitted in accordance with the provisions of this Treaty shall be authenticated by the competent authority, in accordance with the national legislation of the Requested Party and accompanied by a translation in the official language of the Requested Party or in English.
2. The authorities of the Requested Party shall admit as evidence, in any proceedings for extradition, any evidence taken on oath or by way of affirmation, any warrant and any certificate of, or judicial document stating the fact»of a conviction, if it is authenticated:
  - a)
    - i) in the case of a warrant being signed, or in the case of any original document by being certified, by a judge, Magistrate or other competent authority of the Requesting Party; and
    - ii) either by oath of some witness or by being sealed with the official seal of the appropriate Minister of the Requesting Party; or
  - b) in such other manner as may be permitted by the national legislation of the Requested Party.
3. The evidence described in paragraph (2) shall be admissible in extradition proceedings in the Requested Party whether sworn or affirmed in the Requesting Party or in some third State.

**ARTICLE 13**  
**Summary Extradition**

If the person sought informs the competent authorities of the Requested Party that he agrees to be extradited, that Party may stop further proceedings, and take all measures for extradition subject to its national legislation in an expeditious manner.

**ARTICLE 14**  
**Conflicting Requests**

If extradition of the same person is requested, whether for the same or for different offences by the other Party and a third State with whom the Requested Party has extradition arrangement, the Requested Party shall determine to which State the person shall be extradited, and shall not be obliged to give preference to the other party of this Treaty.

**ARTICLE 15**  
**Surrender**

1. If extradition is granted, the person sought shall be sent by the authorities of the Requested Party to a convenient point of departure from its territory, in consultation with the Requesting Party.
2. The Requesting shall remove the person sought from the territory of the Requested Party within sixty days (60) or such longer period as may be permitted under the national legislation of the Requested Party. If he /she is not removed within that period, the Requested Party may release the person and refuse to extradite him/her for the same offence.

**ARTICLE 16**  
**Seizure and Surrender of Property**

1. To the extent permitted under its national legislation, the Requested Party may seize and surrender to the Requesting Party, all articles, documents, and evidence connected with the offence in respect of which extradition is granted. The items mentioned in this Article may be surrendered even when the extradition cannot be effected due to the death, disappearance, or escape of the person sought.
2. The Requested Party may condition the surrender of the property upon satisfactory assurances from the Requesting Party that the

property will be returned to the Requested Party as soon as possible. The Requested Party may also defer the surrender of such property if it is needed as evidence in the Requested Party

3. The rights of third parties in such property shall be duly respected.

#### **ARTICLE 17** **Rule of Specialty**

1. Any person who is surrendered to the Requesting Party under this Treaty shall not be, during the period described in paragraph (2) of this Article, arrested, imprisoned or tried within the territory of the Requesting Party for or in respect of any offence committed before he was extradited to that territory other than;
  - a. the offence in respect of which he was extradited;
  - b. any lesser offence disclosed by the facts proved for the purposes of securing his surrender other than an offence in relation to which an order for his extradition could not lawfully be made; or
  - c. any other offence in respect of which the Requested Party may consent to his arrest, imprisonment or trial concerning the offence other than an offence in relation to which an order for his extradition could not lawfully be made or would not in fact be made.
2. The period referred to in paragraph (1) of this Article is period beginning with the day of his arrival in the territory of the Requesting Party or his extradition under this Treaty and ending forty-five (45) days after the first subsequent day on which he has the opportunity to leave the territory of the Requesting Party.
3. The provisions of paragraph (1) of this Article shall not apply to offences committed after the return of a person under this Treaty or matters arising in relation to such offences.

#### **ARTICLE 18** **Re-Extradition**

A person shall not be re-extradited to a third State, except when, having had an opportunity to leave the territory of the State to which he has been surrendered, he has not done so within sixty (60) days of his final discharge,

or has returned to that territory after having left it.

**ARTICLE 19**  
**Expenses**

Expenses incurred in the territory of the Requested Party on account of the execution of the request for extradition shall be borne by that Party. The expenses on account of the transfer of the fugitive shall be borne by the requesting Party.

**ARTICLE 20**  
**Obligation under International Conventions**

The present Treaty shall not affect the rights and obligations of the Parties in respect of extradition arising from International Conventions/Treaties to which both are States Parties.

**ARTICLE 21**  
**Consultations**

Any difference arising out of the application, interpretation or implementation of the present Treaty shall be resolved amicably through consultations between the Central authorities.

**ARTICLE 22**  
**Transit**

1. Either Party may authorize transportation through its territory of a person surrendered to the other Party by a third State. A request for transit shall be made through diplomatic channels. It shall contain a description of the person being transported and a brief statement of the facts of the case. A person in transit may be detained in custody during the period of transit.
2. No authorization is required where air transportation is used and no landing is scheduled on the territory of the Party. In case of an unscheduled landing on the territory of one Party, the other Party may require the request for transit as provided in paragraph 1. That Party shall detain the person to be transported until the request for transit is received and the transit is effected, so long as the request is received within ninety-six (96) hours of the unscheduled landing.

**ARTICLE 23**  
**Final Provisions**

1. This Treaty is subject to ratification and the instruments of ratification shall be exchanged as soon as possible.
2. This Treaty shall enter into force on the thirtieth (30<sup>th</sup>) day after the exchange of the instruments of ratification.
3. This Treaty may be amended by mutual consent.
4. Either Party may terminate this Treaty. The termination shall take effect six (6) months from the date on which it was notified to the other Party.
5. The request for extradition received prior to its termination shall be considered under this Treaty.

**For the Government of  
The Republic of India**

**For the Government of the  
United Mexican States.**

**511. Treaty between the Government of the Republic of India and the Government of the United Mexican States on Mutual Legal Assistance in Criminal Matters.**

**New Delhi, September 10, 2007.**

**The Government of the Republic of India and the Government of the United Mexican States** hereinafter referred to as “the Contracting Parties”;

**GUIDED** by the traditional friendly relations between both countries:

**RECOGNISING** the need to facilitate the widest measure of assistance in the service of summons, execution of warrants and other judicial documents and commissions;

**DESIRING** to improve the effectiveness of both countries in the investigation, prosecution and suppression of crime, including terrorism and tracing, restraint, seizure and forfeiture of funds meant for financing acts of terrorism as also, the proceeds and instruments of crime, through cooperation and mutual legal assistance in criminal matters:

**HAVE** agreed as follows:

**ARTICLE 1  
SCOPE OF APPLICATION**

1. The Contracting Parties shall, in accordance with this Treaty, provide each other with the widest measure of mutual legal assistance in criminal matters.
2. Mutual legal assistance is any assistance given by either Contracting Party in respect of investigations, prosecutions or proceedings to the other Contracting Party in criminal matters, irrespective of whether the assistance is sought or is to be provided by a Tribunal or Court or some other authority.
3. Assistance shall be provided without regard to whether the conduct which is the subject of the investigation, prosecution or proceedings in one Contracting Party would constitute an offence under the laws of the other Contracting Party.
4. Assistance shall include:
  - a) locating and identifying persons and objects;

- b) serving documents, including documents seeking the attendance of persons;
  - c) providing information, documents and records;
  - d) providing objects, including lending exhibits;
  - e) taking evidence and obtaining statements, including expert's opinion ;
  - f) authorizing the presence of persons from one Contracting Party at the territory of the other Contracting Party for the execution of a request;
  - g) making detained persons available to give evidence or assist investigations;
  - h) facilitating the appearance of witnesses or the assistance of persons in investigations;
  - i) search and seizure;
  - j) taking measures to locate, restrain or forfeit the proceeds and instruments of crime;
  - k) providing of information by either Contracting Party *suo moto* to the other, which may be within its knowledge and can be of use of the other Contracting Party;
  - l) taking measures to locate, freeze, seize and forfeit any funds or finances meant for the financing of acts of terrorism in the territory of either Contracting Party;
  - m) any other form of assistance not prohibited by the national of the Requested Party.
5. This Treaty shall also apply to any requests for legal assistance relating to acts or omissions committed before its entry into force.
6. This Treaty does not empower one Contracting Party's authorities to undertake, in the territorial jurisdiction of the other, the exercise and performance of the functions or authority exclusively entrusted to the authorities of that other Contracting Party by its national laws or regulations.

## **ARTICLE 2 DEFINITIONS**

1. For the purpose of this Treaty:
  - a) for the Republic of India, criminal matters mean, investigations, inquiries, trials or other proceedings relating to an offence created by law of Parliament or by the legislature of a State and for the United Mexican States, criminal matters mean investigations or proceedings relating to any offence under any Federal or State law.
  - b) criminal matters shall also include investigations or proceedings relating to offences concerning taxation, duties, customs, foreign exchange and international transfer of capital or payments.
2.
  - a) “proceeds of crime” means any property derived or obtained directly or indirectly by any person or organization as a result of an offence, including crime involving money laundering or the value of any such property.
  - b) “property” means assets, whether corporeal or incorporeal, movable or immovable, tangible or intangible and deeds and instruments evidencing title to or interest in such assets derived or used in the commission of an offence include the ones obtained through proceeds of crime;
  - c) “forfeiture” means any legal measure resulting in the deprivation of property;
  - d) “instruments of crime” means any property which is or is intended to be used in connection with the commission of an offence;
  - e) “seizure of property” means any measure for the prevention of dealing in or transfer or disposal of property; and
  - f) “assistance” means legal assistance under this Treaty.
3. a) “Requesting Party” means the Contracting Party that makes the request for mutual legal assistance in criminal matters.

- b) "Requested Party" means the Contracting Party to whom the request is made.

**ARTICLE 3  
CENTRAL AUTHORITIES**

1. Requests for assistance under this Treaty shall be made through the Central Authorities of the Contracting Parties.
2. For the Republic of India the Central Authority shall be the Ministry of Home Affairs and in the United Mexican States the Central Authority shall be the Office of the Attorney General.
3. Any change or addition in the Central Authorities shall be notified by either Contracting Party through diplomatic channels.

**ARTICLE 4  
CONTENTS OF REQUESTS**

1. Requests for assistance under this Treaty shall be made in writing. However, in urgent circumstances, or where otherwise permitted by the Requested Party, requests may be made orally or by any electronic means such as electronic e-mail or facsimile, with the understanding that it shall be formalized in writing within thirty (30) days, after the request was made.
2. Requests for assistance shall include a statement of:
  - a) the name of the competent authority conducting the investigation or proceedings to which the request relates;
  - b) the matters, including the relevant facts and laws, to which the investigation or proceeding relates;
  - c) the purpose for which the request is made and nature of the assistance sought;
  - d) details of any particular procedure or requirement that the Requesting Party wishes to be followed and the reasons therefor;
  - e) any time limit within which compliance with the request is desired;

- f) the identity, nationality and location of the person or persons who are the subject of the investigation or proceedings;
- g) in the case of requests for the taking of evidence or search and seizure, or the location, restraint or forfeiture of proceeds of crime or funds meant for financing of acts of terrorism, a statement indicating the basis for belief that evidence may be found in the jurisdiction of the Requested Party;
- h) in the case of requests to take evidence from a person, a statement as to whether sworn or affirmed statements are required and a description of the subject matter of the evidence or statement sought;
- i) in the case of lending of exhibits, the persons or class of persons who will have custody of the exhibit, the place to which the exhibit is to be removed, any tests to be conducted and the date by which the exhibit will be returned;
- j) the person or class of persons which will have custody during the transfer, the place to which the detained person is to be transferred and the date of that person's return;
- k) in case that request is intended to receive a statement from a person in the territory of the Requested Party, the Requesting Party shall send the respective questionnaire in writing;
- l) the need, if any, for confidentiality and the reasons therefor; and
- m) in the case of request for seizure or forfeiture of proceeds or instruments of crime, including seizure and forfeiture of funds meant for financing acts of terrorism where possible:
  - (i) a detailed description of the proceeds or instrument including their location
  - (ii) a statement describing the basis for belief that the monies or property are the proceeds or instruments of crime including seizure and forfeiture of funds meant for financing acts of terrorism; and
  - (iii) a statement describing the evidence that would be available for proceeding in the Requested Party.

3. If the Requested Party considers that additional information is needed to enable the request to be dealt with, that Contracting Party may request such additional information.
4. The Requested Party shall not refuse to execute the request solely because it does not include all of the information prescribed under this Article if it can otherwise be executed according to the national law of the Requested Party.

#### **ARTICLE 5 EXECUTION OF REQUEST**

1. Requests for assistance shall be executed in accordance with the national legislation of the Requested Party and may be executed in accordance with any requirements specified in the request if not incompatible with its national legislation.
2. The Requested Party shall, upon request, inform the Requesting Party of any circumstances, which are likely to cause a significant delay in the execution of the request.
3. The Requested Party shall, inform the Requesting Party of the date and the place of execution of the request for assistance.
4. The Requested Party shall not refuse to execute a request on the ground of bank secrecy.
5. The Central Authority of the Requested Party shall communicate as soon as possible the result of its proceedings to the Central Authority of the Requesting Party.

#### **ARTICLE 6 REFUSAL OR POSTPONEMENT OF ASSISTANCE**

1. Assistance may be refused if, in the opinion of the Requested Party, the execution of the request would impair its sovereignty, security, public order, essential public interest or prejudice the safety of any person.
2. Assistance may be refused if the execution of the request would be contrary to the national law of the Requested Party.
3. Assistance may be refused if the request relates to an offence in respect of which the accused person had been finally acquitted or pardoned,

4. Assistance may be refused if the request seeking seizure, forfeiture of proceeds of crime or seizure of property is in respect of any conduct/activity it which cannot be made basis for such seizure or forfeiture in the Requested Party.
5. Assistance may be postponed by the Requested Party if execution of the request would interfere with an ongoing investigation or prosecution in the Requested Party.
6. The Requested Party shall promptly inform the Requesting Party of the decision of the Requested Party not to comply in whole or in part the request for assistance or either to grant or postpone execution of the request and shall give reasons for that decision.
7. The request for assistance may be refused if it relates to a political offence or an offence of a political nature. For the purpose of this Treaty, the following offences shall not be regarded as offences of political character:
  - (a) offences under International Conventions to which both States are Parties;
  - (b) murder;
  - (c) man slaughter or culpable homicide;
  - (d) assault occasioning actual bodily harm, or causing injury, maliciously wounding or inflicting grievous bodily harm whether by means of a weapon, a dangerous substance or otherwise;
  - (e) the causing of an explosion likely to endanger life or cause serious damage to property;
  - (f) the making or possession of an explosive substance by a person to intend either himself or another person to endanger life or cause serious damage to property;
  - (g) the possession of a firearm or ammunition by a person who intends either himself or through another person to endanger life;
  - (h) the use of a firearm by a person with intent to resist or prevent the arrest or detention of himself or another person;
  - (i) damaging property whether used for public utilities or otherwise

- with intent to endanger life or with reckless disregard as to whether the life of another would thereby be endangered;
- (j) kidnapping, abduction, false imprisonment or unlawful detention. including the taking of a hostage;
  - (k) incitement to murder;
  - (l) any other offence related to terrorism which at the time of the request is under the national legislation of the Requesting Party, not to be regarded as an offence of a political character; and
  - (m) an attempt or conspiracy to commit any of the foregoing offences or participation as an accomplice of a person who commits or attempts to commit such an offence.
8. Before refusing a request for assistance or before postponing the execution of a request, the Requested Party shall consider whether assistance may be provided subject to such conditions as it deems necessary. If the Requesting Party accepts assistance subject to those conditions, it shall comply with them.

**ARTICLE 7**  
**TRANSMISSION OF DOCUMENTS AND OBJECTS**

1. When the request for assistance concerns the transmission of records and documents, the Requested Party may transmit certified true copies.
2. The Requested Party may provide any information, copies of documents and records and objects in the possession of a government department or agency, but not publicly available, to the same extent and under the same conditions as they would be available to its own enforcement and judicial authorities.
3. The original documents and the objects transmitted to the Requesting Party shall be returned to the Requested Party as soon as possible, upon the latter's request.
4. Insofar as not prohibited by the national legislation of the Requested Party, documents, objects and records shall be transmitted in a form or accompanied by such certification as may be requested by the Requesting Party in order to make them admissible according to the national legislation of the Requesting Party.

**ARTICLE 8  
TAKING EVIDENCE IN THE REQUESTED PARTY**

1. Any person, including a person in custody or detention, requested to testify and produce documents, records or other articles in the Requested Party may be compelled by subpoena or order to appear and testify and produce such documents, records and other articles, in accordance with the national legislation of the Requested Party.
2. Subject to the national law of the Requested Party, commissions or other officials of the Requesting Party shall be permitted to be present when evidence is taken in the Requested Party and to participate in the manner as may be permissible.
3. The presence and participation of representatives shall have to be previously authorized by the Requested Party, which will inform the Requesting Party before the execution of the request.
4. The Requesting Party shall submit a list of the names, designation and reasons for the presence of its representative within a reasonable time frame before the execution of the request.

**ARTICLE 9  
VIDEO CONFERENCING**

On request, the Requested Party may facilitate examination of a | witness or an expert before its judicial authority or other competent authority, by means of video conferencing, in conformity with its national ; law and procedure.

**ARTICLE 10  
AVAILABILITY OF PERSONS TO GIVE EVIDENCE OR ASSIST IN  
INVESTIGATION IN THE REQUESTING PARTY**

The Requesting Party may request that a person be made available to testify or to assist in an investigation. The Requested Party shall invite the person to assist in the investigation or to appear as a witness in the proceedings and seek that person's concurrence in writing thereto. That person shall be informed in advance, of any expenses and allowances payable by the Requesting Party.

**ARTICLE 11  
MAKING DETAINED PERSONS AVAILABLE TO GIVE EVIDENCE OR  
ASSIST IN INVESTIGATIONS**

1. A person in custody in the territory of the Requested Party shall, at

request of the Requesting Party, be temporarily transferred to the Requesting Party to assist in investigations or proceedings, provided that the person consents to that transfer and there are no overriding grounds against transferring the person.

2. Where the person transferred is required to be kept in custody under the national legislation of the Requested Party, the Requesting Party shall hold that person in custody and shall return the person in custody at the conclusion of the execution of the request.
3. The initial term of transfer shall not exceed ninety (90) days, which, upon justified request of the Requesting Party, may be extended by the Requested Party.
4. Where the sentence imposed expires, or where the Requested Party advises the Requesting Party that the transferred person is no longer required to be held in custody, that person shall be set at liberty and be treated as a person in the territory of the Requesting Party under Article 10 of this Treaty.
5. The time spent in the custody within the territory of the Requesting Party shall be computed towards the sentence, which was imposed by the Requested Party.

#### **ARTICLE 12 SAFE CONDUCT**

1. A person, including a person in custody or detention, present in the territory of the Requesting Party in response to a request seeking that person's presence shall not be prosecuted, detained or subjected to any other restrictions of personal liberty in that State for any acts or omissions which preceded that person's departure from the Requested Party, nor shall that person be obliged to give evidence in any proceeding other than the proceedings to which the request relates.
2. Paragraph 1 of this Article shall cease to apply if a person, being free to leave the territory of the Requesting Party, has not left it within a period of thirty (30) days after being officially notified that that person's presence is no longer required or, having left that territory, has voluntarily returned.
3. Any person who fails to appear in the territory of the Requesting

Party shall not be subject to any sanction or compulsory measure in the Requested Party.

### **ARTICLE 13 SERVICE OF DOCUMENTS**

1. The Requested Party shall serve the documents sent by the Requesting Party. This service can be carried out by simple transmission of the documents to the addressee. If the Requesting Party expressly requests, the service shall be effected in accordance with the procedures established by its national legislation for similar documents or in any other manner compatible with its legislation.
2. The service shall be proved by a signed and dated receipt of the addressee or by a statement of the Requested Party certifying the fact, manner and date of service. The proof of service shall be transmitted immediately to the Requesting Party. If the Requested Party is unable to effect the service, it shall communicate the reasons for the same to the Requesting Party.
3. The Requesting Party shall transmit a request for the service of a document pertaining to a response or appearance in the Requesting Party within a reasonable time, before the scheduled response or appearance.

### **ARTICLE 14 PROCEEDS AND INSTRUMENTS OF CRIME**

1. The Requested Party shall, upon request, endeavour to ascertain whether any proceeds or instruments of a crime are located within its jurisdiction and shall notify the Requesting Party of the results of its inquiries.
2. The Requested Party shall, upon the request of the Requesting Party, execute a request for a search and seizure in accordance with its national laws.
3. Search and seizure shall be conducted by the Requested Party to the same extent and under the same conditions as to be got done for its own law enforcement and judicial authorities in accordance with its law.
4. The competent authority that has executed a request for a search

and seizure shall provide such information as may be required by the Requesting Party concerning, but not limited to, the identity, condition, integrity and continuity of possession of the documents, records or objects seized and the circumstances of the seizure.

5. Proceeds or instruments seized or forfeited pursuant to this Treaty shall accrue to the Requested Party, unless otherwise agreed.

#### **ARTICLE 15 CONFIDENTIALITY**

1. The Requested Party may require, after consultation with the Requesting Party, that information or evidence furnished or the source of such information or evidence be kept confidential, disclosed or used only subject to such terms and conditions as may be specified by the Requested Party.
2. The Requesting Party may require that the requests, its contents, supporting documents and any action taken pursuant to the request be kept confidential. If the request cannot be executed without breaching the confidentiality requirement, the Requested Party shall so inform the Requesting Party prior to executing the request and the latter shall then determine whether the request should nevertheless be executed.

#### **ARTICLE 16 LIMITATION OF USE**

The Requesting Party shall not disclose or use information or evidence furnished for purposes other than those stated in the request without the prior consent of the Requested Party.

#### **ARTICLE 17 AUTHENTICATION**

1. For the purposes of this Treaty, the documents acknowledged as official in the territory of one Contracting Party shall be acknowledged as official in the territory of the other Contracting Party.
2. Documents, records or objects transmitted pursuant to this

Treaty shall not require any form of authentication, except as specified in Article 7, or as required by the Requesting Party.

#### **ARTICLE 18 LANGUAGE**

Requests, supporting documents and other communications made pursuant to this Treaty shall be in the language of the Requested Party or in English.

#### **ARTICLE 19 EXPENSES**

1. The Requested Party shall meet the expense of executing the request for assistance, nevertheless the Requesting Party shall bear:
  - a) the expenses associated with conveying any person to or from the territory of the Requested Party at the request of the Requesting Party, and any allowance or expenses payable to that person while in the Requesting Party pursuant to a request under Article 10 or 11 or this Treaty; and
  - b) the expenses and fees of experts either in the Requested Party or the Requesting Party.
2. If it becomes apparent that the execution of the request requires expenses of an extraordinary nature, the Parties shall consult to determine the terms and conditions under which the requested assistance can be provided.

#### **ARTICLE 20 CONSULTATION**

The Central Authorities of the Contracting Parties shall consult, at times mutually agreed to by them, to promote the most effective implementation of this Treaty. The Central Authorities may also agree on such practical measures as may be necessary to facilitate the implementation of this Treaty.

#### **ARTICLE 21 OTHER INSTRUMENTS**

Assistance and procedures set forth in this Treaty shall not prevent either Contracting Party from granting assistance to the other Contracting Party

through the provisions of other applicable international conventions/ agreements, or through the provisions of its national law. The Parties may also provide assistance pursuant to any bilateral arrangement, agreement or practice which may be applicable.

**ARTICLE 22  
SETTLEMENT OF DISPUTES**

Any difference or dispute arising out of the application, interpretation or implementation of this Treaty shall be resolved amicably by negotiations and mutual consultations.

**ARTICLE 23  
FINAL PROVISIONS**

1. This Treaty is subject to ratification and the instruments of ratification shall be exchanged as soon as possible.
2. This Treaty shall enter into force on the thirtieth (30<sup>th</sup>) day after the exchange of instruments of ratification.
3. This Treaty may be amended by mutual consent. Any such amendment shall enter into force thirty (30) days after the receipt of the later communication intimating the completion by the Contracting Parties of their internal procedure for the entry into force of the amendment through diplomatic channels.
4. Either Contracting Party may terminate this Treaty. The termination shall take effect six (6) months from the date on which it is notified through diplomatic channels to the other Contracting Party.
5. The requests for assistance made before termination of this Treaty shall be considered even if this Treaty has been terminated.

**Signed** at New Delhi this the 10<sup>th</sup> day of September 2007 (Two thousand and Seven) in three originals each, Hindi, Spanish and English, all texts being equally authentic. However, in case of divergence, the English text shall prevail.

## BELARUS

### **513. Press Release of the Ministry of External Affairs on the State visit of President of Belarus Aleksandr Lukashenko.**

**New Delhi, April 16, 2007.**

The President of Belarus, H.E. Mr. Aleksandr Lukashenko paid a State visit to India from April 15-16, 2007. He was accompanied by a high level delegation consisting of five Ministers and Chairmen of State Committees on Science & Technology and Military-Industry. The members of the delegation are listed at Annex I. A group of leading Belarus businessmen is also visiting India to coincide with this visit. Names of business representatives and their company affiliations are detailed in Annex II.

The President of Belarus met the Indian President, Vice President, Prime Minister and External Affairs Minister. The two sides reviewed bilateral relations and exchanged views on issues of international and mutual interest. A Joint Statement was adopted on the visit of the President of Belarus. Five agreements were concluded during the visit; a list of these agreements is at Annex III.

The Minister of Interior of Belarus, Mr. Vladimir Naumov met the Minister of Home Affairs, Shri. Shivraj Patil to exchange views and discuss areas of mutual interest. The fourth meeting of the Joint Committee on Science & Technology led by the Chairman of the Belarus State Committee on Science & Technology, Mr. Vladimir Matyushkov and Secretary, Department of Science & Technology, Mr. T. Ramasami reviewed bilateral scientific and technological cooperation and implementation of joint projects. The Chairman of State Military and Industrial Committee, Mr. Nikolai Azamatov met the Scientific Advisor to Raksha Mantri, Shri. M. Natarajan. Mayor of Minsk, Mr. Mikhail Pavlov met the Chief Minister of Delhi, Smt. Sheila Dikshit.

The fourth meeting of the India - Belarus Joint Business Council, which was organised by FICCI was held on April 16, 2007 and was attended by leading businessmen from both sides.

**514. Press Release of the Ministry of Home Affairs on the meeting of Home Minister Shivraj Patil with the Belarus Interior Minister Vladimir Naumov.**

**New Delhi, April 16, 2007.**

The Belarus Interior Minister, Mr. Vladimir Naumov met the Union Home Minister, Shri Shivraj Patil here today. The two leaders expressed satisfaction over the current level of understanding between the two countries and expressed the desire to further strengthen the bilateral relations. During the meeting, various issues including those relating to security were discussed. Shri Patil informed the visiting Minister that India has suffered a lot due to terrorism, but has been able to contain the menace. He expressed satisfaction over the fact that there is growing international realization now about the need to contain terrorism. The Union Home Minister also briefed the Belarus Interior Minister about the working of his Ministry, particularly in the sphere of Centre-State relations. Shri Patil accepted Mr. Naumov's invitation to visit Belarus.

The meeting lasted about 45 minutes

**515. Speech of President Dr. APJ Abdul Kalam at the banquet in honour of Belarus President Aleksandr G.Lukashenko.**

**New Delhi, April 16, 2007.**

Your Excellency, Mr. Aleksandr G. Lukashenko,

President of the Republic of Belarus,

Excellencies,

Distinguished Guests,

Ladies and Gentlemen,

It gives me great pleasure to welcome you and your delegation to India. I am very happy to note that your visit is taking place at the time of the 15th anniversary of the establishment of diplomatic relations between our two countries.

Excellency, India regards Belarus as a close and traditional friend. We recall with satisfaction your earlier visit to India in September 1997. It resulted in substantial growth in our bilateral ties in various spheres. Your present visit would, undoubtedly, impart further impetus to the multifaceted ties between our two countries for the mutual benefit of our peoples.

Mr. President, I recall my visit to your beautiful country in 1998 when I was fortunate to interact with the highly talented members of the Belarusian scientific community, universities, labs and other friends of India. The visit left me with warm memories and a lasting impression of your country's achievements and capabilities. I am glad to note that the process of our scientific cooperation has since grown both in range and depth.

Mr. President, I have learnt about your productive and useful discussions with our Prime Minister on various issues of common interest. Our ongoing cooperation, particularly in the spheres of defense, science & technology, trade and investment are important reflections of our close relations. I am confident that this cooperation will further intensify in the years ahead through measures such as direct lab-to-lab joint programmes.

We have watched with admiration the sustained progress made by Belarus since its independence in 1991. Belarus today is stronger, both politically and economically, and is playing an active role on the international stage, including as a member of the Non-Aligned Movement. Belarus should be justly proud of being among the rapidly growing economies of the region.

Excellency, India too is making all-round progress. Our high growth rate and technological capabilities provide a vast array of opportunities for enhancing economic ties between our two countries. To sustain a high rate of growth, India faces the challenge of meeting its rapidly rising energy demand. We expect to use nuclear power as an important element, in this direction as it is near clean energy. In this context, we greatly appreciate the Belarus approach, as a member of the Nuclear Suppliers Group, to support full international civil nuclear energy cooperation with India.

Mr. President, our bilateral trade and economic cooperation, though growing steadily, is still below its potential. There is a need for us to raise the intensity of our efforts to increase two-way trade and economic cooperation and set a target of 500 million dollars of bilateral trade by 2010. Both countries should encourage use of mutual synergies in new areas, including through the setting up of joint ventures in sectors such as mining, heavy engineering and knowledge-based enterprises. We would especially like to

have joint ventures in the areas of heavy road making equipment and in the pharma sector.

Excellency, it is a matter of particular satisfaction that both our countries have been cooperating with each other at the UN and other multilateral fora in a constructive and result-oriented manner. In our rapidly globalizing world, threats and challenges such as terrorism, fundamentalism and extremism must be neutralized effectively through universal commitment and cooperation. We stand firm in condemning all forms and manifestations of terrorism.

In conclusion, I would like to say that there are immense opportunities for all developing countries in the world to grow to their full potential utilizing the resources available among themselves. In this context, human resource development assumes particular importance. India is a country that offers a variety of opportunities in capacity building and for specialized skill development especially in areas like IT etc. Such opportunities enable people-to-people interaction on a sustained basis. India stands ready with its hand of cooperation extended to strengthen people-to-people bonds between India and Belarus.

Excellencies, Ladies and Gentlemen, may I now request you to join me in a toast to:-

- U the peace, prosperity and well being of the friendly people of Belarus;
- U the good health and prosperity of His Excellency President Aleksandr G. Lukashenko, and;
- U the enduring friendship between India and Belarus.

**516. Joint Statement on the visit of the President of the Republic of Belarus A.G. Lukashenko.****New Delhi, April 16, 2007.**

At the invitation of the President of India, H.E. Dr. A.P.J. Abdul Kalam, the President of the Republic of Belarus, H.E. Mr. A.G. Lukashenko, paid a State visit to the Republic of India on April 15 -16, 2007.

2. During the visit, the President of the Republic of Belarus had meetings with the President of India, Dr. A.P.J. Abdul Kalam, Vice President of India, Shri Bhairon Singh Shekhawat, Prime Minister of India, Dr. Manmohan Singh and the External Affairs Minister, Shri Pranab Mukherjee.
3. The talks were held in a warm and cordial atmosphere. Both sides noted with satisfaction the close and friendly relations between India and Belarus, the friendship between the two peoples and shared views and understanding on various international issues. The two sides reviewed the present state and future prospects of India-Belarus relations, and exchanged views on matters of mutual interest. It was noteworthy that the visit coincided with the 15th anniversary of the establishment of diplomatic relations between India and Belarus (on April 17, 2007).
4. The two sides noted that high-level visits impart a positive impetus to bilateral cooperation by further strengthening the political and economic aspects of their relationship, mutual trust and traditional friendship between the people of the two countries. The two sides expressed their readiness to further strengthen their ties through mutual visits at all levels in order to provide a fresh impetus to India-Belarus relations.
5. Recognizing the benefits of long term partnership, the two sides agreed to the further strengthening and diversifying of their cooperation in various fields. They stressed the importance of new initiatives in the spheres of trade, economy, science & technology and two-way investment, including the setting-up of joint ventures and industrial applications of jointly developed technologies. The two sides noted the importance of further diversifying and strengthening the ways and means of economic and financial co-operation through coordinated efforts.

6. The two sides noted with satisfaction the successful completion of bilateral negotiations culminating in the signing of a bilateral Protocol on Belarus' accession to World Trade Organization.
7. It was reiterated that bilateral relations are based on the principles of peaceful co-existence, mutual trust and understanding aimed at fulfilling the interests of the two countries and their peoples. The importance of cooperation in various spheres based on co-ordination and interaction between the Ministries, Departments and other entities concerned was highlighted by the two sides.
8. India and Belarus acknowledged the prospects of strengthening bilateral defence cooperation and agreed to set-up an India-Belarus Joint Commission on military-technical cooperation.
9. The two sides stressed that independence, sovereignty, non-interference in the internal affairs of other countries and territorial integrity are fundamental principles governing international relations. The two sides agreed that harmonious co-existence and democratization of international relations contribute to the strengthening of global stability and security. Both sides fully support the establishment of a multi-polar world order which could guarantee progress, development, security and stability for all countries. They agreed that it is important to respect the diversity of the development models of different countries and shared the view that relations between states and co-operation among them in today's globalizing world must be based on this approach. India acknowledged the policies followed by Belarus as a sovereign state and its model of development and supported Belarus' efforts aimed at protecting its sovereignty and national dignity and contributing to its social and economic development.
10. The two sides stressed that activities aimed at strengthening a central and coordinating role of the UN in achieving peace, stability and security all over the world, and at enhancing the authority and efficiency of the UN, constitute important elements of India-Belarus cooperation at the international level.
11. The two sides agreed on the need for greater efforts by all member countries to accelerate the process of UN reform, including the expansion of the Security Council, in both permanent and non-permanent categories of membership, so as to reflect contemporary

realities. In this context, Belarus reaffirmed its support to India as a candidate with strong credentials for permanent membership in an expanded UN Security Council.

12. In the context of regional conflicts, both sides agreed that political and diplomatic reconciliation should be achieved by adopting dialogue and negotiations as a norm in inter-governmental relations.
13. The two sides expressed concern about the negative effects of slavery and human trafficking and reiterated their commitment to work towards combating this phenomenon.
14. The two sides supported efforts aimed at promoting peace and stability and economic reconstruction in Iraq.
15. The two sides expressed hope that the issue of Palestine will be resolved through peaceful negotiations, resulting in a sovereign, independent viable State of Palestine, within recognized and well-defined borders, living at peace with the State of Israel, and in line with relevant UN Security Council resolutions, within a reasonable time-frame.
16. India and Belarus supported further strengthening of the activities of the Non-Aligned Movement, the principle of solidarity within the Non-Aligned Movement, the commonality of positions of the NAM members in the United Nations Organization & other international organizations and furthering interaction among its member countries, particularly in the areas of trade and economic co-operation.
17. Both sides stated that terrorism in all its manifestations poses a serious threat to global peace and stability and that India and Belarus will further strengthen cooperation both bilaterally as well as in the multilateral context to combat this phenomenon. In this context, they called upon all member states to step up efforts to conclude a Comprehensive Convention on International Terrorism (CCIT) at the United Nations expeditiously.
18. Both India and Belarus, as responsible members of the international community, reiterated their commitment to the objective of non-proliferation of weapons of mass destruction and their means of delivery.

19. The two sides recognized that nuclear energy is a viable, long-term, economical and environmentally-sound means for electric power generation. The two sides expressed their intention to broaden and strengthen co-operation in the field of peaceful uses of atomic energy. The two sides recognized the importance of the application of innovative technologies in the nuclear sphere. The participation of India and Belarus in an international project on innovative nuclear reactors being implemented under the aegis of the IAEA is an example of effective international co-operation in this regard.
20. Belarus will continue to work with the participating Governments of the Nuclear Suppliers Group in order to create conditions for the expansion of the framework for co-operation with India in the field of peaceful uses of atomic energy.
21. With a view to further enhancing the mutually beneficial ties between India and Belarus in different spheres of co-operation, the following documents were signed at the conclusion of the talks between the two sides:
  - U Treaty on Extradition;
  - U Agreement on cooperation in the field of Agriculture;
  - U Programme of Cooperation in the field of culture, arts, education, mass media and press for 2007-09;
  - U Executive Programme of Cooperation in the field of Science & Technology for the period 2007-10;
  - U Protocol on the accession of the Republic of Belarus to the World Trade Organization.
22. The President of the Republic of Belarus, H.E. Mr. A.G. Lukashenko expressed his gratitude to the Indian Side for the warm reception accorded to him and invited the President of India Dr. A.P.J. Abdul Kalam and the Prime Minister of India Dr. Manmohan Singh to visit Belarus. The invitations were accepted with pleasure.

**517. Treaty of Extradition between the Republic of India and the Republic of Belarus.**

**New Delhi, April 16, 2007.**

**The Republic of India and the Republic of Belarus**, hereinafter referred to as the 'Parties'; /

**Desiring** to make more effective the cooperation of the two countries in the suppression of crime by making further provision for the reciprocal extradition of offenders;

**Recognising** that concrete steps are necessary to combat crime including terrorism;

**Have** agreed as follows:

**Article 1  
Duty to Extradite**

The Parties agree to extradite to each other, pursuant to the provisions of this Treaty, any person, who is accused or charged with or convicted of any extraditable offence, by the competent authorities of the Requesting Party, whether such offence was committed before or after the entry into force of this Treaty, as well as if it is committed in a third State by a national of the Requesting Party and the Requesting Party bases its jurisdiction on the nationality of the offender.

**Article 2  
Competent Authority**

The competent authority for the Republic of India shall be the Ministry of External Affairs and for the Republic of Belarus shall be the Prosecutor's Office .

**Article 3  
Extradition Offence**

1. An extradition offence for the purposes of this Treaty is constituted by conduct, which under the law of each Party is punishable by a term of imprisonment for a period of at least one year.
2. A person who has been convicted of an extradition offence may be extradited if he was sentenced to imprisonment or other form of detention for a period of six months or more.

3. AN offence may be an extradition offence notwithstanding that it relates to taxation or revenue or is one of a purely fiscal character.

**Article 4  
Composite Offence**

Extradition shall be available in accordance with this Treaty for an extradition offence, notwithstanding that the conduct of the person sought occurred wholly or in part in the Requested Party, if this conduct and its effects, or its intended effects, taken as a whole, would be regarded as constituting the commission of an extradition offence under the laws of both the Contracting Parties.

**Article 5  
The Political Offence Exception**

1. Extradition may be refused if the offence of which it is requested is an offence of a political character.
2. For the purpose of this Treaty the following offences shall not be regarded as offences of a political character.
  - (a) offences provided under international treaties/conventions to which both countries are parties;
  - (b) murder;
  - (c) manslaughter or culpable homicide;
  - (d) assault occasioning actual bodily harm, or causing injury, maliciously wounding or inflicting grievous bodily harm whether by means of a weapon, a dangerous substance or otherwise;
  - (e) the causing of an explosion likely to endanger life or cause serious damage to property;
  - (f) the making or possession of an explosive substance by a person who intends either himself or through another person to endanger life or cause serious damage to property;
  - (g) the possession of a firearm or ammunition by a person who intends either himself or through another persons to endanger life;
  - (h) the use of a firearm by a person with intent to resist or prevent the arrest or detention of himself or another person;

- (i) damaging property whether used for public utilities or otherwise with intent to endanger life or with reckless disregard as to whether the life of another would thereby be endangered;
- (j) kidnapping, abduction, false imprisonment or unlawful detention, including the taking of a hostage;
- (k) incitement to murder;
- (l) any other offence related to terrorism which at the time of the request is, under the law of the Requested Party, not to be regarded as an offence of a political character;
- (m) an attempt or conspiracy to commit any of the foregoing offences or participation as an accomplice of a person who commits or attempts to commit such an offence.

**Article 6**  
**Grounds for Refusal of Extradition**

1. A person may not be extradited if:
  - (a) he is a national/citizen of the Requested Party;
  - (b) according to the legislation of the Requested Party, the person sought to be extradited has become immune from the criminal prosecution or carrying out of a sentence by reason of lapse of time;
  - (c) the accusation against him not having been made in good faith in the interests of justice;
  - (d) the offence of which he is accused or convicted is a military offence which is not also an offence under the general criminal law;
  - (e) the grant of extradition is contrary to the laws of the Requested Party.
2. A person may not be extradited if he would, if proceeded against in the territory of the Requested Party for the offence for which his extradition is requested, be entitled to be discharged under any rule of law of the Requested Party relating to previous acquittal or conviction.
3. The request for extradition may be refused by the Requested Party

if the person whose extradition, is sought may be tried for the extradition offence in the courts of the Requested Party.

**Article 7**  
**Obligation to prosecute**

1. Where the Requested Party refuses a request for extradition for the reason set out in paragraph 3 of Article 6 of this Treaty, it shall submit the case to its competent authorities for prosecution.
2. If the competent authorities decide not to prosecute in such a case, the request for extradition shall be reconsidered in accordance with this Treaty.

**Article 8**  
**Consequences of non-extradition of own citizens**

If according to paragraph 1(a) of Article 6 of this Treaty, extradition is refused, the Requested Party shall initiate criminal prosecution against such person for the same offence according to its laws. For this the Requesting Party shall transfer to the Requested Party the relevant documents and evidence.

**Article 9**  
**Postponement of extradition and temporary extradition**

1. If the person sought to be extradited is being prosecuted or serving his sentence for another offence in the territory of the Requested Party, the extradition may be postponed till the completion of proceedings, completion of sentence or his release, which shall be advised to the Requesting Party.
2. If the postponement of extradition may cause lapse of time or impede the investigation, the person can be temporarily extradited at the request of the Requesting Party.
3. The temporarily extradited person must be returned to the Requested Party immediately after the end of the proceedings of the case.

**Article 10**  
**Extradition Procedures**

1. The request for extradition under this Treaty shall be in writing through the diplomatic channels or the competent authorities.
2. The request shall be accompanied by:

- (a) as accurate a description as possible of the person sought together with any other information which would help to establish his identity, nationality and residence;
  - (b) a statement of the facts of the offence for which extradition is requested including information about the nature and size of damage caused by the offence for which extradition is requested; and
  - (c) the text, if any, of the law :
    - (i) defining that offence; and
    - (ii) prescribing the punishment for that offence.
- 3. If the request relates to an accused person, it must also be accompanied by a warrant of arrest issued by a judge, magistrate or other competent authority in the territory of the Requesting Party and by such evidence as, according to the law of the Requested Party, would justify his committal for trial if the offence had been committed in the territory of the Requested Party, including evidence that the person requested is the person to whom the warrant of arrest refers.
- 4. If the request relates to a person already convicted and sentenced, it shall also be accompanied:
  - (a) by a certificate of the conviction and sentence;
  - (b) by a statement that the person is not entitled to question the conviction or sentence and showing how much of the sentence has not been carried out.
- 5. In relation to a convicted person who was not present at his trial, the person shall be treated for the purposes of paragraph 4 of this Article as if he had been accused of the offence of which he was convicted.
- 6. If the Requested Party considers that the evidence produced or information supplied for the purposes of this Treaty is not sufficient in order to enable a decision to be taken as to the request; additional evidence or information shall be submitted within such time as the Requested Party shall require.
- 7. Upon receipt of the request for extradition, the Requested Party shall,

in accordance with its laws and the provisions of this Treaty, take urgent measures for arrest of the person sought.

**Article 11**  
**Provisional Arrest**

1. In urgent cases the person sought may, in accordance with the law of the Requested Party, be provisionally arrested on the application of the competent authorities of the Requesting Party, made either through diplomatic channels or the National Central Bureau of International Criminal Police Organization - INTERPOL. The application shall contain an indication of intention to request the extradition of that person and statement of the existence of a warrant of arrest or a conviction against him, and, if available, his description and such further information, if any, as would be necessary to justify the issue of a warrant of arrest had the offence been committed, or the person sought been convicted, in the territory of the Requested Party.
2. The Requested Party shall inform without delay the Requesting Party about such provisional arrest.
3. A person arrested upon such an application shall be set at liberty upon the expiration of 60 days from the date of his arrest if request for his extradition shall not have been received. This provision shall not prevent the institution of further proceedings for the extradition of the person sought if a request is subsequently received.

**Article 12**  
**Rule of Specialty**

1. The extradited person may not without consent of the Requested Party, be prosecuted or punished in the Requesting Party for the offence other than that for which extradition has been granted and any lesser offence disclosed by the fact proved for the purposes of securing his extradition, nor any such a person, without consent of the Requested Party, be extradited to a third State.
2. The consent of the Requested Party is not required if the extradited person:
  - (a) has not left, though had the opportunity, the territory of the Requesting Party within 45 days after termination of the

criminal prosecution, serving of the sentence or release on any legal ground. Such period shall not be deemed to include the period of time during which the extradited person is unable to leave the territory of the Requesting Party for reasons beyond his control;

- (b) once having left the territory of the Requesting Party, voluntarily returns there.
3. The provisions of paragraph 1 of this Article shall not apply to offences committed after the return of the person to the Requesting Party or matters arising in relation to such offences.

### **Article 13 Recognition of Documents and Evidence**

1. The authorities of the Requested Party shall admit in any proceedings for extradition, any evidence and related documents taken on oath or by way of affirmation, any warrant and any certificate of, or judicial document stating the fact of, a conviction, if it is authenticated:
- a) (i) in the case of a warrant being signed, or in the case of any original document by being certified, by a judge, magistrate or other competent authority of the Requesting Party; and  
(ii) either by oath of some witness or by being sealed with the official seal of the appropriate Minister of the Requesting Party; or
  - (b) in such other manner as may be permitted by the law of the Requested Party.
2. The evidence described in paragraph 1 of this Article shall be admissible in extradition proceedings in the Requested Party whether sworn affirmed in the Requesting Party or in some third Party.
3. Documents considered as public in the territory of one Party shall have the evidential force of public documents also in the territory of the other Party.

### **Article 14 Competing Requests**

If extradition of the same person whether for the same offence or for different

offences is requested by a Contracting Party and a third Party with which the Requested Party has an extradition arrangement, the Requested Party shall determine to which Party the person shall be extradited, and shall not be obliged to give preference to the Contracting Party.

#### **Article 15 Capital Punishment**

If under the law of the Requesting Party the person sought is liable to the death penalty for the offence for which his extradition is requested, but the law of the Requested Party does not provide for the death penalty in a similar case, extradition may be refused unless the Requesting Party gives such assurance as the Requested Party considers sufficient that the death penalty will not be carried out.

#### **Article 16 Surrender**

1. If extradition is granted!, the Requested Party shall notify the Requesting Party of the time and place of delivery of the extradited person.
2. The Requesting Party shall remove the person sought from the territory of the Requested Party within 45 days or such longer period, which may not exceed 60 days. If he is not removed within that period, the Requested Party may refuse to extradite him for the same offence and release the person.

#### **Article 17 Surrender of Property**

1. When a request for extradition is granted the Requested Party shall, upon request and so far as its law allows, seize and hand over to the Requesting Party articles (including sums of money) which may serve as proof or evidence of the offence.
2. The articles mentioned in paragraph 1 of this Article shall also be delivered in case the extradition of a person cannot be carried out owing to his death, escape or other reasons.
3. If the articles in paragraph 1 of this Article are needed in the territory of the Requested Party in connection with pending criminal proceedings, their transfer may be postponed till the completion of

the proceedings or they shall be handed over on the condition that they will be returned.

4. These provisions shall not prejudice the rights of the Requested Party or any person other than the person sought. When these rights exist the articles shall be returned to the Requested Party without charge as soon as possible after the end of the proceedings.

#### **Article 18 Expenses**

1. Expenses incurred in the territory of the Requested Party by reason of the request for extradition shall be borne by that Party.
2. The expenses incurred by reason of transit of the extradited person shall be borne by the Requesting Party.

#### **Article 19 Languages**

While complying with this Treaty, the Parties shall use their national language attaching the translation in the national language of the other Party or in the English language.

#### **Article 20 Obligations under International Conventions/Treaties**

The present Treaty shall not affect the rights and obligations of the Parties arising from International Conventions/Treaties to which they are Parties.

#### **Article 21 Ratification and Termination**

1. This Treaty shall be subject to ratification and shall enter into force on the date of exchange of the instruments of ratification.
2. Either Party may terminate this Treaty at any time by giving written notice to the other Party through the diplomatic channel of its intention to terminate the Treaty and the same shall cease to have effect six months after the receipt of the notice by the other Party.

**IN WITNESS WHEREOF**, the undersigned being duly authorized, have signed this Treaty.

**Done** at New Delhi on the-16<sup>th</sup> day of April 2007, in two originals, each in

Hindi, Russian and English, all languages being equally authentic. In case of any divergence of interpretation, the English text shall prevail.

## **BULGARIA**

### **518. Speech of Prime Minister Dr. Manmohan Singh at the banquet in honour of the Prime Minister of Bulgaria Sergei Stanishev**

Your Excellency Prime Minister Stanishev,

Ladies and gentlemen

On behalf of the Government and people of India it gives me immense pleasure to welcome you, along with all the distinguished members of your delegation, to India.

Excellency,

Your visit is an important milestone in our relations that are rooted in history and steeped in antiquity. It is a coming together of two old friends.

Excellency, Bulgaria is a country that we have known intimately for the last several decades. The works of Georgi Rokovski and Boris Georgiev, the beauty of Varna, and the students of the Indira Gandhi School in Sofia and Kindergarten in Pravetz have all contributed to the fund of goodwill and friendship that exists between us. Rabindranath Tagore's visit in 1926 captured the imagination of intellectuals on both sides, and laid the foundations of the study of Indology in Bulgaria.

Today, we welcome you as the modern face of Bulgaria. We admire your spirit of enterprise, and your values of democracy, pluralism and human rights. We celebrate Bulgaria's accession to the European Union. We know that this is good for Bulgaria, good for Europe, and good for India.

Indo-Bulgarian relations are unique. They are not directed against anyone.

There are no irritants. Their sole objective is the Determent of the lives of our two peoples. They contribute to international peace and prosperity.

We have today pledged to shape a partnership that befits the new world order. A partnership that reflects our contemporary strengths and complementarities. Let us reconnect ourselves, and rediscover the benefits of more trade, more investment and more intellectual and cultural interaction. The frontiers of science and technology beckon us to do more. Our task is easy because it is built on the foundation of shared interests, and complete

mutual trust. It is essential, if we have to meet the aspirations of our peoples.

Excellency,

We have convergent views on many international issues. We look forward to working with you to strengthen the United Nations so that it reflects today's realities, and on key issues of energy security, civil nuclear cooperation, climate change, and terrorism.

Our talks have been held in an atmosphere of utmost warmth and cordiality. We have reached concrete outcomes. India is grateful for your friendship, which has stood the test of time. We highly value this friendship, and reciprocate it in full measure.

Excellencies, Ladies and Gentlemen,

I request you to join me in a toast to the health of His Excellency Prime Minister Sergei Stanishev,

the further strengthening of the multisectoral cooperation between India and the Republic of Bulgaria, and

the ever-growing friendship and goodwill between the peoples of our two countries.

**519. Joint Declaration issued during the visit of Prime Minister of Bulgaria Sergei Stanishev.****New Delhi, September 12, 2007.**

1. At the invitation of the Prime Minister of the Republic of India Dr. Manmohan Singh, the Prime Minister of the Republic of Bulgaria, H.E. Mr. Sergei Stanishev paid a state visit to India from 10-15 September 2007.
2. The Prime Ministers of India and Bulgaria held official talks on bilateral, regional and global issues of mutual concern. Prime Minister Dr. Manmohan Singh hosted a banquet in honour of the visiting dignitary. Prime Minister Sergei Stanishev called on President Smt. Pratibha Patil and Vice President Shri Hamid Ansari, and met with Speaker, Lok Sabha Shri Somnath Chatterjee, External Affairs Minister Shri Pranab Mukherjee, Chairperson of United Progressive Alliance Smt. Sonia Gandhi, and Leader of Opposition Shri L.K. Advani.
3. The talks were held in an atmosphere of friendship, warmth and mutual understanding. The two sides expressed satisfaction with the mutually beneficial cooperation and partnership between Bulgaria and India encompassing political dialogue, economic, defence, scientific and technological cooperation, cultural and educational exchange, etc. They agreed to work together for the further enhancement of their multifaceted relationship based on shared democratic values, respect for human rights, mutual understanding and cooperation and similarity of views on major international issues.
4. Both Prime Ministers expressed their will to expand and diversify trade and economic cooperation in areas in which Bulgaria and India have comparative advantages, and to utilise the untapped potential in this area and the existing institutional framework<sup>1</sup>. They agreed to work together for enhancing bilateral investments in various sectors, including in knowledge-based industries.

---

1. On September 11 when the Bulgarian Minister for Economy and Energy called on the Commerce and Industry Minister Kamal Nath, the latter called for maximization of bilateral trade potential. Observing that the Indo-Bulgarian bilateral trade, which at present stood at US \$ 79 million (exports - \$ 40 million and imports - \$ 39 million), he stated that this needed to grow significantly, considering the vast potential that exists for increasing the trade. While congratulating Bulgaria on its accession to the European Union (EU),

5. The Bulgarian side invited Indian investment in different sectors of the Bulgarian economy, especially in metallurgy, chemical industry, electronics, information and communication technology, spare parts, power engineering, and tourism, and expressed interest in setting up joint ventures in India in the areas of food processing, construction of grain-storage, cold-storage facilities, small hydropower stations, road construction, implementation of other infrastructure projects, etc.
6. Both sides also noted the opportunities for bilateral cooperation in the sectors of agriculture, small and medium enterprises and agro-based industries, textiles, perfumery and cosmetics. It was agreed to further promote direct contacts between the business circles of the two countries, including through participation in trade/commercial exhibitions in both countries and regular meetings of the Indo-Bulgarian Joint Business Council, as well as between regions and cities of the two countries. In this regard the two sides agreed to explore and identify mutually convenient solutions for facilitating the access of the representatives of the business communities from both countries to each other's market. Both sides welcomed the outcome of the Bulgaria-India business forum held in New Delhi during the visit of the Bulgarian Prime Minister.
7. The Indian and Bulgarian sides noted with satisfaction the successful development of bilateral scientific and technological cooperation within a broad institutional framework and covering projects in the

---

the Commerce Minister said: "we look forward to your cooperation and support in strengthening the India-EU strategic partnership in all its manifestations. We have begun negotiations on a broad-based trade and investment agreement". Major items of exports to Bulgaria include machinery & instruments, drugs, pharmaceuticals & fine chemicals, manufactures of metals, non-ferrous metals etc. and major items of imports from Bulgaria are - inorganic chemicals, wheat, iron & steel, machinery except electric & electronic. On September 7, the Official Spokesman briefing the media on the visit told journalists that the visit by a Bulgarian Prime Minister was taking place after a gap of 27 years. Giving a background of the bilateral relations, he said that India and Bulgaria "have traditional close and cordial relations." Diplomatic relations were established in 1954, and bilateral cooperation, chiefly in defence, mechanical and electrical machinery, and agriculture took the relationship forward. In Bulgaria, there is significant interest in Indology, Indian languages and culture. There are several organizations/institutions connected with India which are involved in propagation of Indian culture, languages, art, music and religion. In recent years, the bilateral relations have been further strengthened by convergences in the worldviews of the two countries. Bulgaria supported India's candidature for a permanent seat on an expanded UN Security Council. Bulgaria also supported India in the elections to the Human Rights Council in May 2006 and May 2007. Bulgaria, like India, seeks early conclusion of the Comprehensive Convention on International Terrorism, being negotiated in the UN.

fields of solid body physics, nuclear energy, laser technologies, meteorology, medicine, agriculture, biotechnology, nanotechnology, high energy physics, satellite technology, etc. They underlined their determination to continue to enhance the existing collaboration in science and technology, to identify new areas for cooperation and to promote the commercial use of the products of the joint scientific research.

8. The two sides agreed to work jointly to develop mutually beneficial bilateral cooperation in the priority area of information and communication technology through strengthening the bilateral institutional framework and establishing direct contacts in the corporate sector.
9. The two Prime Ministers expressed their support for closer bilateral cooperation in the oil and gas sector, and in the utilization of renewable and alternative energy sources and respective technologies as a basis for sustainable development and as part of the global efforts in addressing the challenges of climate change. They agreed to facilitate the early implementation of the joint project of setting up a solar-based power plant in Bulgaria with the expertise and cooperation of India.
10. The two leaders shared the view that civil nuclear energy can play an important role as a safe, sustainable and non-polluting source of energy in meeting rising global demands for energy. Bulgaria welcomes India's engagement in the areas of peaceful use of nuclear energy and is ready to support efforts for civil nuclear cooperation with India.
11. The Prime Ministers agreed to sustain and enhance bilateral defence cooperation on a mutually beneficial basis by utilizing the existing institutional framework and, where necessary, by strengthening it.
12. The two sides agreed to explore the possibilities to enhance transport links between India and Bulgaria. In this context, both sides sought to review the Air Services Agreement of 1992 and also to explore connectivity in sea, overland (Asia-Europe corridor), and banking and financial linkages.
13. They also agreed to promote bilateral cooperation in the areas of social security and healthcare and to establish the relevant legal basis.

14. The Bulgarian side expressed its appreciation of the assistance in the field of training rendered by the Government of India under the ITEC Programme. The Indian side agreed to continue such cooperation.
15. Underlining the importance of bilateral cooperation in culture and education for promoting greater understanding and closer friendship between India and Bulgaria, the Prime Ministers took note of the direct contacts and cooperation between cultural and educational institutions of the two countries, including promotion of Indological studies in Bulgaria and Bulgarian studies in India. The two sides welcomed the signing in New Delhi during the visit of the Prime Minister of Bulgaria of an Agreement of Cooperation between the University of Delhi and Sofia University of St. Kliment Ohridskia as well as between Georgi Rakovski School, New Delhi, India and 79th Indira Gandhi High School, Sofia, Bulgaria.
16. The Prime Ministers exchanged views on a broad range of regional and international issues of mutual interest, as well as issues of global concern such as countering terrorism, climate change, disarmament, non-proliferation of weapons of mass destruction and their means of delivery, promoting sustainable development and addressing the daunting environmental challenges and strengthening the social dimension of globalisation.
17. The Indian and Bulgarian sides emphasized the essential role of the UN for maintaining global peace and security, for promoting the economic and social advancement of all people and for meeting global threats and challenges. The Prime Ministers stressed the need to strengthen the authority and the efficiency of the UN and underlined in this respect the importance of the reform of the UN Security Council with view to enhancing its transparency and effectiveness. In this context, Bulgaria reiterated its support for India's candidature for a permanent seat on an expanded UN Security Council.
18. India and Bulgaria have agreed to offer reciprocal support for their bids for a non-permanent seat in the UN Security Council for 2011-12 and 2018-19 respectively.
19. The Prime Ministers stressed that terrorism constitutes one of the most serious threats to international peace and security. They strongly

condemned terrorism in all its forms and manifestations, committed by whomever, wherever and for whatever purpose and stressed that there can be no justification, whatsoever, for any acts of terrorism. They emphasized the need for concerted and coordinated action by the international community, in accordance with international law, to realize the objectives of eradicating terrorism in all its forms and manifestations.

20. The Prime Ministers stressed the importance of finalizing early the Comprehensive Convention on International Terrorism through early resolution of the outstanding issues with the objective of an expeditious conclusion of negotiations and adoption of this Convention. They agreed to further expand the bilateral dialogue and cooperation in combating terrorism, organized crime and trafficking.
21. The Prime Ministers underlined that climate change is a global challenge with strong economic, environmental and social dimensions, which impacts adversely all countries especially the poorer and most vulnerable countries, and requires a concerted international response based on the principle of common but differentiated responsibilities and respective capabilities. The two leaders agreed that stronger international cooperation within the UN framework is needed to fight climate change especially in the areas of adaptation, mitigation, capacity building, technology transfer, adequate financing facilities and the development of the carbon market. Both leaders shared the view that a future strategy designed to combat climate change should at the same time support sustainable development, economic growth and poverty reduction which are vital for developing countries.
22. Bulgaria expressed its appreciation of the constructive role of India, home to one sixth of humanity, world's largest democracy and fast-growing economy for promoting peace, understanding and cooperation in Asia and in the world. The Bulgarian side highly values India's contribution for strengthening stability and cooperation in South Asia and welcomed the progress of regional integration within the framework of SAARC.
23. India conveyed appreciation of the constructive policy of Bulgaria in Southeast Europe and in the Black Sea region and its efforts to promote multifaceted regional cooperation, including the

implementation of various infrastructural projects.

24. India warmly welcomed the accession of Bulgaria to the European Union, which presented new opportunities for a closer and more dynamic bilateral partnership within the broader framework of the EU-India strategic partnership.
25. India and Bulgaria are also looking forward to their cooperation as partners in the ASEM process for promoting and enhancing inter-regional cooperation in meeting global challenges.
26. The Prime Minister of the Republic of Bulgaria H.E. Mr. Sergei Stanishev extended an invitation to the Prime Minister of the Republic of India H.E. Dr. Manmohan Singh to visit Bulgaria. He also conveyed an invitation to H.E. Smt. Pratibha Patil, President of the Republic of India, for a visit to Bulgaria. The invitations were accepted with pleasure. The dates for the visits will be finalised through diplomatic channels.
27. He visited the Department of Slavonic and Finno-Ugrian Studies, University of Delhi, and Georgi Rakovski School, New Delhi, and delivered a lecture at the Indian Council of World Affairs.
28. During the visit, the two Sides signed the following documents:
  - a) Agreement on Economic Cooperation between the Government of the Republic of India and the Government of the Republic of Bulgaria
  - b) Treaty on Mutual Legal Assistance in Criminal Matters between the Republic of India and the Republic of Bulgaria
  - c) Treaty on Mutual Legal Assistance in Civil and Commercial Matters between the Republic of India and the Republic of Bulgaria
  - d) Treaty on the Transfer of Sentenced Persons between the Republic of India and the Republic of Bulgaria
  - e) Protocol between the Republic of India and the Republic of Bulgaria for Amending the Agreement between the Republic of India and the Republic of Bulgaria for the Promotion and Protection of Investment, signed in New Delhi on 26 October 1998

- f) Protocol of Intent on Labour Relations, Employment and Social Security between the Ministry of Labour and Employment of the Republic of India and the Ministry of Labour and Social Policy of the Republic of Bulgaria
  - g) Memorandum of Understanding between the National Small Industries Corporation Ltd., India, and the Bulgarian Small and Medium Enterprises Promotion Agency regarding Cooperation in the field of Small and Medium-Sized Enterprises Development
29. The Prime Minister of the Republic of Bulgaria sincerely thanked the Prime Minister of the Republic of India for the warm hospitality extended to him and the accompanying Bulgarian delegation in India.

**520. Treaty on the Transfer of Sentenced Persons between the Republic of India and the Republic of Bulgaria.**

**New Delhi, September 12, 2007.**

**The Republic of India and the Republic of Bulgaria** hereinafter referred to as the Contracting States;

**Desiring** to facilitate the social rehabilitation of sentenced persons into their own countries; and

**Considering** that this objective should be fulfilled by giving their nationals, who have been convicted and sentenced as a result of their commission of a criminal offence, the opportunity to serve their sentences within their own society;

**Have** agreed as follows:

**ARTICLE 1**  
**Definitions**

For the purpose of this Treaty:

- (a) “administering State” means a State to which the sentenced person may be, or has been, transferred in order to serve his sentence;
- (b) “judgment” means a decision or order of a court or tribunal imposing a sentence;

- (c) "sentence" means any punishment or measure involving deprivation of liberty ordered by a court for a determinate period of time or for life imprisonment, in the exercise of its criminal jurisdiction;
- (d) "sentenced person" means a person undergoing a sentence of imprisonment under an order passed by a criminal court including the courts established under the law for the time being in force in the Contracting States;
- (e) "sentencing State" means the State in which the sentence was imposed on the person who may be, or has been transferred.

**ARTICLE 2**  
**General Principles**

1. A person sentenced in the territory of one Contracting State may be transferred to the territory of the other Contracting State in accordance with the provisions of this Treaty in order to serve the sentence imposed on him. To that end, he may express to the sentencing State or the administering State his willingness to be transferred under this Treaty.
2. Transfer may be requested by any sentenced person who is a national of a Contracting State or by any other person who is entitled to act on his behalf in accordance with the law of the Contracting State by making an application to the Contracting State and in the manner prescribed by the Government of that Contracting State.

**ARTICLE 3**  
**Conditions for transfer**

1. A sentenced person may be transferred under this Treaty only on the following conditions:
  - (a) the person is a national of the administering State;
  - (b) the death penalty has not been imposed on the sentenced person;
  - (c) the judgment is final;
  - (d) no inquiry, trial or any other proceeding is pending against the sentenced person in the Sentencing State;
  - (e) at the time of receipt of the request for transfer, the sentenced person still has at least twelve months of the sentence to serve or is undergoing a sentence of life imprisonment;

- (f) that the acts or omissions for which that person was sentenced in the Sentencing State are those which are punishable as a crime in the administering State, or would constitute a criminal offence if committed on its territory;
  - (g) the sentenced person has not been convicted for an offence under the military law;
  - (h) transfer of custody of the sentenced person to the administering State shall not be prejudicial to the sovereignty, security or any other interest of the sentencing State;
  - (i) consent to the transfer is given by the sentenced person or, where in view of his age or physical or mental condition either Contracting State considers it necessary, by any other person entitled to act on his behalf in accordance with the law of the contracting State; and
  - (j) the sentencing and administering States agree to the transfer.
2. In exceptional cases, the sentencing and administering States may agree to a transfer even if the remaining period to be served by the sentenced person is less than twelve months.

**ARTICLE 4**  
**Obligation to furnish information**

1. If the sentenced person has expressed an interest to the sentencing State in being transferred under this Treaty, the sentencing State shall send the following information and documents to the administering State unless either the administering or the sentencing State has already decided that it will not agree to the transfer:
- (a) the name and nationality, date and place of birth of the sentenced person;
  - (b) his address, if any, in the administering State;
  - (c) a statement of the facts upon which the sentence was based;
  - (d) the nature, duration and date of commencement of the sentence;
  - (e) a certified copy of the judgment and a copy of the relevant provisions of the law under which the sentence has been passed against the sentenced person;

- (f) a medical, social or any other report on the sentenced person, where it is relevant for the disposal of his application or for deciding the nature of his confinement;
  - (g) any other information which the administering State may specify as required in all cases to enable it to consider the possibility of transfer and to enable it to inform the sentenced person of the full consequences of transfer for him under its law;
  - (h) the request of the sentenced person to be transferred or of a person entitled to act on his behalf in accordance with the law of the sentencing State; and
  - (i) a statement indicating how much of the sentence has already been served, including information on any pre-trial detention, remission, or any other factor relevant to the enforcement of the sentence.
2. For the purposes of enabling a decision to be made on a request under this Treaty, the administering State shall send the following information and documents to the sentencing State unless either the administering or the sentencing State has already decided that it will not agree to the transfer:
- (a) a statement or document indicating that the sentenced person is a national of the administering State;
  - (b) a copy of the relevant law of the administering State constituting the acts or omissions, on account of which the sentence has been passed in the sentencing State, as if such acts or omissions were an offence under the law of the administering State or would constitute an offence if committed on its territory;
  - (c) a statement of the effect of any law or regulation relating to the duration and enforcement of the sentence in the administering State after the sentenced person's transfer including, if applicable, a statement of the effect of paragraph 2 of Article 8 of this treaty on his transfer;
  - (d) the willingness of the administering State to accept the transfer of the sentenced person and an undertaking to administer the remaining part of the sentence of the sentenced person; and
  - (e) any other information or document which the sentencing State may consider necessary.

**ARTICLE 5**  
**Requests and replies**

1. Requests for transfer shall be made in writing in the prescribed proforma, if any, and addressed through the central authorities of the contracting States or through diplomatic channels to the central authorities of the contracting States. Replies shall be communicated through the same channels.
2. For the purpose of paragraph 1 of this Article, the central authority shall be, in relation to India, the Ministry of Home Affairs; and in relation to Bulgaria, it shall be the Ministry of Justice.
3. The requested State shall promptly inform the requesting State of its decision whether or not to agree to the requested transfer.

**ARTICLE 6**  
**Consent and its verification**

1. The sentencing State shall ensure that the person required to give consent to the transfer in accordance with paragraph 1(i) of Article 3 of this Treaty, does so voluntarily and with full knowledge of the legal consequences thereof. The procedure for giving such consent shall be governed by the law of the sentencing State.
2. The sentencing State shall afford an opportunity to the administering State to verify that the consent is given in accordance with the conditions set out in paragraph 1 of this Article.

**ARTICLE 7**  
**Effect of transfer for the administering State**

1. The competent authorities of the administering State shall continue the enforcement of the sentence through a court or administrative order, as may be required under its national law, under the conditions set out in Article 8 of this Treaty.
2. Subject to the provisions of Article 10 of this Treaty, the enforcement of the sentence shall be governed by the law of the administering State and that State alone shall be competent to take all appropriate decisions in this regard.

**ARTICLE 8****Continued enforcement of sentence**

1. The administering State shall be bound by the legal nature and duration of the sentence as determined by the sentencing State.
2. If, however, the sentence is by its nature or duration or both incompatible with the law of the administering State, or its law so requires, that State may, by court or administrative order, adapt the sentence to a punishment or measure prescribed by its own law. As to its nature and duration the punishment or measure shall, as far as possible, correspond with that imposed by the judgment of the sentencing State. It shall however not aggravate, by its nature or duration, the sentence imposed in the sentencing State.

**ARTICLE 9****Effect of completion of sentence for the sentencing State**

When the administering State notifies the sentencing State under paragraph 1(a) of Article 12 of this Treaty that the sentence has been completed, such notification shall have the effect of discharging that sentence in the sentencing State.

**ARTICLE 10****Pardon, amnesty or commutation and review of judgment**

- (1) The sentencing State alone shall decide on any application for the review of the judgment.
- (2) Either of the Contracting States may grant pardon, amnesty or commutation of the sentence in accordance with its Constitution or other laws.

**ARTICLE 11****Termination of enforcement of sentence**

The administering State shall terminate enforcement of the sentence as soon as it is informed by the sentencing State of any decision or measure as a result of which the sentence ceases to be enforceable.

**ARTICLE 12****Information on enforcement of sentence**

1. The administering State shall notify the sentencing State:

- (a) when the enforcement of the sentence has been completed;  
or
  - (b) if the prisoner escapes from custody before enforcement of the sentence has been completed. In such cases the administering State shall make every effort to have the prisoner arrested in its territory so that the prisoner be prosecuted for committing an offence under the relevant law of the administering State on escape of prisoner.
2. The administering State shall furnish a special report concerning the enforcement of the sentence, if so required by the sentencing State.

**ARTICLE 13**  
**Transit**

If either Contracting State enters into arrangements for the transfer of sentenced persons with any third State, the other Contracting State shall cooperate in facilitating the transit through its territory of the sentenced persons being transferred pursuant to such arrangements, except that it may refuse to grant transit to any sentenced person who is one of its own nationals. The Contracting State intending to make such a transfer shall give advance notice to the other Contracting State of such transit.

**ARTICLE 14**  
**Costs**

Any costs incurred in the application of this Treaty shall be borne by the administering State, except costs incurred exclusively in the territory of the sentencing State. The administering State may, however, seek to recover all or part of the costs of transfer from the sentenced person or from some other source.

**ARTICLE 15**  
**Language**

Requests and supporting documents shall be accompanied by a translation into the language or one of the official languages of the requested State or English.

**ARTICLE 16**  
**Certification**

Except for the document referred to in Article 4(1) (e), all other documents

transmitted in application of this Treaty do not require certification.

**ARTICLE 17**  
**Scope of application**

This Treaty shall be applicable to the enforcement of sentences imposed either before or after the entry into force of this Treaty.

**ARTICLE 18**  
**Amendments**

Any amendments or modifications to this Treaty agreed by the Contracting States shall come into effect in the same manner as entering into force of this Treaty.

**ARTICLE 19**  
**Final provisions**

1. This Treaty shall be subject to ratification and shall enter into force on the thirtieth day after which instruments of ratification are exchanged.
2. The Treaty shall continue to remain in force until six months from the date upon which either Contracting State gives written notice to the other Contracting State of its intention to terminate it.
3. Notwithstanding any termination, this Treaty shall continue to apply to the enforcement of sentences of sentenced persons who have been transferred under this Treaty before the date on which such termination takes effect.

**In witness whereof** the undersigned, being duly authorized by their respective Governments, have signed this Treaty.

**Done** in duplicate at New Delhi on the 12 day of September, 2007 in the Hindi, English and Bulgarian languages, all texts being equally authentic. In case of divergence, the English text shall prevail.

**For the Government  
Of the Republic of India**

**For the Government of  
the Republic of Bulgaria.**

**521. Treaty on Mutual Legal Assistance in Criminal Matters between the Republic of India and the Republic of Bulgaria.**

**New Delhi, September 12, 2007.**

**The Republic of India and Republic of Bulgaria** (hereinafter referred to as Contracting States);

**Guided** by the traditional friendly relations between the two countries;

**Recognizing** the need to facilitate the widest measures of mutual assistance in the service of summons, execution of warrants and other judicial documents and commissions;

**Desiring** to improve the effectiveness of both countries in the suppression of crime, investigation, prosecution and crime related to terrorism and tracing, restraint, forfeiture or confiscation of the proceeds and instruments of crime, through cooperation and mutual legal assistance in criminal matters;

**Have** agreed as follows:

**Article 1**  
**Scope of Application**

1. The Contracting States undertake to afford each other, in accordance with the provisions of the present Treaty, the widest measures of mutual legal assistance in criminal matters.
2. Mutual legal assistance is any assistance given by the Requested State in respect of investigations, prosecutions or proceedings to the Requesting State in criminal matters, irrespective of whether the assistance is sought or is to be provided by a court or some other authority and shall include:
  - a) locating and identifying persons and objects;
  - b) service of summons and other judicial documents;
  - c) taking of evidence, obtaining testimony from persons, including expert examination;
  - d) executing inspection, search and seizure;

- e) providing material and documentary evidence;
  - f) making persons in custody and others, including experts, available to give evidence or assist in investigations;
  - g) location, restraining, seizure and confiscation of the proceeds and instruments of crime;
  - h) providing relevant judicial records and exchange of legal information.
3. Other forms of legal assistance may be executed if they are in accordance with the law of the Requested State.
  4. Assistance and procedures set forth in this Treaty shall not prevent either State from granting assistance to the other State through the provisions of other applicable international conventions or agreements or through the provisions of its domestic laws. The States may also provide assistance pursuant to any bilateral arrangement or agreement that may be applicable.
  5. The assistance under this Treaty shall not include:
    - a) extradition and detention of a person with a view of extradition of that person;
    - b) enforcement of criminal judgments rendered by the courts of the Requesting State on the territory of the Requested State;
    - c) transfer of persons in custody to serve sentences;
    - d) transfer of proceedings in criminal matters.
  6. Assistance shall be provided without regard to whether the conduct which is the subject of the investigation, prosecution or proceedings in the Requesting State would constitute an offence under the laws of the Requested State.
  7. This Treaty shall apply to requests for legal assistance relating to offences committed before its entry into force.

## **Article 2** **Definitions**

For the purpose of this Treaty:

- a) 'Criminal matters' means investigations, inquiries, trials or other proceedings relating to an offence created by law including those relating to taxation, custom duties and international transfer of capital and payments.
- b) 'Property' means property and assets of every description whether corporeal or incorporeal, movable or immovable, tangible or intangible and deeds and instruments evidencing title to, or interest in, such property or assets derived or used in the commission of an offence and includes property obtained through proceeds of crime.
- c) 'Proceeds of crime' means any property derived or obtained directly or indirectly, by any person as a result of criminal activity or the value of any such property.
- d) 'Instruments' means any property used or intended to be used, in any manner, wholly or in part, to commit a criminal offence or criminal offences;
- e) 'Confiscation' means a penalty or a measure, ordered by a court following proceedings in relation to a criminal offence or criminal offences resulting in the final deprivation of property.
- f) 'Restraint of property' means any measure for the prevention of dealing in or transfer or disposal of property.

### **Article 3**

#### **Refusal or Postponement of Legal Assistance**

1. Assistance may be refused if:
  - a) in the opinion of the Requested State, the execution of the request would impair its sovereignty, security, public order or other essential public interest;
  - b) the Requested State has reasons to believe that the request for assistance has been made for the purpose of prosecuting a person on account of that person's race, sex, religion, nationality, ethnic origin, expression of opinion or that that person's position may be prejudiced for any of those reasons;
  - c) the request relates to an offence in respect of which the accused person had been finally acquitted or pardoned in the Requested State.

2. Legal assistance may be postponed if the execution of the request would interfere with an ongoing investigation or prosecution in the Requested State.
3. The Requested State shall promptly inform the Requesting State of its decision not to comply in whole or in part with a request for assistance, or to postpone execution, and shall give reasons for that decision.
4. Before refusing a request for assistance or before postponing the execution of a request, the Requested State shall consider whether assistance may be provided subject to such conditions as it deems necessary. If the Requesting State accepts assistance subject to those conditions, it shall comply with them.

**Article 4**  
**Execution of Request for Legal Assistance**

1. When executing the requested legal actions, the Requested State shall apply its national legislation. To the extent consistent with its law and practice the Requested State may carry out the request in the manner specified by the law of the Requesting State.
2. If the Requesting State makes a specific request, the Requested State shall communicate the date and place of execution of the requested assistance. In such case the authorities of the Requesting State and the parties to the proceedings may attend the execution of the request in conformity with the laws of the Requested State.
3. The Requested State shall not refuse to execute a request on the ground of bank secrecy.

**Article 5**  
**Service of Documents**

1. The Requested State shall serve any document transmitted to it for the purpose of service.
2. The Requesting State shall transmit a request for the service of a document pertaining to a response or appearance in the Requesting State within a reasonable time, before the scheduled response or appearance.
3. The Requested State shall return a proof of service in the manner

required by the Requesting State. If the service cannot be effected the reasons shall be communicated immediately to the Requesting State.

**Article 6**  
**Transmission of Documents and Objects**

1. The Requested State shall provide copies of publicly available information and documents of government departments and agencies.
2. The Requested State may provide any information, documents and objects in the possession of a government department or agency, but not publicly available, to the same extent and under the same conditions as they would be available to its own law enforcement and judicial authorities.
3. The Requested State may provide certified copies of documents, unless the Requesting State expressly requests originals. The original documents shall be kept in the safe custody of the Requesting State till the end of the proceedings.
4. Original documents or objects provided to the Requesting State shall be returned to the Requested State as soon as possible upon request.
5. In so far as not prohibited by the law of the Requested State, documents or objects shall be provided in a form or accompanied by such certification as may be specified by the Requesting State in order to make them admissible according to the law of the Requesting State.
6. Taxes or customs duties shall not be levied on objects that have been transmitted under this Treaty except in accordance with the domestic laws of the Contracting States.

**Article 7**  
**Availability of Persons to Give Evidence or Assist in Investigation  
or Criminal Proceedings in the Requested State**

1. A person including a person in custody, requested to testify and produce documents or objects in the Requested State may be compelled by subpoena or order to appear, testify and produce such documents or objects, in accordance with the law of the Requested State.

2. Where appearance of persons is requested with respect to the execution of a request for assistance in the territory of the Requested State, it shall apply measures of compulsion and sanctions provided for by its domestic law.
3. Subject to the law of the Requested State officials or authorized persons of the Requesting State and persons concerned in the proceedings in the Requesting State shall be permitted to be present when evidence is taken in the Requested State and to participate in the taking of such evidence in the manner as may be specified by the Requested State.
4. The right to participate in the taking of evidence includes the right to pose questions. The persons present at the execution of a request may be permitted to make a verbatim transcript of the proceedings. The use of technical means to make such a verbatim transcript may be permitted.

#### **Articles 8**

##### **Availability of Person to Give Evidence or Assist in Investigations or Criminal Proceedings in the Requesting State**

1. The Requesting State may request that a person be made available to give evidence or assist investigations in its jurisdiction.
2. The Requested State shall invite the person to assist in the investigation or to appear as a witness in the proceedings in the Requesting State and seek that person's voluntary consent thereto. The Requested State shall promptly inform the Requesting State of that person's response.
3. The request shall indicate the approximate allowances and travel and subsistence expenses payable by the Requesting State. If a specific request is made, the Requested State may grant the person an advance, which shall be refunded by the Requesting State.

#### **Article 9**

##### **Transfer of Persons in Custody to Give Evidence or to Assist in Investigations or Criminal Proceedings**

1. Upon the request of the Requesting State a person in custody in the Requested State shall, subject to that person's consent be temporarily transferred to the Requesting State to assist in investigations or give evidence unless there are overriding grounds against the transfer.

2. The transferred person shall be held in custody in the Requesting State and shall be returned in custody to the Requested State on the conclusion of the matter in relation to which the transfer was sought or at such earlier time as the person's presence is no longer required.
3. Where the Requested State advises the Requesting State that the transferred person is no longer required to be held in custody, that person shall be set at liberty and be treated as a person referred to in article 8 of the present Treaty.

#### **Article 10 Safe Conduct**

1. A person present in the Requesting State pursuant to a request seeking that person's attendance shall not be detained, prosecuted, or subjected to any other restriction of personal liberty in the Requesting State in respect of offences or convictions that preceded that person's departure from the Requested State. That person shall not, without his consent, be required to give evidence in any proceedings or to assist in any investigations other than the proceedings and investigations to which the request relates.
2. The protection under paragraph 1 shall cease to apply, if that person being free to leave the Requesting State has not left after the expiration of 30 consecutive days after being officially notified that his presence is no longer required or, having left, has voluntarily returned.
3. Any person who fails to appear in the Requesting State may not be subjected to any sanction or compulsory measure in the Requested State.

#### **Article 11 Information on Judgments**

1. The Requested State shall communicate extracts from and information relating to judicial records requested by Requesting State required in criminal proceedings, to the extent these may be made available to its own judicial authorities in like cases.
2. In cases other than those provided for in paragraph 1 of this Article, the request shall be complied with in accordance with the conditions provided for by the law or practice of the Requested State.

**Article 12**  
**Search and Seizure**

1. The Requested State shall execute a request for a search and seizure.
2. Search and seizure shall be conducted by the Requested State to the same extent and under the same conditions as to be got done for its own law enforcement and judicial authorities in accordance with its laws.
3. The competent authority that has executed a request for a search and seizure shall provide such information as may be required by the Requesting State concerning, but not limited to, the identity, condition, integrity and continuity of possession of the documents or objects seized and the circumstances of the seizure.

**Article 13**  
**Proceeds and Instruments of Crime**

1. The Requested State shall upon request endeavor to ascertain whether any proceeds or instruments of a crime are located within its jurisdiction and shall notify the Requesting State of the results of its inquiries.
2. The Requested State shall upon request take the necessary provisional measures, such as freezing or seizing, to prevent any dealing in, transfer or disposal of property which, at a later stage, may be the subject of a request for confiscation or which might be such as to satisfy the request.
3. The Requested State shall upon request for confiscation concerning instruments or proceeds, situated in its territory, enforce a confiscation order made by a court of a Requesting State in relation to such instruments or proceeds; or submit the request to its competent authorities for the purpose of obtaining an order of confiscation and, if such order is granted, enforce it.
4. The measures mentioned in this article should be carried out as permitted by and in accordance with the domestic law of the Requested State and, to the extent not incompatible with such law.
5. Proceeds or instruments forfeited or confiscated pursuant to this

Treaty shall accrue to the Requested State, unless otherwise agreed on a case- to- case basis.

**Article 14**  
**Contents of a Request for Legal Assistance**

1. The request for legal assistance shall include:
  - a) description of the competent authorities responsible for conducting the investigation or court proceedings to which the request relates;
  - b) purpose of the request and a brief description of the assistance sought;
  - c) description of the facts alleged to constitute the offence and a statement or texts of relevant laws, except in cases of a request for service of documents;
  - d) any other information necessary for the execution of the request, in particular information concerning the identity of the persons concerned in the request;
  - e) details of any particular procedure or requirements that the Requesting State wishes to be followed, and general information about the authorities and parties to the proceedings that are willing to participate;
  - f) if necessary, specification of any time limit within which compliance with the request is desired.
2. In case of requests to take evidence from a person, the request shall contain information about the subject matter of the evidence or statement sought, an interrogation questionnaire and other appropriate requirements.
3. In the following cases, requests for assistance shall include:
  - (a) in the case of requests to take evidence from a person, an indication as to the type of statements, whether sworn, affirmed or recorded/ authenticated by a judicial officer that are required and a description of the subject matter of the evidence or statement sought;
  - (b) in the case of providing of materials of evidence, the current

- location of such materials in the Requested State and an indication of the authority or persons who will be entrusted to keep such materials in the Requesting State, the place to which such materials are to be moved, any tests to be conducted and the date by which such materials will be returned;
- (c) in the case of making detained persons available, an indication of the authority or persons who will have custody during the transfer, the place to which the detained person is to be transferred and the probable date of that person's return; and
4. If necessary, and where possible, requests for assistance shall include:
- (a) the identity, nationality and location of a person or persons who is/are the subject of the investigation, prosecution or proceedings;
- (b) details of any particular procedure or requirement that the Requesting State wishes to be followed and the reasons therefor.
5. If the Requested State considers that the information is not sufficient to enable the request to be executed, it may request additional information to enable the request to be dealt with.

#### **Article 15 Limitation on Use**

The Requesting State shall not, without the consent of the Requested State use or transfer information or evidence provided by the Requested State for investigations and proceedings other than those stated in the request. However in cases where the charge is altered, the material provided may be used in so far as the offence, as charged, is an offence in respect of which mutual assistance could be provided under the present Treaty.

#### **Article 16 Confidentiality**

1. The Requested State shall upon request keep confidential the request for assistance, its contents and the supporting documents as well as the fact of granting of such assistance. If the request cannot be executed without breach of confidentiality, the Requested State shall so inform the Requesting State, which shall then determine whether the request should nevertheless be executed.

2. The Requested State shall upon request keep confidential the evidence and information provided by the Requesting State except to the extent that the evidence and information is needed for the investigation and proceedings described in the request.

**Article 17**  
**Central Authorities**

1. Central Authorities shall transmit and receive requests for legal assistance and responses thereto for the purposes of this Treaty. Transmissions may also take place through the International Police Organization/INTERPOL
2. The Central authorities for the purposes of this Treaty shall be:  
  
for the Republic of India - the Ministry of Home Affairs and for the Republic of Bulgaria - the Ministry of Justice.

**Article 18**  
**Exchange of Legal Information**

Upon request, the Contracting States shall inform each other of the provisions of their respective laws and legal practice.

**Article 19**  
**Certification**

All records and documents, or certified copies thereof that are exchanged between the Contracting States shall not require any form of legislation within the meaning of this Treaty.

**Article 20**  
**Language**

Requests for legal assistance and supporting documents shall be accompanied by a certified translation in English or in the language of the Requested State.

**Article 21**  
**Costs**

1. The costs of executing the request for legal assistance shall be borne by the Requested State.

2. The Requesting State shall bear the expenses for the transfer of persons in custody to its territory and the expenses and fees of experts in the Requested State and the costs mentioned in paragraph 3 of Article 8.
3. If it becomes apparent that the execution of the request requires expenses of an extraordinary nature, the Contracting States shall consult to determine the terms and conditions under which the requested assistance can be provided.

**Article 22**  
**Ratification and Entry into Force**

1. This Treaty shall be subject to ratification and shall enter into force on the 30th day after the exchange of the instruments of ratification.
2. Either contracting State may denounce the present Treaty by giving notice in writing to the other State through the diplomatic channel. Such denunciation shall take effect six months following the date on which it is received by the other State.
3. Under the initiative of either contracting State amendments may be made to this Treaty, which shall enter into force according to procedure described in paragraph 1 of this article.

**Article 23**  
**Interpretation**

All matters with respect to the interpretation or implementation of this Treaty shall be settled by the Contracting States through consultations between the authorities mentioned in Article 17 of the Treaty.

**In witness whereof** the undersigned being duly authorized thereto by their respective Governments, have signed this treaty.

**Done** at New Delhi on 12 September, 2007 in duplicate in Hindi, Bulgarian and English language all texts being equally authentic. In case of divergence, the English text shall prevail.

**For the Republic of India**

**For the Republic of Bulgaria**

**522. Treaty on Mutual Legal Assistance in Civil and Commercial Matters between the Republic of India and the Republic of Bulgaria.**

**New Delhi, September 12, 2007.**

**The Republic of India and the Republic of Bulgaria**, hereinafter referred to as the “Contracting Parties”;

**Attaching** importance to the development of cooperation in the field of legal assistance in civil and commercial matters;

**Have** agreed as follows:

**PART- I  
GENERAL PROVISIONS**

**Article 1  
Legal Protection and Legal Assistance**

1. Citizens of one Contracting Party shall enjoy in the territory of the other Contracting Party the same legal protection in respect of their person and property as do the citizens of the other Contracting Party, to the extent permitted by their laws.
2. The above shall also apply to legal persons established in accordance with the law of either Contracting Party.
3. Citizens of one Contracting Party shall be entitled to free and unimpeded access to the courts or other legal authorities of the other Contracting Party having competence in civil and commercial matters, on the same terms and conditions as its own citizens.
4. Citizens of one Contracting Party shall have the same rights and privileges in the proceedings of a court of the other Contracting Party to the same extent as the citizens of that Contracting Party.
5. The authorities concerned of the contracting parties shall render mutual legal; assistance within their competence, in accordance with their national legislation.

**Article 2  
Mode of Communication**

In providing legal assistance the courts and other legal authorities of the

Contracting Parties shall communicate with each other through the Central Authorities, which shall be:

For the Republic of India - Ministry of Law and Justice of the Government of India,

For the Republic of Bulgaria - Ministry of Justice.

The Central Authorities shall communicate with each other directly.

**PART- II**  
**LEGAL ASSISTANCE CONCERNING**  
**CIVIL AND COMMERCIAL MATTERS**

**Article 3**  
**Scope of legal assistance**

Legal assistance in civil and commercial matters includes:

1. service and dispatch of documents or summons;
2. provision upon request of information on laws, which are or were in force in the respective States, and on their application by the judicial authorities;
3. taking of evidence from litigants, witnesses and " experts;
4. furnishing evidence;
5. obtaining expert opinions;
6. recognition and enforcement of judgments including those by criminal courts in civil matters, arbitration awards and settlements;
7. effecting any other legal assistance.

**Article 4**  
**Request for legal assistance**

A request for legal assistance shall be made in writing and shall contain the following:

1. the designation of the requesting authority;
2. the designation of the requested authority;
3. the specification of the case in relation to which legal assistance is requested;

4. names and surnames of persons relating to the request, information of their citizenship, occupation and permanent or 'terr^oran.' residence. In case of legal persons, their names and address^ .,
5. names and addresses of the representatives of persons relating to the request; and
6. contents of the request.

#### **Article 5 Execution**

1. In executing the request for legal assistance the requested authority shall apply its national laws. However, upon request of the requesting authority, it may apply procedural rules of the requesting Contracting Party as far as they are not in conflict with the laws of the requested Contracting Party.
2. If the requested authority is not competent to execute the request it shall forward the request to the competent authority and shall inform the requesting authority accordingly.
3. In case of receipt of an executable request the requested authority shall notify the requesting authority, parties interested in, or their representatives, of the place and time of execution of the request.
4. The requested authority shall forward documents to the requesting authority after execution of the request. In case legal assistance could not be provided as requested it shall return the request and notify the reasons for inability to execute it.

#### **Article 6 Service of documents or summons**

1. The service of documents or summons shall be affected in accordance with the laws of the requested Contracting Party. When the documents or summons are not drawn up in the language of the requested Contracting Party or are not accompanied by a translation, they may be served on the addressee if he is willing to accept them. In case of non-acceptance of such document or summons the service shall be considered as not having been effected.
2. A request for service shall contain the exact address of the addressee and the title of the document or summons to be served.

**Article 7**  
**Proof of service of documents or summons**

The service of documents or summons shall be proved in accordance with the rules in force in the territory of the requested Contracting Party. The date and place of service as well as the person on whom the document or summons was served shall be indicated in a certificate of service.

**Article 8**  
**Service of documents and questionnaires to citizens through diplomatic missions or consular offices**

The Contracting Parties shall be free to effect service of documents and questionnaires to their own citizens through their diplomatic missions or consular offices. No compulsion shall be applied in connection with such service.

**Article 9**  
**Summons served upon witness or expert abroad**

1. If in course of the judicial proceedings in the territory of one Contracting Party there is need for the personal appearance of a witness or an expert, staying in the territory of the other Contracting Party, the request to serve summons shall be addressed to the competent authority of that Contracting Party.
2. The summons may not entail any penalties for failure of the summoned person to appear.
3. A witness or expert, who in response to a summons, has voluntarily appeared before the competent authority of the requesting Contracting Party shall not be in the territory of that Contracting Party prosecuted, detained or punished for a criminal offence committed by him before he enters its territory.
4. A witness or expert shall be deprived of this immunity if he fails to leave the territory of the requesting Contracting Party within 15 days after being informed by the requesting authority that his presence is no longer necessary. Such period shall not include any period of time during which the witness or expert was unable to leave the territory of the requesting Contracting Party for reasons beyond his control.

5. Witnesses and experts who upon request appeared in the territory of the requesting Contracting Party shall have the right to be reimbursed by the requesting authority their travel expenses and costs connected with their stay in its territory. Experts shall also be entitled to remuneration for making an examination. The request shall contain the information on reimbursements which the requested persons are entitled to; the requesting Contracting Party shall provide against their statement an advance payment to cover the corresponding expenses.
6. The Contracting Parties shall render all necessary assistance to each other for taking evidence of a witness in accordance with the provisions of their laws or, as the case may be, on the basis of questionnaire or otherwise, which may be admitted as evidence in accordance with the laws of the requested Contracting Party.

**Article 10**  
**Recognition of documents**

1. Documents emanating from or certified by a court, any other competent authority or an authorized person of one of the Contracting Parties shall be considered authentic if duly sealed by it. Documents complying to the requirements hereby shall be acknowledged by courts and other competent authorities of the other Contracting Party.
2. Documents considered as official in the territory of one Contracting Party shall have the evidentiary force of official documents also in the territory of the other Contracting Party.

**Article 11**  
**Costs of legal assistance**

The requested Contracting Party shall normally not apply for the reimbursement of legal assistance costs. However, should the estimated or actual expenses of the requested Contracting Party be of extraordinary amount, the Central Authorities shall consult each other and find the mutually acceptable solution.

**Article 12**  
**Dispatching of certificates of civil status and other documents**

The Contracting Parties undertake to dispatch to each other upon request, by diplomatic channels, without translation and free of charge, certificates

or any other documents concerning personal rights and property interests of their citizens.

**Article 13**  
**Refusal of legal assistance**

The requested Contracting Party may refuse legal assistance if it considers it may be prejudicial to its sovereignty, security or public order or is in conflict with its laws or international obligations.

**Article 14**  
**Exemption from payment of legal fees and security**

1. The citizens of one Contracting Party shall be exempt in the territory of the other Contracting Party from payment of legal fees and security under the same conditions and to the same extent as citizens of that Contracting Party.
2. The citizens and legal persons of one Contracting Party shall be exempt in the territory of the other Contracting Party from deposit of security for filing a claim before the courts or other legal authorities under the same conditions and to the same extent as citizens and legal persons of that Contracting Party.

**Article 15**  
**Issuance of documents on personal, marital and property status**

1. A document relating to personal, marital and property status necessary to receive permission for exemption from payment of legal fees shall be issued by a competent authority of the Contracting Party in the territory of which the declarant resides or stays.
2. If the declarant does not reside or stay in the territories of the Contracting Parties the document issued or certified by a diplomatic mission or consular office of the State, whose citizen he is, is sufficient.
3. A court passing order for exemption from payment of legal fees may request the authority which issued the document to furnish additional information.

**PART III**  
**RECOGNITION AND ENFORCEMENT OF JUDGEMENTS**

**Article 16**

**Recognition and enforcement of judgments on civil and commercial matters and monetary payments awarded in criminal cases**

1. The Contracting Parties shall mutually recognize and enforce final and effective judgements of judicial authorities on civil and commercial matters as well as orders awarding monetary payments in criminal cases.
2. In the territory of the Contracting Parties judgements of declaratory nature which do not require enforcement shall be equally recognized without special proceedings.
3. Procedure relating to recognition and enforcement of judgements shall be subject to the laws of the Requested Party.

**Article 17**

**Accompanying documents**

Application for recognition and enforcement must be accompanied by:

- 1) a copy of the judgment, certified by the court, together with an official document stating that the judgment or decree is enforceable, if it is not clear from the text of the judgment itself;
- 2) a document from which it follows that a summons was in due time and form at least once handed to the defendant, who refused to accept it or did not participate in the proceedings; and
- 3) certified translations of the application and the accompanying documents into the language of the requested Contracting Party or the English language.

**Article 18**

**Costs**

Legal costs relating to recognition and enforcement shall be regulated by the law of the Contracting Party in whose territory the judgment is to be enforced.

**Article 19**

**Recognition and Enforcement of Arbitral Awards**

Recognition and enforcement of arbitral awards passed in one of the

Contracting Parties shall be made in the other Contracting Party in accordance with the Convention on the Recognition and Enforcement of Arbitral Awards, 1958 (New York Convention) and its national laws.

#### **Article 20 Languages**

While complying with the present Treaty, the Contracting Parties shall use their national language attaching the translation in the national language of the other Contracting Party or in English language.

### **PART IV FINAL PROVISIONS**

#### **Article 21 Consultation**

All matters with respect to the interpretation or implementation of this treaty shall be settled by the Contracting Parties through consultation between the authorities mentioned in Article 2 of the Treaty.

#### **Article 22 Entry into Force**

1. This treaty shall be subject to ratification and shall enter into force on the 30<sup>th</sup> day of the exchange of instruments of ratification.
2. Either of the Contracting Parties may denounce this Treaty at any time by giving notice to the other Contracting Party through undiplomatic channel; and if such notice is given the Treaty shall cease to have effect six months after the receipt of the notice.
3. Under the initiative of either Contracting Party amendments may be made to this Treaty, which shall enter into force according to the procedure described in paragraph 1 of this Article.

**Done** in duplicate at New Delhi this 12<sup>th</sup> day of September 1957 in Hindi, Bulgarian, and English languages, each text being equally authentic. In case of any interpretational difference the English text shall prevail.

**For the Republic of India**

**523. Agreement between the Government of the Republic of India and the Government of the Republic of Bulgaria on Economic Cooperation.**

**New Delhi, September 12, 2007.**

**The Government of the Republic of India and the Government of the Republic of Bulgaria** hereinafter referred to as “the Contracting Parties”,

**Inspired** by the traditional links of friendship and cordial relations which exist between the Republic of India and the Republic of Bulgaria,

**Committed** to the principles of free market economy,

**Desirous** of developing and intensifying their economic, industrial, technical and technological cooperation on the basis of reciprocity and mutual benefit,

**Conscious** of the necessity of existence of an adequate legal framework for India Bulgaria relations in accordance with the applicable legislation and regulations in the two countries,

**Taking** into consideration the international Agreements concluded by the Contracting Parties in the field of economic cooperation as well as the accession of the Republic of Bulgaria to the European Union,

**Have** agreed as follows:

**ARTICLE I  
OBJECTIVES**

The Contracting Parties agree that the objectives of this Agreement, in accordance with laws and regulations in force in either country, are to:

- (i) Promote activities aimed at the development of bilateral economic, technical and technological cooperation;
- (ii) Support and develop business contacts;
- (iii) Facilitate the expansion of bilateral investment and identification of economic and investment opportunities in their respective countries;
- (iv) Reinforce cooperation for the enhancement of economic relations between the two countries.

## **ARTICLE II COOPERATION ACTIVITIES**

The Contracting Parties shall encourage and facilitate greater cooperation between their natural and legal persons including business associations, institutions and agencies, in accordance with laws and regulations in force in each country. To this end, they agree to:

- (i) Exchange information on economic development and bilateral trade, economic plans, forecasts and strategies;
- (ii) Inform each other about existing possibilities concerning trade fairs, exhibitions, entrepreneurial missions and other promotional activities;
- (iii) Facilitate the exchange of experts, technicians, investors and business representatives of the public and private sectors; and
- (iv) Explore and promote joint business possibilities in third countries arising from partnership between Bulgarian and Indian companies.

## **ARTICLE III INSTITUTIONS**

1. The Joint Commission for Economic, Scientific and Technical Cooperation between the Government of the Republic of India and the Government of the Republic of Bulgaria, set up through exchange of letters in 1973, hereinafter referred to as "the Joint Commission", shall promote, oversee and coordinate the cooperation between the two countries under this Agreement.
2. **The tasks of the Joint Commission shall include:**
  - Discussions on the development of bilateral economic relations;
  - Identifying new possibilities for further development of economic cooperation;
  - Drawing up suggestions for improvement of the terms of economic cooperation between enterprises of both countries, and
  - Making recommendations for the implementation of this Agreement.

3. The Joint Commission shall comprise experts of the two Contracting Parties and representatives of relevant organizations and institutions of the Indian side and of the Bulgarian side.
4. Each Contracting Party shall designate a chairperson on its part at Ministerial level, referred to as "the co-Chair". Each co-Chair shall designate an official from the concerned Government to coordinate the work of the Joint Commission.
5. By way of arrangement between the Contracting Parties, Joint Working Groups may be established within the framework of the Joint Commission.
6. The Sessions of the Joint Commission shall be convened once every two years, or more often, if required, alternately in India and in Bulgaria, the date and place of the Sessions shall be mutually agreed upon by representatives of the Contracting Parties.
7. At the conclusion of each Session, Agreed Minutes prepared by the host delegation shall be agreed upon and signed by the Co-Chairs.
8. The working language of the Joint Commission shall be English.
9. In the period between Sessions, the co-Chairs may direct the designated officials to discuss issues concerning the work of the Joint Commission.

#### **ARTICLE IV FINAL PROVISIONS**

1. This Agreement shall not be interpreted in such a way as to affect the obligations arising from any agreements or arrangements concluded or to be concluded between the EC or the EC and its Member States on one part and India on the other.
2. This Agreement shall enter into force on the date of receipt of the last diplomatic note with which the Contracting Parties inform each other about the fulfilment of their national legal requirements for the entry into force of this Agreement. On the date of entry into force of this Agreement, the Agreement between the Government of the Republic of India and the Government of the Republic of Bulgaria on Trade and Economic Cooperation signed in New Delhi on 4 December 1996 shall be deemed to be terminated.

3. This Agreement shall remain in force until the expiration of six months from the date on which either Contracting Party receives from the other Contracting Party a written notice of its intention to terminate the Agreement. In the event of termination of this Agreement its provisions, as relevant, shall continue to apply in respect of the unfulfilled obligations of commercial and cooperation contracts entered into during the period of validity of this Agreement, as well as those arising from contracts/agreements concluded under the Trade and Economic Cooperation Agreement signed on 4 December 1996.
4. This Agreement may be amended at any time by a written agreement of the Contracting Parties. The entry into force of the amendments shall be governed by the terms of the entry into force of this Agreement.

**IN WITNESS WHEREOF**, the following representatives duly authorized thereto by their respective Governments have signed this Agreement.

**DONE** at New Delhi on 12<sup>th</sup> September, 2007 in two originals each in Hindi, Bulgarian and English languages, all texts being equally authentic. In case of any divergence in interpretation, the English text shall prevail.

FOR THE GOVERNMENT OF  
THE REPUBLIC OF INDIA

FOR THE GOVERNMENT OF  
THE REPUBLIC OF BULGARIA

Minister of Commerce and Industry

**Petar Domitrov**  
Minister of Economy and Energy

## CROATIA

### **524. Press Release of the Ministry of External Affairs on the visit of Minister of State Anand Sharma to Croatia, September 18-20, 2007.**

**New Delhi, September 20, 2007.**

Minister of State for External Affairs, Shri Anand Sharma, visited Croatia, from September 18 - 20, 2007. Aside from discussions with Foreign Minister, Mrs. Kolinda Grabar-Kitarovic, he called on President Stjepan Mesic, the Speaker of the Parliament, Mr. Vladimir Seks, and Prime Minister Dr. Ivo Sanader.

Mr. Anand Sharma's exchanges with the Croatian leadership were wide-ranging, and characterized by mutual goodwill and warmth. Discussions noted the excellent bilateral cooperation in international fora, including reciprocal support for non-permanent seat in the UNSC, for Croatia in 2008-09 and for India in 2011-12, and the affinity in the approach to the expansion of the UNSC.

The two sides recognized the need for acceleration of high-level visits and economic exchanges, at a time of rapid expansion of the Indian economy, and the likelihood of Croatia's early entry into the EU. In their review of bilateral economic relations, information technology, generic medicines, biotechnology, tourism, infrastructure, especially road construction were identified as priority areas. Cooperation in S&T is progressing well. Bilateral trade, likely to cross US \$ 100 million in 2007, is heavily in India's favour.

The Joint Economic Committee and the Joint Business Council are likely to meet in October 2007, for developing tie-ups. This would also be an opportunity for Indian businesses to explore the viability of using the Croatian Adriatic ports of Rijeka and Ploce, as gateways for India's trade with the region. An Agreement on Visa Exemption for Diplomatic and Official Passport Holders was signed during the visit.

Exchanges also covered the regional situation in South-Asia, and South-Eastern Europe, especially the progress of regional economic cooperation. Mr. Anand Sharma was briefed on the status of negotiations over its membership of the EU, and NATO.

MOS for External Affairs briefed his interlocutors on India's challenge of ensuring energy security, for its burgeoning economy. In this context, discussions also covered the issue of international civilian nuclear energy cooperation with India, and the required amendments in the guidelines of the Nuclear Suppliers' Group (NSG), of which Croatia is the latest member.

President Stjepan Mesic, who made a State visit to India in November 2002, renewed his invitation to the President of India to visit Croatia. There was agreement that, following the Parliamentary elections in Croatia in November 2007, an active calendar of high-level visits needs to be finalized.

## CYPRUS

### **525. Briefing Points by Official Spokesperson on External Affairs Minister Pranab Mukherjee's visit to Cyprus.**

**New Delhi, May 25, 2007.**

External Affairs Minister Shri Pranab Mukherjee arrived in Cyprus on May 24 night to begin his tour of Cyprus, Libya, Hamburg (ASEM Meeting), Brussels and Berlin (Indo-EU Troika).

On May 25 morning, EAM paid homage at the Bust of Mahatma Gandhi located next to the Cyprus Parliament on Jawaharlal Nehru Avenue in Nicosia (the only such Bust of a foreign leader in the area). He then offered flowers at the statue of late President Archbishop Makarios III.

EAM had 45 minute call on President Tassos Papadopoulos. The discussions recalled the traditional long-standing and deep rooted friendship between Cyprus and India, India's consistent support for the territorial integrity of Cyprus as well as the UN Security Council Resolutions relating to the Cyprus problem. Bilateral relations particularly the possibilities of closer cooperation in trade and investment, knowledge-based industries, pharmaceuticals and energy were discussed. President Papadopoulos assured EAM of strong support from Cyprus as a member of the EU on matters of interest to India.

EAM had one-to-one meeting with Foreign Minister Yiorgos Lillikas followed by delegation level talks which carried on over lunch. Bilateral relations were discussed in detail in the context of traditional friendship between the two countries and the history of close cooperation and support in the international forum. Possibilities of Cyprus playing a useful and cooperative role for promoting India-EU relations in political and economic terms were discussed. Cooperation in trade and investment, energy, tourism, pharmaceuticals, IT were discussed including through setting up of joint ventures. Closer and regular consultations between the two Foreign Ministries were also agreed upon. Cyprus reiterated their strong support for India's candidature as a Permanent Member for UN Security Council. Other issues discussed included India's civil nuclear programme, terrorism, climate change and developments in SAARC.

Three agreements were signed - Agreement on Abolition of Visa Re-

quirement for Diplomatic and Official Passport Holders, Agreement on Combating International Terrorism, Organised Crime and Illicit Drug Trafficking, and Executive Programme on Cultural, Educational and Scientific Cooperation.

Later on May 25, EAM met the President of Foreign Affairs Committee in the House of Representatives, Mr. Averof Neophytou<sup>1</sup>.

**Following are the opening remarks of the Minister at the joint press interaction:**

*"I am delighted to be here in Cyprus, a country with which we have traditionally had very warm and close ties. I am here in pursuance of a decision taken when the President of Cyprus visited India in April 2006 to launch a high level ministerial dialogue between our two countries to prepare our relationship for the 21st century. It would interest you to know that this is my first visit to Europe since I assumed charge as the External Affairs Minister of India late last year.*

*We are very happy that Cyprus is now a member of the EU. We have a strategic partnership with the EU and a comprehensive joint action plan to implement that partnership. Cyprus in the EU means that we have one more close friend in the Union.*

---

1 Giving a background to the visit to Cyprus the Official spokesperson told the media that the visit "follows a decision arrived at during the visit to India of the President of Cyprus in April 2006, to constitute a high level Ministerial dialogue between the two countries to further develop traditionally close and warm relationship in the light of the changing global and regional situation and to better utilize each other's complementarities particularly in trade and economic matters." He said that this was the first visit to Cyprus by Foreign Minister of India in over two decades. At the Prime Ministerial level, of course, Prime Minister Shri Vajpayee had visited Cyprus in October 2002 and Minister of State for External Affairs Shri Omar Abdullah had visited Cyprus in April 2002.

Traditionally, India and Cyprus have supported each other on matters of importance to each other. Cyprus' membership of the EU has given rise to greater scope for closer collaboration between the two countries. India has consistently supported the sovereignty and territorial integrity of Cyprus. India supports a peaceful resolution of the Cyprus problem in accordance with relevant Resolutions of the UNSC. Both countries also share similar views on the need to combat and eradicate the scourge of terrorism. Within the UN, both countries share the need for early conclusion of the Comprehensive Convention on International Terrorism. Cyprus has plans to develop high technology as the third pillar of its economy and this offers further opportunities for Indian companies. Indian firms have undertaken power and civil construction projects in the past and we hope to participate in more such projects in Cyprus in the future. Indian companies have also expressed interest in exploration blocks for oil and gas in the offshore waters of the Mediterranean, for which international bids have been invited in July this year.

*I have had a very productive and useful exchange of views with my counterpart and before that I was received by the President of the Republic. We have had substantive discussions on how best to take forward our bilateral relationship and have signed three important agreements. We also discussed regional and international issues of interest to both our sides. India has always supported Cyprus in its quest for unity and territorial integrity. Cyprus, in turn, has always been supportive of India's interests including in such important areas as our quest for permanent membership of the UN Security Council, our desire to expand our civil nuclear energy programme and our fight against terrorism.*

*I am confident that my visit will help further strengthen the ties of friendship and cooperation that bind India and Cyprus."*

**526. Agreement between the Government of the Republic of India and the Government of the Republic of Cyprus on Combating International Terrorism, Organized Crime and Illicit Drug Trafficking.**

**Nicosia, May 25, 2007.**

**The Government of the Republic of India and the Government of the Republic of Cyprus** (hereinafter referred to as the "Parties").

**Guided** by the traditional friendly relations between the two countries and their endeavour to contribute to the further development of their bilateral relations;

**Deeply** concerned with the expansion of organized crime and International Terrorism;

**Convinced** of the need to enhance bilateral cooperation in combating international terrorism, transnational organized crime and illicit drug trafficking;

**Recognizing** the mutual advantages of such cooperation for both Parties in accordance with their national laws and regulations;

**Taking** into consideration the relevant international treaties to which both are Parties;

**Desiring** to improve the effectiveness of both countries in the prevention, investigation, prosecution and suppression of crime including crime relating to terrorism and drug trafficking and to establish a framework for enhancing cooperation between the officials of intelligence and law-enforcement agencies of the Parties;

**Have agreed** on the following:

### **Article 1**

The Parties shall, within the framework of this Agreement and subject to their domestic laws and regulations, cooperate in combating international terrorism; illicit trafficking in drugs and psychotropic substances including their precursor chemicals and provide each other with the widest measure of the mutual legal assistance in the investigation, prosecution and suppression of crime.

### **Article 2**

In the context of this Agreement the following terms have the meaning defined hereinafter

- (a) "proceeds" means any economic advantage, derived from or obtained, directly or indirectly, from criminal offences and shall include any property as defined in sub-paragraph (b) of this article;
- (b) "property" includes property of any description, or the value of such property whether corporeal or incorporeal, movable or immovable, and legal documents or instruments -evidencing title to or interest in such property;
- (c) "confiscation" means a penalty or a measure, ordered by a court or any other authority following proceedings in relation to a criminal offence or criminal offences resulting in the final deprivation of property;
- (d) "controlled delivery" means the technique of allowing illicit or suspect consignments to pass out of, through or into the territory of either Party, with the knowledge and under the supervision of their competent authorities with a view to investigate person or persons involved in the commission of the offence;
- (e) "freezing" or "seizure" means temporarily prohibiting the transfer, destruction, conversion, disposition or movement of property or

temporarily assuming custody or control of property on the basis of an order issued by a court or other competent authority; and

- (f) “financing of terrorism” means the acts set out in Article 2 of the International Convention for the Suppression of the Financing of Terrorism.

### **Article 3**

The Parties have resolved to cooperate in their joint fight against terrorism in all its forms and to this end, shall:

- (a) exchange information and intelligence on the activities of any terrorist groups and their associates including those providing front or cover to individuals or groups engaged in the planning, promoting or executing acts of terrorism against the parties as well as those which may operate from or use the territories of either Party;
- (b) identify and exchange information on any sources of financing of terrorism which may be located in the territory of either Party and take steps to seize and confiscate the sources of financing of terrorism;
- (c) coordinate approach to combat international terrorism;
- (d) cooperate and share experience in areas of hijack termination, hostage rescue and negotiations and protection of VIPs;
- (e) facilitate cooperation in preventing access of terrorists to fire arms, ammunition, explosives, nuclear material and other prohibited substances;
- (f) enhance cooperation and intelligence sharing between the law enforcement agencies of the Parties;
- (g) provide mutual assistance including exchange of professional expertise and training of security and law enforcement personnel and in organizing seminars and conferences etc.; and
- (h) address any other matter as mutually agreed upon.

### **Article 4**

- (1) For the purpose of this Agreement, crime will include all offences so created by the legislature of the respective Party.

- (2) The Parties shall provide each other the widest measure of mutual legal assistance in the investigation, prosecution and suppression of crime, including crimes related to terrorism.
- (3) The assistance shall include but not be limited to:
  - (a) Measures to locate, restrain, forfeit or confiscate the means and resources of financing terrorism, or the proceeds of crime;
  - (b) Taking of evidence or obtaining statements of persons;
  - (c) Providing information, documents and other records including criminal and judicial records;
  - (d) Communicating information available with each Party about criminal acts either committed or being planned to be committed within the territory of the other Party:
  - (e) Executing requests for search and freezing or seizure;
  - (f) Delivery or lending of exhibits;
  - (g) Serving of documents seeking attendance of persons:
  - (h) Exchanging the names of the persons criminally convicted for serious crimes on a case by case basis upon a relevant request;
  - (i) Locating and identifying persons and objects; and
  - (j) Any other assistance consistent with objectives of this Agreement.
- (4) The Parties shall
  - (a) Exchange data on persons involved in organized crime, their linkages, the structure of the criminal groups and their modus operandi; and
  - (b) Consider ways and means to facilitate mutual legal assistance in criminal matters, arrest, extradition and prosecution of Individuals and their associates engaged in crime.

#### **Article 5**

For suppression of illicit trafficking in drugs, psychotropic substances and precursors, the Parties shall -

- (a) Exchange and share information about persons involved in drug trafficking, their modus operandi as well as other relevant details of such crimes, in so far as these are necessary for the prevention or suppression of crimes;
- (b) Exchange the results of their criminal and criminological research on drug trafficking and abuse of drugs, psychotropic substances and precursors;
- (c) Share and exchange of samples of drugs and psychotropic substances of natural or synthetic origin usable for abuse;
- (d) Subject to their domestic laws and international obligations, facilitate the controlled delivery of illicit drugs and psychotropic substances in order to render possible the arrest of the persons to whom it will be delivered as well as any other persons involved in the trafficking, provided that the necessary information is submitted at least 48 hours prior to the requested action; and
- (e) Promptly exchange information about the seizures of drugs, psychotropic substances and precursors and arrest of the citizens of one Party in the territory of other Party on drug related crimes and to provide information on investigations, prosecution and related matters.

#### **Article 6**

1. The competent authorities of the Parties shall ensure the protection of confidential information delivered to them in accordance with their national legislation.
2. In case of disclosure or a risk for disclosure of confidential information delivered by the competent authorities of one Party, the competent authorities of the receiving Party shall immediately inform the other about the event, and relevant circumstances. The notification should include the consequences of the event and measures undertaken in order to prevent future disclosures.

#### **Article 7**

Documents, data and technical equipment delivered pursuant to the present Agreement can be transferred to a third country only with the approval of the competent authority of the delivering Party.

**Article 8**

1. For the protection of personal data delivered in the course of the cooperation, the following conditions shall apply:
  - (i) The receiving competent authorities of the one Party may use the personal data solely for the purpose and under the conditions determined by the delivering competent authorities of the other Party;
  - (ii) Upon the request of the delivering competent authorities of the one Party, the receiving competent authority of the other Party shall give information on the utilization of the personal data delivered and the results thus achieved;
  - (iii) Personal data may be forwarded solely to security and public order protection authorities. Personal data may be transferred to other competent authorities only with the previous permission of the delivering Party;
  - (iv) The competent authorities of the Parties shall take all the appropriate measures for the security of the data and their protection against accidental or unlawful destruction, accidental loss, alteration, unauthorized dissemination, or access or publication and any other form of unlawful processing; and
  - (v) The competent authorities of the delivering Party shall be responsible for the authenticity of the personal data. Should it become evident that the personal data so delivered is false, the receiving authorities of the other party must be informed about it immediately. In such a case the receiving party is obliged to rectify or destroy such false data.

**Article 9**

1. The Ministry of Home Affairs shall be the central authority on the side of the Republic of India.
2. The Ministry of Justice and Public Order shall be the central authority on the side of the Republic of Cyprus.
3. The Parties shall nominate such other law enforcement agencies

for cooperation in various areas under this Agreement as deemed necessary.

4. In the absence of other agreement, the English language shall be used for communication and exchange of information.

#### **Article 10**

The Parties shall set up a Joint Coordination Committee in order to promote and review the cooperation within the terms of this Agreement, which shall also include representatives of law enforcement agencies. The Committee shall meet whenever needed but not more than once a year on mutually convenient dates and the venue of the meetings shall alternatively be in India and Cyprus.

#### **Article 11**

The Joint Coordination Committee shall lay down the detailed modalities and specify law enforcement agencies on either side to exchange operational intelligence in the field of crime, terrorism and trafficking in drugs, psychotropic substances and precursors including their office address, contact telephone numbers, fax and other relevant details to facilitate contact on priority basis.

#### **Article 12**

1. The Joint Coordination Committee shall observe complete confidentialities in the conduct of its work.
2. Any confidential information provided by one Party pursuant to Agreement shall not be passed on or disclosed to a third party without express consent of the Party providing such information.

#### **Article 13**

Either Party may deny a request for cooperation, in whole or in part, if that request affects its national sovereignty, endangers its security or violates its laws and regulations.

#### **Article 14**

Any dispute arising out of the interpretation or application of this Agreement shall be settled through negotiations between the Parties through Diplomatic Channels.

#### **Article 15**

The provisions of this Agreement shall not affect the rights and obligations

assumed by the Parties pursuant to any other bilateral or multilateral agreement to which they are parties.

#### **Article 16**

This Agreement may be amended or revised, as deemed necessary, by mutual written consent of the Parties.

#### **Article 17**

1. This Agreement shall come into force from the date of exchange of instruments of ratification and remain in force for an indefinite period.
2. Either Party may at any time terminate this Agreement by giving six months advance written notice to the other Party indicating its intention to terminate this Agreement. The Agreement shall cease to have effect on expiry of the six months notice period.

The undersigned, being duly authorized thereto by their respective Governments, have signed this Agreement.

**Done** at Nicosia on the 25<sup>th</sup> day of May in the year 2007, in two originals each in Hindi, English and Greek language, all the texts being authentic. In case of any divergent interpretation, the English text shall prevail.

**527. Agreement between the Government of the Republic of India and the Government of the Republic of Cyprus on Abolition of Visa Requirement for holders of Diplomatic and Official/Service Passports.**

**Nicosia, May 25, 2007.**

**The Government of the Republic of India and the Government of Republic of Cyprus.**

**Hereafter** referred to singularly as the “Contracting Party” and collectively as the “Contracting Parties”

**CONSIDERING** the interest of both countries to strengthen their friendly relations, and

**DESIRING** to facilitate the entry of the citizens of the Republic of India and the citizens of Republic of Cyprus who are holders of diplomatic or official/ service passports into their respective countries,

**HAVE** agreed as follows.

**ARTICLE 1**

1. A citizen of either Contracting Party, who is in possession of a valid diplomatic or official/service passport shall be permitted to enter into, exit from and transit through the territory of the other Contracting Party through their respective international points of entry/exit without visas.
2. A citizen of either Contracting Party, holding the said passport shall be allowed to stay in the territory of the other Contracting Party for the maximum period of ninety (90) days without a visa.

**ARTICLE 2**

1. A citizen of either Contracting Party, who is assigned as a member of the diplomatic or consular staff in the territory of the other Contracting Party and is in possession of a valid diplomatic or official /service passport, shall not be required to obtain a visa to enter the territory of the other Contracting Party, and shall be granted, on request from the diplomatic mission/consular post concerned, within ninety days of the arrival of the diplomatic/official/service passport holder, a residence permit for period of his/her official stay.

2. A citizen of one Contracting Party being the representative of his/her country in an international organization located in the territory of other Contracting Party holding the said passport shall also enjoy the rights mentioned in paragraph-1 of this Article.
3. The facilities enumerated in paragraphs 1 and 2 of this Article shall also apply to the spouse of a member of the diplomatic Mission or Consulate or representative in international organization, their children and their dependent parents, provided they hold a similar category of passport or the children's names are entered in their father's or mother's passport.

#### **ARTICLE 3**

1. A citizen of either Contracting Party, who is in possession of a valid diplomatic or official/service passport and has to attend a meeting or conference convened by an international organization or Government, in the territory of the other Contracting Party, shall not be required to obtain a visa to enter and stay in the territory of the other Contracting Party.
2. The holders of diplomatic and official/service passports of either Contracting Party who are employed by an international organization, body, agency or any other such entity, would be required to obtain visa prior to their entry into the territory of the other Contracting Party for official or private visits.

#### **ARTICLE 4**

1. Each Contracting Party reserves the right to refuse the entry into, or shorten the stay in its territory, of any citizen of the other Contracting Party, whom it may consider undesirable.
2. If a citizen of one Contracting Party loses his/her passport in the territory of the other Contracting Party, he/she shall inform the authorities concerned of the host country for appropriate action. The diplomatic Mission or Consulate concerned will issue a new passport or travel document to its citizen and inform the concerned authorities of the host Government.

#### **ARTICLE 5**

Citizens of either Contracting Party, being holders of diplomatic or official/service passports shall abide by the laws and regulations of the other

Contracting Party while crossing its frontier and throughout the duration of their stay in its territory.

#### **ARTICLE 6**

1. For the purposes of this Agreement, each Contracting Party shall transmit to the other, through diplomatic channels, specimens of its respective passports, including a detailed description of such documents currently used, at least thirty(30) days before the entry into force of this Agreement.
2. Each Contracting Party shall also transmit to the other through diplomatic channels, specimen of its new or modified passports, including a detailed description of such documents, at least thirty (30) days before they are brought into force.

#### **ARTICLE 7**

Each Contracting Party reserves the right for reasons of security, public order or public health, to suspend temporarily, either in whole or in part, the implementation of this Agreement, which shall take effect immediately after notification has been given to the other Contracting Party through diplomatic channels.

#### **ARTICLE 8**

Either Contracting Party may request in writing, through diplomatic channels, a revision or amendment of the whole or part of this Agreement. Any revision or amendment, which has been agreed to by the Contracting Parties, shall come into effect on a date to be mutually agreed upon and shall accordingly form part of this Agreement.

#### **ARTICLE 9**

Any difference or dispute arising out of the implementation of the provisions of the Agreement shall be settled amicably by consultation or negotiation between the Contracting Parties without reference to any third party or an international tribunal.

#### **ARTICLE 10**

This Agreement shall enter into force on a date to be mutually agreed upon by the Contracting Parties, which shall be notified through the exchange of Diplomatic Notes. This Agreement shall remain in force for an indefinite

period and may be terminated by either Contracting Party by notification through diplomatic channels, which shall enter into force ninety (90) days after the date of such notification.

IN WITNESS WHEREOF, the undersigned being duly authorised by their respective Governments, have signed the present Agreement.

**Done** at Nicosia on this 25<sup>th</sup> day of May in the year two thousand seven in two(2) originals; in Hindi, Greek and English languages, all texts being equally authentic. In the event of any divergence of interpretation, the English text shall prevail.

## CZECH REPUBLIC

### **528. Press Release of the Ministry of External Affairs on the visit of Czech Foreign Minister Karel Schwarzenberg.**

**New Delhi, November 16, 2007.**

1. The Foreign Minister of the Czech Republic, Mr. Karel Schwarzenberg is visiting India from November 18 to 21, 2007.
2. During his visit, the Czech Foreign Minister will hold discussions with the External Affairs Minister, who will host a dinner in his honour. The visiting dignitary will also hold talks with the Minister of New and Renewable Energy. The Czech Foreign Minister will also visit Skoda automobile factory in Aurangabad.
3. India and the Czech Republic have traditionally enjoyed warm and friendly relations dating back to medieval ages, the Kingdom of Bohemia. India's trade and economic links with Czechoslovakia also pre-date our independence. Czechoslovakia established a Consulate in Bombay in 1920 and in Calcutta soon thereafter. This year, India and the Czech Republic are celebrating 60th anniversary of establishment of diplomatic relations commencing from November 13, 2007. A number of Czech companies such as Skoda Auto, Czech Shoe Company, Bata Works, Tatra Joint Venture established an early presence in the country. Indian and NRI investors as Mittal Steel, Infosys Technologies, Ashok Leyland and Tata Tea have established presence in the Czech Republic.
4. The visit is taking place against the backdrop of significant increase in bilateral trade and investment consequent to the robust economic growth in India. Bilateral trade has shown significant growth during last few years, topping USD 665 million in 2006. In 2007 up to August 2007, bilateral trade reached USD 605 million, with Indian exports of USD 263 million and Indian imports of USD 342 million. The Joint Press Statement issued during the visit of Czech Prime Minister in January 2006 envisaged trade turnover of USD 1 billion by 2010. It appears that the target may be achieved this year.
5. Indian students are increasingly attending professional courses such as medical, dental and engineering in Czech institutions. Cooperation between CSIR and the Czech Academy of Sciences is ongoing and both sides are exploring ways to take this further.

6. A Memorandum of Cooperation between the Foreign Service Institute and the Czech Diplomatic Academy is to be signed during the visit.
7. The visit of the Czech Foreign Minister follows the visits of Czech President in November 2005 and Czech Prime Minister in January 2006. These high level visits have served to enhance our political and economic ties significantly.

**529. Memorandum on Cooperation between the Foreign Service Institute of the Ministry of External Affairs of the Republic of India and the Diplomatic Academy of the Ministry of Foreign Affairs of the Czech Republic.**

**New Delhi, November 16, 2007.**

**The Foreign Service Institute of the Ministry of External Affairs of the Republic of India and The Diplomatic Academy of the Ministry of Foreign Affairs of the Czech Republic** hereinafter referred to as the "Parties";

**Desirous** of establishing and developing cooperation regarding diplomatic staff training;

**Have reached** the following understanding:

**Article 1**

This Memorandum is intended to create conditions for maintaining regular, contacts and promoting cooperation between the two diplomatic institutions..

**Article 2**

The Parties agree that a priority task of such cooperation is to elaborate and introduce modern methods in training specialists in the field of foreign diplomacy, international relations, international law, foreign economic relations, political science and other subjects of the curriculum as well as to inform each other on matters relevant to teaching techniques along with the exchange of relevant literature and publications.

**Article 3**

The Parties will cooperate through programs of basic and specialized

courses. The Parties may exchange teaching materials. On the basis of reciprocity, the Parties may exchange experts, scholars, lecturers and diplomatic trainees with a view to upgrading their professional qualifications. The Parties will exchange experience concerning the organization of teaching institutions.

#### **Article 4**

The Parties may organize participation of their respective experts in conferences, symposia and panel discussions, by informing each other of these activities in advance.

#### **Article 5**

The Parties will promote the organization of meetings of Foreign Ministry officials and representatives of diplomatic missions of the two countries with the students and the faculty of the Academies on issues of mutual interest.

#### **Article 6**

The Parties will decide the specifics and logistics of every project they undertake together. For this purpose, a protocol laying down the financial terms and conditions of the proposed exchanges will be concluded, if necessary.

#### **Article 7**

The Memorandum shall enter into force on the day of its signature and shall remain in force for a period of three years. Thereafter, it may automatically be renewed for similar three-year periods at a time, unless terminated by either Party by giving a written notice of 90 days to the other Party prior to the date of the termination of the Memorandum, The termination of this Memorandum shall not affect ongoing projects unless the Parties decide to do so.

#### **Article 8**

Any differences and disputes that may arise from the interpretation or implementation of the present Memorandum on Cooperation shall be settled amicably through direct mutual consultations between the Parties.

#### **Article 9**

This Memorandum on Cooperation may be amended by mutual written agreement of the Parties.

**Done** in New Delhi on this 16th day of November 2007 in two originals, of each Hindi, Czech and English languages, all texts being equally authentic. In case of any divergence in interpretations, the English text shall prevail.

Academy of the Ministry of Foreign  
Affairs of the Czech Republic**

**Dean of the Foreign  
Service Institute**

**Director of the Diplomatic Academy**

## GERMANY

### **530. Briefing by Official Spokesperson on the visit of German Chancellor Dr. Angela Merkel.**

**New Delhi, October 29, 2007.**

**Official Spokesperson:** Good afternoon, everybody.

You may be aware that Chancellor of the Federal Republic of Germany, Her Excellency Dr. Angela Merkel, will be beginning her State visit. She arrives tonight. She is here at the invitation of Prime Minister Dr. Manmohan Singh. She is being accompanied by a high-level delegation including the Federal Minister of Research and Education, Dr. Annette Schavan and her Political and Security Advisor Dr. Christoph Heusgen. She will also be accompanied by a 30-member business delegation.

Several meetings are planned during the state visit. She would be meeting the President of India, Vice-President of India, Prime Minister of India, the Chairman of UPA and there will be calls by External Affairs Minister and by Leader of Opposition

The Prime Minister and the Chancellor will together flag off the Science Express, which is a train which will be showcasing India and Germany's cooperation in the science and technology field. The exhibition will be travelling around India for a year.

After the engagements in Delhi, which will be essentially all of tomorrow, she will be visiting Mumbai. There she will meet the Governor and Chief Minister of Maharashtra, and will also address the CEO's Round Table. This will be the first meeting of the CEO's Round Table, and will be held in Mumbai. That is so much for the broad programme. You have the detailed advisory already giving you the times of the various events.

To give you some background on the relationship, as you know we have traditionally warm and friendly relations with Germany. In 2000, the two countries adopted the agenda for the Indo-German Partnership in the 21st Century which imparted the strategic dimension to this relationship. Since then there has been considerable progress in several fields particularly cooperation in science and technology, defence, culture, economic relations and, of course, the bilateral exchange both at political levels and at experts level has been intensified

In terms of the several cultural milestones which we have passed in the last two years, India was featured in 2006 as the Year of India in Germany. India was the partner country at the Hanover Fair in 2006, which was jointly inaugurated, you will recall, by Chancellor Merkel and by Prime Minister Singh. India was also the focus country at the Bonn Biennial Art Festival in May 2006 as well as the guest of honour country in the Frankfurt Book Fair in the same year in October. India was the partner country in the International Tourism Bourse in Brazil in March this year. And the India Day was held at the Frankfurt International Motor Show in September 2007. So in many ways India has been a flavour of the year in Germany.

In trade and economic relations there has been a significant increase. Germany is India's largest trade partner in the European Union, and the second most important source of technological collaboration globally and an important investor particularly in the area of upgradation of infrastructure. Bilateral trade has crossed ten billion Euros in 2006 showing an increase of 39 per cent over the previous year. This was the target which was meant to be reached in 2009 and, therefore, has been reached three years ahead of schedule. Germany is 7th largest investor in India with total inflows of US dollar 1.9 billion between 1991 and June this year.

One of the major elements of cooperation remains science and technological cooperation. An Indo-German Science and Technology Research Centre is being set up to facilitate cooperation in industrial and basic research and ensuring that scientific breakthroughs are turned into practical applications. I have already told you about the Science Express. In education our links are expected to be strengthened with India having created five rotating chairs in prominent German universities.

At the conclusion of the bilateral talks tomorrow there will be a joint statement which will be issued which will show the strategic roadmap not only for the future cooperation but also for our strategic partnership of shared cherished values in the global arena. We also expect several agreements and memoranda of understanding to be signed during the visit which will be covering fields of defence, cooperation, science and technology and intellectual property rights.

That is the visit that begins tonight.

\*

\*

\*

\*

**Question:** Could you elaborate on the nature of defence cooperation (with Germany)?

**Official Spokesperson:** As I said, it has been growing. In terms of what is going to be happening I will only be able to tell you tomorrow after what we agree to when the talks are held and we sign the Memorandum of Understanding.

**Question:** Regarding the political cooperation with Germany ... (inaudible)... the Chancellor... (inaudible)... some German officials are saying that they want to take the relationship beyond science and technology and economic cooperation. What is India's stand on that?

**Official Spokesperson:** Certainly, political cooperation has been growing very significantly since a strategic dimension to the relationship was added following the adoption of the Indo-German Partnership in the 21st Century. That cannot be complete without political cooperation of the closest kind both in bilateral relations as well as in the international arena.

We have been cooperating quite closely with each other by keeping each other closely briefed through meetings at the highest level and also, wherever possible, aligning positions given the democratic values of both countries. Our position on the UN reforms is one such case in point. Similarly, our position on how we see international phenomena like terrorism is another case in point as well as several regional issues there has been very active, close exchange of views and an alignment of positions on several areas. So, certainly we would like to see this process strengthened.

**Question:** Will India be seeking Germany's help in the Nuclear Suppliers Group?

**Official Spokesperson:** I am not going to be able to tell you about what all the Prime Minister and Chancellor Merkel will discuss. It is a full scale bilateral discussion and I expect a number of issues of mutual interest will be discussed.

**531. Joint Press Conference by Prime Minister Dr. Manmohan Singh and Chancellor of Federal Republic of Germany Dr. Angela Merkel.**

**New Delhi, October 30, 2007.**

**Prime Minister Dr. Manmohan Singh:** Your Excellency Chancellor Dr. Angela Merkel, Distinguished Guests, Ladies and Gentlemen of the Press:

I once again extend a very warm welcome to Chancellor Merkel on her first visit to India.

Chancellor Merkel and I have had extremely warm, fruitful and intensive discussions. We have reaffirmed our strong mutual commitment to the strategic partnership that was launched in 2001.

The signing of several bilateral agreements today, and the Joint Statement on the Further Development of the Strategic and Global Partnership between India and Germany will impart a new and substantive momentum to our relations.

We both recognize the long-term potential of Indo-German economic and trade relations. Germany has become our largest trade partner in Europe and the fourth largest globally. I conveyed to the Chancellor that we welcome German investment, particularly in areas of Germany's proven technological strengths.

Science & Technology and cooperation in high technology areas remains an important dimension of our relations. This morning Chancellor Merkel and I launched the Science Express which is symbolic of our longstanding collaboration in this field.

We reviewed prospects for intensifying cooperation in the areas of infrastructure, energy, defence, education, culture and vocational training. We spoke about the need to facilitate people-to-people contacts.

We also discussed regional and global issues.

India and Germany share common values of democracy, rule of law, and fundamental freedoms. We recognize the need to create an equitable international order which reflects contemporary realities, and is conducive to meeting the challenges of poverty and disease. We reaffirmed our common resolve to combat international terrorism, and to work towards an early and balanced outcome of the Doha round of talks.

I conveyed my appreciation to Chancellor Merkel for her leadership and keen interest on the issues of climate change and energy security. I would like to thank Chancellor Merkel for her endorsement of the idea of per capita entitlements, and the need for developed countries to accept convergence of per capita Green House Gas emissions of developing countries with theirs.

I invite Chancellor Merkel to make her comments.

**Chancellor Dr. Angela Merkel:** *Allow me to first of all thank you most warmly, Prime Minister Dr. Manmohan Singh and the whole of the Indian Government, for the very warm and very gracious hospitality extended to me and to the members of the German Delegation. Let me say that we are delighted to be your guests in your country. Let me also tell you that I am firmly convinced that this visit will contribute to further enhancing the strategic partnership between our two countries, a partnership that covers many areas, not only the area of politics but also the economy, business relations and economic cooperation in general.*

*What fuels our cooperation and what is really the driving force behind this excellent cooperation is particularly the very dynamic economic relationship between our two countries. We envisaged to actually achieve the goal of a 10 billion exchange of goods by the year 2010. I am very gratified to be able to tell you that we have already achieved this volume of trade exchanges at this point in time. So, we have decided to be even more ambitious until 2012 and to double that number by that time. So, we can safely say that business relations, our economic relations indeed are the driving force behind this relationship. I must say that I feel very encouraged by the fact that the Indian Government has actually thrown its full weight behind this economic relationship and behind this partnership in general.*

*One of the flagships of our cooperation is obviously the cooperation in science and research. We have already embarked on that in the past and we are going to continue that in the future. The Science Express is the very symbol of this very broad-based cooperation between our two countries. You can also see how important this is by the sheer number of agreements and memoranda of understanding that have been signed here just now. We continue to work together with India in the future, particularly in the area of science but also more comprehensively in the overall issue of education.*

*We would like to continue on the successful cooperation also in the area of development cooperation. We would like to continue over the existing level of development cooperation and further enhance it to include, for example,*

*issues related to climate change, energy efficiency, energy supply and also renewable energies. On this last there are currently new possibilities that are being explored in negotiations between the two Ministries that are in charge on both sides.*

*We addressed also other issues that we would like to continue in the area of bilateral cooperation. We have said that we are going to continue to build on the existing level of bilateral cooperation and further enhance it in the next few years to come. We have also covered the whole spectrum of international issues, multilateral tasks that we see ahead for our two countries, most of these issues having to do with conflicts, for example, here in this region. We touched on the issue of Myanmar but also on issues related to overall cooperation, for example again, climate protection, but also the issue of Afghanistan. So, you can see that this is indeed a cooperation that covers a lot of different issues and is very broad-based in nature.*

*Thank you very much for giving us the opportunity to hold this very broad-based, very intensive exchange of views here. I know that we are going to have time later on over dinner to continue these exchanges of views. I would now also like to tell you that I am absolutely convinced that Germany and India can do a lot together and that they want to do a lot together also in the future.*

*Allow me to add a brief remark. I have already pointed this out to the Prime Minister previously that I was probably going to make this announcement. I have just been informed that Germany has been made hosts for the World Cup Women Soccer that is in 2011. So, a word of congratulations goes out to the team, to my fellow countrymen. I have the assurances of the Prime Minister that he is very happy for Germany for the fact that we have been able to win this World Cup for our country. Let me assure you that we will try to be very good hosts again. I would also like to congratulate here the German Soccer Federation for the efforts that it put into this. I would also like to congratulate the fans of the team in Germany. I am absolutely certain that they will again turn the summer of 2011 into a fairy tale summer for soccer, and this time it is going to be for the women's team.*

**Question (German Media - ZDF Television):** This is a question addressed to both the Chancellor and to the Prime Minister. The subject of my question is the nuclear deal between the United States and India. Did you address that issue during your conversation? What is your opinion on this, Chancellor? What sort of plans do you have, Prime Minister, on the nuclear deal? We understand that you have certain problems here in India to actu-

ally implement that deal, to turn it into a reality. What does this mean, Chancellor, for the German business community? Do you think it will have any impact? Will it open doors or will it rather close it to them?

**Prime Minister Dr. Manmohan Singh:** I and the Chancellor had a very fruitful discussion on this whole issue of civil nuclear cooperation between India and the international community. I explained to Her Excellency that the 123 agreement that we have signed with the United States is an honourable deal, good for India, good for the world, good for the cause of nonproliferation. We have run into some problems domestically which we are trying to resolve. But as far as our Government is concerned, we remain committed to see that this process is carried forward. For this we need to evolve a broad-based consensus in our country and efforts are on in that direction.

**Chancellor Dr. Angela Merkel:** *We did raise the issue and the Prime Minister explained to me the internal situation in India, and I underlined that from the point of view of Germany we have every interest to see India being committed by and incorporated in the international regimes in this respect to the best extent possible so as to ensure the maximum transparency on that particular issue. We would then hope that the IAEA rules would be abided by India and that out of that would follow obviously the further rules and agreements that are relevant to this issue. One would hope that further progress would be made in this respect on the basis of the IAEA rules. Once that is in place, once that cooperation with the IAEA is in place, then Germany and India could do, I suppose, a lot together on that basis and in the area of the peaceful use of nuclear power. Whether any sort of business activity will arise out of that is up to the business community to decide.*

**Question (Indian Media - NDTV):** I have a question for the Prime Minister. In the last few days more and more senior American officials are speaking out about the need for India to take the next steps on the nuclear deal and to take them quickly. Are you worried that if India does not take the next steps quickly, it would be more difficult for us to get this deal through?

**Prime Minister Dr. Manmohan Singh:** I have already mentioned that efforts are on to evolve a broad-based national consensus. We are a democracy, and in a democracy ultimately you have to take all those who are supporting you along with you. That process is under way. I would not like to speculate what would be the consequences. There is I think some delay, but we have not I think reached the end of the road.

**Question (German Media - DPA):** I would like to ask two questions really. As to the genuine and real chances for achieving a permanent seat on an enlarged Security Council, did you address that issue? How do you assess those chances? My second question is directed to the Federal Chancellor. How do you feel looking at the praise that you have garnered today?

**Prime Minister Dr. Manmohan Singh:** We had a very fruitful discussion on the whole issue of the Security Council reform. As you know, India and Germany are part of the G-4 process. All the four countries who are members of G-4 are convinced that if the Security Council is to reflect the realities of the 21st century, there is need for reform. We recognize that there is a growing support for the reform of the Security Council. But there are still hurdles and our two countries have agreed to work together in this area.

**Chancellor Dr. Angela Merkel:** *Yes, we had an exchange of views on this question of a permanent seat and we are going to continue our cooperation within the G-4 on that particular issue. We have an interest in a reform of the Security Council of the United Nations. We both have an interest in giving our two countries a higher profile within the United Nations through a permanent seat. We are going to continue to be in contact on that issue. We would also have to look at, and that obviously is what presupposes any success in this, whether there is a reform enthusiasm still within the United Nations, whether that reform spirit is again gaining momentum. It seems to have been waning somewhat but, I think, one ought to be optimistic on that particular front.*

*On the issue of praise, when I receive praise I take it as praise of Germany as a whole. But it is certainly true that I personally feel that I am also strengthened by words of praise in the sense that I feel strengthened to tackle more political problems wherever they may arise.*

**Question (Indian Media - Indo Asian News Service):** This question is addressed to the German Chancellor. People-to-people contacts are at the heart of any strong bilateral relationship. Is Germany going to liberalize its visa regime and immigration rules to allow more Indian businessmen and workers in? Are there any difficult issues in this area?

**Chancellor Dr. Angela Merkel:** *On that allow me to point out the fact that over the past three years we have actually been able to increase the number of Indian students studying in Germany by a factor of five. We are going to continue to work closely together in this respect. There are also many companies in Germany who train young Indians in Germany, for example, Deutsche Bahn is only one of these companies. We are aware of this issue*

*of visa. We do see it. We do see the need also for discussing that because it is certainly true that the expectations on the Indian side have to match the legal situation, the legal system as it exists in our country. There are a number of issues here that simply need to be addressed and need to be overcome because we obviously want to avoid a situation where an Indian entrepreneur wishes to come to Germany to invest there and is hindered by the fact that he or she will not be granted a visa.*

[Text in italics is translated by German interpreter]

**532. Joint Statement on the Further Development of the Strategic and Global Partnership between India and Germany.**

**New Delhi, October 30, 2007.**

1. Prime Minister Manmohan Singh and Chancellor Angela Merkel have reaffirmed today their commitment to the strategic partnership between India and Germany. The special partnership has already led to growing cooperation in global affairs and substantial expansion in the bilateral engagement in multiple fields. Within the framework of the Agenda for the Indo-German partnership in the 21st century adopted in 2000 and the Joint Statement issued on the occasion of the visit of the Prime Minister of India to Germany in April 2006, India and Germany will enhance the scope of their partnership with a view to strengthen it, based on shared principles, common perceptions and interests.
2. India and Germany share and promote universal values of democracy, rule of law, human rights and fundamental freedoms including religious, which are best realized in a pluralistic environment. They share a vision of peace, security and common opportunity in global affairs. They have shared interests in overcoming and finding solutions to key global challenges - amongst others poverty, diseases such as HIV/AIDS, the environmental and climate change, energy security, UN reform, international crime including cyber crime, illegal migration and trafficking in people, the proliferation of weapons of mass destruction and their delivery systems, and international terrorism. Co-operation will be further enhanced on these issues, both bilaterally and in regional and international fora.

3. India and Germany share the vision of further strengthening their partnership through new initiatives in the spheres of trade and bilateral investment, energy, science and technology, education, culture, defence. They see considerable potential for growth in all these fields.
4. India and Germany are strong partners in the field of science, technology and research and are determined to further developing this central pillar of their strategic partnership. The establishment of the Indo-German Science and Technology Centre, and the launch of the Science Express, which will carry an exhibition, designed and fabricated by the Max Planck Society, to numerous Indian cities in the course of the next year, are significant contributions reflecting this cooperation. Both sides are actively pursuing cooperation in the space sector including in the Chandrayaan project. Germany's support to India's participation in ITER and India's commitment to participate in the FAIR project was welcomed and appreciated.
5. Trade, investment and education belong to the core of the Indo-German partnership and collaboration. Both sides noted with satisfaction that bilateral trade has doubled within three years and agreed to work towards an annual trade volume of 20 billion Euro for 2012. The upward trend in two-way investments between India and Germany is a welcome development that needs further acceleration. Infrastructure and energy need to be concentrated on as sectors for mutually beneficial investments. They should take into account the complementary nature of the skills, resources and opportunities available in the two economies.
6. Transport infrastructure in India and transport links between India and Germany are vital components of our economic and trade relations. Railways and power generation are two areas wherein German investment in India would be to mutual advantage and would generate spin-off benefits to Indian and German industry. The two sides agreed to look for innovative ways and means to achieve this objective. India appreciates Germany's long-standing engagement in the area of vocational training. Both sides agreed to explore new avenues for further cooperation in this field including through public-private partnership.
7. The two sides underlined the importance of business to business links to further economic cooperation. They welcomed the meeting of a CEOs Round Table of Indian and German business leaders in Mumbai. In the light of the rapidly growing trade and economic relations and the rapidly evolving pattern of international competitive advantage, it was agreed

to facilitate movement of persons and professionals between the two countries in accordance with national legislation. Both Governments acknowledge the considerable potential for cooperation in the services sector. In this context, there was agreement on the need for the early conclusion of a Social Security Agreement, both for individuals and companies in the two countries. The two sides shared the assessment that further enhancement of bilateral air traffic relations would underpin the growing trade relationship between both countries.

8. Both sides reaffirm the development cooperation between Germany and India as an example of excellent bilateral work, innovation and alignment of development priorities. The mutually agreed priority areas focus on energy, environment and sustainable economic development. Indo-German cooperation promotes social security systems, development, micro financing and rural cooperative banking. The Rural Cooperative Credit Project / Linkage Banking Project, a programme of Indo-German development cooperation, was noted as an example. A new financial commitment by Germany of 150 million Euro likely to be concluded in November 2007 to promote energy efficiency and renewable energy projects was appreciated. These projects reinforce the common goal of both sides to produce clean energy and protect the global climate.
9. India and Germany recognise the urgent need to find effective and practical solutions to address concerns regarding climate change and its implications for human kind. These would include mitigation and adaptation strategies in a manner that supports further economic and social development in particular of developing countries. Long-term convergence of per capita emission rates is one of the important principles that should underpin negotiations in the context of the United Nations. Both sides reaffirmed their commitment to the United Nations Framework Convention on Climate Change (UNFCCC) in accordance with their common but differentiated responsibilities and respective capabilities. India and Germany call on all parties to actively and constructively participate in the negotiations on a comprehensive post-2012 agreement for which the UNFCCC Conference in Indonesia in December 2007 would be significant.
10. The activities and follow up of the Indo-German Energy Forum were noted with appreciation. The MoU between the Energy Agencies of both countries signed during the visit of the Indian Minister of Power in

Germany in 2006, the Indo-German Symposium on Energy Efficiency as well as the Indo-German Environment Forum both to be held in New Delhi in 2008 will generate additional momentum for the bilateral political dialogue on energy. It will equally foster the identification of cooperation projects in this field. The early conclusion of an MoU on Clean Development Mechanism (CDM) projects will further strengthen this process. India and Germany noted with satisfaction the growing bilateral CDM cooperation with 21 approved projects at present.

11. They emphasized the need for ensuring the supply of safe, sustainable and non-polluting sources of energy to meet the rising global demand for energy, particularly in developing countries.
12. There was agreement that the enlarged bilateral defence cooperation on the basis of the Defence Cooperation Agreement, including the bilateral dialogue on export control, marked the development of a new phase to enhance the strategic partnership. It is envisaged to include exchange of information and cooperation in the fields of defence technological research, armament procurement projects including project related development and technology as well as general defence technology.
13. India and Germany strongly support an early, fair and substantive outcome of the Doha Round of multilateral trade negotiations. They bear common responsibility for a successful conclusion of the Doha Agenda with focus on the development dimension and stress the necessity to overcome the existing differences in the Doha Round for the benefit of all WTO member states. Close cooperation between India and Germany will make a significant contribution to achieve a balanced and comprehensive agreement.
14. India and Germany noted with satisfaction the growing partnership between India and the EU. They welcomed that negotiations have begun between India and the EU to arrive at a broad-based Trade and Investment Agreement in accordance with the decision reached at the India-EU Summit in Helsinki in 2006. They look forward to the forthcoming India-EU Summit which will further the India-EU relationship.
15. India and Germany recognise that a strengthened multilateral system, including a reformed UN Security Council that would reflect the realities of the 21st century, enhances global cooperation and security. Both sides will continue their close cooperation bilaterally and in the framework

of the G4 for the strengthening of the multilateral system and towards early realisation of reform of the United Nations, including the expansion of the UN Security Council, in both permanent and non-permanent categories of membership. India and Germany reaffirmed their firm support for each others' candidature for permanent membership on an expanded UNSC.

16. Terrorism is a global threat requiring a global response. Both sides underline the importance of joint international efforts in countering terrorism which is not justified under any circumstances. They agree to intensify mutual exchange of views, experiences and practical cooperation in the fight against terrorism, both through bilateral channels and in multilateral forums. They shall strengthen cooperation through the Indo-German Joint Working Group on Counter-Terrorism and in the EU framework, as well as in pursuing as soon as possible agreement in the UN on the Comprehensive Convention against International Terrorism. They will share experiences and increase co-operation, including joint operational work between police and law enforcement agencies. The conclusion of a Treaty on Mutual Legal Assistance in Criminal Matters would further strengthen the bilateral efforts.
17. Both sides share the view that proliferation of weapons of mass destruction and its linkages with terrorism pose a great threat to international peace and security. India and Germany share the vision of a world free of weapons of mass destruction, a goal towards which they will work together.
18. India and Germany reaffirm their commitment to strengthen their comprehensive strategic partnership for the benefit of both their peoples and the international community based on universal values of democracy and pluralism. A stronger partnership between India and Germany, two major democracies in Asia and Europe, acting in concert in international institutions, enhances global cooperation and security. Both sides stressed the commitment to work towards promoting international peace, stability and security, development and the eradication of poverty.

## GREECE

### **533. Address of President Dr. APJ Abdul Kalam to the thinkers of Greece organized by Eliamep, Athens, Greece.**

**Athens, April 26, 2007.**

*Dynamics of Peace and Prosperity*

*"Virtue is Knowledge" - Socrates*

I am delighted to address and interact with the eminent thinkers of Greece, organized by the Hellinic Foundation for European and Foreign Policy (ELIAMEP). My greetings to the organizers, researchers and distinguished participants. Greece and its people have a special place in the hearts of Indian people. I have a very special sense of elation in standing before you to address this august body on the hallowed grounds of this great country, which had made a mark on the civilisational map of the world, millennia ago. The land of Iliad and Odyssey, that of Homer, Socrates, Plato and Aristotle had been the toast of those who delved into history not only for literary enjoyment or educational enlightenment, but for spiritual and philosophical fulfillment also. I am particularly happy to be addressing you today because my thoughts go back to my own country whose civilisation also dates back to many millennia ago and has also, like that of yours, been rich in content and extensive in reach. In one of his addresses, Dr. S. Radhakrishnan, who was the philosopher President of India, referred to comparisons between the knowledge centers of civilisations of India and Greece. The Delphi Temple says "know thyself" just as the Upanishads say "atmanam viddhi". He also stated that the greatest of civilisations "does not depend upon the extent of territory which they have or the size of the population which they embrace but it depends upon the artistic, intellectual and spiritual achievements of the countries themselves.....". He referred to a great ancient Bishop of the last century who had made out that Greece and India were the two metaphysical nations of the world - the former contributing to the western civilization and the latter to the eastern.

I was thinking what thoughts I can share with this intellectual audience. While substantial amount of development has taken place during the 20th century and it has improved the conditions of human lives, still we are

faced with conflicts in our day-to-day pursuit of life. Keeping this in mind, I have selected "Dynamics of Peace and Prosperity" as the topic for initiating discussion today.

### **Unity of Minds**

I was studying the classic "Dialogues of Plato", where Plato brings out "our aim in founding the State was not the disproportionate happiness of any one class, but the greatest happiness of the whole" in 2400 years ago. Similarly, during the same period Tamil poet Saint Thiruvalluvar said,

... "the important elements that constitute a nation are: being disease free; wealth; high productivity; harmonious living and strong defence". We have to find how we can provide all these elements to all the citizens of the nation on an equitable basis for happiness for all. This may result in an extremism free world, a peaceful world. I would like to first discuss with you my personal experience in exploring what brings happiness to the human beings.

During the year 2003, I visited one of the Indian states, Arunachal Pradesh, I visited a Buddhist monastery at Tawang 3500 m. altitude. I stayed and spent some time nearly for a day. I observed a unique situation in all the villages nearby where young and experienced were all radiating happiness in spite of severe winter environment. Then, I visited the 400 years old Tawang monastery itself and there also I saw monks of all age groups in a state of serenity. I was asking myself what is the unique feature of Tawang and surrounding villages which makes people and monks to be at peace with themselves. When the time came, I asked the Chief Monk, how in Tawang villages and monastery, I am experiencing peace and happiness being radiated by everyone. There was a pause, the chief monk smiled. He said, "You are the President of India. You will be knowing all about us and the whole nation. Again I said, "It is very important for me, you please give me your thoughtful analysis".

There was a beautiful golden image of Lord Buddha radiating smile and peace. The Chief Monk assembled nearby all his nearly 100 young and experienced monks. The Chief Monk and myself were sitting amidst them. The Chief Monk gave a short discourse, which I would like to share with you. Chief Monk said, "In the present world, we have a problem of distrust, unhappiness transforming into violence. This monastery spreads: when you "Remove "I" and "Me" from your mind, you will eliminate ego; if you get rid of ego, hatred towards fellow human beings will vanish; if the hatred goes out of our mind, the vio-

lence in thinking and action will disappear; if violence in our mind is taken away, peace springs in human minds. Then peace and peace and peace alone will blossom in the society". I realized the meaning of beautiful equation for peaceful life, but difficult mission for the individual is how to remove the ethos of "I" and "ME". For this, we need the education inculcated in the young age as propagated by Greek and Indian philosophers.

In my search for evolving a peaceful and prosperous society, I got part answer. My search for real truth continues. I saw an ancient Christian monastery in Bulgaria, where I had a discussion with highly experienced monks on the message of Tawang. The Monk added that forgiveness is also the foundation of good life. Similarly in the birth place of Swami Vivekananda, I explained the Tawang experience to the disciples and they too felt the Tawang experience indeed is beautiful and they added "Trait of Giving " will add to peace and happiness. Then I visited Ajmeer Sharif where I participated in the Friday Namaz. Here, the Sufi expert told me that Almighty's creation, the man, has been challenged with another powerful creation of Shaitan. Only good deeds lead to good thinking, good thinking results into actions radiating love as commanded by Almighty. While talking about good deeds, I am reminded of the advice given to Gandhiji by his mother. She says,

"Son, in your entire life time, if you can save or better someone's life, your birth as a human being and your life is a success. You have the blessing of the Almighty God".

This advice has made a deep impact in the mind of Gandhiji, which made him to work for the humanity throughout his life. During the 100th birthday of His Holiness Sree Sree Shivakumara Swamiji of Sree Siddaganga Math, Tumkur, Karnataka, a southern state of India - a message of "Giving" came to my mind celebrating his contribution, which I would like to share with you

#### **"Radiating message on Giving"**

*"O my fellow citizens, In giving, you receive happiness,*

*In Body and Soul.*

*You have everything to give.*

*If you have knowledge, share it.*

*If you have resources, share it with the needy.*

*Use your mind and heart,*

*To remove the pain of the suffering,*

*And, cheer the sad hearts.*

*In giving, you receive happiness.*

*Almighty will bless all your actions."*

What message do we get from all these experiences? All these experiences give an insight that human beings can attain lasting peace and happiness only when they rise above their selves and work towards serving others without external temptation. Is it utopian goal or is it practicable in day-to-day life? I have come across many incidents where people have, irrespective of their normal professional affiliations, have come forward for great societal missions by giving.

#### **Punjab Experience in reviving the waterways**

Last year, I was in Punjab, a northern state of India. There, I visited Sultanpur Lodhi and saw the marvelous development which has taken place on the river Kali Bein. I was delighted to see the rejuvenated Kali Bein, the place where the revered Sikh Guru Gurunanak Devji is said to have received enlightenment. Over the years this rivulet had turned into weed choked drain. Now, river is clean due to the efforts of Baba Balbir Singh Seechewal, a priest in a Gurudwara temple and his team. Babaji had organized people's participation in stopping the massive flow of sewage into the Bein and cleaned 160 km long polluted and choked rivulet within the last five years by deploying on an average 3,000 kar sevak (volunteer pilgrims) per day. Today one can feel the flow of fresh water in this rivulet released from the Tarkina Barrage by the government. The revival of the rivulet has recharged the water table as the hand pumps that had become dry for the past 4 decades are now pumping out water. Also, I saw speed boats running on the river. The 3 kms stretch which I physically saw was a beautiful site to watch with nice bathing ghats, tree orchards on the bank of the river and well laid out roads parallel to the river. I also saw the great happiness of giving on the faces of the volunteers who had physically participated in this task. This is a great example of giving and happiness arising out of giving. In the context of "Giving, nations all around" have the responsibility of promoting peace and prosperity.

#### **Confluence of Civilizations**

The Greece and India have the unique responsibilities in radiating the thinking process to the world, how to establish integrated way, peace and pros-

perity of nations. This topic, I have gone into details, while addressing to EU Parliament on 25 APR 2007. Of course 27 members from Greece represent the EU Parliament. I have given a three dimensional approach "Education with value system", "Religion transforming into Spiritual Force" and "Economic Development of the nation to remove the disparities in the society". The members assembled here may like to refer my talk on the website [www.presidentofindia.nic.in](http://www.presidentofindia.nic.in).

Now, I would like to talk to you about the present ambience in India and the dreams, that will pave the way for intensifying our cooperation towards national prosperity and world peace.

### **Ascent Phase**

India is in an ascending economic trajectory, with continuously rising foreign exchange reserves, moderate rate of inflation, global recognition of our technological competence, energy of 540 million youth, umbilical connectivities of 20 million people of Indian origin in various parts of the planet. India as the largest democracy in the world has the reputation for providing leadership to one billion people with multi-cultural, multi-language and multi-religious backgrounds. Our technological competence and value systems with civilizational heritage are also highly respected. Foreign Institutional Investors are finding investing in India attractive. We are in the process of accelerating our clearance system of investment proposals. Our industrialists are also investing abroad and opening new business ventures. The Indian economy is growing with an average annual GDP growth rate of over 8 to 9%. Very soon, we will be reaching the target of 10% GDP growth rate. Now, I would like to talk to you about the possible Indian ambience in 2020.

### **Possible Ambience in 2020**

I visualize a prosperous India well before the year 2020. We expect the people below the poverty line to come to near zero and our literacy must be nearly 100%. The Human Development Index of India will be less than 50. Every Indian will have either a good university degree or quality training with globally competitive employable vocational skill. E-governance would be in position for all Government to Government (G2G) and Government to Citizens (G2C) transactions making the governance system transparent with a National ID card in position. Tele-density will reach over 75%. All our villages will have reliable, uninterrupted quality electric power supply. 600,000 villages will have all three connectivities such as physical connectivity, electronic connectivity, knowledge connectivity leading to economic connectivity through the programme of PURA (Providing Urban Amenities in Rural Areas). The

interlinking of rivers and water bodies and use of technology for water collection, water recycling and water management will result in equitable distribution of water for drinking, irrigation, industry, navigation and as natural beauty. There will be no shortage of water in any part of the country nor will there be disasters due to floods, water logging etc. India would have realized energy security and would be working towards energy independence. Good sanitation facilities will be available in homes in every part of India and for all Indians and tourists. We will be using more of renewable energy such as solar energy, wind power, bio-mass, mini and micro Hydel and thorium based nuclear reactors which are environment friendly energy sources.

Through responsive and innovative venture capital systems and entrepreneurial training both in schools and colleges, we will have more enterprises leading to a large number of employment generators rather than employment seekers. A pro-active healthcare system delivered through innovative schemes will provide quality healthcare access at an affordable cost to all the people including those living in remote areas. Everyone will have an opportunity to take up and complete courses of choice in higher education. In addition to the above economic, social and human development, India will also have a visible global presence in strategic sectors and will contribute to world peace. All our technological and economic advances while enhancing our prosperity would embed our value system derived from our civilizational heritage. This unique combination will make our growth robust and sustainable and will lead to a peaceful, secure, happy and prosperous society. For achieving Vision 2020 from the present ambience, we need a measurement tool which can guide us in our growth path. Since we are looking for inclusive growth for our one billion people, we need a comprehensive measure of our growth in terms of the National Prosperity Index.

### **National Prosperity Index**

While our economy is very much in the ascent phase and our GDP is growing at nearly 9% per annum, it is evident that economic growth is not fully reflected in the quality of life of a large number of people, particularly in rural areas and even in urban areas. Hence, we have evolved what is called a "National Prosperity Index (NPI)" which is a summation of (a) Annual growth rate of GDP; plus (b) improvement in quality of life of the people, particularly those living below the poverty line plus (c) the adoption of a value system derived from our civilizational heritage in every walk of life which is unique to India. That is  $NPI=a+b+c$ . Particularly, 'b' is a function of availability of housing, good water, nutrition, proper sanitation, quality education, quality healthcare and employment potential. 'c' is a function of promoting the joint

family system, creation of a spirit of working together, leading a righteous way of life, removing social inequities, and above all promoting a conflict free, harmonious society. This will be indicated by peace in families and communities, reduction in corruption index, reduction in court cases, elimination of violence against children and women and communal tensions. There should also be progressive reduction in the number of people living below the poverty line leading to its becoming near zero by 2020. All our efforts are directed towards improving the national economic performance guided by the measured National Prosperity Index of the nation at any point of time.

### **Conclusion**

The foreign policy and defense are important components of any nation. I am glad that you all lead the country in these fronts. Mathematical models have advanced quite a bit today and are handy tools in understanding many of the aspects of defence and foreign policy. We can even model precisely the Transactional parts between citizens, between armed forces and between nations. However, including the aspects such as the unity of minds and other qualitative attributes would be a grand challenge for the policy makers. The coexistence of the quantitative and the qualitative issues in policy making are common to India and Greece. I am sure Greece and India in conjunction with the European Union could collaborate in giving a scientific outlook to policy making.

Prosperity of nations is important for the prosperity of the world and to avoid conflicts and war. The centuries of learning from different civilizations like Indian and Greek should enable us to formulate ideas and systems to bring prosperity and reduce disparities. One of the main drivers would be human values bridged by spirituality of religions. We also need to find ways and means of rooting out the fundamental causes of extremism. We have to find solutions for depleting sources for energy, continuously degrading environment and the scarcity of water threatening the humanity. I believe that humanity as a whole has to work with focused national, regional and international missions which itself will be a major unifying factor and pave the way for peace and prosperity to the whole mankind.

Now, may I request the participants of this meet to offer suggestions which will benefit Greece and India in working towards the mission of promoting peace and prosperity in the world.

May God bless you.

**534. Speech by President Dr. APJ Abdul Kalam at the banquet hosted by the President of the Hellenic Republic Karolos Papoulias.**

**Athens, April 26, 2007.**

Your Excellency Mr. Karolos Papoulias,

President of the Hellenic Republic,

Madam May Panou-Papoulia,

Excellencies,

Distinguished Guests,

Ladies and Gentlemen,

I greatly appreciate your warm welcome and your kind words. I am happy to be in Greece, which has contributed so much to human civilisation. Greece is the crucible of democracy and India is the world's largest democracy. My visit has been a rewarding experience. The arrangements are excellent and the hospitality extended to me and my delegation most generous. The friendship and warm sentiments of the people of Greece have made our stay most memorable.

Our exchanges in ancient times began well before Alexander's invasion in 326 BCE. Pythagorus is reported to have travelled to India in the sixth century BC. Socrates (469-399 BCE) had occasion to meet an Indian philosopher in Athens and was greatly moved by the latter's Upanishadic observation that humans - the Relative, could be properly understood only in the light of an understanding of the Divine - the Absolute. In more recent times, in the 18th century, Demetrius Galanos of Athens embraced India as his second motherland and breathed his last in his beloved Varanasi, proving himself to be one of the earliest and ablest pioneers of Indology.

In modern times, both our countries have faced great challenges. We have secured freedom from colonial rule and fought against fascism in World War II. We share a deep commitment to democracy and have active civil societies. We both believe in the values of freedom, dignity and respect for the individual. We stand together to fight against terrorism for which we have zero tolerance. These shared values have helped us to understand each other's concerns and aspirations, paving the way for broad-based cooperation.

Greece is an important member of the European Union, with which our relationship has grown stronger over the years and with which we have a strategic partnership. This is another important element in our relations.

I realise, I am in the midst of historic Athens in the land of the "Iliad" and the "Odyssey" and that of Socrates, Homer and Plato. Greece is the country from where democracy radiated and dimensions of Republic were established. I have a message from my country of a billion democratic people, with multi religion, multi language and multi cultural. The message is: - Nations have to work together and graduate to bring peace and prosperity not only to their own country but also to nations around them. Then only peace will prevail in the world. The European Union is a great example. The dynamic performance of the European Union is indeed an important milestone in nations working together. For example, in our region, the South Asian Association for Regional Cooperation of eight countries is working very hard to bring economic prosperity and peace in the South Asian region.

Both India and Greece are committed to the UN Charter. We have worked together in UN forums on issues of common interest. We believe that there is a need to reform the UN structure to make it more democratic and transparent and more compatible with contemporary realities. We greatly appreciate Greece's principled and consistent support to India's candidature for a permanent seat on an expanded UN Security Council.

We appreciate Greece's efforts to bring about peace, stability and constructive cooperation in South Europe and the Balkan region, which has witnessed so much turbulence in recent years.

We are encouraged by the current momentum in our relations. Exchanges and cooperative ties are growing in a wide range of areas. We are working together to expand and deepen the political, economic and cultural content of our relationship. As a result of our joint efforts, our bilateral trade volume has grown to U.S. \$ 620 million. I would suggest that both our countries should work to increase bilateral trade to over U.S. \$1.25 billion by 2010.

We are strengthening the institutional framework for our cooperation through new agreements entered into or under negotiation on Science and Technology, double taxation avoidance, investment promotion and air transport. There exist concrete opportunities for cooperation in trade, investment, infrastructure development, shipping, tourism, S&T and Information Technology. The small but growing Indian community in Greece has been making

its contribution to the Greek economy. I am confident that our multi-dimensional relationship will continue to strengthen in the future.

Excellency, on behalf of my delegation and on my own personal behalf, I would like to take this opportunity to once again convey my sincerest gratitude for the warmth, friendship and hospitality extended to us.

Excellencies, Ladies and Gentlemen, may I request you to join me in a toast to: -

- U the personal good health and happiness of His Excellency, President Karolos Papoulias and Madam May Panou-Papoulia;
- U the well-being of our two friendly peoples; and
- U closer friendship and further strengthening of the multi-dimensional future-oriented and cooperative partnership between India and the Hellenic Republic.

## ITALY

### **535. Joint Statement issued on the occasion of the Visit of the President of the Council of Ministers of Italy, Prof. Romano Prodi.**

**New Delhi, February 15, 2007.**

Prime Minister of India, Dr. Manmohan Singh, and President of the Council of Ministers of Italy, Prof. Romano Prodi, today affirmed their commitment to work towards the establishment of a strategic partnership based on the close understanding and excellent political dialogue between the two countries, and enhanced cooperation on economy and trade, defense, culture, science & technology, higher education and research, space and the environment.

Both sides agreed to hold regular meetings between the respective Prime Ministers, to take place alternately, in India and Italy. They stressed the importance of the ongoing annual consultations at the level of Ministers of Foreign Affairs and regular consultations at the level of senior officials of the two Foreign Ministries.

Both sides emphasized the importance of increasing bilateral trade and investment flows in order to realize the significant potential that exists and reiterated their commitment to facilitate business exchanges so that bilateral trade could substantially increase in the next three years.

The economic events held in Delhi, Bangalore, Kolkata, Mumbai and Chennai during the visit have promoted interaction between business on both sides and opened up new opportunities for enhancing cooperation in the sectors of agri-business, textiles and clothing, leather, jewellery, woodwork and machine tools, automotive and auto-components, energy, fashion, design, cinema and infrastructure.

Both sides agreed on the need to enhance engagement between SMEs. Considering the success of the Italian industrial cluster model for growth of the manufacturing sector, they agreed to facilitate exchange of experiences and training on the Italian model.

The two sides noted that there were complementarities between the two countries to further develop cooperation in the area of design. Italian strengths in design and technology could be combined with India's manu-

facturing competencies and human resource skills for mutual benefit. A centre of Excellence in design education will be set up jointly by India and Italy at the National Institute of Design, Ahmedabad (India).

Recognising the benefits of closer cooperation in fostering the protection and promotion of intellectual property rights, the two leaders agreed that both sides would work together to cooperate in the areas of capacity building activities, human resource development and public awareness programme.

The services sector has the potential of further contributing to the strengthening of economic relations. They noted with satisfaction the positive developments in this regard and the setting up of innovative financial instruments by the Italian banking sector to facilitate direct investments and joint ventures.

The leaders were presented with the recommendations of the first meeting of the Indo-Italian CEOs Forum held in New Delhi on 15th February 2007. Both sides expressed the hope that the work of this Forum would help increase bilateral trade and investment linkages.

The two sides welcomed the establishment of the Joint Working Group on Infrastructure and looked forward to active cooperation in this sector. They also decided to strengthen cooperation in the field of Information Technology.

Food processing is another area of ongoing bilateral cooperation. The two sides are exploring the possibility of working together to establish a Joint Food Testing Laboratory at Kolkata; set up an Indo-Italian Joint Foundation for Food Processing and developing an Agro Food Park.

The two parties noted with appreciation the positive results of the bilateral executive programme on scientific and technological cooperation and the high level of cooperation attained by Universities, research centers and public and private institutions of the two countries and agreed to enhance it further. They noted with satisfaction the ongoing Indo-Italian cooperation at the Synchrotron in Trieste and the relevant results of the joint ITPAR (India-Trento Program for Advanced Research) Project in Microsystems, Material Science, Computer Science and Telecommunications. They further agreed to continue to support the activities of the ICGEB (International Centre for Genetic Engineering and Biotechnology).

Italy is an important partner for India in space research. The two sides agreed to further increase cooperation between ASI (Agenzia Spaziale

Italiana) and the ISRO (Indian Space Research Organisation) and welcomed the installation of the Thermo Vacuum Chamber at ISRO Satellite Centre in Bangalore and the forthcoming launch of the "Agile" Satellite by PSLV (Polar Satellite Launch Vehicle).

They agreed that the defense sector presents opportunities for increased cooperation.

Cultural cooperation has always been at the forefront of relations between the two countries. The two sides welcomed the signing of the Cultural Exchange Programme for 2007-2009, and agreed to enhance cooperation and exchanges, inter alia, in music, contemporary art, design, restoration and the preservation of historical heritage and cinema. They further agreed to strengthen their cooperation against illegal trafficking of cultural assets and to encourage academic exchanges between universities.

The two sides underlined the importance of fostering an increase of tourism to both countries, facilitating contacts and increasing direct air links. The two leaders reiterated their commitment to work jointly in addressing global challenges and noted the scope for increased bilateral cooperation in the field of environment and the protection of natural resources. They welcomed the bilateral MoU for cooperation in new and renewable energy technologies.

Both sides reiterated their commitment to a rules-based multi-lateral trading system and noted the importance of a positive and balanced outcome of the Doha Round of negotiations consistent with the mandate.

Both Heads of Government reaffirmed the vital importance of an effective multilateral system. They expressed their firm support for a reformed and more efficient United Nations and agreed to regular consultations on UN matters.

The two leaders re-affirmed their commitment to disarmament and non-proliferation objectives and supported renewed efforts of the international community to achieve them. Italy and India confirmed their willingness to work together in the relevant international fora to this end.

The two leaders stressed the importance of energy security. Italy recognized the rising demand for energy in India and the need for international cooperation in this domain. They agreed to continue to discuss the need to adopt forward-looking approaches to enhance international civil nuclear

cooperation under appropriate IAEA safeguards with India.

They welcomed the establishment of a bilateral Joint Working Group on combating international terrorism and transnational crime. Italy and India will continue to cooperate on the implementation of the UN Global Counter Terrorism Strategy, work towards an expeditious adoption of a comprehensive Convention on International Terrorism.

Both sides underlined the importance of cooperation on the United Nations activities for peace support and post conflict stabilization. In this context, they welcomed the establishment of the Peace-building Commission (PBC) at the UN and agreed to continue their cooperation in PBC's Organizational Committee of which both India and Italy are members.

Both sides welcomed the enhanced cooperation between India and Italy through the participation of Indian personnel in the training programmes of CoE SPU (the Carabinieri-run Centre of Excellence for Stability Police Units) in Vicenza, Italy, which has been mutually beneficial.

The two leaders agreed to work together in further strengthening the bilateral relationship, also in the context of the Strategic Partnership between India and the European Union. In this regard, they reaffirmed their strong commitment to the full implementation of the comprehensive and forward looking Joint Action Plan, aimed at creating further opportunities for closer political and economic cooperation. They looked forward to the early launch of negotiations for the broad based India-EU Trade and Investment Agreement.

The two leaders exchanged views on regional issues of mutual interest (including South Asia, Afghanistan, Iran, Middle East and Lebanon) and the forthcoming meeting of the G8 and partner countries.

Both sides expressed deep satisfaction with the outcome of the visit, which both sides agreed was successful and represented the beginning of a new phase in the growing partnership between India and Italy.

Invitations were extended to the Hon'ble President and Prime Minister of India to pay official visits to Italy. These were accepted with thanks. Dates will be settled through diplomatic channels.

**536. Memorandum of Understanding between the Government of the Republic of India and the Government of Italy for setting up a Joint Working Group on Combating International Terrorism and Transnational Crime.**

**New Delhi, February 15, 2007.**

**The Government of India** and the **Government of Italy** (hereinafter referred to as the "Parties");

**Bearing** in mind the close and friendly relations between the two countries;

**Mindful** of the dangers posed by the spread of terrorism and its harmful effects on peace, cooperation, and friendly relations between States which may also jeopardize the sovereignty and territorial integrity of States;

**Recognizing** the need to prevent, eliminate and unequivocally condemn all acts, methods and practices of terrorism and deplore the impact of terrorism on the life, property, socio-economic development and political stability of countries and on international peace and security;

**Realizing** that the goal of combating international terrorism, can be achieved by mutual cooperation in a spirit of reciprocity within the framework of their respective domestic laws and regulations;

**Recognizing** further the importance and the purpose of the UN Security Council Resolution 1373 (2001) on combating international terrorism;

**Have agreed** to establish a Joint Working Group on Combating International Terrorism and Trans-national Crime

**COMPOSITION**

- (i) The Ministry of External Affairs will be the nodal agency on the Indian side responsible for the implementation of this MoU
- (ii) The Ministry of Foreign Affairs will be the nodal agency on the Italian side responsible for the implementation of this MoU.
- (iii) The nodal agencies of the respective Parties will includes representatives from the Ministries and other relevant

agencies involved in counter terrorism activities as well as those dealing with prevention of drug trafficking and money laundering who will implement the purpose of the MoU.

#### MODALITIES

- (i) The Working Group shall meet at least once every year on mutually convenient dates. The Venue of the meetings shall alternately be in India and Italy; the first meeting will take place within 6 months from the day of the signature of the present MOU and define the objectives and scope of the Working Group.
- (ii) The Joint Working Group shall observe complete confidentiality in the conduct of its work.
- (iii) Any confidential information provided by one Party pursuant to this MoU shall not be passed on or disclosed to a third party without the express consent of the former Party.

This MoU shall come into force on the date of its signature and shall remain in force initially for a period of three years. Thereafter, the MoU shall be extended automatically for a similar period of three years at a time unless either Party gives to the other a written notice of its intention to terminate the MoU at least six months before the expiry of its duration.

**Signed** in New Delhi on 15th February 2007 in two originals in English language, both texts being equally authentic.

## NETHERLANDS

### **537. Speech of President Shrimati Pratibha Devisingh Patil at a banquet in honour of the Queen of the Netherlands.**

**New Delhi, October 24, 2007.**

Your Majesty Queen Beatrix,

Your Royal Highness Willem-Alexander, Crown Prince of Orange,

Princess Maxima,

Ladies and Gentleman,

On behalf of the Government and people of India, it gives me great pleasure to warmly welcome Your Majesty as well as the Crown Prince of Orange, Princess Maxima and your delegation to India.

We appreciate the special affinity and deep affection of the Dutch Royal Family for India. We recall Your Majesty's memorable visit to India twenty-one years ago in January 1986. That was an important milestone in our relations. We also remember the role played by His Royal Highness, Prince Claus in fostering greater engagement between our two countries.

Contacts between India and the Netherlands go back to several centuries and include the first voyage to the Indian Ocean by Cornelius Houtman in 1595 as well as by two Dutch ships reaching India in 1597. In the 17th century, Dutch scholars studied Sanskrit, Tamil and Telugu. There are still remnants of Dutch settlements in Gujarat, Tamil Nadu and West Bengal - where traces of Dutch influence in maps and manuscripts, ornaments and furniture and the famous Delft tiles have been found. Exchanges between historians, economists, sociologists, orientalists constitute a major element in cultural exchanges between our two countries. The Kern Institute in the prestigious University of Leiden and the world famous Tropical Institute are repositories of this interest. It is vital that such interest is nurtured as it fosters greater understanding and mutual goodwill. The cultural agreements concluded today will give impetus to cultural exchanges. I hope the planned Festival of India in the Netherlands in 2008 will give the Dutch people a glimpse of India's diverse cultural tradition.

I am happy that our bilateral relations have begun to recapture the vibrancy

of these historic contacts. Our bilateral trade has doubled in the past five years. The Netherlands is now among our top ten trading partners. There has been useful investment in India by Dutch companies spread across telecommunication, financial services, agro processing, chemicals and pharmaceutical sectors. The Netherlands, with its renowned expertise in water management, ports, agro-technologies and energy, has much to offer to India.

Recently, there has been a regular exchange of visits at the highest level. The visit of Prime Minister Jan Peter Balkenende to India in January 2006 and Prime Minister Dr. Manmohan Singh to your country in November 2004, during which the India-EU Strategic Partnership was launched, mark significant steps in further deepening and diversifying our relationship. Your visit represents a new high point in such contacts.

Your Majesty's visit to India comes at an interesting time. I do hope that what you see and experience this time will give you a glimpse of a new and dynamic India, the boundless energy and creativity of our people and their march towards prosperity. As one who has had a long-standing interest in the development of India and knowledge of our efforts, Your Majesty would be interested to see the advances in the knowledge economy and in the progressive development of our human resources.

India attaches importance to its relations with the Netherlands. We are also happy to note that in 2006, Prime Minister Balkenende's government declared India as a priority country in Dutch foreign policy. We have reason to be satisfied with the new momentum in our relations. We take particular note of the expansion in economic and commercial relations and the serious interest on both sides to forge cooperation in the fields of our respective expertise and competence.

India and the Netherlands share a common commitment to democratic governance, the rule of law, respect for human rights and religious freedom. Our two countries have enjoyed a tradition of tolerance and have fostered diversity in their social fabric. In India we have evolved a composite culture that celebrates the unity in our diversity. These shared values provide a strong foundation to our ties.

Your Majesty, we are confident that your visit will contribute to the further development of relations between our two countries and flourishing ties between our peoples.

Excellencies, Ladies and Gentlemen, may I request you to join me in a toast:

- U to the health of Her Majesty Queen of the Netherlands
- U to friendship and cooperation between India and the Netherlands.

## PORTUGAL

### **538. Speech of President A. P. J. Abdul Kalam at a banquet in honour of the Portuguese President Prof. Anibal Cavaco Silva.**

**New Delhi, January 11, 2007.**

Your Excellency, Prof. Anibal Cavaco Silva,

President of the Republic of Portugal,

Dr. Maria Cavaco Silva, Excellencies,

Distinguished Guests,

Ladies and Gentlemen,

It gives me great pleasure to extend a very warm welcome to you, Mr. President and your delegation to India. It is fifteen years since we last welcomed a Portuguese President. During that period there has been a steady growth in our bilateral relations which are today characterised by cooperation and mutual understanding. We welcome you also as a committed democrat who has played an important role in the development and emergence of contemporary Portugal.

Portuguese sailors were among the pioneers of transoceanic navigation discovering sea routes previously unknown to Europeans. They laid the foundation of hitherto unexplored trade routes linking Europe with other continents; that development marked a significant milestone in European outreach to the rest of the world; a precursor of the trend towards globalization witnessed in later centuries.

Indo-Portuguese contact of over four centuries has enriched our mutual cultural heritage in many ways. The relationship has matured in the three decades following the developments in 1974. Your visit will help add substantive content to our partnership and in this context we are particularly pleased to see that you are accompanied by a high level delegation comprising of senior ministers, officials and business leaders. There are concrete opportunities for increasing and diversifying our bilateral trade and investment links and for further strengthening our cooperation in science & technology. There is great vibrancy in the Indian economy which is on a

fast growth trajectory. IT, biotechnology, agribusiness & food processing, tourism, textiles, chemicals and pharmaceuticals are among the sectors that offer vast opportunities for fruitful cooperation and partnership. We should set a target of one billion dollars for our bilateral trade by the year 2010. The areas of Nano-science and Nano-Technology offer great potential for joint collaboration. We can also intensify our joint efforts in the areas of ocean research and knowledge products and systems.

Portugal is an active member of the European Union which is a Strategic Partner for India. Excellency, your personal contribution to the progress of modern Portugal and its active participation in the European integration process through your astute leadership is well known.

Our shared values and common aspirations for the future form the basis of our strategic partnership with the EU. We recall with appreciation Portugal's invaluable support in 2000 for the holding of the first India-European Union Summit. We note with satisfaction that this mechanism, which today plays such a valuable role in our relations with the EU was first introduced in Lisbon in 2000. We look forward to working closely with Portugal during its Presidency of the EU in the second half of 2007 to further strengthen the India-EU Strategic partnership. We are particularly pleased that for the next India-EU Summit to be held in India later this year, the EU delegation would be led by Portugal. It is also our hope that by that time negotiations on a broad-based India-EU Trade & Investment Agreement will be well on their way. The Summit would allow us, inter-alia, to take stock of the state of play with a view to ensuring early conclusion of those negotiations.

Excellency, over the last three decades, India and Portugal have also worked closely in multilateral fora, especially in the United Nations. Our two countries share a similar view on many important issues, which confront the world today. Amongst them is terrorism which constitutes one of the gravest threats to global peace and security and violates the most basic human right - the right to life. The scourge of terrorism transcends international boundaries and needs to be countered by nations acting in close cooperation. We look forward to strengthening our cooperation with Portugal and the EU in preventing and combating terrorism.

Excellency, India attaches great importance to its relations with Portugal. Our countries have been in contact with each other for over five centuries and we look forward to strengthening our close and mutually beneficial partnership with Portugal bilaterally as well as in the framework of the EU.

Let me once again welcome Your Excellency and Dr. Maria Cavaco Silva to India.

Excellencies, Ladies and Gentlemen, may I request you to join me in a toast to :-

- U the good health of His Excellency President Cavaco Silva and Dr. Maria Cavaco Silva
- U the well-being of the Portuguese people, and;
- U the everlasting friendship between India and Portugal.

### **539. Agreement on Extradition between the Republic of India and the Portuguese Republic.**

**New Delhi, January 11, 2007.**

**The Republic of India and the Portuguese Republic** hereinafter referred to as Contracting States;

**Desiring** to improve the co-operation of the two countries in the prevention and suppression of crime, by making provisions for the reciprocal extradition of offenders;

**Have** agreed as follows:

#### **Article 1 Obligation to Extradite**

The Contracting States agree to extradite to each other, subject to their laws and to the conditions specified in this Agreement, any accused person wanted for prosecution or any convicted person wanted for the imposition or enforcement of a sentence for an extraditable offence, found in the territory of the other State.

#### **Article 2 Extraditable Offences**

1. Extradition shall be granted in respect of offences that are punishable under the laws of both Contracting States by imprisonment or other measure of deprivation of liberty for a maximum period of at least

one year. Where the request for extradition relates to a person convicted of such an offence who is wanted for the enforcement of a sentence of imprisonment or other measure of deprivation of liberty, extradition shall be granted only if a period of at least six months imprisonment or other measure of deprivation of liberty remains to be served.

For the purposes of this Article, in determining whether an offence is an offence against the law of both Contracting States:

- a) It shall not matter whether the laws of the Contracting States place the acts or omissions constituting the offence within the same Category of offence or denominate the offence by the same terminology;
  - b) The totality of the acts or omissions alleged against the person whose extradition is requested shall be taken into account and it shall not matter whether, under the laws of the Contracting States, the constituent elements of the offence differ.
3. Where the offence for which extradition is requested has been committed outside the territory of the requesting State, extradition shall be granted subject to the provisions of this Agreement:
- a) If the person whose extradition is requested is a national of the requesting State; or
  - b) If the law of the requested State provides for the punishment of an offence committed outside its territory in similar circumstances.
4. Extradition shall be granted in accordance with the provisions of this Agreement for offences of a fiscal character including duties, taxation, customs and exchange.
5. If the request for extradition includes several separate offences, which are punishable under the laws of both Contracting States, but some of which do not fulfil the other conditions set out in paragraph 1 of this Article, the requested State may grant extradition for the latter offences provided that the person is to be extradited for at least one extraditable offence.

**Article 3**  
**Nationals**

1. The requested State shall have the right to refuse to extradite its nationals.
2. Where the requested State refuses to extradite a person on the ground that the person is a national of the requested State, it shall, if the requesting State so requests and the laws of the requested State allow, submit the case to the competent authorities in order that proceedings for the prosecution of the person in respect of all or any of the offences for which extradition has been requested, may be taken.

**Article 4**  
**Grounds for Refusal to Extradite**

1. Extradition shall not be granted if:
  - a) The requested State considers that the execution of the request is contrary to its Constitutional principles and domestic laws;
  - b) There are substantial grounds for believing that a request for extradition for an ordinary criminal offence has been made for the purposes of prosecuting or punishing a person on discriminatory grounds contrary to the international and internal laws in force in each Contracting State.
  - c) The offence for which extradition is requested is an offence of a political nature. For the purposes of this Agreement, the following offences shall not be considered as political offences:
    - (i) Genocide, crimes against humanity, war crimes and serious offences under the 1949 Geneva Conventions;
    - (ii) Offences that ought not to be regarded as political under the international treaties, conventions or Agreements to which each Contracting State is a party;
    - (iii) Murder, culpable homicide;
    - (iv) Voluntarily causing hurt or grievous hurt by a dangerous weapon or means;
    - (v) Possession of a fire-arm or ammunition with intention to endanger life;

- (vi) The use of a fire-arm with intention to resist or prevent the arrest or detention;
  - (vii) Causing of loss or damage to property used for public utilities or otherwise with intention to endanger life;
  - (viii) Wrongful restraint and wrongful confinement;
  - (ix) Kidnapping and abduction including taking of hostages;
  - (x) Offences related to terrorism and terrorist acts; and
  - (xi) Abetting, conspiring or attempting to commit, inciting, participating as an accomplice in the commission of any of the above offences.
- d) The offence for which extradition is requested is an offence under military law, which is not an offence under the ordinary criminal law of the Contracting States;
- e) Final judgement has been rendered in the requested State or in a third State in respect of the offence for which the extradition is requested; and
- i) The judgement resulted in the person's acquittal;
  - ii) The term of imprisonment to which the person was sentenced has been completely enforced, or is wholly or, with respect to the part not enforced, a pardon or an amnesty has been granted; or
  - iii) The court convicted the person without imposing a penalty;
- f) The person whose extradition is requested has been granted amnesty in respect of the offence for which extradition is requested, or has, according to the law of either Contracting State, become immune from prosecution or punishment by reason of lapse of time, or for any other reason;
- g) The extradition sought might lead to a trial by a court of exceptional jurisdiction or that has been specially established for the purpose of trying that person's case or where it concerns the enforcement of a sentence passed by such a court. For the purposes of this Agreement, the expression "court of exceptional jurisdiction" shall not be

interpreted as referring to a special court which is set up by the regular procedure established by the internal law of each Contracting State.

2. The requested State shall have the right to refuse extradition if:
  - a) The competent authorities of the requested State have decided to refrain from prosecuting the person whose extradition is requested for the offence in respect of which extradition is requested;
  - b) The offence for which extradition is requested is regarded under the law of the requested State as having been committed in whole or in part within that State. However, extradition may be granted in accordance with this treaty notwithstanding that the conduct of the person sought occurred wholly or partly in the requested State, if under the laws of that State, his conduct and its effects, or its intended effects, taken as a whole, would be regarded as constituting the commission of an extraditable offence in the territory of the requesting State;
  - c) A prosecution in respect of the offence for which extradition is requested is pending in the requested State against the person whose extradition is requested;
  - d) The person sought has been convicted in that person's absence of the offence for which extradition is requested, unless the requesting State provides an assurance, which is considered by the requested State to be sufficient, that the person sought shall, upon surrender, have a right to appeal against the conviction or to seek re-trial;
  - e) The requested State, while also taking into account the nature of the offence and the interests of the requesting State, considers that, in the circumstances of the case, the extradition of that person would be incompatible with humanitarian considerations in view of age, health or other reasons of a personal nature to be analysed by the requested State on a case to case basis. If, however the extradition is refused under this clause, the accused shall be prosecuted by the requested State in accordance with its domestic laws.

#### **Article 5 Rule of Specialty**

1. Subject to paragraph 3 of this Article, a person extradited under this

Agreement shall not be detained or tried, or be subjected to any other restriction of personal liberty, in the requesting State for any offence committed before the extradition other than:

- a) An offence for which extradition was granted; or
  - b) Any other extraditable offence in respect of which the requested State consents.
2. A request for the consent of the requested State under this Article shall be accompanied by the documents mentioned in paragraph 4 of Article 8.
  3. Paragraph 1 of this Article does not apply if the person has had an opportunity to leave the requesting State and has not done so within 45 days of final discharge in respect of the offence for which that person was extradited or if the person has returned to the requesting State after leaving it.
  4. If the description of the offence charged in the requesting State is altered in the course of proceedings, the person extradited shall be proceeded against or sentenced only in so far as the offence under its new description is an offence for which extradition could be granted pursuant to this Agreement.

#### **Article 6** **Re-extradition to a Third State**

1. Where a person has been surrendered to the requesting State by the requested State, the requesting State shall not extradite that person to any third State for an offence committed before that person's surrender unless:
  - a) The requested State consents to that re-extradition; or
  - b) The person has had an opportunity to leave the requesting State and has not done so within 45 days of final discharge in respect of the offence for which that person was surrendered by the requested State or has returned to the requesting State after leaving it.
2. In relation to any consent pursuant to subparagraph 1(a), of this Article the requesting State may request the production of the documents mentioned in Article 8, as well as any declaration made by the extradited person in respect of the re-extradition.

**Article 7**  
**Concurrent Requests**

If extradition is requested concurrently by a Contracting State and by one or more other States, whether for the same or for different acts or omissions, the requested State shall determine to which of those States the person is to be extradited having regard to the circumstances and, in particular, the existence of other treaties or Agreements binding on the requested State, the relative gravity of the offences and where they were committed, the respective dates of the requests, the nationality of the person and the possibility of subsequent re-extradition.

**Article 8**  
**Extradition Procedure**

1. A request for extradition shall be made in writing and shall be communicated through the diplomatic channels.
2. All documents submitted in support of a request for extradition shall be authenticated.
3. A document is authenticated for the purposes of this Agreement if:
  - a) It purports to be signed or certified by a judge, magistrate or other competent officer in or of the requesting State; and
  - b) It purports to be sealed with an official or public seal of the concerned Ministry or the competent authority of the requesting State.
4. A request of extradition shall be accompanied by:
  - a) If the person is accused of an offence - the original and two certified copies of the warrant for the arrest of the person, a statement of each offence for which extradition is requested and a statement of the acts or omissions which are alleged against the person in respect of each offence, and such documents/information as, according to the law of the requested State, would justify his committal for trial if the offence had been committed in the territory of the requested State;
  - b) If a person has been convicted in that person's absence of an offence - a judicial or other document or a copy thereof, authorising the apprehension of the person, a statement of each

offence for which extradition is requested, a statement of the acts or omissions which are alleged against the person in respect of each offence and a statement of the relevant law that ensures the right to appeal against the decision or to seek retrial;

- c) If the person has been convicted of an offence otherwise than in that person's absence - documents evidencing the conviction and the sentence imposed, the fact that the sentence is immediately enforceable, and the extent to which the sentence has not been carried out;
- d) If the person has been convicted of an offence otherwise than in that person's absence but no sentence has been imposed - documents evidencing the conviction and a statement affirming that it is intended to impose a sentence;
- e) In all cases - a statement of the relevant law creating the offence, including any provision relating to the limitation of proceedings and a statement of the penalty that can be imposed for the offence;
- f) In all cases - a description which is as accurate as possible of the person sought together with any other information which may help to establish the person's identity and nationality; and
- g) If applicable - a statement indicating reasons, which have prevented the person from becoming immune from prosecution or sentence by reason of lapse of time in relation to the offence for which extradition is requested, according to the law of the requesting State;
- h) In the case of an offence committed in a third State, statement demonstrating that the third State does not claim the person sought for that offence;
- i) In cases of conviction *in absentia* information that the person sought may appeal against the conviction or seek re-trial;
- j) An assurance that the person sought will be afforded the protection provided for by articles 5 and 6 of this Agreement.

**Article 9**  
**Supplementary Information**

1. If the requested State considers that the information furnished in support of the request for the extradition of a person is not sufficient, in accordance with this Agreement, that State may request that additional information be furnished within such time as it specifies.
2. If a person who is under arrest in relation to extradition is released from custody as a consequence of the failure of the requesting State to provide additional information requested pursuant to paragraph 1 of this article, the requested State shall notify the requesting State as soon as practicable.

**Article 10**  
**Provisional Arrest**

1. In case of urgency a Contracting State may apply, by means of the facilities of the International Criminal Police Organisation (INTERPOL), or otherwise, for the provisional arrest of the person sought, pending the presentation of the request for extradition.
2. The application may be transmitted by post or telegraph, or by any other means affording a record in writing.
3. The requests for provisional arrest shall indicate the existence of either a detention order or a sentence against the person claimed, describe briefly the facts that amount to an offence, state when and where such offence was committed, the legal provisions that are applicable, as well as the available data concerning the identity, the nationality and the whereabouts of that person.
4. On receipt of an application for provisional arrest the requested State shall take the necessary steps to secure the arrest of the person sought and the requesting State shall be promptly notified of the result of its application,
5. Provisional arrest shall be terminated if the request for extradition is not received within 18 days of the arrest; it may however be prolonged for up to 40 days of the arrest if the reasons given by the requesting State.

6. The provisions of paragraph 5 above shall not prejudice re-arrest and extradition if a request is received subsequently.

#### **Article 11 Surrender**

1. The requested State shall, as soon as a decision on the request for extradition has been made, communicate that decision to the requesting State. Reasons shall be given for refusal, in whole or in part, of a request.
2. Where extradition is granted, the person shall be removed from the requested State from a point of departure in that State convenient to the Contracting States.
3. The requesting State shall remove the person from the requested State within such reasonable period as the requested State specifies and, if the person is not removed within that period, the person may be released and the requested State may refuse to extradite the person for the same offence.
4. If circumstances beyond its control prevent a Contracting State from surrendering or removing the person to be extradited it shall notify the other Contracting State. The two Contracting States shall mutually decide upon a new date of surrender, and the provisions of paragraph 3 of this article shall apply.

#### **Article 12 Postponement and Temporary Surrender**

1. The requested State may postpone the surrender of a person in order to proceed against the person, or so that the person may serve a sentence, for an offence other than an offence constituted by an act or omission for which extradition is requested. In such cases the requested State shall advise the requesting State accordingly.
2. To the extent permitted by its law, the requested State may temporarily surrender the person sought to the requesting State in accordance with conditions to be determined by mutual Agreement between the Contracting States.

#### **Article 13 Surrender of Property**

1. To the extent permitted under the law of the requested State and

subject to the rights of third parties, which shall be duly respected, all property found in the requested State that has been acquired as a result of the offence or that may be required as evidence shall, if the requesting State so requests, be surrendered if extradition is granted.

2. The said property may, if the requesting State so requests, be surrendered to the requesting State even if the extradition agreed to cannot be carried out.
3. When the said property is liable to seizure or confiscation in the requested State, the latter may, in connection with pending criminal proceedings, temporarily retain it or hand it over on condition that it is returned.
4. Where the law of the requested State or the protection of the rights of third parties so require, any property so surrendered shall be returned to the requested State free of charge after the completion of the proceedings, if that State so requests.

#### **Article 14 Transit**

1. Where a person is to be extradited to a Contracting State from a third State through the territory of the other Contracting State, the Contracting State to which the person is to be extradited shall request the other Contracting State to permit the transit of that person through its territory.
2. Upon receipt of such a request the requested Contracting State shall grant the request unless it is satisfied that there are reasonable grounds for refusing to do so, provided that in any case the transit of a person may be refused on any ground on which the extradition of that person might be refused under this Agreement.
3. Permission for the transit of a person shall, subject to the law of the requested Contracting State, include permission for the person to be held in custody during transit. ,
4. Where a person is being held in custody pursuant to paragraph 3 of this Article, the Contracting State in whose territory the person is being held may direct that the person be released if that person's transportation is not continued within a reasonable time.

5. The Contracting State to which the person is being extradited shall reimburse the other Contracting State for any expense incurred by that other Contracting State in connection with the transit.

**Article 15  
Expenses**

1. The requested State shall make all necessary arrangements for and meet the cost of any proceedings arising out of a request for extradition.
2. The requested State shall bear the expenses incurred in its territory in the arrest and detention of the person whose extradition is requested until the person is surrendered to a person nominated by the requesting State.
3. The requesting State shall bear the expenses incurred in conveying the person from the territory of the requested State.

**Article 16  
Language**

A Contracting State which sends to the other Contracting State a document, in accordance with this Agreement, that is not in the language of the other Contracting State shall provide a translation of the document into the language of the other Contracting State.

**Article 17  
International Obligations**

The present Agreement shall not affect the rights and obligations of the Contracting States arising from international conventions to which they are parties.

**Article 18  
Entry into Force and Termination**

1. This Agreement shall enter into force thirty days from the date of the last communication through diplomatic channels between the Contracting States indicating the fulfillment of the respective internal legal or constitutional requirements for its entry into force.
2. Either Contracting State may terminate this Agreement by giving notice in writing and at any time to the other through diplomatic channels, and if such notice is given the Agreement shall cease to have effect six months after the receipt of the notice.

3. The provisions of this Agreement shall be applicable to the extradition requests presented after its entry into force, irrespective of the date on which the facts occurred.

**In witness where of** the undersigned, being duly authorised thereto by their respective Governments, have signed this Agreement.

**Done** at New Delhi, on the Eleventh day of January of the year 2007 (two thousand and seven), in Hindi, Portuguese and English, all texts being equally authentic. However, in case of divergence, the English text shall prevail.

**540. Press Release issued by the Ministry of External Affairs  
on the visit of Minister of State Anand Sharma to Portugal.**

**New Delhi, June 12, 2007.**

Minister of State for External Affairs Shri Anand Sharma arrived in Lisbon on a 2-day official visit from 10-12th June, 2007. Minister Sharma called on the Portuguese President Prof. Anibal Cavaco Silva at Belem Palace. He thanked the President for Portuguese support for co-sponsoring the Resolution to declare 2nd October as the International Day of Non-Violence by the UN. Besides bilateral relations matters relating to economic cooperation in the energy sector with emphasis on renewable energy were also discussed. Portugal's role in reinforcing India-EU relations during the Portuguese Presidency of EU was also discussed. This visit assumes greater importance in view of the fact that Portugal will take over the Presidency of the EU on the 1st of July, 2007 and during their Presidency the 8th India-EU Summit will take place in India.

Minister Sharma also met with Portuguese Foreign Minister Dr. Luis Amado and Portuguese Secretary of State for Foreign Affairs and Cooperation Prof. Joao Cravinho and had wide ranging discussions on issues of mutual interest including the forthcoming India-EU Summit which is to be held in New Delhi on 30th November, 2007.

Minister Sharma also delivered a public lecture at the prestigious Orient Foundation in Lisbon on 'India in the 21st Century'.

**541. Joint Press Interaction by the Prime Minister Dr. Manmohan Singh and Portuguese Prime Minister Mr. Jose Socrates.**

**New Delhi, December 1, 2007.**

**Prime Minister Dr. Manmohan Singh:** Your Excellency Prime Minister Socrates; Members of the Portuguese and Indian Delegations; Ladies and Gentlemen of the Press:

Prime Minister Socrates and I have just concluded very fruitful talks today. Our bilateral Summit meeting carried forward the momentum generated by the successful visit of the President Portugal to India in January 2007.

It was during Portugal's Presidency of the European Union in the year 2000 that the Portuguese leadership proposed a summit-level meeting between India and the European Union. The Eighth India-EU Summit held yesterday under the Portuguese Presidency thus has an added significance for India-Portugal bilateral relations.

Prime Minister Socrates and I have agreed that we should rethink our historical links and build a strong and contemporary relationship that reflects the vast goodwill that our people have for each other and the immense potential that exists for promoting bilateral collaboration.

We shared the view that the present level of bilateral trade at US \$397 million is far below our potential. We agreed to make full use of the opportunities that are emerging from the rapid growth of India and the expansion of the European Union to actively enhance trade and investment including by encouraging greater business-to-business interaction.

Indian and Portuguese majors in the information technology and pharmaceuticals sectors have recently entered each other's markets. We agreed to encourage more such investments.

We also discussed avenues for trilateral cooperation especially with the Community of Portuguese speaking countries. We are already cooperating in the field of hydrocarbons in Angola. We also identified cooperation in renewable energy as a priority.

Science and technology is yet another promising area in which we can pool our resources. There has been exchange of scientists and we would like to

build upon this. We have identified high technology areas such as information technology, biotechnology, bio-informatics and nanotechnology as focus areas for joint collaboration. For this we shall re-energize the existing inter-governmental mechanisms.

Parliamentary exchanges between the two countries are an intrinsic element of our mutual desire to broad-base our relations. Our respective Parliaments have constituted Friendship Groups, and we both agreed that this initiative deserved our full support.

We have also agreed to promote greater bilateral exchanges in the fields of sports, culture and tourism. We welcomed the signing of the Memorandum of Understanding between the All India Football Federation and the Portuguese Professional Football League. I am sure all football lovers in India will welcome this. There is also immense scope for working together in the area of restoration and conservation of our cultural heritage.

Portugal has the third largest Indian origin community in Europe. I conveyed to Prime Minister Socrates our admiration for Portugal's tolerant and open society. The richness of Portuguese culture in Goa, Daman and Diu is well-known to every Indian, and we celebrate this legacy.

We also exchanged views on regional and international issues. We are grateful to Portugal for its most friendly understanding and support to India's candidature for permanent membership of an expanded UN Security Council. I also derive great satisfaction from what Prime Minister Socrates has told me of Portugal's support for India's civil nuclear cooperation in the Nuclear Suppliers Group.

Based on our talks today I can say that we have a warm, trusted and reliable friend in Portugal, and especially in Prime Minister Socrates. India looks forward to taking this important relationship forward in all areas.

Thank you.

**Prime Minister of Portugal:** Mr. Prime Minister, on behalf of my delegation and on my personal behalf I wish to thank you for your kind words and for the very warm welcome extended to us. I wish to add that it is an extreme honour to be here as Prime Minister of Portugal and at the same time as the President of the European Council. I will take from this moment one souvenir, a very good memory, a memory of the spirit of cooperation between Portugal and India that started seven years ago under the first Portuguese Presidency that gave rise to the first EU-India Summit in 2000.

This Summit between Portugal and India is a summit of mutual rediscovery with the awareness that we have to recover, we have to make up for lost time, and we have to live up to our duties as two people with a common history.

The visit of the Portuguese President to India in January, 2007 represents a real watershed, a real turning point. It had a very favourable impact on Portuguese people and business people. They became aware that they had a lot to do to strengthen our cultural, social and economic ties. It is, therefore, with great satisfaction that I emphasise that during these last months we have signed several memorandums of understanding and several protocols regarding different sectors. For instance, there are cooperation agreements between our respective Chambers of Commerce, between Indian Universities and the Institute of Camoes to foster the Portuguese language. There are several memorandums of understanding between other institutions such as the Institute for the Cultural Heritage. There are Protocols and all these Protocols and Memorandums of Understanding are a clear sign of a clear political will to strengthen our ties. Our ambition has to be commensurate with our responsibilities, people who share historical ties.

But the most ambitious goals are obviously set for the commercial relations. Globalisation offers us major opportunities. We already have very dynamic commercial relationships. But we should like to emphasise ties in the tapping of unexplored opportunities in the sectors of tourism, IT, oil and gas, renewable energy. Therefore, it is with great pleasure that I mentioned that these are fundamental sectors to strengthen our ties and the ties between our business communities. It is, therefore, with satisfaction that I see that business circles in both countries are very aware of the fact that Portugal may become a gateway for India, not only in Europe but also in South America and in Africa. The recent agreement between the Gulf and ONGC is an example of these fruitful and constructive relationships.

It is, therefore, with great pleasure that I see the attention given by Portuguese businesses to India, to the Indian market. They are very willing to invest in India as it was seen in the EU-India Business Summit held recently here. Conversely, I see that Indian businesses are also willing to invest in Portugal. They see many opportunities there. So, these are all expressions of the wish of our people to rediscover themselves to this mutual rediscovery and to the strengthening of our ties.

I have had the opportunity to tell the Prime Minister and to the Indian authorities that Portugal supports India in the Nuclear Suppliers Group. The

Portuguese' position is due to the fact that Portugal thinks it is high time the international community acknowledged that India has given enough guarantees of the prudent use of the nuclear energy for civil purposes.

We have also had the opportunity to tell the Prime Minister that Portugal supports India's membership to the UN Security Council. Portugal supports India, Brazil, Germany and Japan. We think that the world has changed greatly in the last fifty years and the Security Council should reflect those changes.

I also wish to thank the Prime Minister for his kind words about the Indian community residing in Portugal. But I also wish to tell them that it is a very well integrated community, hard workers, their children study, and, therefore, it is a community that contributes greatly to the development of our country.

Mr. Prime Minister, we are very proud of the presence of the Indian community in Portugal. But we are even prouder when we hear the Indian Prime Minister talk about the Portuguese presence in India because we take pride in our history and we wish to keep on honouring this history.

India is a country of outreach. All short sentences are bad. All short sentences, judgments about India are bad." I have just quoted the Indian Prime Minister. I wish to add that it is the firm wish of all Portuguese here to fully understand India. Of course, that requires much more time and much more effort. But we are firmly determined to better know India and to take the opportunities offered to us by this globalized world. We should always build on our historic ties. We always do that.

**Question (IANS):** This question is addressed to Portuguese President. Now that Portugal is absolutely convinced and they are supporting India in the Nuclear Suppliers Group, will you use your clout to convince other skeptical members of the European Union to support India? What you spoke about the process of mutual rediscovery between India and Portugal, what about encouraging more people-to-people contacts between the countries?

**Portuguese Prime Minister:** The short answer to your question is, yes. We will do our utmost to convince other countries of our position. We do it not simply to please India but because we are convinced that India has given enough evidence of a very prudent and wise use of nuclear energy according to international rules. As far as the second part of your question about Portuguese and Indian ties, well we would like to foster them at all levels not only at business level but also we would like to strengthen our

cultural ties. I would like to convince more Indians to come to Portugal. Portugal, of course, is a smaller country than India; is not so diverse but it has a long history that places it very well to become a global negotiator now because it has ties with Europe but it also has ties with Latin America, with Africa and with Asia.

**Question (Portuguese media):** I would like to know if you have any idea about the business volume that will be generated by the agreement between the Gulf and ONGC. Do you not find it somewhat ironical that Portugal now comes to India to look for investment in the energy sector in one of its former colonies?

**Portuguese Prime Minister:** Now, let us begin with your second question. I do not see anything ironic in that. On the contrary, I think that pays tribute to our common history. I think Portugal should privilege those peoples it has historical ties with. That is the way to pay tribute to our history, to live up to it. Our history has to do with the East and with Africa. They present new opportunities not only to Portugal but to Africa and to India. To draw them closer is paying a tribute to our common history. As far as business relations and business flows are concerned, the cooperation between the Gulf and ONGC is to develop research activities and other activities in Angola. For the time being it is a joint venture to explore, to carry out some activities in Angola. Once again that is living up to our common history.

Thank you.

## **RUSSIA**

### **542. Joint Statement on the outcome of the official visit of Russian President Vladimir V. Putin.**

**New Delhi, January 25, 2007.**

The President of the Russian Federation, H.E. Mr. Vladimir V. Putin, paid an official visit to the Republic of India on January 25-26, 2007 at the invitation of the Prime Minister of the Republic of India Dr. Manmohan Singh. President Vladimir Putin is the first Russian Head of State who is participating as the Chief Guest at the celebrations on the occasion of the Republic Day. Besides a high level official delegation, President Putin was accompanied by a group of top Russian businessmen and industrialists representing diverse areas.

2. During his stay in New Delhi, President Vladimir Putin met the President of India, Dr. A.P.J. Abdul Kalam and the Prime Minister of India, Dr. Manmohan Singh. The Chairperson of the United Progressive Alliance, Mrs. Sonia Gandhi called on President Vladimir Putin. President Vladimir Putin also participated in a business meeting attended by high level representatives from the trade and industrial circles of India and Russia.
3. The Prime Minister of India and the President of the Russian Federation recalled with satisfaction their meeting in July 2006 on the sidelines of the G-8 Summit in St. Petersburg where the Russian Presidency had invited India as an outreach country. The two leaders discussed a broad range of issues relating to bilateral cooperation and exchanged views on important regional and international issues of mutual interest and concern. The talks were held in the traditionally warm and cordial atmosphere that is characteristic of the longstanding India-Russia friendship. They noted with particular interest that this visit took place in the year when the two sides were actively preparing to jointly commemorate the 60th anniversary (on April 13, 2007) of the establishment of diplomatic relations between India and the Russian Federation. They expressed satisfaction that, despite many momentous developments affecting global geopolitical situation over the last several decades, India and Russia have consistently remained close and friendly partners, with a continued commitment at the highest political level to further consolidate their ties. The

following documents were signed at the conclusion of the talks between the Prime Minister of India and the President of the Russian Federation:

- U Programme of Cultural Exchanges between the Government of the Republic of India and the Government of the Russian Federation for the Years 2007-2009;
- U Protocol between the Government of the Republic of India and the Government of the Russian Federation on holding "Year of Russia in India" in the year 2008 and "Year of India in Russia" in the Year 2009;
- U Agreement between the Government of the Republic of India and the Government of the Russian Federation on the access of the Indian Party to navigation signals of the Russian Global Navigation Satellite System GLONASS for peaceful purposes;
- U Agreement between the Government of the Republic of India and the Government of the Russian Federation on access of the Indian Party to a part of the Russian Global Navigation Satellite System GLONASS radio frequency spectrum;
- U Agreement between the Indian Space Research Organization and the Federal Space Agency on cooperation in the joint satellite project 'YOUTHSAT';
- U Memorandum of Intent between the Department of Atomic Energy, the Government of the Republic of India and Federal Atomic Energy Agency, the Russian Federation on development of cooperation in the construction of additional nuclear power plant units at Kudankulam site as well as in the construction of Russian design nuclear power plants at new sites in the Republic of India;

Also the following were adopted:

- U Joint Statement by the Prime Minister of the Republic of India and the President of the Russian Federation on cooperation in the field of peaceful uses of atomic energy<sup>1</sup>;

---

1. This signing of the MOU may be seen in the background of the statement of President Putin to the Press Trust of India in an interview held in Moscow before his departure for India. He said: "We stand ready to support our Indian friends. We intend to help India directly in the construction of atomic energy facilities for peaceful use. On top of that some of our companies are very much interested in acquiring large contracts for

- U Plan of major events to commemorate the 60th Anniversary of the establishment of diplomatic relations between the Republic of India and the Russian Federation (April 13, 2007).
4. The Sides stress that durable, friendly and mutually beneficial relations between the two countries are based on deep mutual confidence and understanding. The strategic partnership between India and Russia has served not only the long-term national interests of both countries but has also effectively contributed to stability and security in Asia and the world in general. The two countries hold identical or similar views on most international issues. The Prime Minister of India and the President of the Russian Federation highly value the successful practice of holding annual summits that have played a key role in consistently adding greater strategic content to the wide-ranging cooperation between the two countries. These Summits encourage intensive contacts between India and Russia at all levels with a view to further intensifying bilateral cooperation.
  5. During the talks, the two Sides reviewed the implementation of the decisions taken during the India-Russia Summit in December 2005. While expressing satisfaction at the ongoing multifaceted cooperation, the Sides support its further development, particularly in priority spheres such as high technologies, telecommunications, outer space, metallurgy, energy, nuclear power and military and technical cooperation.
  6. The Sides reaffirm their intention to intensify efforts to further develop and diversify their trade and economic cooperation. Noting that the Indian-Russian Inter-Governmental Commission on Trade, Economic, Scientific, Technological and Cultural Cooperation provides an important mechanism for the development of trade and economic ties, the Sides stress the need to pay particular attention to the further promotion of bilateral trade and investment, including in energy, technology and knowledge-intensive economic sectors.
  7. The Sides express satisfaction over the signing in February 2006 of the India-Russia Protocol on completion of negotiations on Russia's accession to the WTO. Particular importance is attached to the setting

---

construction of new facilities." In a clear statement that Russia would pursue India's case with the Nuclear Suppliers Group for ensuring fuel supplies, he said: "On various occasions we provided India with nuclear fuel. And we will help India settle problems in international affairs with the proviso that Russia will abide by international obligations."

up of a Joint Study Group (JSG) in 2006 to work out practical recommendations aimed at effectively tapping the opportunities available in both countries to substantially raise their bilateral trade and economic cooperation. As an immediate step, the Sides support early finalization of a result-oriented programme of action by the JSG to increase their bilateral trade to US \$ 10 billion by 2010.

8. The Sides advocate every possible effort to expand mutually beneficial contacts between the business communities of the two countries. They welcome the initiatives taken in this direction by the industrial and business associations of India and Russia, aimed at strengthening the important role played by the Joint Business Council. The Sides also agree to take steps to remove the existing barriers impeding the promotion of bilateral trade.
9. The Sides appreciate the establishment of the Indo-Russian Forum for Trade and Investment, co-chaired by the Minister of Commerce and Industry of India and the Minister of Economic Development and Trade of the Russian Federation. They are optimistic that its first meeting in India in February 2007 at which a large number of top businessmen from both sides are preparing to participate will yield positive results.
10. Noting the vital role played by energy in economic growth, the Sides attach particular importance to energy security issues. They endorse the concept of 'energy security' envisaging an acceptable balance between security of demand and security of supply. In view of their corresponding resources, needs, capabilities and potential, the Sides agree to further enhance direct dialogue<sup>2</sup> between their oil and gas companies aimed at concluding concrete and mutually beneficial commercial agreements for joint work in all segments of oil and gas cooperation in India, Russia and third countries. The arrival of the

---

2 On the eve of the visit there was speculation that during the visit India would demand a stake in Sakhalin - III. The Minister for Oil and Natural Gas Murli Deora told journalists on January 25 that while he could "not spell out the percentage of the stake that would be demanded as the matter is still in the negotiating stage, but we want to extend our partnership in this venture further." (Indian Company ONGC Videsh has a 20 percent stake in the Sakhalin - I project that would give India 2.4 million tones of oil every year.) Since the joint statement was silent on the specific issue, the next day President Putin was asked by *the Hindu* on the omission. President Putin clarified that "With regard to Sakhalin III, you need to work directly with our companies...And the Indian partners know whom they need to deal with and in what manner. On behalf of the (Russian) Government we will provide all the necessary administrative support."

first shipment of oil to India from Sakhalin-I in early December 2006 as well as the signing on January 25, 2007 of an MoU between ONGC and Rosneft oil company setting up two joint Working Groups - one each for upstream and downstream activities - demonstrate the viability of future India-Russia cooperation in the entire hydrocarbon value chain. The Sides also expressed satisfaction at the progress in the ongoing construction of two nuclear power plants in Kudankulam (India) with Russian participation<sup>3</sup>.

11. The Sides note with satisfaction that the progressive expansion of their traditionally important cooperation in the field of peaceful uses of outer space is based on deep mutual trust and high capabilities of the two countries in this sphere. In this context, they particularly welcome the signing of additional bilateral agreements during the present visit to jointly implement wide-ranging cooperation in the Russian Global Navigation Satellite System GLONASS. They also express satisfaction at the signing of a bilateral document to jointly develop and launch a Youth Satellite for educational purposes.
12. Military-technical cooperation between India and Russia has traditionally remained a major pillar of the bilateral strategic partnership. The Sides note with satisfaction that mutually beneficial interaction in the field of defence has steadily progressed from a buyer-seller format to also include joint research and development, manufacturing and marketing, regular service to service interaction and joint exercises<sup>4</sup>. As a leading example of their shared potential in high technological

---

3 Russian Minister for Atomic Energy Sergey V. Kirienko on January 22 speaking at Tirunelveli in South India assured India that Moscow would supply fuel for the reactors being built at Kudankulam throughout their life. "Fuel for the first reactor would reach the site in the second quarter of this year. Without violating the Nuclear Proliferation Treaty, we will ensure fuel supply for the reactors," he told reporters after inspecting the Reactor Pressure Vessel installed in the first reactor. He expressed the hope that there would not be any pressure from the NSG against fuel supply for the Kudankulam Nuclear Power Project.

4 Meanwhile Russian Deputy Prime Minister and Defence Minister Sergei Borisovich Ivanov speaking in Bangalore said Russia was looking for cooperation with India in the fields of space, military, nuclear energy and information technology. He said both countries were discussing specific contracts to develop advanced fifth generation combat aircraft. They could also develop multi-role transport aircraft jointly. The advanced fighter is expected to replace the ageing fighter fleet. Mr. Ivanov said Russia was convinced that after 44 years of cooperation there were newer opportunities to strengthen the bonds between the two countries. Indian software products for armed forces and space programme, for example could fill the gap in the development of transport aircraft jointly. The Agreement for the fighter aircraft was signed in October during the Defence Minister's visit to Moscow and the Agreement for fighter aircraft in November during the Prime Minister's visit.

collaboration, the India-Russia joint venture to manufacture Brahmos missile, which is expanding in scope, has led the way to further such joint projects. The Sides note with satisfaction the in-principle decision to jointly develop a new Multi-Role Transport Aircraft.

13. India and Russia, while recognizing vast possibilities offered by rapid development and mass use of information and communication technologies, systems and utilities, including internet, express their concern that along with the gains, new threats of use of information technologies have emerged, which are incompatible with the goals of ensuring international stability and security both in civil and military spheres. The Sides express their readiness to continue bilateral India-Russia dialogue and intensify joint efforts directed at strengthening national and international information security, including combating criminal and terrorist activities.
14. The Sides recall with satisfaction their wide-ranging bilateral cooperation in the field of science and technology that has been successfully and jointly steered and conducted in the framework of the Integrated Long Term Programme (ILTP). They affirm to jointly commemorate the 20th anniversary (on July 3, 2007) of the establishment of the ILTP. As a major initiative, the Sides welcome the decision to set up an India-Russia Technology Centre in Moscow to facilitate and channelize commercial /industrial applications of new jointly developed technologies. The Sides recognize that this new facet to S&T cooperation would also provide a stimulant effect to the overall scope of joint work. The Signing of the relevant Joint Work Document would enable the Centre to begin concrete work.
15. The Sides have agreed to continue work on the North-South international transport corridor project, in the interests of further development of trade and economic cooperation between India and Russia.
16. Cultural cooperation and people to people contacts have traditionally played an important role in promoting greater understanding and closer friendship between India and Russia. In this context, the Sides welcome the signing of the bilateral Cultural Exchange Programme and the Protocol to celebrate 2008 as the "Year of Russia in India" and 2009 as the "Year of India in Russia". The Sides appreciate ongoing joint efforts aimed at development of partnership relations between institutions of the two countries in

the fields of culture, Indian and Russian studies and languages. They agree to consider new mechanisms, including financial, to accelerate this trend through greater interaction between Indian and Russian scholars.

17. The Sides will work towards the establishment of a multipolar world order based on the principles of the rule of law, sovereign equality, territorial integrity and non-interference in internal affairs of States. Activities aimed at strengthening a central coordinating role of the United Nations in maintaining peace and security, and at increasing the efficiency and authority of the UN, form important elements of India-Russia cooperation at the international level. India and Russia stress the need to implement the process of UN reform, so as to reflect contemporary realities. In this context, the Russian Federation reiterates once again that it regards India as an influential and major member of the international community. The Russian Federation reaffirms its support to India as a deserving and strong candidate for the permanent membership in an expanded UN Security Council.
18. India and Russia strongly condemn terrorism in all its forms and manifestations. Both Sides reaffirm that terrorism is one of the gravest threats to international peace and security, and that there can be no justification for any act of terrorism, irrespective of motivations, wherever and by whosoever committed. They are also convinced that terrorism cannot and should not be associated with any nationality, religious, cultural or ethnic group. The Sides affirm that bilateral cooperation in counter-terrorism is an important dimension of their strategic partnership. They agree to consolidate joint efforts in suppressing financing of international terrorism and fighting illicit drug trafficking.
19. The Sides reiterate their intention to continue comprehensive long-term international cooperation to combat terrorism and to address other new challenges and threats, acting on the basis of international law under the UN auspices as well as within other relevant international organizations of which India and Russia are members. They oppose double standards in combating this phenomenon. They will cooperate to implement the United Nations Global Counter-Terrorism Strategy and to ensure an early entry into force of the International Convention for the Suppression of Acts of Nuclear Terrorism. Both Sides affirm their strong interest in promptly reaching

an agreement on the draft Comprehensive Convention against International Terrorism submitted by India.

20. The Sides note with concern the risk posed by the spread of terrorist ideologies and express their determination to counter this threat basing these efforts on UN SC resolution 1624, including through enhancing, in every possible way, dialogue among civilizations and cultures.
21. The Sides are interested in strengthening bilateral and multilateral interaction in Central Asia, which would contribute to enhanced stability and security in the region, including through closer and mutually beneficial cooperation with individual countries in the region based on shared interests and mutual respect. India and Russia advocate the development of practical cooperation among all partner countries of the Shanghai Cooperation Organization.
22. The Sides are concerned about the continuing deterioration of the situation in Afghanistan and the growing terrorist threat posed by the Taliban and other extremist forces. India and Russia will continue to participate in the post-war recovery in Afghanistan and are interested in strengthening its statehood and in the reemergence of that country as a peaceful, democratic, independent and prosperous state.
23. The Sides are convinced that an effective solution to the Iranian nuclear issue is best found through political and diplomatic efforts. In this regard the unanimous adoption of the UN Security Council Resolution 1737 is significant. It underscores the need for more active and transparent cooperation of Iran with the IAEA in order to resolve outstanding verification issues. They agreed that implementation of the Resolution should facilitate resumption of negotiations for a long-term comprehensive agreement which would allow for the development of relations and cooperation with Iran based on mutual respect and the establishment of international confidence in the exclusively peaceful nature of Iran's nuclear programme.
24. The Sides call for ensuring peace and security on the Korean Peninsula, maintaining it free from nuclear weapons and addressing the nuclear problem through the six-party talks based on the Joint Statement of September 19, 2005.
25. The Sides reaffirm their commitment to securing a comprehensive, lasting and just settlement of the Arab-Israeli conflict on a firm

international legal basis, i.e. relevant UNSC resolutions, the Madrid Principles and the Road Map. They also support the Arab Peace Initiative, adopted in Beirut in 2002. They condemn violence by all sides and call for negotiated solutions. They advocate the active support of the international community, the Quartet and regional players for efforts aimed at normalizing the situation in West Asia and Middle East, and resuming dialogue on all tracks; the Palestinian, the Lebanese and the Syrian, for comprehensive and durable peace in the region.

26. The Sides express concern over the continuing deterioration of the situation in Iraq. They believe that a return to peace, stability and progress in Iraq can only be achieved through reconciliation and a broad internal dialogue between all ethnic and religious groups and political forces of the country. India and Russia believe that the developments in Iraq indicate the need for collective international efforts aimed towards an early normalization of the situation in the country.
27. The Sides call for expansion of cooperation within the China-Russia-India trilateral format. The first trilateral summit-level meeting, which took place in July 2006 in the outreach format of the G8 events in St. Petersburg, gave a fresh impetus to enhancing multifaceted interaction among the three states. The trilateral interaction promotes the development of mutually beneficial economic cooperation among India, Russia and China, enhances international accord in the field of countering new challenges and threats, especially in the fight against terrorism, and contributes to strengthening peace and stability in Asia and throughout the world.
28. The Sides reaffirm their strong commitment to strengthening their relations in every possible way, and express their conviction that the strategic partnership contributes to the development of mutually beneficial and comprehensive bilateral cooperation, and serves the cause of peace, security, stability and sustainable development at the regional and global levels.
29. The President of the Russian Federation invited the Prime Minister of the Republic of India to visit Russia at a mutually convenient time for the next annual Summit. The invitation was gladly accepted.

**543. Joint Statement by the Prime Minister Dr. Manmohan Singh and the Russian President Vladimir Putin on cooperation in the field of peaceful uses of Atomic Energy.**

**New Delhi, January 25, 2007.**

India and Russia, reaffirm the importance of their strategic partnership which serves their national interests, strengthens bilateral relations and contributes to international peace and security and highlight the importance of mutually beneficial cooperation and shared objectives in the field of nuclear energy.

India and Russia, as states possessing advanced nuclear technologies, recognize that nuclear energy provides a safe, environmental friendly and sustainable source of energy. They underline the need to further develop international cooperation in promoting the use of nuclear energy for peaceful purposes in accordance with their respective international commitments and national legislations. They believe that nuclear energy will provide an indispensable source of energy to future generations.

India and Russia as responsible states share an objective of ensuring non-proliferation of weapons of mass destruction and their means of delivery including possible linkages with terrorism.

India and Russia resolve to further emphasize their willingness to expand and strengthen their scientific and other exchanges and bilateral dialogue on peaceful uses of nuclear energy.

India and Russia note with satisfaction their ongoing cooperation in construction of nuclear power plants at Kudankulam. India and Russia reaffirm their commitment to work together to expand civil nuclear energy cooperation, with a special emphasis on nuclear power generation aimed at enabling India to realize its goals of promoting nuclear power and achieving energy security in a self sustaining manner.

With the objective to implement these intentions, an agreement between the Government of the Republic of India and the Government of the Russian Federation will be signed on cooperation in the construction of 4 additional power units at Kudankulam. (This understanding was reflected in the Memorandum of Intent dated 25.01.2007.)

India undertakes that the reactor facilities and nuclear fuel supplied by Russia shall remain under the IAEA safeguards during the entire period of their actual use in accordance with the agreement on safeguards, which shall be

concluded between the Republic of India and the IAEA. It will also inter alia take into account measures relating to physical protection and other issues as may be mutually agreed.

Russia will continue to work with the Participating Governments of NSG in order to create conditions through amendment to its guidelines to facilitate expansion of civilian nuclear energy cooperation with India.

India and Russia recognize the importance of R&D for development of innovative technologies which reduce the risk of nuclear proliferation to further facilitate the wide scale development of nuclear energy. International project for nuclear reactors and fuel cycles (INPRO) which is being implemented under the aegis of IAEA with the participation of India and Russia is an example of productive international cooperation.

India and Russia express their willingness to further expand and strengthen their bilateral civilian nuclear energy cooperation by broadbasing cooperation covering both power (fission and fusion energy) and non-power applications in areas of mutual interest to be identified by both sides.

The Department of Atomic Energy, India and the Federal Atomic Energy Agency, the Russian Federation will work out in 2007 a comprehensive programme of cooperation in the field of peaceful uses of atomic energy between India and Russia<sup>1</sup>.

1. The Memorandum of Intent was signed by Anil Kakodkar, Chairman of the Atomic Energy Commission for India and Sergei Kiriyyenko, Chief of the Russian Atomic Energy Agency for the Russian Federation. This is to be followed by an inter-governmental agreement (IGA) between the two countries similar to the one that governs the supply and execution of units Koondankulam 1 and 2. The original IGA of 1988 and revised IGA of 1998 specify only two reactors at Koondankulam. "We hope that in the near future the inter-governmental agreement will be signed," said Sergey Shmatko, President of the AtomStroyExport (ASE) in an interview to the daily *the Hindu*. ASE is the nuclear plants and systems exporting arm of the Russian atomic energy agency. According to Mr. Shmatko this will pave the way for a general agreement as well as a special contract between ASE and Nuclear Power Corporation of India Ltd. (NPCIL) for the construction of the additional plants at Koondankulam. "Just after this we will start the preparatory work for building the next two units," Mr. Shmatko said. Asked whether such work can be started given the constraining guidelines of the NSG, Mr. Shmatko said that there was no embargo imposed by the guidelines on preparatory work. He however added that Russia would respect the NSG guidelines. "But we hope that the changes in the Indian status vis-à-vis the NSG will happen quickly. In any case preparatory work could start before that," he said. (The Signing of the Inter-Governmental Agreement which was expected to take place in November during the Prime Minister's visit to Moscow was postponed.)

**544. Joint Press Conference of President of Russian Federation Vladimir Putin and Prime Minister Dr Manmohan Singh.**

**New Delhi, January 25, 2007.**

**Prime Minister Manmohan Singh:**

Excellency, President Vladimir Putin, Distinguished Members of the Russian Delegation, Ladies and Gentlemen of the Press.

President Putin is visiting India as part of our well-established practice of Annual Summits between our two countries. His current visit is of special significance, as he is the Chief Guest at our Republic Day Celebrations. We hold President Putin in high esteem, as a world leader and as a special friend of India. It therefore gives me great pleasure in extending him a very warm welcome.

Our discussions today were extremely useful and productive, and confirmed, once again, that our strategic partnership is based on a deep convergence of our vital national interests.

Though there has been a sea-change in the international

situation during the last decade, Russia remains indispensable to the core of India's foreign policy interests. Building on the long tradition of warm and friendly relations with Russia, we seek a comprehensive re-engagement that would impart new momentum and carry our strategic partnership to new heights.

Energy security is the most important of the emerging dimensions of our strategic partnership. Russia's position as a global leader on energy issues is widely recognized. We look forward to long-term partnership with Russia in this vital field.

We appreciate Russia's support in lifting international restrictions on nuclear cooperation with India and in assisting us in the expansion of our nuclear energy sector. We have today signed a Joint Declaration on cooperation in the field of peaceful use of atomic energy. Our growing cooperation is manifest in the Protocol of Intent we have signed on construction of additional units at Kudankulam.

Both of us agreed that our economic relationship is far below what is con-

sistent with the demands of our strong strategic partnership and the growth profiles of both India and Russia. The Joint Study Group is exploring possibilities for charting out a path for comprehensive economic cooperation and we have agreed to expedite its work.

We have had comprehensive discussions on our expanding defence relationship. Our defence ties have steadily progressed to include new areas such as joint research and development, manufacturing and marketing, regular service to service interaction and joint exercises. Our cooperation in the joint development of the Multi-Role Transport Aircraft and our interest in such cooperation in the development of the Fifth Generation Fighter are significant developments.

We decided to give a boost to our cooperation in high technology sectors including space, science and technology and information and communication. This is manifest in the signing of additional bilateral agreements to jointly implement wide ranging cooperation in the Russian Global Navigation Satellite System (GLONASS)

Mr. President, we see your visit, as a landmark and as one laying the foundation for renewed engagement between our two countries and charting the course of our relations in the years to come. Let me extend to you, once again a very warm welcome.

**Rajeev Sharma :** Some years ago, Russia had taken a lead, in trying to form a trilateral axis with China and India. Now what is the status of this trilateral axis? And how do both of you react to January 11 test launch by the Chinese of anti satellite missiles?

**President Vladimir Putin:** *Today the PM and I discussed the cooperation in trilateral format. We did not go into great detail. We stated that this was a useful format. You have probably read reports by international study groups and international research centres that focus on investment issues. According to their estimates in the forthcoming decade, India, Russia, China and Brazil will account for quite a significant portion of the world's economic activity and they will attract quite a lot of international investment. Naturally cooperation with such countries as India, Russia and China should be harmonious and we should seek ways towards ensuring such cooperation. In addition, what brings us together is our desire to address regional issues in matters that would be acceptable to all the three sides. Therefore, we believe that the work in the trilateral format is promising. Now as far as the tests that have taken place in People's Republic of China the funda-*

*mental position of the Russian Federation is that the outer space should be absolutely weapons free. However, I like to note that People's Republic of China is not the first country to conduct such tests. As far as I am concerned, the first such test was conducted in the late 1980s. In addition to that, we can hear from military circles in United States that their plans to try to weaponise outer space. We should not let the genie out of the bottle. And this is our position.*

**Prime Minister Dr Manmohan Singh:** Well President Putin has already mentioned the working of the trilateral cooperation and when I was in St Petersburg a few months ago as guest of President Putin the President of China, President Putin and myself held a very useful discussion and next month the Foreign Ministers of Russia, China and India would be meeting to explore further avenues of working together to make success of this trilateral forum. As far as the weaponisation of outer space is concerned, our approach is also similar. That we are not in favour of weaponisation of outer space.

**Russian journalist:** Thank you very much. I have two questions. My first question is to the Russian president. What do you think will be the priority areas that we should focus in our cooperation in the forthcoming two years. Will those areas be dominated by politics or economics? And my question to the Prime Minister is the following: What do you think about the possibilities of investing India's debt to Russia in the Indian economy and which particular sector would benefit from such investment?

**Prime Minister Dr Manmohan Singh:** As far as investment of Rupees accumulating in the debt are concerned, we have agreed to use these for expanding areas of cooperation to launch joint ventures in Medium term transport aircraft is one such joint project, the Titanium di oxide manufacture is another project. In the same way we will and can identify new joint ventures for the utilization of this rupee accumulation.

**President Vladimir Putin:** *Will there be more politics or more economics? We are totally aware of the fact that without political support it is absolutely impossible to cooperate in the economic area. However, the high level of political trust between the two countries should be converted to great level of economic interaction. Therefore I believe that it is the common sense will dominate in the coming years. And on this basis of which we will seek to harmonise the political aspect of our cooperation as well as the economic content of our interaction. And we have outlined the business component of our cooperation. And here we should mention the following, energy, hydro*

*carbons, their exploration, prospecting, production and transport; then nuclear energy; and the political component plays quite a role in this section. These include our joint efforts within the frame work of Nuclear Suppliers Group, the IAEA and other international frameworks. And also these include our direct and practical cooperation in Kudankulam and possibly on other sides as well. And transport and communication in the broadest sense of the words; And our traditional trade items, investment; of course, military technology cooperation and culture. This is good enough for the beginning. Thank you.*

[Note: The text in italics is based on Russian interpreters translation]

**545. Speech of President Dr. A. P. J. Abdul Kalam at the banquet in honour of the Russian President Vladimir V. Putin.**

**New Delhi, January 25, 2007.**

Your Excellency, Mr. Vladimir V. Putin,

President of the Russian Federation,

Excellencies,

Distinguished Guests,

Ladies and Gentlemen,

It is a matter of great pleasure and honour for me to warmly welcome you and your delegation to India on the eve of the Republic Day of India - a day that celebrates a glorious moment in India's history.

Excellency, you are regarded in India as a world leader and a special friend of India. We recall with happiness all your previous visits to India that have led to substantial enhancement of partnership relations between our two countries. Your current visit to India has a special significance. Mr. President, you are the first leader from our great friend Russia, to be the Chief Guest at our Republic Day celebrations. Your presence amidst us on this occasion would serve as yet another event to be seen by millions of people in India and abroad to demonstrate the importance that our two countries attach to our long-standing and unbroken friendship and cooperation.

It is with great pleasure that I recall my visit in May 2005 to your country when I had the opportunity to interact with you and several senior Russian dignitaries, eminent scientists and friends of India. I also had fruitful visits to a number of higher educational establishments and scientific institutions in Moscow and St. Petersburg. The visit also helped me to relive my happy experiences of working with various scientific institutions in Russia, including those dealing with defence research and development. My state visit to Russia indeed left me with lasting impressions, including scope for added cooperation in the fields of science and technology.

Mr. President, I understand that, earlier today, you had successful discussions with our Prime Minister covering an entire array of issues. Our ongoing interactions give us confidence that the strategic dimension of our relations would be consolidated even further in the years ahead. We sincerely acknowledge your commitment to relations with India. As our wide-ranging cooperation develops in the national interests of our two countries, it has increasingly also emerged as a factor of stability in the region and beyond.

We have watched with friendly interest that Russia today stands stronger, both politically and economically and is on its way to gaining still further stature and influence internationally. India too has made rapid and substantial progress, which is evident from our steadily rising GDP growth rates. These trends and the new economic and technological capabilities in India and Russia have expanded the spectrum of opportunities to enhance our economic ties to mutual benefit. This has also made our cooperation in the energy sector more relevant and promising. The arrival of the first shipment of oil to India from Sakhalin-I last month demonstrates the viability of our partnership in hydrocarbons. The Kudankulam nuclear power project signifies mutuality of interest in this field, which both sides seek to further expand. Recently, I was at Kudankulam and saw the progress made. Further expansion in nuclear power production is possible. It is essential that both the Russian and Indian teams strictly follow PERT. I am particularly glad to note that today we signed agreements aimed at practical implementation of our cooperation in the Russian global navigation system GLONASS. We also signed an agreement for joint development of a Youth Satellite for educational purposes - an idea that I had discussed when I last visited Russia.

Mr. President, from my personal experience I know that technological cooperation between our countries has a bright future. 'BrahMos' has deci-

sively proved this. Our two countries are now examining the feasibility of developing a Multipurpose Transport Aircraft. We will be celebrating the 20th anniversary of the Integrated Long-Term Programme (ILTP) later this year testifying to the extensive bilateral scientific and technological cooperation. As a new step forward, we are now seeking to set up an India-Russia Technology Centre in Russia to promote commercial and industrial applications of jointly developed technologies. I wish this project all success.

Mr. President, we need to be more imaginative in our efforts to boost our trade to meet the target of US \$ 10 billion trade by 2010, which would go a long way in raising our economic cooperation to its true potential.

India and Russia seek to build a multi-polar world, which is governed by the principles of sovereign equality, rule of law, territorial integrity and mutual respect among all countries. In this globalising world, we are also faced with new threats and challenges such as terrorism. As two large multi-ethnic, multi-linguistic and multi-religious democracies, India and Russia have to work further for world peace. Our two countries stand firmly together in condemning and fighting all threats and acts of terrorism.

Excellency, on April 13 this year, we commemorate the 60th anniversary of the establishment of diplomatic relations between India and Russia. We are proud that our unbroken friendship and problem-free partnership over decades has no parallel in recent history.

Excellencies, Ladies and Gentlemen, may I request you to join me in a toast to: -

- U the peace, prosperity and well being of the people of friendly Russia;
- U the good health and prosperity of His Excellency President Putin, and;
- U the enduring friendship between India and Russia.

**546. Memorandum of Intent between the Department of Atomic Energy, the Government of the Republic of India and Federal Atomic Energy Agency, the Russian Federation on Development of Cooperation in the Construction of Additional Nuclear Power Plant Units at Kudankulam Site as well as in the Construction of Russian Design Nuclear Power Plants at new sites in the Republic of India.**

**New Delhi, January 25, 2007.**

**The Department of Atomic Energy, the Government of the Republic of India and Federal Atomic Energy Agency, the Russian Federation,**

**Reaffirming** the importance of the strategic partnership and highlighting the importance of mutually beneficial cooperation in the field of civil nuclear energy including construction of additional units at Kudankulam site as well as in the construction of Russian design nuclear power plant units at new sites in the Republic of India taking into account common understanding evolved between the Parties,

**Noting** with satisfaction their ongoing cooperation in the construction of nuclear power plants at Kudankulam,

**Reaffirming** the objective of implementing future cooperation in the construction of four additional nuclear power plant units at Kudankulam through an agreement between the Government of the Republic of India and the Government of the Russian Federation which, inter alia, shall include provisions determining scope and content of cooperation, obligations of both sides and their respective authorized organizations, provision of fabrication and supply of nuclear fuel throughout the operational period of NPP units, storing and reprocessing of spent fuel on territory of India, progressive localization of all relevant activities mentioned above, provision for State credit to the Indian side and / or grant of a State Guarantee by the Russian side, modalities of payments, conclusion of separate contracts, conditions governing implementation of agreement through periods of suspension, protection of confidential information, provision regarding intellectual property rights, application of appropriate IAEA safeguards, physical protection, provisions relating to nuclear liability, procedures for amendments, settlement of disputes and, entry into force, State their intent for the following:

Both Parties shall take all appropriate measures for prompt finalization, signing and entry into force of the Inter-Governmental Agreement mentioned above.

**Done** at New Delhi on January 25, 2007.

**For Department of Atomic Energy    For the Federal Atomic Energy Agency**  
**The Government of India                Russian Federation**

**547. Protocol between the Government of the Republic of India and the Government of the Russian Federation on holding “Year of Russia in India” in the year 2008 and “Year of India in Russia” in the year 2009.**

**New Delhi, January 25, 2007.**

**The Government of the Republic of India and the Government of the Russian Federation**, proceeding from the earlier agreement reached between the leadership of the two countries at the Moscow Summit in December 2005, have decided:

**Article 1**

To hold a “Year of Russia in India” in the year 2008 and a “Year of India in Russia” in the year 2009, within the framework of which the Indian and Russian Parties will hold mutual events in the Republic of India and in the Russian Federation.

**Article 2**

For preparing and conducting the above events, Indian and Russian National Organising Committees will be established in 2007, headed by the President of the Indian Council for Cultural Relations of the Republic of India and the Deputy Chairman of the Government of the Russian Federation, respectively, under which Working Groups will be set up for drawing up a plan of events for holding the “Year of India in Russia” and the “Year of Russia in India”.

**Article 3**

The plan of events, based on reciprocity, will be approved by a decision of the Chairmen of the National Organising Committees.

**Article 4**

The Working Groups formed will comprise representatives of corresponding state executive bodies of the two countries, including states of the Republic of India and subjects of the Russian Federation.

**Article 5**

Coordination of the drawing up and implementation of the Plan of Events and the activities of the Working Groups would be under the charge of the National Organising Committees of the Republic of India and the Russian Federation.

**Article 6**

The main places for conducting the events during the "Year of India in Russia" will be Moscow, St. Petersburg, Nizhny Novgorod, Yekaterinburg, Kazan, sister cities, Astrakhan region, Republic of Tatarstan, Samara region and other subjects of the Russian Federation and their administrative centres, which have partner relations with the Republic of India as well as any other state(s) of the Republic of India, which the National Organising Committee may choose.

**Article 7**

The main places for holding the events during the "Year of Russia in India" will be Delhi, Mumbai, Kolkata, Hyderabad, sister cities, State of Gujarat, State of Andhra Pradesh, State of Karnataka and other cities and states of the Republic of India, which have partner relations with the Russian Federation as well as any other state(s) of the Republic of India, which the National Organising Committee may choose.

**Article 8**

The Plan of Events for holding the "Year of India in Russia" and the "Year of Russia in India" will include exhibitions, fairs, symposiums, conferences, video-conferences, presentations, exchange of delegations and other events in the fields of trade and economy, science and technology, humanities and other areas. A programme of specific events will be agreed upon at a working level between the Working Groups of the National Organising Committees of the Republic of India and the Russian Federation.

**Article 9**

The proposal for the official emblem of the "Year of India in Russia" and the "Year of Russia in India", as well as memorial coins and stamps, will be

worked out by the concerned departments and approved by a joint decision of the Chairmen of the National Organising Committees.

#### **Article 10**

This protocol comes into force from the date of its signature.

**Done** in New Delhi on the twenty-fifth day of January, 2007 in two originals, each in the Hindi, Russian and English languages. In case of any divergence in interpretation the English text will be used.

**On behalf of the Government  
Of the Republic of India**

**On behalf of the Government of the  
Russian Federation**

#### **548. Plan of major events to commemorate the 60th Anniversary of the establishment of diplomatic relations between the Russian Federation and the Republic of India.**

**January 30, 2007.**

**The Ministry of External Affairs of the Republic of India and the Ministry of Foreign Affairs of the Russian Federation** to commemorate the 60th anniversary of the establishment of diplomatic relations between the two countries,

**Guided** by their mutual interest to strengthen friendly relations and deepen their strategic partnership,

**Have** agreed to make arrangements for the jubilee events as follows:

1. Exchange of messages of congratulations at the summit level.
2. Exchange of messages of congratulations between the co-chairmen of the Intergovernmental Russian-Indian Commission on trade and economic, scientific and technical and cultural cooperation.
3. Exchange of messages of congratulations between the Foreign Ministers of the two countries.
4. Official receptions in the Embassies on the occasion of the 60th anniversary of the establishment of diplomatic relations.

5. Publication of articles of the Foreign Ministers on the occasion of the 60th anniversary of the establishment of diplomatic relations.
6. Round tables to be convened by the Diplomatic Academy of the Ministry of Foreign Affairs of the Russian Federation and the Foreign Service Institute of the Ministry of External Affairs, with participation of academicians and scholars from both countries
7. Events to be organized by Embassy's cultural departments in each country devoted to different periods and directions of cooperation between the two countries
8. A special exhibition and official reception on the venue of the Center of History of the Russian Foreign Service to mark the 60th anniversary of the establishment of diplomatic relations.

**549. Question in the Lok Sabha: "Visit of Russian President".**

**New Delhi, March 7, 2007.**

**Will the Minister of External Affairs be pleased to state:**

- (a) whether the Russian President recently visited India;
- (b) if so, the details of the issues discussed and the outcome thereof;
- (c) whether any bilateral agreements including the setting up of nuclear plants in the country were signed during his visit;
- (d) if so, the details thereof;
- (e) the total number of nuclear plants proposed to be set up in the country under the said agreement, State-wise;
- (f) the time by which these plants are likely to be set up;
- (g) whether Russia has also agreed to help India in getting an exemption in the Nuclear Suppliers Group;
- (h) if so, the details thereof; and
- (i) the extent to which Russian help will enable India to expand its nuclear energy programme and sustain energy security?

**The Minister of External Affairs (Shri Pranab Mukherjee):**

(a) to (i) A statement is placed on the Table of the House.

**STATEMENT**

- (a) Yes. The Russian President visited India from 25-26 January 2007.
- (b) The two Sides discussed a wide range of issues relating to regional and international matters of mutual interest and concern. The key issues of cooperation in the fields of defence, space, energy, science and technology, trade and investment were deliberated upon. The results of the discussions have been outlined in the "Joint Statement on the outcome of the Official Visit of H.E. Mr. Vladimir V. Putin, President of the Russian Federation to the Republic of India" issued on 25th January 2007, which is available in the public domain.
- (c)&(d) A number of bilateral documents were concluded during the visit but no agreement was signed on the setting up of nuclear power plants. Discussions were held on the construction of additional nuclear power plants at the Kudankulam site as well as at new sites and a Memorandum of Intent to this effect was signed. "Joint Statement by the Prime Minister of the Republic of India and the President of the Russian Federation on Cooperation in the field of Peaceful Uses of Atomic Energy" was issued on 25th January 2007. This joint statement outlines plans for cooperation with the Russian Federation in the area of peaceful uses of nuclear energy.

The other documents signed were as follows:

- (1) Joint Statement on the outcome of the official visit of the President of the Russian Federation to India;
- (2) Programme of Cultural Exchanges for the years 2007-09;
- (3) Protocol on holding "Year of Russia in India" in the year 2008 and "Year of India in Russia" in the Year 2009;
- (4) Agreement on access of the Indian Party to navigation signals of the Russian Global Navigation Satellite System GLONASS for peaceful purposes;
- (5) Agreement on access of the Indian Party to a part of the Russian Global Navigation Satellite System GLONASS Radio Frequency Spectrum;

- (6) Agreement on cooperation in the joint satellite project 'YOUTHSAT'; and
  - (7) Protocol on exchange of information on the movement of goods and conveyances between the Republic of India and the Russian Federation.
- (e)&(f) The Memorandum of Intent referred to in the previous paragraph envisages construction of four additional nuclear power plant units at the Kudankulam site as well as construction of Russian design nuclear power plants at new sites in India. No other details regarding the number or sites for new nuclear power plants and possible time frame have emerged so far.
- (g),(h)&(i) Russia is collaborating with India in the construction of 2 units of 1000 MW capacity nuclear reactors in Kudankulam, Tamil Nadu. Russia is supportive of wider cooperation with India in the area of peaceful uses of nuclear energy and recognizes that nuclear energy provides a safe, environmental friendly and sustainable source of energy. Russia and India have jointly underlined the need to further develop international cooperation in promoting the use of nuclear energy for peaceful purposes in accordance with their respective international commitments and national legislations. Specifically, Russia expects to continue to work with the participating Governments of Nuclear Suppliers' Group [NSG] to make an exception in its guidelines to facilitate full civilian nuclear energy cooperation with India.

**Shri Asaduddin Owaisi:** Sir, though we have signed the Memorandum of Intent, I would like to know from the hon. Minister, since the trade deficit between India and Russia is huge, what steps are being taken to bridge the trade deficit or gap and whether India is going to invest in Sakhaline III project.

**Shri Pranab Mukherjee:** So far as the trade is concerned, it is true that the current level of trade between India and Russia is just about US \$ 3 billion; it has been decided to make it US \$ 10 billion by 2010. In respect of the investments in new oil fields, like Sakhalin III, the hon. Member may be aware perhaps of the facts. We have already made an investment in Sakhalin I. We are interested in two other sectors also. Talks are going on but nothing has been finalized.

**Shri Asaduddin Owaisi:** The other issue is about the visa agreement.

Our Indian businessmen are facing a huge problem, especially when they go to Russia. What is it that the Government is doing in ensuring that India is going to sign the Re-admission Treaty with Russia since Russia is insisting upon signing the Treaty? This is a very important issue.

The other important question is, do we have to wait for 1, 2 and 3 agreements with US because as it is we have a Nuclear Agreement with Russia.

**Shri Pranab Mukherjee:** Sir, so far as the last question is concerned, there is no co-relation between signing of 123 agreement with the US and our programme with Russia in respect of civilian nuclear programmes for peaceful uses of nuclear energy. As the hon. Member and the whole country is aware, already we are having two nuclear power plants with the support of Russia at Kudankulam and there is a proposal of having more nuclear power plants in Kudankulam and certain other areas also, though the areas have not yet been finalized. So, our nuclear cooperation programme for civilian uses with Russia is a continuing one and a long-term programme.

In respect of the visa agreement, the problem of the Russian insistence on the Re-admission Agreement along with a Visa Facilitation Agreement, the two sides are continuing discussions to resolve this issue. I am aware of the problem that our businessmen and professionals are some time facing due to the restrictive visa policies pursued by some countries including Russia.

**Shri Kharabela Swain:** Can Russia set up additional nuclear power plants in Kudankulam without the approval of IAEA or the Nuclear Supplier Group? Has Russia got an approval from such agencies or setting up of such plants will require future approval from such agencies?

**Shri Pranab Mukherjee:** There are a number of issues connected with the setting up of a nuclear power plant. Merely setting up of the power plant or buying reactor is not an end in itself. We require the continuing supply of fuel and supply of fuel depends on the NSG guidelines. Russia is also a signatory or a part of it. The hon. Member is aware that efforts are made to amend the NSG guidelines to ensure that we can have the supply of nuclear fuel for the generation of power. All these things are co-related and unless we have the assurance of the fuel supply we cannot have an agreement for the establishment of nuclear power plant.

**Shri C.K. Chandrappan:** Sir, in reply to 'b', 'c' and 'd', statements 3, 4, 5 and 6 are related to India's access to Russian satellite for peaceful pur-

poses. Will the hon. Minister kindly explain the areas where we will have the benefit by getting this access? Do we have the benefit in communications or in doing satellite survey and all that?

**Shri Pranab Mukherjee:** Sir, the Agreement will help us to have access to navigation signals of the Russian Global Navigation Satellite System GLONASS radio frequency spectrum for peaceful purposes. These are the facilities we are going to have. In addition, talks are going on for the agreement on cooperation in the joint satellite project for the youth set.

**Shri Vijayendra Pal Singh:** Sir, the arrangement and collaboration with Russia on the nuclear plants in Kudakulam was before the Indo-US Agreement signed. I would like to know how it was signed and what was the reaction of the US on this. In this process, the local and the domestic thorium will also be infused in it in the third stage. If that is so, why did we not really take this on a little further? What is the real advantage of the nuclear deal with the US when this could be signed with Russia much before that?

**Mr. Speaker:** Today, we are having the first Question Hour of this Session. That is why, I have allowed your two supplementaries but you are entitled to ask only one.

**Shri Pranab Mukherjee:** Sir, so far as the first part of the question is concerned, it is true that we were having these two programmes before the Indo-US nuclear arrangement. Now there is a proposal for having four power plants. So far as thorium is concerned, it is a part of our three-pronged nuclear power programme but as the hon. Member is aware, the technology to have its full commercial use is yet to be developed and it will take some time. Keeping that in view, we would like to have it.

As far as the Indo-US nuclear deal is concerned, that is completely a different question altogether. If the hon. Member is interested, I could respond to it and I am ready for a full-fledged discussion on it.

**550. Press Release issued by the Ministry of External Affairs on consultations between Foreign Secretary Shivshankar Menon and the Russian First Deputy Foreign Minister Andrei Denisov as part of the Foreign Office Consultation Programme.**

**New Delhi, April 10, 2007.**

Shri Shivshankar Menon, Foreign Secretary met Mr. Andrei Denisov, First Deputy Foreign Minister of the Russian Federation for consultations on April 9, 2007 in New Delhi. They were assisted by high level official delegations from the two sides. The meeting took place in the framework of regular consultations between the two Foreign Offices.

During the meeting, which lasted for about three hours, the two sides reviewed the entire range of bilateral cooperation programmes, regional issues and other international and multi-lateral issues of strategic concern to India and Russia.

The two sides reviewed the progress of implementation of decisions arrived at during the Summit visit of H.E. Mr. Vladimir Putin, President of the Russian Federation to India on January 25-26, 2007. Particular attention was paid to cooperation in areas of trade and economy, defence, energy, space and science and technology. Both sides expressed their appreciation of the strengthening of the bilateral consultation process on various topical and regional issues. Foreign Secretary and the First Deputy Foreign Minister decided to intensify the consultations process in a subject-specific manner.

Among regional and multilateral issues, Afghanistan, Iran's nuclear programme, Iraq and Middle East, Central Asia, India-Russia-China trilateral cooperation, cooperation with EU and NATO, UN reforms, countering of terrorism and narco-trafficking came up for discussions.

Foreign Secretary extended the Indian side's warm best wishes to the First Deputy Foreign Minister and his team in the context of the forthcoming 60th anniversary of the establishment of the diplomatic relations between India and the Russian Federation, which will take place on April 13, 2007. Foreign Secretary and the First Deputy Foreign Minister agreed to meet next in Moscow on mutually convenient dates.

**551. Message of External Affairs Minister Pranab Mukherjee on the occasion of the release of the photo album published by the Russian Embassy and RIA Novosti on the occasion of 60th anniversary of the establishment of diplomatic relations between India and the Russian Federation.**

**New Delhi, April 13, 2007.**

Scholars and historians have often identified the summit exchanges in 1955 as the first milestone of Indo-Soviet relations. It is often overlooked that the ground work was laid earlier with the visits to the then USSR by Gurudev Rabindranath Tagore in 1930 and India's first Prime Minister Jawaharlal Nehru as a young Congress leader in 1927. Tagore's "Letters from Russia" generated considerable awareness and critical understanding within the Indian intelligentsia about the Soviet system. Young Nehru was deeply impressed by the rapid progress in agriculture, industrialization and fast spread of education in the USSR. The thinking behind India's five year plans may well have arisen in the mind of the future Prime Minister well before India attained independence.

There are few international parallels with the relations between India and the Russian Federation in post- Second World War diplomatic history. Indo-Russian relations are a natural continuation of Indo-Soviet friendship, which have had significant strategic content for nearly half a century. Stability and continuity of cooperation and emerging political and economic realities led the two countries to classify the partnership as strategic in 2000.

The international community has undergone a period of profound transformation in the political, economic, security and other areas, particularly after the dissolution of the Soviet Union and the end of the Cold War. Every country has had to readjust its foreign policy priorities in the face of far reaching economic and political changes and the steadfast friendship with Russia has remained one of the constants in India's foreign policy framework. Within the Indian political establishment, there has been remarkable unanimity on nurturing this friendship and this sentiment has been fully reciprocated by Moscow. Even at a time when Russia was coming to terms with its new political and economic identity and when the Indian establishment was preoccupied with large scale economic reforms, focused attention was paid to this very special and close bilateral relationship. Our vibrant bilateral activities which form the basis of our cooperation are the result of the policy priority both countries accord to one another.

There are serious dangers today - armed conflicts, underdevelopment among large populations, terrorism and violation of human rights, to name a few. We

trust that in an increasingly interdependent world, Indo-Russian friendship can help address these challenges and promote global peace and prosperity. Both countries believe that strengthening of multilateralism is essential for a just and equitable order. This could certainly be facilitated by a readjustment of international political and economic structures to reflect the realities of today's world as compared to the past.

An important factor that unites India and Russia is that both are diverse countries. Multi-ethnic and multi-religious societies need strong traditions of secularism and tolerance. Managing diversity in a democratic and federal political framework is a challenge that both countries face constantly. Our societies are conducting a day-to-day dialogue of civilizations internally and the model they represent is of importance to us and for the international community.

I am optimistic that we can potentially transform and strengthen trade and economic cooperation making full use of emerging opportunities in our two fast growing economies and the initiatives from private and public sector companies will surely play a larger role in the coming years. In this context, I view the February 2007 meeting of the Indo-Russian Trade and Investment Forum, with participation of businessmen from our two countries, as a significant development. It is time for us to work in unison on global trade and financial issues that concern our vital interests. I would welcome creative ideas and solutions to break free of the present level of bilateral trade of about US \$ 3 billion. We are cooperating fruitfully in the areas of defence, energy including nuclear energy, space, high-technology sectors such as information technology, bio-technology and nano-technology, aviation and metallurgy. I feel that economic progress in both countries will open up yet more opportunities for valuable bilateral cooperation.

Importantly, the civilizational and cultural affinity between our two peoples will be enhanced when the 'Year of Russia' is celebrated in India in 2008 and the 'Year of India' in Russia in 2009. There is great warmth and affection at the people-to-people level, and this should be strengthened particularly among the younger generation, who are growing up in a globalised world. With decades of friendship behind us, we can look forward to continued close relations ahead.

I congratulate Embassy of the Russian Federation in New Delhi and News Agency Ria Novosti for bringing out this special album to mark the sixtieth anniversary of the establishment of diplomatic relations between India and Russia.

Sd/-

[Pranab Mukherjee]

## **552. Briefing by Official Spokesperson on External Affairs Minister Pranab Mukherjee's visit to Russia.**

**New Delhi, October 10, 2007.**

**Official Spokesperson (Shri Navtej Sarna):** External Affairs Minister Shri Pranab Mukherjee leaves tomorrow for Russia for the 13th Session of the India-Russia Inter-Governmental Commission (IRIGC) meeting. He will be holding discussions on 12th October with his counterpart for this purpose, which is the co-Chairman from the Russian side, Deputy Prime Minister Alexander Zhukov. Last session of the forum the IRIGC was held in December 2006 in Delhi. Just to give you some of idea of the IRIGC, it has five working Groups and four of them have already met in the last three months. These are the groups on trade and economy, metallurgy and mines, technology, tourism and culture. The one that remains, Working Group on Energy, will meet on 11th October just before the session of the IRIGC. There is, of course, possibility of a Protocol, which is the normal practice, coming out after the session of the IRIGC. To give you a quick overview of the relationship in the context of which this forum meets, India's ties with the Russian Federation are time-tested and based on continuity trust and mutual understanding. Several high-level visits have promoted and strengthened this partnership. There are annual summits at the head of Government level between the two countries since the year 2000. As you may recall, during his last visit here President Putin was the Chief Guest at the Republic Day celebrations. Besides, Head of Government level interaction, there is Parliamentary interaction. The former Speaker of Lok Sabha Shri Manohar Joshi had gone to Russia in September 2003 and addressed the State Duma.

At the Foreign Minister level, Foreign Minister Lavrov visited India in November 2006 and again in February 2007 - that was for the India-Russia-China trilateral meeting. The two Foreign Ministers have also met recently on the sidelines of the ARF in Malaga in August 2007, and they participated in the BRIC Foreign Minister's meeting in New York only in September this year.

On defence cooperation, there is a historical relationship of defence cooperation. The cooperation is not limited only to a buyer-seller relationship but includes joint research and development, training and service-to-service contacts. In fact, the External Affairs Minister as former Defence Minister had led a defence delegation in November 2005 to Russia to co-chair the 5th Session of the Inter-Government Commission on Military Technical Cooperation.

On trade and economic relations, trade remains below expectations and with tremendous potential. For that purpose, a Joint Study Group was set up to look into ways and means to enhance it. This has submitted its final report of its meeting in Moscow in July 2007 and recommends measures for increasing bilateral trade by \$ 10 billion by 2010. This will be one of the areas that will be looked at during this meeting.

On energy sector, as I said, the Group will meet before the IRIGC Session. This is a very important aspect of India-Russia relations. As you know, ONGC Videsh Limited has acquired a 20 per cent stake in the Sakhalin-I oil and gas project and has invested about \$ 1.5 billion in the project. It remains one of the largest Indian investments abroad. The Russian company Gazprom and GAIL are jointly developing a block in the Bay of Bengal. The Kudankulam nuclear power project with two units of combined capacity of 2000 MW is also a good example of India-Russia civil nuclear cooperation.

Space is another key area of cooperation between the two countries. During President Putin's visit, two space-related agreements were signed - agreement on cooperation in outer space for peaceful purposes, and the inter-space agreement for cooperation on the Russian Satellite Navigation System, Glonass. S&T also remains a very important area. There is an integrated long-term programme of cooperation between India and Russia. As you know, culture is particularly important this year round. This is the 60th anniversary of the establishment of diplomatic relations between India and Russia. Five Chairs relating to Indology have been established in Moscow, St. Petersburg, Kazan and Vladivostok. Days of Russian Culture were held in India in November 2003, and Days of Indian Culture were held in 2005 in Russia. The two countries have agreed to hold Year of Russia in India in 2008, and Year of India in Russia in 2009. I think that gives you sufficient background for the visit. Naturally there will be briefings and reports coming from Moscow. We will also have visual inputs available for you - photographs etc. - that you might like to use for your stories over the next two days.

**Question:** Has the agreement on Glonass been operationalised?

**Official Spokesperson:** Yes. Let me tell you exactly what it says. After the agreement was signed, subsequently a number of follow up agreements on Glonass have been signed. Implementation of these space cooperation agreements and programmes is going on.

**Question:** What is the status of implementation of this agreement?

**Official Spokesperson:** I do not know what is the exact implementation of the actual navigation system but we are very much part of it.

**Question:** There have been some reports of Indian bunkers that the Chinese have objected to on the border...(Inaudible)... apparently the Chinese had said that they will approach the issue diplomatically. Has there been any diplomatic initiative from Chinese side in this regard?

**Official Spokesperson:** I will take the question back and see if I can come back with something.

**Question:** What are the specific recommendations on trade?

**Official Spokesperson:** On trade, as you know, the bilateral trade turnover is about Rs.12,200 crore. I am giving a round figure. That was the previous year. Last year it was Rs.13,700 crore. Major items of export are drugs, pharmaceuticals, chemicals, cotton etc. You are familiar with all these. Important development is that India and Russia concluded a bilateral agreement on Russia's accession to WTO. This final protocol and the completion of negotiations were signed in February 2006. The Joint Study Group, which I mentioned to you, basically looks into setting up a Joint Taskforce which will be monitoring the implementation of the report. It will be looking at ways and means to increase, facilitate and smoothen the problems that we may have been having, for instance, with items like tea, diamonds and such others so that the overall impact is increase in volumes. For your information, the banking sector has been cooperating quite well. Our banks are doing well in Russia and many banks have established corresponding contacts in Russia. Ties in insurance also are improving. We have, of course, always been taking up the issue of visa facilitation for our business people, which we hope will result in greater traffic of our business people to Russia.

The Working Group on Mining and Metallurgy also, in the same context, has identified opportunities of investment in joint venture operations, particularly in research and training, waste management, etc. There is also cooperation in underground coal gasification. These are all new areas which are being looked at.

**Question:** When is the Prime Minister visiting Russia for the annual Summit. Or are the dates being worked out by the EAM?

**Official Spokesperson:** I do not know what EAM might discuss during his meeting with the Russian leadership. But, as you know, we have a tradition of an annual Summit. So, when we do have the dates of the Prime Minister's

visit to Russia, we will let you know once they are finalized.

**Question:** Is the BRIC Summit in the pipeline?

**Official Spokesperson:** I do not have anything on that.

**Question:** Will the Gazprom-GAIL project be reviewed?

**Official Spokesperson:** This already exists in the bilateral relationship. But what I would expect is that they will definitely look at the overall co-operation in the space field, and they will look at agreements that would have been signed since the last meeting. They will review them and then also see the stage of implementation of the Glonass system.

**Official Spokesperson:** As I said, we have civil nuclear energy cooperation in the shape of the Kudankulam Project. It is quite likely that they will review the progress in that sphere.

**Question:** Future programmes....?

**Official Spokesperson:** Possible.

**Question:** Cooperation in the SCO Group ...(Inaudible)...

**Official Spokesperson:** There is no specific working group. This is a bilateral commission which has five fixed Working Groups which are essentially like with many countries we have a Joint Commission. With Russia we have the IRIGC which looks into those specific areas. The External Affairs Minister will be there, he will be having broader discussions with the Russian leadership besides reviewing the work of the Working Groups. It is quite possible that during those discussions, not only the bilateral relationship but the regional issues which could include the one that you are mentioning may come up. It is only guesswork at this stage but it is quite possible because they will be having wider discussions.

**Question:** Anything on the visit of the Minister of Defence?

**Official Spokesperson:** I do not have any dates yet. You must ask the Defence Ministry.

Thank you.

**553. Article by External Affairs Minister Pranab Mukherjee in the daily *Hindustan Times* to mark 60 years of the establishment of diplomatic relations between India and Russia.**

**New Delhi, October 12, 2007.**

This year marks the 60th anniversary of the establishment of diplomatic relations between India and Russia on April 13, 1947. In these 60 years, the world has undergone many changes but India-Russia relations have remained a steady beacon in promoting global stability. At the core of our bilateral ties is a strong foundation of mutual respect, understanding and trust.

Even before Independence, India's thinkers and political leaders, including Rabindranath Tagore and Jawaharlal Nehru, had expressed their empathy and appreciation for Russia and its people. Tagore's Letters from Russia, published after his visit to the USSR in 1930, had a profound impact on India's academic and literary community.

In one letter, Tagore writes: "In stepping on the soil of Russia, the first thing that caught my eye was that in education, at any rate, the peasant and the working classes have made such enormous progress in these few years that nothing comparable has happened even to our highest classes in the course of the last 150 years. The people here are not at all afraid of giving complete education even to Turcomans of distant Asia; on the contrary, they are utterly earnest about it."

Those who introduced Tagore's works to Russian readers included names like Anna Akhmatova, Ivan Bunin and Boris Pasternak. In the beginning of the 20th century, Mahatma Gandhi and Leo Tolstoy exchanged thoughts through letters on subjects such as spirituality, humility and love, and passive resistance.

Nehru's visit to the USSR in 1927 left a deep impression on him about mass education, public health infrastructure and the economic progress made by the Soviet Union under the five-year 'Gos' plans. The foundations of close bilateral ties were laid during his visit to Russia in June 1955 in his capacity as PM and the subsequent visits by CPSU First Secretary Khrushchev and Premier Bulganin to India later that year. A number of high-level exchanges, including by Indira Gandhi in 1966, 1971 and 1976 and by Rajiv Gandhi in 1985, were instrumental in strengthening these ties. Soon after Indepen-

dence, our young nation received invaluable support from the USSR for the development of its economy, particularly heavy industries, infrastructure projects and technological expertise. Indians remember the generous Soviet assistance in building steel plants in Bhilai, Bokaro and Visakhapatnam, an aluminum plant in Korba and key power transmission lines and hydro-power stations, which Nehru called "the temples of modern India". Russia's contribution to the development of India's defence and space capabilities is also remembered. India's first satellite was launched by a Russian launch vehicle in 1975 and our first cosmonaut went into space on a Russian spacecraft in 1984.

The developments of the early 1990s put to test our unique ties but the relationship was reaffirmed with the signing of the Treaty of Friendship and Cooperation in January 1993. In the last decade, the pace of growth in our bilateral activities has been exceptional. In a clear reaffirmation of the priority accorded to one another, India and the Russian Federation agreed to a Declaration of Strategic Partnership during the visit of President Vladimir Putin to India in October 2000.

Intensive high-level political exchanges reflect our long-term perspective, unaffected by tactical or short-term considerations. The relationship is free from ideological or power bloc considerations. It is not surprising, therefore, that this tie has never impaired either country's relationships with third countries. Our shared vision for a peaceful, multi-polar and prosperous world is the basis for the strategic partnership and we agree that strengthening multilateralism is essential for a just and equitable world order. India and Russia are fast-growing economies, increasingly important in global trade and investment. The India-Russia Inter-Governmental Commission on Trade, Economic, Scientific, Technological and Cultural Cooperation is an effective mechanism overseeing our ties. The Joint Study Group to examine ways to increase our bilateral trade to US \$ 10 billion by 2010 submitted its report in July this year. Its implementation will ensure a quantum jump in our bilateral trade and economic cooperation. Earlier, the protocol on conclusion of bilateral market access negotiations in the context of Russia's accession to the WTO was signed in 2006.

India and Russia have a long tradition of defence cooperation and the bulk of India's defence hardware is of Soviet or Russian origin. The licensed production of T-90 tanks and SU-30 MKI aircraft and engines are examples of our strong defence ties in the post-Soviet era. Today, we have agreed to jointly design, develop, produce and market high technology defence prod-

ucts. The potential of such cooperation has been demonstrated by the joint development and production of the BrahMos cruise missile.

The long years of exchanges in the area of space have included cooperation in the launch of satellites and the visit of an Indian cosmonaut to the Salyut space station. In December 2004, two important bilateral agreements were signed: (i) Agreement on Cooperation in Outer Space for Peaceful Purposes; and (ii) Agreement on Cooperation in the Russian Global Satellite Navigation System (Glonass). The 'YouthSat' satellite for collaboration between academic institutions in Russia and India and Indian participation in Russian Science Mission Coronas-Photon are among the other important initiatives.

Energy security is central to India's interests and Russia is a natural partner as one of the world's largest producers of oil and natural gas. India's highest public sector investment abroad so far has been in Russia's Sakhalin-1 hydrocarbon project. India views nuclear energy, as a safe, sustainable and environmentally-friendly source of energy, helping meet growing demand. The ongoing collaboration with Russia in the construction of two nuclear power units of 1,000 MW capacity in Kudankulam, Tamil Nadu, is an indication of the potential for further cooperation. The 20-year-old Integrated Long-Term Programme (ILTP) for exchanges in the field of science and technology is India's largest such programme. Over 550 joint research projects have already been successfully implemented. Further, seven Joint Centres of Excellence have been set up in powder metallurgy, polio vaccine production, advanced computing, bio-technology, gas hydrates, ayurveda and seismology. The focus now is to set up a technology centre to facilitate commercial application of technologies and to increase the effectiveness of ILTP. Cutting edge areas such as nano-technology deserve greater attention for joint endeavours in the future.

Mutual appreciation and respect for each other's culture, history and way of life have characterised Indo-Russian ties at a people-to-people level. The forthcoming celebrations of the 'Year of Russia' in India in 2008 and the 'Year of India' in Russia in 2009 are aimed at strengthening the interaction and bonds.

We are both very diverse countries. Multi-ethnic, multi-lingual and multi-religious societies need strong traditions of secularism and tolerance. Managing diversity in a democratic and federal framework is a challenge both countries have faced. Today, when we are told about the need for a dia-

logue among civilisations, we recognise that the successful holding together of our social fabric is a useful model for the global community.

The 21st century faces a number of challenges, such as armed conflict, underdevelopment, disease, hunger, terrorism, WMD proliferation and environmental degradation. Many of these problems cut across international frontiers. We trust that in an increasingly interdependent world, India-Russia friendship will promote an environment of global cooperation.

**554. Statement by External Affairs Minister at the 13th Session of the India - Russia Inter Governmental Commission on Trade, Economic, Scientific, Technological & Cultural Cooperation.**

**Moscow, October 12, 2007.**

Excellency Mr. Alexander D. Zhukov, Deputy Chairman of the Government of the Russian Federation, esteemed members of the Russian delegation and Indian colleagues.

2. I am glad to be back in Moscow for this 13th Session of India-Russia Inter-Governmental Commission for trade, economic, scientific, technological and cultural cooperation (IRIGC). I recall that my last visit in November 2005 was to co-chair the Fifth Session of the Inter-Governmental Commission for military-technical cooperation. Let me note that this year marks the 60th anniversary of the establishment of diplomatic relations between our countries. These sixty years have demonstrated the strength and the depth of the bilateral relationship, which has steadily grown and today Russia is a very special and unique friend for India. We in India strongly support further development of India's strategic partnership with Russia. In this context, our IRIGC meeting will review cooperation in several important areas of mutual interest.
3. The last Session of the IRIGC in December 2006 was followed by the landmark visit of President Putin, where he also participated as the Chief Guest in our Republic Day celebrations. Several significant agreements were concluded during the visit and important directions given to further develop the relationship. To follow-up in respective

areas, all five Working Groups under the IRIGC – on trade & economic cooperation, mines & metallurgy, technology, energy and tourism & culture - have held their review meetings. The Joint Task Force on mutual financial obligations has also held a review meeting recently. The outcomes of these meetings have been summarized in their mutually agreed documents.

4. The two sides are unanimous on enhancing joint efforts towards realizing the full potential for bilateral trade, investment and economic cooperation. Bilateral trade stood at US\$ 4 billion during 2006-07. Our leadership has set a trade target of US\$ 10 billion by the year 2010 and both governments would need to pay special attention towards achieving this target. The conclusion of the report of the Joint Study Group to increase bilateral trade & investment and examine the feasibility of a Comprehensive Economic Cooperation Agreement in July this year is a substantive step forward. I commend the detailed and comprehensive nature of the report developed by our experts. The next stage is to implement the recommendations made in the report.
5. The Commerce Ministers of India and Russia, at their meeting in St. Petersburg on June 10, 2007, had agreed to set up a Joint Task Force to monitor the implementation of the recommendations of the Joint Study Group. We have since shared the text of the Terms of Reference for this Joint Task Force with the Russian side. Let us try to finalize them as early as possible so that the Task Force can be operationalized to proceed with its mandate. The Joint Study Group has also recognized that a Comprehensive Economic Cooperation Agreement will contribute to strengthening bilateral trade & investment.
6. An area of weakness, which has been identified by the Joint Study Group, pertains to inadequate awareness among enterprises on both sides about business opportunities. In this regard, the newly set up India-Russia Forum on Trade and Investment is a positive development. A successful first meeting of the Forum was held in February 2007 in New Delhi with the participation of over 500 entrepreneurs. The second Trade & Investment Forum has been proposed for January-February 2008 and we should direct our respective agencies to start preparations. The Joint Business Council among the chambers of commerce & industry on both sides could

contribute by taking initiatives to promote greater business-to-business dialogue and participation in exhibitions and other exchanges. We could also consider a bilingual IRIGC publication for reaching out to business community and relevant institutions on both sides.

7. The Working Group on trade and economic cooperation identified key areas for bilateral cooperation, such as energy, transport, high technology, chemicals & pharmaceuticals, agricultural & processed food products, diamonds and tourism. It also underlined the need for expert-level discussions on trade in animal products covering issues such as sanitary and phyto-sanitary standards & certification procedures.
8. India-Russia cooperation in ferrous and non-ferrous metallurgical industry dates back to 1950s & 60s. Investment and joint venture opportunities have been identified by the Working Group on mining and metallurgy e.g. setting up of new facilities, modernization of existing ones, technological collaboration in specific processes such as waste management, joint research and training. We are also interested in securing long-term supply of coking coal from Russia. I understand that the ongoing collaboration in another area, underground coal gasification between ONGC & Skochinsky Institute is proceeding satisfactorily.
9. The last one year has seen an increase in the interaction in the banking sector and progress in terms of opening of representative offices and establishment of correspondent relationships. Presently, thirty six Russian banks have correspondent relationships with seven major Indian banks. The sub-Group on banking and financial matters held a fruitful meeting in Jaipur on 4-5 October, 2007 and, these exchanges should facilitate bilateral trade and financial investment.
10. We have discussed simplification of visa procedures in previous IRIGC meetings and unfortunately, the situation has not improved on the ground. We are aware of Russia's position, which links a visa facilitation agreement to a readmission agreement. In order to break this deadlock and to make a beginning, we could try to identify a mutually acceptable solution so that, trade and business ties are not hindered.
11. With regard to outstanding claims, our central banks and the Joint

Task Force on mutual financial obligations have worked hard to resolve disputes. Some of these claims are relatively small in value but have an adverse impact on exporters' confidence. There are cases of alleged shortfalls in payments relating to defence supplies or pending claims of shipping companies where both sides have exchanged available documents during past meetings. If consensus is reached on outstanding sums, we may be able to identify mutually acceptable solutions. We also hope that the text of Letters of Exchange on utilizing rupee debt funds for investment would be signed at an early date.

12. In the context of energy security, it is natural for us to seek cooperation with our strategic partner Russia, which is one of the largest exporters of hydrocarbons in the world. Partnership with India in the energy sector may also serve Russian interest in diversifying its export market. There have been active contacts between our energy companies to pursue opportunities in India, Russia and third countries and we hope that there will be concrete progress as a result of this engagement. We believe that the support of the two governments will be integral to the success of their efforts. Indian oil & gas companies are interested in exploration and also the downstream sector for example refineries and pipelines. Indian and Russian agencies have been discussing an expansion in the ongoing collaboration in the field of nuclear energy and we are confident that these discussions will be successful.
13. The year 2007 marks the 20th anniversary of the India-Russia Integrated Long Term Programme (ILTP) of cooperation in the field of science & technology. As we meet, the Joint Council meeting of the ILTP is also taking place here in Moscow. Our cooperation within the framework of the ILTP covers the joint research & development projects, setting up of joint Centres of Excellence, exhibitions, seminars and transfer of technology. The Joint Technology Centre in Moscow will be a significant development for the ILTP by forming an industry interface of scientific & technological research. While a Protocol of Intent for setting up the Centre was signed in August 2006, its operationalization is still under discussion. Both sides should try for an early finalization of the Joint Working Document for this Centre. I am pleased to note that Department of Science and Technology of India and the Russian Academy of Sciences have agreed to sign MoUs for setting up three new joint Centres on

biomedical technology; non-ferrous metallurgy; and accelerators & lasers. We have noted the emphasis in Russia on the emerging frontier area of nano-technology, which is also an important field for India.

14. The Working Group on technology covers a very wide range of areas, including scientific & technological cooperation under ILTP as well as cooperation in communications & information technology. On both sides, these subjects are coordinated by different Ministries with their respective sets of institutions & organizations. We may consider reorganizing this cooperation into two Working Groups – one on science & technology and the other on communications & information technology.
15. Cultural exchanges and people-to-people ties form an important aspect of India-Russia relations and we are committed to promote them further. During the visit of President Putin in January 2007, the two governments signed the Cultural Exchange Programme 2007-2009 and decided to hold 'Year of Russia in India' in 2008 and 'Year of India in Russia' in 2009. Last week, Dr. Karan Singh, the co-Chairman from our side of the Organizing Committee for the Year of Russia in India and Year of India in Russia visited Moscow to review preparations. Ensuing events in 2008 and 2009 will provide another opportunity to further foster understanding and goodwill between the peoples of our countries, particularly the younger generation. Tourism is another important area. I understand that a few sea-side destinations in India are already popular among Russian tourists. We expect that more spots of tourist interest will catch the fancy of our Russian friends. I also hope that an enhanced flow of tourists will start in the reverse direction to the beautiful terrains and historical sites in Russia.

May I thank you, Excellency, for hosting today's deliberations and convey my appreciation to the members of the Russian delegation for their contribution to the work of this Inter-Governmental Commission.

**555. Remarks by External Affairs Minister Pranab Mukherjee at the Joint Press Interaction following the India-Russia Inter-Governmental Commission Session.**

**Moscow, October 12, 2007.**

Good afternoon.

Let me begin by thanking my host and co-chair of the India-Russia Inter-Governmental Commission on Trade, Economic, Scientific, Technological and Cultural Cooperation, His Excellency Mr. Alexander Zhukov, as well as the Government of the Russian Federation for all the arrangements that have been made for this meeting. I had a very fruitful meeting with Deputy Prime Minister Zhukov this morning and we have just concluded the plenary session of the 13th meeting of the IRIGC with the signing of the Protocol for this session. All five Working Groups under the IRIGC – on trade & economic cooperation, mines & metallurgy, technology, energy and tourism & culture - have held their meetings prior to this Session.

Deputy Prime Minister Zhukov and I had substantial discussions in all major areas of bilateral cooperation relating to trade, commerce, investment, energy, science, technology, services, metallurgy and culture. We also identified new areas, such as high technology, for a quantum increase in our bilateral trade and economic cooperation.

Our annual bilateral trade stands at around \$4 billion. Although we can derive satisfaction from the fact that this trade has been increasing steadily in recent years, I think we all recognize that it is still below potential. Accordingly, we have discussed steps for strengthening our trade and economic cooperation during the IRIGC Session.

The major Indian hydrocarbon, power and other energy-related companies have significant collaboration with Russian companies and both sides are keen to deepen and widen this further. Since Russia is one of the largest exporters of energy, chemicals and fertilizers and India a large importer of these products, there is a natural complementarity for cooperation in these areas.

The 'Year of Russia in India' in 2008 and the 'Year of India in Russia' in 2009 will be landmark events. We concurred that these events will provide us yet another opportunity to increase people-to-people contacts. Apart from culture, we also agreed to take steps to increase our cooperation in tourism, education and human resources development.

The Integrated Long Term Programme (ILTP) for Scientific and Technological Cooperation between the two countries has completed twenty years of successful collaboration. Because of functional reasons, we decided to set up a new Working Group on Science and Technology and to re-designate the existing Working Group on Technologies as the Working Group on Information and Communication Technologies.

Let me take this opportunity to thank H.E. Mr. Alexander Zhukov for his personal efforts and interest in the IRIGC. We will look forward to welcoming the Russian delegation in India next year for the 14th IRIGC Session. Let me also congratulate and extend my best wishes to both sides on the occasion of 60th anniversary of the establishment of diplomatic relations between India and Russia.

Thank you.

**556. Remarks by External Affairs Minister Pranab Mukherjee at the Indian Business Alliance (IBA) meeting.**

**Moscow, October 12, 2007.**

Dear friends and colleagues,

I am glad to join this significant gathering of Indian businessmen here today. Indian business organizations have a major role to play in Russia since the potential for partnership is very high. However, factors such as the language-barrier and the lack of awareness about opportunities can, at times, become barriers to trade and commerce. In this context, all of you have a special catalytic role to play in enhancing awareness about opportunities to raise trade and investment.

In recent years, Government of India has taken several measures to tap the strength of Indians abroad. Apart from established institutionalized mechanisms, we are proud to note that Indians abroad have become important in increasing cooperation between India and their host countries.

As you know, the 13th session of the IRIGC took place today. Although the IRIGC is a government-to-government forum, we spent quite some time discussing the role of the private sector in furthering economic cooperation between India and Russia. I am happy that IRIGC is accompanied by a

business event such as this and I expect that we will have an intensification of such interactions in the years to come.

This year, which started with the visit of President Putin to India and will end with the visit of Prime Minister Dr. Manmohan Singh to Russia, saw several important developments in our bilateral economic cooperation. The first India-Russia Forum on Trade and Investment was held in India in February. The Joint Study Group set up to analyse our bilateral trade and economic cooperation finalized its report in July. Also the Integrated Long-Term Programme (ILTP) of Cooperation in Science and Technology is celebrating its 20th anniversary this year. I mention ILTP here because we are making renewed efforts to bring work done in this area to the market. The setting up of the Russia-India Technology Centre in Moscow would be a step in this direction.

It is an extremely welcome idea to have an India Brand Equity website in Russian. The website's utility and coverage should grow with time. And this would be possible by providing the correct information with regular updates.

India's bilateral trade with Russia has been growing steadily in recent years, but all of us will have to put in special efforts to raise it several times in the next few years. The Indian Business Alliance can play a leading role in this process by attracting more Indian companies to do business in Russia. Since you are here in Russia with first hand knowledge, we look to you for inputs on the way forward. I thank you for the work you are doing and extend to you my best wishes in all your efforts for the future.

Thank you.

**557. Press Release of the Ministry of Defence on the signing of the landmark Agreement between India and Russia on the Joint Development and Production of Fifth Generation Fighter Aircraft.**

**New Delhi, October 18, 2007.**

India and Russia today signed a landmark Intergovernmental Agreement for the joint development and joint production of the Fifth Generation Fighter Aircraft (FGFA), marking the beginning of cooperation in the development of state of the art new technology major weapon systems. The agreement was signed by the Secretary Defence Production Mr KP Singh and Deputy Director of the Federal Service for Foreign Military Cooperation Mr. Vyacheslav Dzirkaln in the presence of the Defence Minister Mr. AK Antony and his Russian counterpart Mr. Anatoly Serdyukov in Moscow today. The watershed agreement was signed at the conclusion of the Seventh Meeting of the India- Russia Intergovernmental Commission for Military and Technical Cooperation. Mr Antony and Mr Serdyukov also signed a Protocol which envisages a 'new strategic relationship' based on greater interaction at various operational levels.

Speaking to reporters shortly after the signing ceremony, Mr. Antony said the two countries have agreed to strengthen and expand relations in all areas especially in the areas of joint exercises and greater cooperation in the field of Research and Development. "Now the frequency and level of exercises will be higher", Mr. Antony said. He said talks with Russia have started to extend the Military Cooperation Agreement beyond 2010. The pact had been signed during the Russian President Mr. Vladimir Putin's visit to India in 2000.

The Defence Minister described the Agreement on FGFA as a 'major landmark' and said that the Indo-Russian relationship is on a trajectory to reach new heights. He hoped that the two countries would soon sign an Intergovernmental Agreement on co-development and co-production of Multi-Role Transport Aircraft. Mr. Antony expressed satisfaction at the outcome of discussions on other important projects e.g., supply and licensed production of T-90 tanks, SU-30 MKI aircraft and other strategic issues. He admitted that there has been a delay in the delivery of the repaired and refurbished aircraft carrier Admiral Gorshkov along with supply of deck-based fighter aircraft MiG-29-K and said it was decided that some more studies by technical groups would be done to go through the details. He appreciated the

efforts made by the Russian side to resolve issues relating to life cycle support of equipment of Russian origin.

On the question of Integrity Pact, he said, "the objective is neither to create problems for anybody nor to favour anybody. What India wants is transparency in all defence purchases. In the past, there have been a lot of controversies. We want to avoid it. We want speedy modernisation but with transparency. Integrity Pact is one of the safeguards for transparency".

**558. Response of Official Spokesperson to questions relating to the visit of External Affairs Minister to Russia.**

**New Delhi, October 18, 2007.**

EAM's visit to Moscow on 11-12 October 2007 was to co-chair the India-Russian Inter-Governmental Commission to promote economic, technological and cultural cooperation. He had detailed discussions with his Russian counterpart, Deputy Prime Minister Alexander Zhukov. In particular, agreement was reached on operationalising the Report of the Joint Study Group to enhance India-Russian economic cooperation.

On occasion, other meetings are held during such visits in both India and Russia. However, the Russian Ministry of Foreign Affairs explained to us that this was not possible this time. This does not in any way affect the friendly ties between the two countries.

There have been exaggerated comments<sup>1</sup> and analysis in the media on the visit of EAM to Moscow. These are without foundation and seek to draw inferences that are completely unwarranted.

---

1. The Spokesperson was referring to the media stories which highlighted the fact that during the EAM's visit to Moscow, he could not meet with his counterpart or with President Putin. There were also reports of EAM being frisked by the Russian security at the Moscow airport while returning. The media was quick to reach the conclusion that it marked a chill in the India - Russia relations.

**559. Press Release of the Ministry of Defence on the visit of Defence Minister A. K. Antony to Moscow.****New Delhi, October 18, 2007.**

India and Russia today signed a landmark Intergovernmental Agreement for the joint development and joint production of the Fifth Generation Fighter Aircraft (FGFA), marking the beginning of cooperation in the development of state of the art new technology major weapon systems. The agreement was signed by the Secretary Defence Production Mr KP Singh and Deputy Director of the Federal Service for Foreign Military Cooperation Mr. Vyacheslav Dzirkaln in the presence of the Defence Minister Mr. AK Antony and his Russian counterpart Mr. Anatoly Serdyukov in Moscow today. The watershed agreement was signed at the conclusion of the Seventh Meeting of the India- Russia Intergovernmental Commission for Military and Technical Cooperation. Mr Antony and Mr Serdyukov also signed a Protocol which envisages a 'new strategic relationship' based on greater interaction at various operational levels.

Speaking to reporters shortly after the signing ceremony, Mr Antony said the two countries have agreed to strengthen and expand relations in all areas especially in the areas of joint exercises and greater cooperation in the field of Research and Development<sup>1</sup>. "Now the frequency and level of exercises will be higher", Mr. Antony said. He said talks with Russia have started to extend the Military Cooperation Agreement beyond 2010. The pact had been signed during the Russian President Mr. Vladimir Putin's visit to India in 2000.

The Defence Minister described the Agreement on FGFA as a 'major landmark' and said that the Indo-Russian relationship is on a trajectory to reach new heights. He hoped that the two countries would soon sign an Intergovernmental Agreement on co-development and co-production of Multi-Role Transport Aircraft. Mr. Antony expressed satisfaction at the outcome of dis-

---

1. On October 17, ahead of his discussions and the Seventh Meeting of India- Russia Intergovernmental Commission on Military Technical Cooperation, the Defence Minister had expressed confidence that a major breakthrough was likely to be achieved on key projects under discussion between the two countries. Speaking to reporters after laying a wreath at the Tomb of the Unknown Soldiers at Alexandrovsky Garden in Moscow, he said 'relationship between India and Russia is special' and his visit was meant to further expand the scope of cooperation between the two countries. He said his visit would prepare the groundwork for the visit of the Prime Minister Dr. Manmohan Singh to Moscow next month (November). Asked to compare the Indo-US relationship with Indo-Russian

---

relationship, Antony said that India "has cordial relationship with many countries including the United States. The improvement in our relations with the United States is not at the cost of our old friendship with Russia". He stressed that New Delhi's relations with Moscow in general and specially defence cooperation in particular were set to grow. Speaking at the opening of the 7th session of the Indo-Russian Inter-governmental Commission on Military Technical Cooperation on October 17, Mr. Antony, who co-chaired the IGC for India, voiced confidence that defence ties between the two countries "would grow stronger in the years to come." The Minister expressed the hope that the session would give further impetus to "the existing strong relationship" between the two countries in the defence sphere and help to resolve ongoing problems such as providing life-long product support to Russian-made weapon systems and delays in modernisation of the Gorshkov aircraft carrier for the Indian Navy. At the same time, he praised the "unique" character of the defence cooperation between India and Russia. "Russia is the only country with which we have elaborate institutionalised arrangements," he said. The Defence Minister said Russia was and would remain India's biggest defence partner. Mr. Antony said: "The larger part of the inventory of our armed forces is of Russian origin and this is likely to remain so for many years to come. India wants not only to maintain but to strengthen defence ties with Russia." Over the years defence ties with Russia had evolved from buyer-seller relations to joint development and production of defence equipment. Russia's Defence Minister Anatoly Serdyukov described the Indo-Russian defence ties as "large-scale, plan-based and long-term." He said bilateral defence deals were under the constant control of the top leadership of the two countries. "Russia is also set to lease out to India an Akula-II nuclear submarine for a period of 10 years beginning with 2008 or 2009," the *Izvestia* Russian national daily reported on October 18. During the two-day session, the two sides decided to start drafting a new long-term programme for defence cooperation. The current programme for the period 2000-2010 involves 200 defence projects estimated at \$18 billion. "We will further strengthen all-round defence cooperation and extend it to the future," Mr. Antony said after the close of the IRIGC session. "We have decided to expand our cooperation in R&D and have more co-development and co-production projects in aviation and other defence hardware." Describing the IRIGC session as a "landmark" event, Mr. Antony said an intergovernmental agreement for the joint design and manufacture of the Multi-Role Transport Aircraft (MTA) for the military would be signed shortly. (Russian sources said the deal would be inked during the visit of Prime Minister Manmohan Singh to Russia for a summit with President Vladimir Putin (This Agreement was signed in November). The military of the two countries also decided to increase the frequency and raise the level and scope of joint military exercises, as well as expand reciprocal training programmes. "This will mark the start of a new strategic relationship based on greater interaction at the various operational levels," Mr. Antony remarked. The Minister said all questions pertaining to the acquisition and production of T-90S Main Battle Tanks, Su-30MKI planes and other equipment had been sorted out. Russia would supply more 347 T-90S tanks and 40 Su-30MKI jets. Summing up the results of the IRIGC, Mr. Serdyukov said: "Russian-Indian military-technical cooperation is developing dynamically and progressively in such fields as joint development of technologies, joint production and supplies of military products to third countries, and the perfection of business and financial relations with the view of attaining effectiveness and mutual benefit." Commenting on the 5th-generation jet pact, the head of the Sukhoi aircraft company, which is designing the plane, said joint work on the project would be modelled along the lines of the BrahMos missile joint venture. "We will share the funding, engineering and intellectual property in a 50-50 proportion," Mikhail Pogosyan said. "We hope that the export potential of the new aircraft will be higher now that it is a joint project between our two countries." He disclosed that the Indian version of the 5th-generation aircraft would be different from the Russian version because of specific Indian requirements.

cussions on other important projects e.g., supply and licensed production of T-90 tanks, SU-30 MKI aircraft and other strategic issues. He admitted that there has been a delay in the delivery of the repaired and refurbished aircraft carrier Admiral Gorshkov along with supply of deck-based fighter aircraft MiG-29-K and said it was decided that some more studies by technical groups would be done to go through the details. He appreciated the efforts made by the Russian side to resolve issues relating to life cycle support of equipment of Russian origin.

On the question of Integrity Pact, he said, "the objective is neither to create problems for anybody nor to favour anybody. What India wants is transparency in all defence purchases. In the past, there have been a lot of controversies. We want to avoid it. We want speedy modernisation but with transparency. Integrity Pact is one of the safeguards for transparency".

**560. Press Release of the Ministry of External Affairs announcing visit of Prime Minister Dr. Manmohan Singh to Russia.**

**New Delhi, November 6, 2007.**

1. At the invitation of the President of the Russian Federation, H.E. Mr. Vladimir V. Putin, the Prime Minister of India Dr. Manmohan Singh will visit Russia on 11-12 November, 2007. Several bilateral documents are expected to be concluded during the visit.
2. The visit will be in continuation of annual Summit meetings between India and Russia institutionalized since the first visit of H.E. Mr. Vladimir Putin as President to India in October 2000. The last Summit was held in New Delhi during President Putin's visit on 25-26 January 2007, when he also participated as Chief Guest at our Republic Day celebrations. Since then, a series of high-level visits have taken place between the two countries to strengthen bilateral cooperation in various areas.
3. External Affairs Minister, Shri Pranab Mukherjee led an inter-Ministerial delegation to Moscow on 11-13 October 2007 for the 13th Session of the Inter-Governmental Commission on Trade, Economic, Scientific, Technological & Cultural Cooperation. The Commission,

which was co-Chaired on the Russian side by the Deputy Prime Minister Mr. Alexander Zhukov, reviewed the work of the five Working Groups – Trade & Economy, Mines & Metallurgy, Energy, Technology and Tourism & Culture. Earlier in July 2007, a Joint Study Group co-Chaired by the Commerce Secretary finalized its report on increasing bilateral trade to US\$ 10 billion by 2010.

4. There is ongoing dialogue and exchange of views between the two governments on various issues of mutual interest. External Affairs Minister met the Russian Foreign Minister on 24 October 2007 in Harbin (China) on the sidelines of India-Russia-China Trilateral Foreign Ministers Meeting and on 1 August 2007 in Manila on the sidelines of ARF / EAS meetings. The two Foreign Ministers also participated in BRIC (Brazil-Russia-India-China) Foreign Ministers Meeting in New York on 24 September 2007 and India-Russia-China Trilateral Foreign Ministers Meeting in New Delhi on 14 February 2007. National Security Advisor, Shri M.K. Narayanan paid a visit to Russia on 27-28 August 2007 and the Acting Secretary of the Russian Security Council, Mr. Valentin Sobolev visited India on 28 October – 1 November 2007.
5. Raksha Mantri Shri A.K. Antony visited Russia on 17-19 October 2007 for the 7th Session of the Inter-Governmental Commission on Military Technical Cooperation, which was co-Chaired by the Russian Defence Minister, Mr. Anatoly Serdyukov. During the visit, the two countries signed an Inter-Governmental Agreement on Cooperation in the Development and Production of Multi-Role Fighter Aircraft.
6. This year, the Integrated Long Term Programme for Scientific & Technological Cooperation (ILTP) between India and Russia has completed 20 years of fruitful work. A Joint Council of the ILTP, which was co-Chaired by the Chairman of the Scientific Advisory Council to the Prime Minister, Prof. CNR Rao, was held in Moscow on 11-12 October 2007. During the meeting, the two sides concluded a Memorandum of Understanding on the setting up of three new joint centres of excellence on non-ferrous & rare metals, bio-medical technology and accelerators & lasers. There is ongoing cooperation in the space sector in terms of implementation of various inter-Governmental agreements under an umbrella agreement on cooperation in outer space for peaceful purposes signed in December 2004.

7. Dr. Karan Singh, President of the Indian Council for Cultural Relations visited Russia from 7-10 October 2007 to discuss preparations for the 'Year of Russia' in India in 2008. Earlier, during the visit of President Putin to India in January 2007, the two sides had signed a Protocol on holding 'Year of Russia' in India in 2008 and 'Year of India' in Russia in 2009. The 'Year of Russia' will be inaugurated in early 2008 and the year-long programme will include exhibitions, trade fairs, seminars, book fair, film festivals, industry interactions, fashion & food events and various cultural performances.
8. In 2007, India and Russia are also commemorating the 60th anniversary of the establishment of diplomatic relations between the two countries (13 April). In this regard, a Plan of Major Events adopted during President Putin's visit to India in January 2007 is being implemented.

**561. Interview of Prime Minister Dr. Manmohan Singh with RIA Novosti.**

**November 9, 2007.**

***Q 1. Your visit to Russia, and meetings and negotiations with Russian President Vladimir Putin are taking place on the eve of the Year of Russia in India. What significance do you attach to this major event in bilateral relations? What role will the mass media of the two countries play in covering the Year's events?***

**Ans:** The "Year of Russia" in India will be inaugurated in 2008 after my visit to Moscow. In January 2007, it was in President Putin's and my presence that the Protocol on holding the 'Year of Russia' in India in 2008 and the 'Year of India' in Russia in 2009 was signed in New Delhi. The co-Chairs of the respective Organizing Committees - Dr. Karan Singh, the president of the Indian Council for Cultural Relations (ICCR) and Mr. Alexander Zhukov, a Russian deputy prime minister - met in early October 2007 in Moscow and finalized the contours of the program for the Year of Russia in India in 2008.

The Year of Russia and India is an important joint effort to further strengthen the understanding and bonds of friendship at the people-to-people level. The events will encompass diverse fields of human endeavor, including art

and culture, science and technology, and economy and industry. Exhibitions, trade fairs, industry and media interactions, scientific exhibitions, seminars, books fairs, film festivals, and fashion and food events will form part of the Year of Russia in India, involving federal and regional governments on both sides.

The mass media has a critical role in publicizing the events. The mass media should in fact become part of the festivities. It should contribute to overcoming all barriers of language.

***Q 2. What do you think of the political and strategic cooperation between Russia and India at present and in the future?***

**Ans:** India and Russia have enjoyed close ties of friendship and partnership over the last sixty years. Russia occupies a special and unique place in India's foreign relations. Our time-tested relationship is based on deep mutual trust and understanding.

Today India and Russia are strategic partners. Our geo-political interests have always had much in common. We have intensive contacts at all levels, not least through the mechanism of annual summit-level exchanges institutionalized by President Putin during his first visit to India in 2000. I am grateful to President Putin for his strong personal commitment to Indo-Russian relations.

India and Russia present a unique example of two large states with a strong interest in a peaceful, secure and prosperous world order and high stakes in the orderly of the functioning international system. Our shared world view, which envisages a strong role for the United Nations, could help foster closer political relations and cooperation in multilateral forums.

I am very optimistic about the future of our strategic partnership with Russia.

***Q 3 What do you think stands in the way of the growth of Indian exports toS Russia, and what prevents a diversification of bilateral trade in general? What steps do you expect from your Russian partners?***

**Ans:** The volume of our two-way bilateral trade is still far below its true potential. Currently, India's exports to Russia are around US\$ 1 billion, which is less than 1% of India's overall exports and Indian imports from Russia are about 1.2 % of Russia's total exports. Relatively high trans-

portation costs and inadequate exchanges between Indian and Russian businessmen are some of the reasons for these low trade volumes.

Diversification of trade to high value items such as gems and jewellery could offset the transportation cost disadvantage. Rationalization of tariff lines, setting up of joint ventures and greater information exchange would also contribute to enhancing trade. Additionally, there is potential for investment in sectors such as machinery, automobiles, pharmaceuticals, agricultural and food products. A greater involvement of the private sector is essential to expanding bilateral trade. Quality standards and certification requirements need to be mutually agreed upon.

The two governments set up a Joint Study Group in 2006 to examine measures to boost bilateral trade to US\$ 10 billion by 2010 and to study the feasibility of signing a Comprehensive Economic Cooperation Agreement. The report of the Joint Study Group has been submitted, and is in the process of examination by our governments.

I look forward to discussing these issues with President Putin.

***Q 4 India welcomes foreign investment, but Russian investment in the Indian economy is clearly insufficient. What is the reason for this and how can it be remedied?***

**Ans:** India and Russia are two of the fastest growing economies in the world. Both countries have been attracting significant Foreign Direct Investments.

One of the reasons for the currently limited investments seems to be the lack of information and awareness among the business communities on both sides. We set up the India-Russia Forum on Trade and Investment last year for business-to-business interaction. The first meeting of this Forum was held in February, 2007 in India with the participation of over 500 businessmen from both countries. The next meeting of the Forum is scheduled for February 2008 in India. Our banks and financial institutions are now meeting regularly and more banks are seeking to establish correspondent relations. This should contribute to facilitating investments between our two countries.

***Q 5 India actively cooperates with many countries in the military-technical sphere. What is Russia's role in this cooperation and what needs to be done by Russia to further strengthen bilateral strategic ties?***

**Ans:** Russia is India's most important partner in defense cooperation. Russia is the only country with which we have a formal mechanism of an Inter-Governmental Commission for military-technical cooperation, which meets annually under the chairmanship of the two defense ministers.

Defense cooperation is an integral element of our strategic partnership. Many defense contracts are at various stages of implementation. Joint research, development and production of defense equipment will continue to play an important role in strengthening India's strategic partnership with Russia.

An inter-governmental agreement for cooperation in the production and development of fifth generation multi-functional fighter aircraft has been recently signed. I am sure that bilateral collaboration in the field of military technical cooperation will continue to grow in the future.

***Q 6 What is the significance of, and what are the prospects for, alternative energy sources and nuclear power in guaranteeing the country's energy independence and meeting the needs of a growing economy? In view of the positive experience in developing the Sakhalin I deposit, how do you see the development of cooperation between Moscow and New Delhi in the search for and joint development of hydrocarbon fuel reserves?***

**Ans:** With its immense proven reserves of oil and gas, Russia is bound to play a critical role in global energy security in the years ahead. India is currently the fourth largest importer of oil and gas in the world. With India growing at over 8-9 per cent per annum, our energy requirements are increasing rapidly. President Putin has defined energy security as not just security of supply but also security of demand. India can be a major guarantor for energy demand.

Indian and Russian oil and gas companies are engaged in discussions to expand their cooperation beyond the Sakhalin-1 project. At the same time, India is seeking to attract international oil companies to bid for exploration blocs and Russian oil and gas companies are active in India.

Enhancing power generation capacity is an extremely important objective for India. India needs energy from all sources, including renewable and nuclear energy. We have plans to produce 20,000 MW of nuclear power by 2020. International civil nuclear energy cooperation will enable us to augment our nuclear energy production. We are grateful for Russia's ongoing

partnership in the construction of nuclear power units in India. During President Putin's visit to India in January 2007, we issued a joint statement on cooperation in the field of peaceful uses of atomic energy.

***Q 7 What in your opinion are the prospects for cooperation in such areas as science, high technologies, nanotechnology, and space?***

**Ans:** Without doubt, there are excellent prospects. India already has extensive cooperation with Russia in the field of science and technology under the umbrella of the Integrated Long Term Program. This program has been in operation for 20 years, and has many achievements. The setting up of seven Joint Centers of Excellence is one example. Marketing of technologies is an important focus area for both our countries. We are planning to set up a Joint Technology Centre. Nanotechnology and biotechnology are two potential areas of special significance for future cooperation.

Our cooperation in the space sector dates back to the launch of the Indian satellite 'Aryabhata' in April 1975. Indian and Russian space agencies are cooperating in the joint development and use of the Russian satellite navigation system GLONASS, in a joint satellite project involving university students from both sides called YOUTHSAT, and through Indian participation in the Coronas Photon scientific mission. I am particularly excited about our joint mission for lunar exploration.

***Q 8. Where do you see Russian-Indian relations in, say, 15 years' time?***

**Ans:** Indo-Russian relations will grow to great heights. The evolution of our relations will be based on the solid foundation of the last sixty years. I see a continuing convergence and similarity of our world views on major international issues. We have a shared destiny, and a common neighborhood where we seek to build an atmosphere of peace, stability and cooperation. India and Russia will continue to work together to shape an equitable international order which reflects contemporary realities.

I also see much more collaboration to exploit our mutual strengths and complementarities. The rapid growth of our economies will create new opportunities for mutual cooperation, particularly in the area of energy security. Apart from this, the traditional pillars of our strategic partnership can be expected to see a further deepening.

**562. Statement of Prime Minister Dr. Manmohan Singh before his departure for Russia.**

**New Delhi, November 11, 2007.**

I am visiting Russia for the next annual bilateral Summit with President Putin. Ever since President Putin's first visit to India in 2000, the practice of holding annual summits has led to the progressive consolidation of our relations and maintained the momentum of our very close high level contacts.

The India-Russia Strategic Partnership is an enduring bond of friendship, which has strong historical roots. Our relations with Russia have traditionally been a factor of peace and stability in the region and beyond. I am convinced that the strong fundamentals of mutual trust and a shared world view on regional and global issues would continue to bring our two countries closer together in a dynamic international environment.

Our multifaceted bilateral cooperation with Russia is based on long-term interests. The year 2007 is the 60th year of the establishment of India-Russia diplomatic relations. As we rejoice in our joint accomplishments during the six decades of unbroken friendship, we also stand committed to further deepen our partnership in the fields of trade and investment, defence, energy security, science and technology, space and other areas of mutual benefit.

I look forward to continuing my discussions with President Putin to further strengthen India's relations with Russia. I will convey to him the high priority that India attaches to its partnership with Russia, and the benefits that this partnership has brought to our two peoples. I am confident that my visit will lead to a reaffirmation of our joint endeavour towards creating greater economic prosperity and a secure, stable and peaceful world order.

### **563. Opening Remarks of Prime Minister Dr. Manmohan Singh at Joint Press Interaction with Russian President Vladimir Putin.**

**Moscow, November 12, 2007.**

This is the eighth annual summit between India and Russia and my fourth visit to Russia as Prime Minister. I am truly delighted to be back in your beautiful country. Let me thank you, Mr. President, for the warm reception and hospitality accorded to me and my delegation.

I am extremely satisfied with my discussions with President Putin<sup>1</sup>. They were characterized by warmth, cordiality and unanimity on all issues of mutual interest. There has been substantial forward movement on many of the issues that we had discussed at our last Summit in January. We held wide-ranging discussions and identified areas for further cooperation between our two countries.

1. The Russian leader in his remarks said the talks showed that the two countries shared "identical or close views on all issues discussed." He described his meeting with the Prime Minister as "highly constructive and open." "We have confirmed our interest in pursuing bilateral interaction in all directions," Mr. Putin said. Foreign Secretary Shivshankar Menon told the media that a restricted meeting between the two leaders that preceded delegation-level talks went on for more than two hours, which is unprecedented for such interactions, and was marked by "real warmth" and "real meeting of minds." Both leaders underscored the importance of defence cooperation. Dr. Singh described it as "one of the pillars of our strategic partnership." Referring to the signing an inter-government agreement for the development and production of a multi-role transport aircraft (MTA) on the heels of another agreement for joint construction of a futuristic fifth generation fighter plane, Mr. Putin said. "The two agreements open up new prospects for our cooperation in a highly sensitive area of defence." India and Russia also signed agreements to mount a joint space mission to the moon, to combat drug trafficking and unitise rupee debt funds for Russian investments in India. The Foreign Secretary said the Chandrayaan-II unmanned mission, involving landing a rover on the moon would hopefully come before the end of 2011 and would provide a "huge impetus" to space research. Both Mr. Putin and Dr. Singh voiced support for trilateral cooperation among Russia, India and China. Mr. Putin noted that triangular interaction had been put on a permanent basis and showed a tendency for "expansion and deepening in various directions." The two sides covered a host of issues - defence, atomic energy, space and international and regional issues such as Iran and the situation in Pakistan. On the supply of nuclear reactors the Prime Minister restricted himself to answering a query by saying work on the inter-governmental agreements for the supply of four additional reactors, "which Russia had promised in January, is in progress." He said he looked forward to expanded cooperation in civilian nuclear energy between the two countries. As the supply of reactors depended on India crossing the International Atomic Energy Agency and Nuclear Suppliers Group stages, Singh said it was a subject of discussion between the government and its allies. "The process of evolving a national consensus is still on," he said. The PM thanked Putin for Russia's steadfast support in supplementing India's nuclear energy programme - by the supply of fuel to Tarapore and two reactors at

I also had a useful and productive exchange of views with Prime Minister Zubkov.

We discussed ways to substantially upgrade our economic ties, which should form the bedrock of our strategic partnership. We agreed that there are enormous opportunities for collaboration.

We discussed the recommendations made by the Joint Study Group and the establishment of a Joint Task Force to implement them.

I am happy that we have been able to satisfactorily resolve the long pending issue of the utilization of the rupee debt fund. We also agreed to redouble our efforts to achieve a bilateral trade target of 10 billion US dollars by 2010.

I will be meeting the captains of Russian industry and a high-level Indian business delegation later in the evening. I will urge them to invest more in this relationship.

High technology is an area of great promise. Our cooperation is symbolized by the agreement on Chandrayan II, which will include a joint mission to the Moon involving an orbiter, a lander and a rover to carry out scientific studies.

We continued our dialogue on energy. I thanked the President for Russia's steadfast support in supplementing our nuclear energy programme, and its assistance in lifting international restrictions on nuclear cooperation with India that are still in place.

---

Kudankulam in Tamil Nadu - and its assistance in lifting international restrictions on nuclear cooperation with India that are still in place. Singh's allusion ostensibly was to Moscow's support of New Delhi in the NSG, whose waiver it needs to partake of nuclear commerce. In the same context, Putin remarked that India knew that Russia was a reliable partner. "This visit has seen a huge impetus on space cooperation," Menon told mediapersons. He said India would be an equal partner in the development of technology for Chandrayaan II. On the nuclear reactors, the Foreign Secretary said Russia has always been a reliable supplier. "We have always relied on them and will broaden the cooperation when we can." Besides cooperation in space and defence, including the development and production of multi-role transport aircraft, the two sides accorded "high priority" to trade and investment, which has "lagged far behind our excellent political understanding and joint commitment to strategic partnership". It may, however be added in parenthesis that on October 12 Russian Dy. Prime Minister Alexander Zhukov said in Moscow that the nuclear pact for four reactors would be signed in November during the Prime Minister Manmohan Singh visit. He said this is the presence of EMA Pranab Mukherjee after attending the Inter Governmental Commission for Trade, Economic, Scientific-technical and cultural cooperation.

Defence cooperation is one of the pillars of our strategic partnership. Our decision on the co-development and co-production of the Fifth Generation Fighter and the Multi-role Transport Aircraft are major steps forward<sup>2</sup>.

We had a constructive discussion on regional and global issues. There is a mutuality and convergence in our interests. We highly value Russia's role in international affairs and its global leadership on key issues.

Our two countries are preparing enthusiastically for the "Year of Russia in India" in 2008 and "Year of India in Russia" in 2009. We wish to showcase the new Russia in India and the new India in Russia. I have invited both the President Putin and the Prime Minister Zubkov to India.

Ours is a strategic partnership that has stood the test of time. Through our discussions today we have consolidated and strengthened our engagement in different areas. I am very satisfied with the results of my visit.

---

2. The India-Russia accord on development and production of a multi-role transport aircraft (MTA) signed in Moscow marked the beginning of the second major joint research and development initiative in the aviation sector between the two sides. The first one fructified during Defence Minister A.K. Antony's visit to Moscow last month. Both countries agreed to develop and produce the fifth generation fighter aircraft. This is the first time they agreed to develop substantial military platforms - the fifth generation fighter and the MTA. While the fifth generation aircraft will take care of India's security needs after a decade, the latest agreement would replace the An-32, the ageing workhorses of the Indian Air Force, and also give India a first-ever toehold in the exports market. The MTA, with a 15 to 20 tonne payload capability, will be configured for a variety of roles - cargo, troop transport, para-drop, and casualty evacuation, air dropping of supplies, weapon delivery and aerial refueling. As per the pact, the Russian armed forces will buy 100 of the aircraft and the IAF 45. Sixty will be earmarked for sale to third countries.

**564. Speech of Prime Minister Dr. Manmohan Singh at the meeting of Indian and Russian businessmen.**

**Moscow, November 12, 2007.**

“It gives me immense pleasure to meet you all in Moscow. I attach great importance to interaction with entrepreneurs and businessmen of Russia and India. You represent the business and industry of two of the most rapidly growing emerging economies of the world.

In the post-1991 period, the content and format of the economic relations between India and Russia have been redefined. The rapid growth of our markets and economic reforms have created trillion dollar economies in both our countries.

The Indian economy is today witnessing an annual GDP growth rate of about 9%. Never before has such a growth rate been sustained year after year. Our target is to attain a growth rate of 10% in the 11th Plan period.

We have strong macroeconomic fundamentals. Our growth process is largely based on growing domestic consumption. Our foreign exchange reserves have crossed US\$ 250 billion. We expect to receive Foreign Direct Investment of about US\$ 30 billion this year. Our savings and investment rates are close to 35% of our GDP.

We have a highly favourable demographic profile and a robust educational system. We have plans to establish 6000 model schools in the country, open 30 new Central Universities, 370 new colleges, and undertake a huge expansion of Institutes of Technology, Management and Science. I have announced a major expansion in our vocational educational and skill development programme.

Infrastructure development is today a high priority in India. Our infrastructure needs are estimated at over 450 billion dollars over the next five years. Mechanisms have been institutionalized to sustain high levels of investment through public-private partnerships, systematic bidding systems and innovative financing mechanisms.

There are thus enormous opportunities that are opening up in India and government is playing the role of a facilitator. But there is only so much governments can do. There is no substitute for a vigorous two-way engagement between the business communities of India and Russia. I regard today's meeting as a vital step in that direction.

Trade and investment relations between India and Russia have lagged far

behind our excellent political understanding and our joint commitment to strategic partnership. President Putin and I have therefore identified this aspect as having a high priority. We wish to see our economic engagement expand to become a major pillar of the Indo-Russian strategic partnership.

If Russia's trade with China is US\$ 35 billion and with the European Union it is more than 200 billion Euros, I see no reason why India-Russia trade should languish at the level of US\$ 4 billion.

During my last visit, we had decided to set up an Indo-Russian Joint Study Group to suggest ways to enhance our bilateral trade volume to US\$ 10 billion by 2010. I am happy to inform you that the Government of India has approved the report of the Joint Study Group. We have also decided to set up a Joint Task Force to implement the recommendations.

I would like to mention some of the more promising areas for future cooperation. India's energy requirements are going to increase manifold. India has the technological and financial capabilities to participate in both upstream and downstream areas in the hydrocarbon sector. Our refining capacity is projected to double by 2012 from the existing level of 120 million tonnes. There is an expanding market and organized distribution channels. I believe that there are bilateral synergies in this important sector waiting to be exploited.

I would also mention the immense possibility for joint investments in the areas of banking, information technology, telecommunications, high-technology sectors, power, pharmaceuticals and textiles. Indian and Russian enterprises can collaborate in third country markets.

Russia is the second largest producer of rough diamonds in the world. India is the largest processor of rough diamonds, representing more than 80% of the world's mined production. Indian companies have strong presence in the international jewellery market and opportunities for collaboration need to be explored.

India will be hosting the second meeting of the Indo-Russian Forum on Trade and Investment in India in February next year. We look forward to receiving a strong contingent of businessmen and entrepreneurs from Russia. Such meetings should become frequent and lead to tangible outcomes.

It is your enterprise and entrepreneurship that have created the growth story in our two countries. It is this same spirit that we look upon to give a big leap forward to our bilateral economic relations. I assure you that our two governments are fully committed to make this happen."

**565. Agreement between the Federal Space Agency and the Indian Space Research Organisation on Cooperation in the field of Joint Moon Exploration within the Framework of the Agreement between the Government of the Republic of India and the Government of the Russian Federation on Cooperation in the field of Exploration and Use of Outer Space for Peaceful Purposes.**

**Moscow, November 12, 2007.**

**The Federal Space Agency** (hereinafter referred to as Roscosmos), on the one part, and **the Indian Space Research Organisation** (hereinafter referred to as ISRO), on the other part, hereinafter referred to as "the Parties",

**GUIDED** by the Agreement between the Government of the Russian Federation and the Government of the Republic of India on Cooperation in the Field of Exploration and Use of Outer Space for Peaceful Purposes of December 3, 2004 (hereinafter referred to as "the Agreement on Space Cooperation"),

**BEING AWARE** of the importance of Moon exploration and taking into consideration the uniqueness of scientific tasks arising in connection with this,

**TAKING INTO CONSIDERATION** the mutual interest of the Parties in the implementation of the joint lunar exploration mission with launch of joint spacecraft,

**DESIRING** to promote cooperation between Russian and Indian scientists in the field of space sciences,

**HAVE AGREED** as follows:

**Article 1  
Objective**

The objective of this Agreement shall be to define the organizational, technical and legal framework for the implementation of cooperation between the Parties and their Designated Organisations in the field of the Joint Moon Exploration.

**Article 2  
Subject of cooperation**

The cooperation between the Parties within the framework of the present Agree-

ment shall comprise of joint realization of spacecraft for Moon exploration including (i) the Moon Orbiter Module, and (ii) the Moon Lander and Rover Module.

The Moon Orbiter Module, hereinafter referred to as “the Orbiter” shall be placed into the near-Moon polar orbit for the implementation of scientific studies from the above mentioned orbit;

The Moon Lander and Rover Module, hereinafter referred to as “Lander Rover”, shall be delivered to the Moon surface, for in-situ scientific studies at the Moon near-polar area.

The Orbiter and the Lander Rover in their integrated form shall be hereinafter referred to as the “Integrated Spacecraft.”

### **Article 3 Planning and management**

1. The joint activity within the framework of the present Agreement shall be performed on a phase-by-phase basis and aimed at the solution of the following tasks:
  - a) integration of the Orbiter and the Lander Rover, implementation of the complex ground tests, and launch of the integrated spacecraft by an Indian launch vehicle (GSLV) during 2011-2012;
  - b) operation of the Orbiter and Lander Rover during the various phases of the transfer to the Moon orbit, injection into the near-Moon orbit and landing on the Moon surface;
  - c) carrying out of scientific studies in the Moon orbit and on the Moon surface;
  - d) station keeping of the Orbiter, operation of the Lander Rover and acquisition, processing and analysis of scientific data.
2. A joint working group shall be established by the Parties for the management and coordination of the work indicated in paragraph 1 of the present Article, including the coordination of the schedules for the Orbiter and Lander Rover development, the plan of the joint scientific studies and experiments, as well as the development of the mission management concept. This joint working group shall

include representatives of Roscosmos, ISRO, as well as of the Russian and Indian Designated Organizations and Participants taking part in the work within the framework of the joint project.

**Article 4**  
**Responsibilities of the Parties**

1. For the purposes of the implementation of the present Agreement Roscosmos shall:
  - a) have the prime responsibility for the joint development and manufacture along with ISRO of the engineering and flight models of the Lander Rover and its scientific instruments;
  - b) provide to ISRO all information necessary for making a joint decision of the sharing of responsibilities for the joint work cited in a) above;
  - c) seek to engage the relevant Russian Designated Organizations for the joint work cited in a) above;
  - d) work with ISRO to ensure the acquisition and analysis of the down-link information from the Lander Rover and for the generation of control commands during all phases of their operation;
  - e) ensure the delivery by the Russian Designated Organizations on the conditions of temporary import to the Republic of India, of mock-ups and flight models of the Lander Rover, scientific equipment, and associated control and measurement equipment and documents.
  - f) track the Lander Rover after its separation from the Integrated Spacecraft
2. For the purposes of the implementation of the present Agreement ISRO shall:
  - a) have the prime responsibility for the joint development and manufacture along with Roscosmos and its Designated Organisations of the Orbiter and its scientific instruments;
  - b) provide to Roscosmos all the information necessary for making a joint decision on the participation of the Russian Participants in the joint work cited in a) above;

- c) carry out the testing of the Integrated Spacecraft in the territory of the Republic of India, with the participation of representatives of Roscosmos and/or Russian Designated Organizations;
  - d) in due time inform Roscosmos on date of the Integrated Spacecraft launch;
  - e) have the full responsibility for providing a launch of the Integrated Spacecraft into the agreed orbit using ISRO's satellite launch vehicle GSLV;
  - f) track the flight of the Orbiter after the separation of the Lander Rover from the Integrated Spacecraft and share the information with Roscosmos.
3. For the purposes of the implementation of the present Agreement the Parties shall:
- a) provide to each other, the data necessary for the integration of the identified sub-modules and the communication links between the Orbiter and the Lander Rover;
  - b) on the basis of specific mutual arrangement, coordinate the opportunities to install Russian and Indian scientific equipment on the Orbiter and Lander Rover;
  - c) examine the possibility of placing scientific instruments from third parties in the Orbiter or Lander Rover;
  - d) jointly track the flight of the Integrated Spacecraft up to the moment of the separation of the Lander Rover from the Orbiter from it and share with each other the trajectory parameters and attitude data;
  - e) ensure the communication link between the Orbiter and the Lander Rover and the Orbiter and the spacecraft control centre.

#### **Article 5 Designated Organizations and Points of Contact**

1. According to paragraph 2 of Article 3 of the Agreement on Space Cooperation Roscosmos designates:
- i) the Federal State Unitary Enterprise "Glavkosmos" for the coordination and organizational and juridical support of the joint activity;

- ii) the Federal State Unitary Enterprise "Lavochkin Association" for the joint development of the Lander Rover module with ISRO;
- iii) the Institute of Space Research of the Russian Academy of Sciences for the development of the Russian complex of scientific equipment.

2. According to paragraph 2 of Article 3 of the Agreement on Space Cooperation ISRO designates:

- i) the ISRO Satellite Centre, Bangalore as the lead agency for the realisation of Integrated Spacecraft, and Mission Management;
- ii) the Vikram Sarabhai Centre, Thiruvananthapuram as the lead agency for the realisation of GSLV launch vehicle;
- iii) the Satish Dhawan Space Centre, SHAR as being responsible for integration and launch operations of GSLV;
- iv) the Physical Research Laboratory, Ahmedabad as the lead agency for the utilisation of the science data.

3. The representatives of the Parties for operational contacts regarding the implementation of the present Agreement shall be as follows:

on behalf of Roscosmos:

Dr. N. F. Sanko

Head of Space Complexes Division, Department of Automatic Space Complexes and Control Systems;

on-behalf of ISRO:

Mr. P. S. Sastry

Director, Advanced Technologies, ISRO HQ

#### **Article 6 Financial Arrangements**

1. According to Article 6 of the Agreement on Space Cooperation each Party shall bear expenses for the implementation of its own responsibilities as they are defined in the present Agreement.
2. Each Party shall notify and consult for suitable remedial measures

with the other Party when in case encounters financial difficulties that may affect the implementation of the present Agreement.

3. The expenses related to travel of experts should be borne by the sending organization, unless agreed otherwise.

#### **Article 7 Use of Scientific Data**

1. The Parties, their Designated Organizations and Participants in the Joint Activity shall have access to all scientific data resulting from the implementation of the joint mission.
2. Scientific data shall not be transferred by any Party to a third party without a written consent of the other Party. The use of these data for commercial purposes shall not be envisaged; however in case of their use for commercial purposes the Parties shall specifically define the terms and conditions of such use.
3. The initial results obtained during the joint Indo-Russian experiments, and research papers prepared on the basis of these data, shall be published by the Parties jointly regardless of which specific Party or its Designated Organization have obtained these results or prepared the papers.

#### **Article 8 Investigation of Accidents or Failures**

1. In case of the loss or damage to the equipment resulting from accident or failure during the integration of the Orbiter with the Lander Rover or ground tests, transportation of the completely assembled integrated spacecraft to the launch site, its integration with the launch vehicle, during launch or under other circumstances, the Parties shall grant assistance to each other in carrying out the investigation of the accident or failure. At the same time each Party shall in due time inform the other Party on the results of its own investigation.
2. If the accident or damage is related to the equipment or physical members of personnel of Roscosmos, ISRO and/or their Designated Organizations, then their representatives shall have the right, subject

to all necessary authorizations, to participate in the investigation of such an accident or failure, including the search and collection of fragments and /or separate parts of the modules or sub-modules.

3. In case of the accident or failure each Party shall guarantee the storage of fragments and /or separate parts of the integrated spacecraft that it disposes, and their delivery to the safe place for further analysis, and assist to the return of the above mentioned fragments and/or separate parts to the relevant manufacturer.

#### **Article 9**

##### **Application of the Agreement on Space Cooperation**

With regard to Intellectual Property, Exchange of Information, Property Protection, Responsibility, Customs, Export Control, Assistance to Personnel, Settlement of Disputes, the provisions of the Agreement on Space Cooperation shall be applied concerning the activity carried out within the framework of the present Agreement.

#### **Article 10**

##### **Final Clauses**

1. The present Agreement shall enter into force upon its signature and shall remain in force until December 31, 2017 (*note: launch plus 5 years*). It can be extended by mutual written consent of the Parties.
2. The present Agreement may be amended by mutual written consent of the Parties.
3. Each Party can at any point terminate this Agreement giving notice to that effect, to the other Party at least 6 month before the supposed date of the termination of the present Agreement. The termination of the present Agreement shall not affect the Parties' responsibilities according to Articles 7 and 8 of the present Agreement, unless the Parties agree otherwise. In case of the termination of the present Agreement both Parties shall endeavor to reach agreement concerning rules and conditions to minimize negative effect of the termination of this Agreement in relation to the other Party.

Organization**

**566. Agreement between the Government of the Republic of India and the Government of the Russian Federation on Cooperation to Combat Illicit Trafficking in Narcotics, Psychotropic Substances and their Precursors.**

**Moscow, November 12, 2007.**

**The Government of the Republic of India and the Government of the Russian Federation**, hereinafter referred to as “the Parties”,

**Aware** that illicit trafficking in narcotic drugs and psychotropic substances (hereinafter referred to as “narcotics”) and their precursors, as well as abuse of narcotics undermine the political, economic, social and cultural spheres of both States and pose a serious threat to the health and well-being of their people,

**Guided** by the objectives of the Single Convention on Narcotic Drugs of 1961, as amended by the 1972 Protocol to the Single Convention on Narcotic Drugs of 1961, the Convention on Psychotropic Substances of 1971 and the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988, and taking into account relevant resolutions adopted by the United Nations, including the XVII and XX Special Sessions of the United Nations General Assembly of 1990 and 1998,

**Acknowledging** that the objective of eradicating illicit trafficking in narcotics and their precursors is a common responsibility of all States of the world and requires coordination of actions within the framework of multilateral and bilateral cooperation,

**Determined** to develop mutual cooperation with a view to effectively resolving the issue of illicit trafficking in narcotics and their precursors,

**Sharing** their deep concern over the illicit cultivation, production, processing and trafficking in narcotics,

**Recognizing** that the medical use of narcotics continues to be indispensable for the relief of human pain and suffering and that adequate measures must be taken to ensure the availability of narcotics for such purposes,

**Emphasizing** the need for concerted actions in the legal field and in the sphere of cooperation between law enforcement and other competent authorities taking into account the constitutional, legal and administrative systems of the States of the Parties and based on respect for their national sovereignty,

**Recognizing** the need for promotion of effective information exchange including in the field of mutual technical cooperation, prevention, treatment, rehabilitation and social reintegration of drug addicts,

**Aware** of the significance of the development of mutual cooperation with a view to suppressing illicit trafficking in narcotics and their precursors through interaction, coordinated and concerted action and implementation of special programmes in that sphere in accordance with the legislation of their States,

**Have** agreed as follows:

#### **Article 1**

1. The Parties shall harmonize their policies and implement coordinated programmes to combat illicit trafficking in narcotics and their precursors and abuse of narcotics in accordance with their national legislation and the provisions of this Agreement.
2. In furtherance of the objectives of this Agreement, subject to their national legislation, the Parties shall:
  - a) exchange literature on their existing laws, rules, procedures, best practices and methods of curbing illicit trafficking in narcotics and their precursors and any further amendments to the existing legislation;
  - b) cooperate in the fight against illicit trafficking in narcotics and their precursors, laundering of proceeds derived from this kind of criminal activity including tracing, identifying, freezing, seizing and forfeiting of assets and property obtained from illicit trafficking in narcotics and their precursors or used in the process of such trafficking;
  - c) render mutual assistance, subject to their national legislation,

in complying with the administrative and control procedures laid down by the International Narcotics Control Board (INCB) governing activities related to the legitimate international trade in narcotics and their precursors in order to prevent their diversion for illicit trafficking;

- d) exchange information and collaborate to reduce the demand for narcotics through prevention, awareness-raising activities and programmes as well as treatment and rehabilitation activities;
- e) share experience in training of personnel engaged in drug law enforcement and drug demand reduction with a view to suppressing illicit trafficking in narcotics and their precursors.

#### **Article 2**

1. In accordance with their national legislation, the Parties shall cooperate to combat illicit trafficking in narcotics and their precursors and abuse of narcotics, *inter alia*, by:
  - a) assisting each other in the appropriate use of Controlled Delivery, with a view to identifying persons involved in the illicit trafficking in narcotics and the diversion of their precursors into the illicit trade;
  - b) ensuring the exchange of information of operational, technical and general nature between the competent authorities of the Parties specified in Article 3 of this Agreement;
  - c) assisting each other, as mutually agreed, in operational, investigative and other matters connected with illicit trafficking in narcotics and their precursors;
  - d) promptly exchanging information about data on persons involved in illicit trafficking in narcotics and their precursors in accordance with Appendix I to this Agreement and providing further information on investigation, prosecutions and related matters in conformity with Appendix II to this Agreement.
2. This Agreement shall not preclude the competent authorities of the Parties from identifying and developing other mutually acceptable avenues and forms of cooperation.

3. This Agreement shall not cover the issues of extradition and mutual legal assistance in criminal matters.

### **Article 3**

1. The central authorities of the Parties, responsible for the coordination of cooperation under this Agreement, shall be:

For the Indian Party – Department of Revenue, Ministry of Finance of the Republic of India;

For the Russian Party – Ministry of Foreign Affairs of the Russian Federation.

2. Cooperation envisaged by this Agreement shall be implemented through competent authorities of the Parties. The competent authorities of the Parties shall be:

**For the Indian Party:**

Narcotics Control Bureau;

Department of Revenue, Ministry of Finance of the Republic of India;

Central Bureau of Narcotics;

Ministry of External Affairs of the Republic of India;

Ministry of Home Affairs of the Republic of India;

Central Board of Excise and Customs;

Ministry of Social Justice and Empowerment of the Republic of India.

**For the Russian Party:**

Federal Service of the Russian Federation for Narcotics Traffic Control;

Ministry of Foreign Affairs of the Russian Federation;

Ministry of the Interior of the Russian Federation;

Ministry of Health and Social Development of the Russian Federation;

Federal Security Service of the Russian Federation;

Federal Financial Monitoring Service;

Federal Customs Service.

3. The central authorities of the Parties, within 30 days from the date

of signing of this Agreement, shall notify each other the names and official titles of authorized divisions or persons of the competent authorities of the Parties as well as all possible means of communication between them.

4. The competent authorities of the Parties shall establish direct channels of communication to ensure effective interaction in implementing this Agreement. The Parties shall, at the earliest, inform each other through diplomatic channels about any changes in their competent authorities.

#### **Article 4**

1. Assistance within the framework of this agreement shall be provided at the initiative of one of the Parties or at the request of the competent authority of a Party.
2. The request for assistance shall be submitted in written form. In urgent cases the request may be submitted through technical means of communication or orally, but thereafter it shall be confirmed in writing within a period of three days.
3. The request shall include:
  - a) the name of the requested competent authority;
  - b) the name of the requesting competent authority;
  - c) information of those involved in the illicit trafficking in narcotics or diversion of their precursors, including their name, surname, father's name (and possible aliases), sex, date and place of birth, nationality, passport number, date and place of issue, occupation, address, extent of involvement, criminal record and other relevant materials, possible accomplices, date and place of arrest or detention, judicial or administrative measures taken;
  - d) assistance required as well as other data necessary for providing the assistance, including name of the competent seizing authority, date and place of the seizure, seized quantity, chemical analysis data, packing, labeling and trade marks, particulars of conveyance used and mode of concealment, route, place of the narcotics production and

processing, destination, equipment and accessories seized.

4. The request shall be signed by the head of the competent authority, or his/her deputy, or other authorized persons, and authenticated by the official stamp of the requesting authority.
5. Any information exchanged under this Agreement shall be in English, unless otherwise agreed between the Competent Authorities of the Parties.
6. The requested party shall take all necessary measures to ensure prompt and the fullest possible implementation of the request.

#### **Article 5**

1. The request within the framework of this Agreement may be denied fully or partially if the requested Party believes that it may damage its sovereignty, national security or that it contradicts the legislation or international obligations of its State.
2. The request may also be denied if the action underlying the request is not recognized as an offence by the legislation of the State of the requested Party.
3. If the request is denied, the requesting Party shall be informed thereof in written form as well as of the grounds for the denial.

#### **Article 6**

1. Each Party shall maintain the confidentiality of information and documents received from the other Party, if they are classified or if the providing Party considers their disclosure undesirable. The level of confidentiality of such information and documents shall be determined by the providing Party.
2. The information and documents received under this Agreement shall not be used for purposes other than those for which they were requested and provided, unless such information and documents are publicly available in the territory of the requested Party.
3. The information and documents, received by one of the Parties under this Agreement may be disclosed to a third party with the prior written consent of the competent authority that provided them.

**Article 7**

Any dispute between the Parties arising out of implementation or interpretation of this Agreement shall be resolved through consultations between the competent authorities of the Parties. Disputes not resolved between the competent authorities of the Parties shall be subject to further settlement between the Parties.

**Article 8**

This Agreement shall not affect the rights and obligations of each of the Parties under other international treaties to which its State is a Party.

**Article 9**

Each of the Parties shall bear the costs arising in the territory of its State and related to the implementation of this Agreement.

**Article 10**

From the date of entry into force of this Agreement, the Agreement on cooperation between the Government of the Republic of India and the Government of the Russian Federation on the matters relating to the competence of the Ministry of Finance of the Republic of India and the Ministry of Security of the Russian Federation in the sphere of combating illicit traffic in narcotic drugs and psychotropic substances of 28 January 1993 shall be terminated.

**Article 11**

1. This Agreement shall enter into force on the date of receipt of the last written notification on completion by the Parties of their domestic procedures which are necessary for its entry into force.

2. This Agreement shall be concluded for a period of five years. Thereafter, it shall be automatically extended each time for further five-year periods. Either Party may terminate this Agreement by notifying the other Party in writing at least six months prior to the expiry of the relevant five-year period about termination of this Agreement. This Agreement shall terminate upon the expiry of six months from the date of receipt of this notification by the other Party.

Appendices I and II to this Agreement shall constitute its integral part.

**Article 12**

This Agreement may be amended and supplemented by mutual consent of the Parties.

In witness whereof, the undersigned being duly authorized thereto by their respective Governments have signed this Agreement.

**Done** at Moscow on the twelfth day of November, 2007 in two copies each in the Hindi, Russian and English languages, all texts being equally authentic. However, in case of any divergent interpretation of this Agreement the English text shall be used.

**For the Republic of India**

**567. General Letter of Exchange on Utilization of Rupee debt funds for Russian investments in India.**

**Moscow, November 12, 2007**

**Excellency,**

I have the honour to refer to the Agreement between the Government of the Republic of India and the Government of the Russian Federation in the form of the Letters of Exchange of January 28, 1993, and of September 6, 1993, as well as to the Agreement between the Government of the Republic of India and the Government of the Russian Federation on granting a credit to the Republic of India for financing long-term projects in the field of technical cooperation and for purchasing special equipment of September 17, 1992, and to confirm the consent of the Government of the Republic of India to the following.

- “ 1. The accumulated amounts of INR 46,460,308,050.53 and USD 33,479,918.88 at the central accounts of the State Corporation “Bank for Development and Foreign Economic Affairs of the USSR” (hereinafter referred to as Vnesheconombank) with the Reserve Bank of India (hereinafter referred to as RBI) may be utilized by the Government of the Russian Federation besides the purposes stipulated in the above agreements for any investment projects on the territory of the Republic of India that will be subject to the following:

- Shall be used for productive purposes and not for making profit out of transactions on capital markets;
  - Any investment from these funds will be subject to a “lock-in” period of 5 years, during which this equity cannot be sold or transferred to a third party without a permission of the Republic of India;
  - Shall be treated by both Parties as investments made by the Russian Federation or any company incorporated in the Russian Federation;
  - Shall be governed by the laws, rules, and other regulations (including applicable regulations for Foreign Direct Investments) prevalent in the Republic of India as well as by the provisions of the Agreement between the Government of the Russian Federation and the Government of the Republic of India on promotion and mutual protection of investments of December 23, 1994.
2. The enhanced level of trade between the Republic of India and the Russian Federation is expected to absorb the annual repayments by the Republic of India to the Russian Federation in cover of the state credits granted by the USSR and the Russian Federation effected after 15 April 2007.
  3. The Government of the Republic of India and the Government of the Russian Federation may revisit this agreement to reassess how the use of the amounts in Indian rupees and US dollars has worked in practice both in case of investments and purchase of goods and services. In the future, either as a result of such reassessment or otherwise, the Government of the Republic of India and the Government of the Russian Federation may decide whether the amounts accumulated and yet to be paid after 15 April 2007 may be used for investment purposes or repaid in hard currency.
  4. RBI and Vnesheconombank will mutually agree on a banking arrangement implementing the provisions of the present Agreement”.

**I have the honour to confirm** that the above correctly sets out the understanding reached between the two Governments. Your letter and this reply thereto shall constitute an Agreement between the Government of the Re-

public of India and the Government of the Russian Federation on this matter and shall come into force from the date of signing of the Letter of Response.

Excellency, please accept assurances of my highest consideration.

**(Dr. D.Subbarao)**

## SERBIA

### **568. Press Release of the Ministry of External Affairs on the visit of Minister of State Anand Sharma to Serbia, 16-17 September 2007.**

**New Delhi, September 17, 2007.**

During his visit to Serbia from 16-17 September, MOS Shri Anand Sharma met with Serbian Prime Minister Vojislav Kostunica, Foreign Minister Vuk Jeremic, Parliament Speaker O. Dulic and other senior dignitaries.

Both sides reiterated the traditional goodwill in their bilateral relationships. The Serbian side stressed the importance of India in their foreign policy priorities. The Serbian side expressed the hope that trade and investment with India, which is currently at a low level, can be taken to a qualitatively new level through reinvigorating the relationship. The Serbian side expressed concern over developments in regard to Kosovo, negotiations for which are to be held in London tomorrow.

Agreements on visa exemption for Diplomatic and Official passport and MOU for cooperation between the Foreign Service Institute of India and its counterpart in Serbia were signed. An invitation has been extended by Shri Sharma to the Serbian Prime Minister Kostunica to visit India to attend the Conference on Federalism in November 2007.

**569. Agreement between the Government of the Republic of India and the Government of the Republic of Serbia on Visa Exemption for Holders of Diplomatic and Official Passports.**

**Belgrade, September 17, 2007.**

**The Government of the Republic of India and the Government of the Republic of Serbia,**

**Hereinafter** referred to as the Contracting Parties,

**Wishing** to promote their bilateral relations and with a view to facilitating the travel of citizens of the two Contracting Parties,

**Have** agreed as follows.

**ARTICLE 1**

Citizens of one Contracting Party, who are holders of valid diplomatic or official passports shall be exempted from a visa requirement for entry into, exist from and transit through the territory of the State of the other Contracting Party and shall be allowed to stay there for a maximum period of ninety (90) days,

**ARTICLE 2**

1. Members of diplomatic missions and consular posts accredited to the other Contracting Party and their dependents forming part of their household, who are holders of diplomatic or official passports, shall be granted, on request from the diplomatic mission/consular post concerned, within ninety days of the arrival of the diplomatic or official passport holder a residence visa for a period of his/her official stay.
2. A citizen of one Contracting Party being the representative of his/her country in an international organization located in the territory of other Contracting Party holding the said passport shall also enjoy the rights mentioned in paragraph 1 of this Article.

**ARTICLE 3**

Under this Agreement, a citizen of either Contracting Party shall be obliged to observe the laws and regulations in force in the territory the State of the other Contracting Party.

**ARTICLE 4**

This Agreement shall not restrict the right of the competent authorities of the Contracting Parties to refuse the entry or leave to stay to the holders of diplomatic or official passports of the other contracting Party referred to in Articles 1 and 2 of this Agreement, provided that these persons are considered as *personae non gratae*, without providing reasons for their decision.

If a citizen of one Contracting Party loses his/her passport in the territory of the other Contracting Party, he/she shall inform the Authorities concerned of the host country for appropriate action. The diplomatic Mission or Consulate concerned will issue a new passport or travel document to its citizen and inform the concerned authorities of the host Government.

**ARTICLE 5**

1. The Contracting Parties shall exchange, through diplomatic channels, specimens of their valid diplomatic and official passports subject to the provisions of this Agreement not later than thirty (30) days before entry into force of this Agreement.
2. If new diplomatic, official or special passports are introduced, or the existing ones are changed, the Contracting Parties shall exchange their specimens through diplomatic channels not later than thirty (30) days before they have been formally introduced.

**ARTICLE 6**

Any difference or dispute arising out of the implementation of the provisions of the Agreement shall be settled amicably by mutual consultation or negotiation between the Contracting Parties without reference to any third party or an international tribunal.

**ARTICLE 7**

This Agreement shall enter into force thirty (30) days from the date of the receipt of the last notification in which the Contracting Parties have informed each other through diplomatic channels that conditions prescribed by their national laws for entry into force of this Agreement have been fulfilled.

**ARTICLE 8**

Each Contracting Party reserves the right for reasons of security, public

order or public health to suspend temporarily, either in whole or in part, the implementation of this Agreement, which shall take effect immediately after notification has been given to the other Contracting Party through diplomatic channel.

#### **ARTICLE 9**

Either Contracting Party may request in writing, through diplomatic channels, a revision or amendment of the whole or part of the Agreement. Any revision or amendment, which has been agreed to by the Contracting Parties, shall come into effect as stipulated in the Article 7 of the Agreement and shall accordingly form a part of this Agreement,

#### **ARTICLE 10**

This Agreement shall remain in force for indefinite period of time. Each Contracting Party may terminate it any time by informing the other Contracting Party thereof through diplomatic channels, and the Agreement shall cease to be in force thirty (30) days from the date of receipt of such notification.

**Done** in Belgrade on this 17<sup>th</sup> day of September 2007 in two original copies in Hindi, Serbian and English languages, all texts being equally authentic. In case of any divergence of interpretation, the English text shall prevail.

**570. Memorandum of Understanding on Mutual Cooperation Between the Foreign Service Institute, Ministry of External Affairs, the Republic of India and the Diplomatic Academy, Ministry of Foreign Affairs, Republic of Serbia.**

**Belgrade, September 17, 2007.**

**The Foreign Service Institute, Ministry of External Affairs, Republic of India and the Diplomatic Academy, Ministry of Foreign Affairs, Republic of Serbia** (hereinafter referred to as "the Parties") in the spirit of cooperation that has traditionally existed between the two countries and desiring to promote greater cooperation between the two institutions, have agreed as follows:

**Article 1**

The Parties shall cooperate in mutually agreed areas of activity, which inter alia, may include:

1. Exchange of information of structure and content of training programme for diplomats;
2. Identification of experts in mutually agreed areas;
3. Exchange of information on the use of IT in diplomacy;
4. Joint research in mutually agreed areas;
5. Mutual assistance in, designing IT-based course content for distance learning.

**Article 2**

The Parties shall exchange information and publications on training programmes, curricula of studies and other activities of common interest.

**Article 3**

The Parties shall promote the exchange of experts, scholars and diplomatic trainees.

**Article 4**

The Parties will encourage coordinated research on the subject of mutual interest.

**Article 5**

The Parties will decide the specifics and logistics of every project they undertake together. For this purpose, a protocol laying down the financial terms and conditions of the proposed exchanges will be concluded, if necessary.

**Article 6**

This Memorandum shall enter into force on the date of its signature and shall remain in force for a period of three years. Thereafter, it may automatically be renewed for a similar three-year periods at a time, unless terminated by either party by giving a written notice of 90 days to the other party prior to the date of termination of the Memorandum.

IN WITNESS WHEREOF, the undersigned being duly authorized thereto by their respective Governments, have signed this Memorandum and affixed their seals.

**Done** at Belgrade on this 17th day of September 2007 in two originals in Hindi, English and Serbian Languages, all three being equally authentic. In case of any divergence in interpretation, the English text shall prevail.

## **SLOVAK REPUBLIC**

### **571. Press Release of the Ministry of External Affairs on the visit of Minister of State Anand Sharma to Slovakia, 22-24 March 2007.**

**New Delhi, March 25, 2007.**

Shri Anand Sharma, Minister of State for External Affairs paid an official visit to the Slovak Republic from 22nd to 24th March 2007. The last time such a visit took place from India to the Slovak Republic was in 1993 when the then Minister of State for External Affairs, Shri R.L.Bhatia had visited on the occasion of the inauguration of the Slovak Republic. During the visit, Shri Sharma met Mr. Jan Kubis, the Slovak Minister for Foreign Affairs, Mr. Lubomir Jahnatek, Minister of Economy, Mr. Frantisek Kasicky, Minister of Defence and Mrs Diana Strofova, State Secretary of Foreign Affairs. During these discussions, Slovakia reiterated its support for the Indian candidature for the permanent membership of the UNSC. It was agreed to strengthen bilateral relations in trade and investment, defence, culture and other areas. Recognising the excellent relations that exist between the two countries in the area of defence, it was agreed to set up a joint working group for cooperation in this field. They also discussed cooperation in the energy sector, including nuclear energy, the ongoing discussion on the conclusion of a broad based agreement on trade and investment between India and the European Union.

The leaders also exchanged views on international issues such as restructuring of the UN, International Terrorism, Afghanistan, Iraq, Western Balkans etc. They acknowledged that they shared similar perceptions on these issues.

## SWEDEN

### 572. Media Briefing by Official Spokesperson on visit of the Foreign Minister of Sweden.

**New Delhi, May 4, 2007.**

**Official Spokesperson:** Good afternoon everybody. I wanted to brief you about the discussions that External Affairs Minister had with the Swedish Foreign Minister Mr. Carl Bildt. The discussions went on for more than an hour and were followed by a lunch that External Affairs Minister hosted in honour of the visiting dignitary. I will give you a flavour of the discussions that took place.

The External Affairs Minister appreciated the Swedish government's desire to enhance engagement with India across the board and to deepen and diversify the already good bilateral relationship, particularly in the area of trade and economic development. This was given an impetus when the Prime Minister of Sweden had visited India in May 2004. Particular focus is on IT, bio-technology, telecom, environment technologies, renewable energy, investment in infrastructure and so on. There is also a strategic element to the relationship, the first Strategic Dialogue was held between NSA and the Swedish State Secretary in the Prime Minister's office in January 2006. There was a discussion on the economic relationship - bilateral trade has grown by about 42% in the last year and reached the \$2 billion mark. It is predominantly in favour of Sweden due to heavy engineering exports related to the telecom sector. Sweden is 12th in the list of investors in India. In this context, we had mentioned that it would be very useful, if we had a freer travel regime particularly for Indian businessmen and also for tourism as well for professionals, students and so on because this would increase the interest in the two countries and also facilitate business related activities. On the regional aspects, EAM briefed the Swedish Foreign Minister on our own neighbourhood, that is the Composite Dialogue process with Pakistan, the situation in Nepal, situation in Bangladesh and Sri Lanka as well as Afghanistan. He also briefed the Swedish Foreign Minister on the recently held SAARC Summit and the fact that Afghanistan has been included and five Observers had attended the Summit and themes of the Summit and so on. On his part, the Swedish Foreign Minister briefed EAM on developments in the European Union and issues that were facing them there. He also shared EAM's concern on terrorism as an international issue on which

countries need to focus.

The other global issues that they discussed at considerable length was energy and climate change. In this context, EAM also mentioned how climate change had also figured in SAARC, given the fact that melting of glaciers can be cause of common concern for South Asian countries. Similarly, the Swedish Foreign Minister also briefed EAM on how European Union is implementing decisions on climate change within themselves. On international issues - both sides shared their views and desire to work in international fora in a way that strengthens multi-polarity. Two issues that I am sure are of interest to you were discussed - one was reforms in the United Nations and in particular, reforms in the Security Council and India's candidature for permanent seat in the Security Council. In this context, Swedish Foreign Minister said that they favour reforms of the UN as they do realize that the world of today is very different from the world of 1945. He said that he hopes there will be an opportunity for restructuring the Security Council and as and when this happens no other country will have as strong a claim as India does. Besides, the permanent candidature, both India and Sweden are up for elections in different years for non-permanent seats of the Security Council. So that matter was also discussed.

As part of the discussion on energy, EAM briefed Swedish Minister on India's desire to increase and diversify its sources of energy so that we can continue to grow at 9-10% in the future and in this discussion, a desire to move towards clean energy. Naturally, the India-US negotiations on the civil nuclear energy cooperation agreement came up for discussion. And in this context also since you all know that Sweden is a member of the Nuclear Suppliers Group, Sweden said that they are watching the negotiations between India and the United States and would naturally be taking their decisions after that. They understand and they appreciate India's concerns and needs for energy and he assured the External Affairs Minister of a positive approach. Besides that there was a general discussion on other issues - on Sweden's relations with its neighbours and forthcoming G-8 and Outreach members' meeting in June and other meetings coming up at the end of this month. So that should give a fair idea of the discussions.

\* \* \* \*

Thank you.

## SWITZERLAND

### 573. Press Release of the Ministry of External Affairs on the visit of Swiss President Ms. Micheline Calmy-Rey.

**New Delhi, November 5, 2007.**

1. The President of the Swiss Confederation, H.E. Ms. Micheline Calmy-Rey is visiting India from 5-8 November 2007.)

\* \* \* \*

3. The visit of the Swiss President to India follows on the visit of President Dr. A.P.J. Abdul Kalam to Switzerland in May 2005. The visit is also a part of the high-level dialogue between India and Switzerland in the last few years. Ms. Calmy-Rey will be the third Swiss President to visit India, the others being Mr. Flavio Cotti in 1998 and Mr. Pascal Couchepin in 2003. From the Indian side, Shri V.V. Giri had visited Switzerland in 1970. President Dr. A.P.J. Abdul Kalam's visit in May 2005 followed after a long gap of 25 years.
4. Since the establishment of diplomatic relations in 1948, India and Switzerland have enjoyed a warm and friendly relationship. A number of Swiss companies such as ABB, Nestle, CIBA-Geigy and Sandoz established an early presence in the country.
5. Bilateral trade has been growing steadily, topping USD 2.25 billion in 2006 (excluding bullion --- 2.48 billion in 2004; and software services---100 million in 2004). There is still, however, further potential to grow. Over the ten-year period between 1995 and 2005, the two-way bilateral commodity trade has nearly doubled. During the first six months of 2007, India's exports to Switzerland grew by 28.5%, while Swiss exports to India grew by 32.5% over the same period in 2006. The total bilateral trade in the first six months of 2007, grew by 31.3% to CHF 1625.5 million. If this trend continues, the bilateral trade could cross USD 3 billion by the end of 2007, which would represent an increase of nearly a billion dollars in just one year.
6. India and Switzerland have established competencies in science and technology<sup>1</sup>. We are happy that there has been an acceleration of

---

1. During the course of the visit of the Swiss President it was decided that India will send a nuclear expert to Switzerland to explain the India-U.S. civil nuclear agreement as well as

bilateral cooperation in the leading-edge areas of nano science and technology, bio-info-nano technology, research and development of solar cells, brain and stem cell research and other related areas. Cooperation between Swiss and Indian institutes of technology and science are ongoing and both sides are exploring ways to take this further.

7. President Micheline Calmy-Rey will visit Hyderabad and Agra. The bilateral visit takes place as the two countries would be observing 2008 as the 60th anniversary of the signing of the Treaty of Friendship (14 August 1948). The bilateral visit would serve to highlight the progress in partnership the two countries have made over the past six decades and highlight the opportunities for the future.

---

other aspects of its discussions with the International Atomic Energy Agency (IAEA) and the Nuclear Suppliers' Group (NSG). Switzerland is a member of both organisations and their approval is necessary for India to break out of the isolation from global commerce in civil nuclear energy. "I requested the Prime Minister to have an Indian expert to explain the Indo-U.S. nuclear deal," Switzerland President Micheline Calmy-Rey told newsmen after her official round of interaction with President Pratibha Patil, Prime Minister Manmohan Singh and External Affairs Minister Pranab Mukherjee. Switzerland is a major votary of non-proliferation and has opposed conflicts or attempts at armed intervention outside the United Nations mandate. In fact, in 2003 it stopped all military flights over its airspace after the U.S.-led coalition invaded Iraq without the U.N. Security Council mandate. Dr. Singh and Ms. Calmey-Rey also discussed the feasibility of an economic agreement similar to a free trade agreement covering goods, services, investments, intellectual property and trade facilitation. India is the fourth-largest trading partner for Switzerland in Asia and Switzerland is among the 10 major foreign investors in India with over 140 joint ventures. Both countries also have a scientific and technical cooperation agreement as well as joint research programmes in life sciences, IT and biotechnology. Switzerland has had a programme on cooperation and development with India since 1961. This programme is being restructured to orient it towards cooperation primarily in the fields of energy and climate, science and technology by 2010. "We are happy that there has been an acceleration of bilateral cooperation in the leading-edge areas of nano science and technology, bio-info-nano technology, research and development of solar cells, brain and stem cell research and other related areas. Cooperation between Swiss and Indian institutes of technology and science are ongoing and both sides are exploring ways to take this further," said a foreign office news release.

**574. Speech of President Smt. Pratibha Devisingh Patil at a Banquet in honour of the Swiss President Mrs. Micheline Calmy-Rey.**

**New Delhi, November 7, 2007.**

Your Excellency President Micheline Calmy-Rey,

Distinguished Guests,

Ladies and Gentlemen,

I am delighted to welcome you, President Micheline Calmy-Rey and the members of your delegation to India.

Switzerland and India have a long tradition of cordial and friendly relations. India signed a Treaty of Friendship with your country on 14th August 1948. Despite tumultuous changes the world over, our relations have stood the test of time. Your visit assumes special significance as our two countries begin to commemorate the 60th anniversary of our Friendship Treaty. It also assumes special significance as we decide to reinforce our friendship and work towards establishing a Privileged Relationship between our two democracies.

We were honoured by your participation in the just concluded 4th International Conference on Federalism. These Conferences, the 2nd Conference of which was hosted by Switzerland, are unique. They are a step towards establishing a 'community of practices' where people come together to engage in a process of collective learning about federalism. India and Switzerland are good examples of successful federalism where every individual or group enjoys more than one identity and these identities merge into loyalty to the State. Our two countries have succeeded in upholding the principle of "respect for differences" and "unity in diversity" as we call it.

I am pleased to note that under your leadership Swiss foreign policy has been marked by a strong commitment to promoting peace, respect for international law, the fight against poverty and the empowerment of women. The principle of gender equality is enshrined in the Indian Constitution. It not only grants equality to women, but also empowers the State to adopt measures of positive discrimination in favour of women. My Government is committed to the implementation of this directive.

Excellency, today we live in an increasingly interdependent world. It is important for our two countries to recognize the need to dovetail the

complementarities between a technologically advanced, mature industrial economy such as Switzerland and a large, rapidly growing economy like India. We need to forge closer business partnerships in priority sectors such as engineering, precision manufacturing, high technology, food processing, infrastructure, environment, IT and bio-technology. India with its large pool of skilled manpower could help the Swiss industrial, financial and banking sectors to remain globally competitive.

Switzerland is famous for its dynamic small and medium enterprises and India recognizes the role that such enterprises can play in further promoting bilateral trade, investment and technological links. The agro-based and food-processing industry in India needs an infusion of technology and capacity building. We wish to encourage this interaction.

We also wish to strengthen our ongoing useful collaboration in the S&T sector, especially in "bio-info-nano technologies". This could start with lab-to-lab or university-to-university linkages.

To an Indian, Switzerland is synonymous with snow capped mountains and picturesque locales that form the backdrop of many of our blockbuster films. This has naturally made Switzerland one of the most favoured holiday destinations for Indians. We in turn would also like to encourage Swiss tourists to visit India and make it one of their favourite holiday destinations. We look to benefit from Switzerland's experience in developing our tourist infrastructure, adventure tourism and eco-friendly sustainable tourism in the mountainous regions.

Excellency, India and Switzerland are committed to promoting multilateralism and to further strengthening the United Nations. We share the view that international relations must be democratized and the process of United Nations reform, in particular reform of the UN Security Council, expedited to make the Council more representative of contemporary reality. We are determined to eliminate the scourge of international terrorism against which we have zero tolerance. We also look forward to working with Switzerland on other critical issues such as Climate Change which require a global response within the framework of the United Nations, based on the principle of common but differentiated responsibility and respective capabilities. India is not a major polluting nation and we are committed to ensure that our per capita emissions of Green House Gases remain below those of the developed world.

Excellency, we are convinced that your visit will provide further impetus to

bilateral relations between our two countries and pave the way for the Privileged Relationship that we are working towards.

May I now request you all to join me in a toast:-

- U to the health and prosperity of the President of the Swiss Confederation, Her Excellency Mrs. Micheline Calmy-Rey,
- U to the further strengthening of relations between India and Switzerland, and;
- U to the progress and prosperity of the friendly and peace-loving people of Switzerland.

## UNITED KINGDOM

### **575. Press Release issued by the High Commission of India in London on the visit of Minister of State Anand Sharma to UK.**

**London, September 21, 2007.**

Hon'ble Minister of State for External Affairs, Mr. Anand Sharma, MOS(AS) who is on an official visit to the U.K. from 20th – 23rd September 2007, met Rt. Hon'ble Ed Miliband MP, Minister for the Cabinet Office, in London on 21st September 2007. The meeting lasted for 45 minutes. Both sides exchanged views on the excellent status of bilateral relations between India and the U.K., and issues flowing from the International Conference on Peace, Non-Violence and Empowerment: Gandhi and Philosophy in the 21st century, which Mr. Miliband had attended as an official representative of Her Majesty's Government of the United Kingdom.

The Hon'ble Minister had an hour long meeting on 21st September 2007 with Lord Digby Jones, Minister for Trade and Investment in the Foreign and Commonwealth Office. Both the ministers reviewed the current status of Indo-U.K. economic and commercial relations and explored the possibility of increasing opportunities in investment and trade. The concerns expressed by NASSCOM on revisions to U.K work permits regulations were conveyed to Lord Jones, who offered to coordinate an appropriate response by the U.K. Government to meet NASSCOM's concerns. Both the leaders discussed the forthcoming visit of a major U.K. trade delegation led by Lord Jones to India from 24-28 September 2007.

MOS(AS) addressed a gathering of distinguished politicians, diplomats, political scientists, scholars and academicians at Chatham House, The Royal Institute of International Affairs, the U.K's leading Foreign Policy Think Tank, on the topic of "Emerging India and its engagement with the 21st Century World." This was followed by a question-answer session on various issues on India's domestic and foreign policy.

MOS(AS) will be a Keynote Speaker at the Fifth Annual Eurasia Conference being held in the prestigious institution, Judge Business School, University of Cambridge on Saturday, 22nd September 2007. The theme of the meeting is "India in the 21st century and its engagement in the

Caspian and wider Central Eurasian Region.” More than 70-80 eminent personalities from politics, business and academia are expected to attend.

**576. Press Release issued by the High Commission of India in London on the visit of External Affairs Minister Pranab Mukherjee to London.**

**London, October 4, 2007.**

1. Shri Pranab Mukherjee, Hon'ble Minister for External Affairs, Government of India was on a one day visit to London on October 03, 2007.
2. The Mayor of London, Mr. Ken Livingstone, called on Mr. Mukherjee at 1415 hours and briefed him on the involvement of the city of London in celebrating 60th Anniversary of India's Independence and discussed his forthcoming visit to India in November 2008.
3. Mr. Mukherjee met Mr. David Miliband, Foreign Secretary at 1500 hours and discussed a wide range of bilateral, regional and international issues. The visit is part of the ongoing exercise of regular dialogue at the highest level between the two countries.

**577. Press Release of the High Commission of India in the United Kingdom on the visit of Minister of State Anand Sharma to London.**

**London, November 15, 2007.**

Hon'ble Mr. Anand Sharma, Minister of State for External Affairs, paid an official visit to the United Kingdom from 12-14 November, 2007 as a part of the ongoing high-level dialogue with the UK. During his visit Hon'ble Minister visited House of Lords and interacted with Parliamentarians. On 13th November, he met Rt. Hon'ble Lord Mark Malloch-Brown, Minister of State for Africa, Asia and UN to exchange views on bilateral and regional issues. On 14th November, he delivered a talk on "India & Africa -Partnership in the 21st Century" at the International Institute for Strategic Studies.

**INDIA'S FOREIGN RELATIONS - 2007**

**SECTION-VIII**

**INDIA AND THE UNITED NATIONS**

**578. Press Statement on the meeting of High-Level officials of Brazil, Germany, India and Japan on United Nations Security Council Reform.**

**New Delhi, April 19, 2007.**

High-Level Officials of the G-4 (Brazil, Germany, India and Japan) met in Brasilia on 19 April 2007 to assess recent developments regarding United Nations Security Council reform. They reaffirmed the need for an urgent reform of the Security Council. In that context, they reiterated the G-4 proposal that includes new seats in both categories, permanent and non-permanent, and encompass developed as well as developing states. They expressed the readiness of the G-4 to engage in negotiations with all those genuinely interested in a meaningful Security Council reform. They stressed the urgency to achieve results and stated their willingness to participate in negotiations with flexibility, with a view to reaching a decision on this long-standing issue at the earliest. The high-level officials of the G-4 decided to convey the conclusions of the Brasilia meeting to the President of the General Assembly.

**579A. Report on the remarks of Minister of State Anand Sharma on the UN Security Council Reforms.**

**New York, June 16, 2007.**

Questioning the credibility of the 15-member UN Security Council as Africa, Latin America and India do not find representation in it, New Delhi said that the expansion of the body must be an integral part of wide-ranging reforms of the United Nations.

This will ensure that the organisation and its major bodies reflect the current realities and not those existing at the end of the Second World War, Minister of State for External Affairs Anand Sharma has said.

Talking to reporters in New York, he questioned the legitimacy of the 15-member Security Council in which Africa and Latin America and biggest democracy of the world “India” are not represented. What credibility such a body can enjoy? he asked.

India, along with Japan, Germany and Brazil, was working to correct this imbalance and make the most powerful forum of the United Nations— which

takes decisions on security questions and issues mandates applicable to all Member States— transparent and representative of all membership by ensuring that views of all regions and groupings are heard when major actions are contemplated.

India, Japan, Germany and Brazil, who are strong contenders for permanent seats on an expanded Council, have been working to change the make up of the Council so that its decisions enjoy greater legitimacy.

The expansion of the Security Council should be seen in the context of overall reforms of the United Nations which would make it more effective and efficient and give strong legitimacy to its decisions at a time when the organization is being asked to play increasing role in conflict prevention and resolution, he stressed.

Sharma, who was talking to reporters shortly after the General Assembly declared October two as International Day of Non-Violence in recognition of relevance of Mahatma Gandhi's philosophy of peace and brotherhood in the present-day, spoke of the great relevance of his message in the current ridden world.

That the Mahatma's message enjoys worldwide support is clear from the fact that the resolution, initiated by India, was adopted unanimously, he said.

Mahatma Gandhi's message, he said, was universal as it emphasised not only non-violence but also the need to create condition in which every human being could live in dignity. His philosophy envisages a world without suffering, without conflict and without hunger. In short, the message encompassed equity, dignity and freedom for all, he stressed.

**579B. Resolution adopted by the General Assembly: A/RES/61/271 of 27 June 2007 to observe the International Day of Non-violence.**

**New York, June 27, 2007.**

**The General Assembly,**

**Reaffirming** *the Charter of the United Nations, including the principles and purposes contained therein,*

**Recalling** *its resolutions 53/243 A and B of 13 September 1999, containing the Declaration on a Culture of Peace and the Programme of Action on a Culture of Peace, 55/282 of 7 September 2001 on the International Day of Peace and 61/45 of 4 December 2006 on the International Decade for a Culture of Peace and Non-Violence for the Children of the World, 2001–2010, as well as other relevant resolutions,*

**Bearing** *in mind that non-violence, tolerance, full respect for all human rights and fundamental freedoms for all, democracy, development, mutual understanding and respect for diversity are interlinked and mutually reinforcing,*

**Reaffirming** *the universal relevance of the principle of non-violence, and desiring to secure a culture of peace, tolerance, understanding and non-violence*

1. *Decides, with effect from the sixty-second session of the General Assembly and guided by the Charter of the United Nations, to observe the International Day of Non-Violence on 2 October each year, with the International Day being brought to the attention of all people for its celebration and observance on this date;*
2. *Invites all Member States, organizations of the United Nations system, regional and non-governmental organizations and individuals to commemorate the International Day of Non-Violence in an appropriate manner and to disseminate the message of non-violence, including through education and public awareness;*
3. *Requests the Secretary-General to recommend ways and means by which the United Nations system and the United Nations Secretariat could, within existing resources, assist Member States,*

*upon request, in organizing activities to commemorate the International Day of Non-Violence;*

4. *Also requests the Secretary-General to take necessary measures, within existing resources, for the observance by the United Nations of the International Day of Non-Violence;*
5. *Further requests the Secretary-General to keep the General Assembly informed at its sixty-third session of the implementation of the present resolution, within the United Nations system, as regards the observance of the International Day of Non-Violence.*

**580. Press Release of the Ministry of External Affairs on the election of Dr. Arjun Sengupta as Chairman of the Inter-Governmental Working Groups of the Human Rights Council on the Right to Development.**

**New Delhi, September 18, 2007.**

Dr. Arjun Sengupta, Member of Parliament (Rajya Sabha), has been elected as the new Chairperson of the Inter-Governmental Working Group of the Human Rights Council on the Right to Development. The Working Group on the Right to Development is one of the Inter-Governmental Working Groups on Human Rights and was established in 1998. Dr. Sengupta has been associated with the issues relating to Right to Development for a long time and has been serving as the Indian expert on Human Rights and Extreme Poverty. He is well-known internationally in the field of human rights and obtained strong endorsement for his election to the Working Group from all countries in the world. The Working Group on the Right to Development holds particular importance to India as this is the only Inter-Governmental mechanism in the Human Rights machinery that focuses on the issue of Development.

**581. Statement by External Affairs Minister Pranab Mukherjee at the General Debate of the 62nd UN General Assembly.**

**New York, October 1, 2007.**

Your Excellency,

Mr. President, Excellencies,

Ladies and Gentlemen,

Kindly accept my congratulations on your election to the Presidency of the 62nd session of the UN General Assembly. My delegation assures you of its full co-operation as we address issues identified in the Annual Report of the Secretary-General and responsibly and creatively move forward with pending reforms to this Organization.

**Mr. President,**

At the outset I would like to express India's deep gratitude to all Member States for the unanimous adoption recently by the UN General Assembly of the resolution to annually observe the International Day of Non-Violence on October 2, the birth anniversary of Mahatma Gandhi. I also look forward to participation by Member States in the informal UNGA Plenary and other functions being organized tomorrow at the United Nations to mark the first International Day of Non-Violence.

**Mr. President,**

The topic for this year's debate - Responding to Climate Change - is both timely and relevant. India's views on it have recently been set forth at the high-level event on Climate Change here last week. Combined with the exchange of views in the General Debate, it will no doubt provide a useful backdrop to the meeting of the UN Framework Convention on Climate Change to be held later this year in Bali, Indonesia. The impact of climate change and environmental degradation falls disproportionately upon developing countries. Developing countries, are the most vulnerable to it, and also lack the means to tackle it.

Measures to address climate change must be based on mitigation and adaptation strategies with fair burden sharing and measures to realize sustainable patterns of consumption and production. The process of burden sharing must also take into account where the primary responsibility for the present state of GHG concentration in the atmosphere rests and not foreclose rapid and sustained economic development for the developing world, which, in any case, is an imperative for adaptation.

Technology is the other key area that needs to be addressed. It is important that critical clean technologies are made available and affordable for developing countries. The IPR regime must balance rewards for innovators with the common good of humankind. Concerted international action to address climate change in accordance with the principle of common but differentiated responsibilities and respective capabilities, as also national circumstances and social and economic conditions, is the need of the hour. India, for whom energy security is a national imperative, has a very small individual carbon footprint with per capita CO<sub>2</sub> emissions just about a quarter of the world's average. Even then, we are determined that even as we pursue economic growth, our per capita GHG emissions will not increase beyond those of the industrial countries.

**Mr. President,**

Poverty and underdevelopment are amongst the central challenges of our times. The overarching requirement is for sustained economic growth to eradicate poverty in developing countries. However, economic growth must also be measured against the template of social inclusion. Growth alone is not enough if it does not produce benefits that are sufficiently dispersed, not only in terms of increased income and employment but also for improved health, nutrition, and education for all.

I affirm India's resolve to achieve the internationally agreed development goals, including the Millennium Development Goals. The Government of India accords the highest priority to inclusive growth, including the political, legal, educational and economic empowerment of women, effective and affordable public health and enhanced access to educational opportunities, especially for all those who are disadvantaged.

It is apparent that progress in the achievement of the internationally agreed development goals has been tardy. The international community, through the UN system, must more effectively support the efforts of developing countries to achieve the development goals. A comprehensive reform of the international financial architecture is a key ingredient in this process. The United Nations must play an important role in overseeing the reform of the international financial architecture. This should include measures to ensure a greater voice for and participation by developing countries in the Bretton Woods Institutions. The process of reform must be carried to its logical conclusion if the credibility of these institutions is to be enhanced.

We must also address as a priority the regrettable inversion of global resource flows. Today, instead of the urgently needed inflow of resources to developing countries to buttress their national economic development plans, we are confronted with a net outflow from them. Official Development Assistance showed a marked fall during 2006, and remains well below the target of 0.7% of GNP. It is primarily being used to finance debt relief. That this is happening after so many years of liberalization and globalization highlights our collective failure. Perhaps we should be considering mechanisms such as an international debt commission to redress the problem of developing country debt. The LDCs, who are particularly hard hit by rising energy costs, find themselves in an even more difficult situation. Enhanced and predictable resource flow to developing countries remains a key objective of the global partnership for development. India will continue

to do what she can to help with capacity building in other developing countries, and to assist them through ODA within the limits of our capacity. By the end of the year, LDC imports into India will face a zero tariff regime.

Early and substantive progress at the Doha round of trade negotiations, based on the primacy of the development dimension, is another imperative. We must return to the negotiating table with a redoubled sense of urgency, while recognizing that adherence to the existing mandate remains critical. Nor can the interests of subsistence farmers be ignored or equated with those of other sectors. An illogical linkage between agriculture and NAMA will only complicate the developmental impact of the round. The overarching principle of special and differential treatment for developing countries remains a categorical imperative.

**Mr. President,**

As part of India's commitment to the achievement of human rights for all, and as a member of the Human Rights Council, we remain actively involved in developing the institutional framework of this body, including the Universal Periodic Review Mechanism, based on effective international cooperation as a central principle in the Council's method of work. India will work towards developing an international normative framework for promotion and protection of human rights. India is honored to be one of the first signatories of the International Convention for the Protection of all Persons from Enforced Disappearance. Earlier today, I also had the honour of depositing India's instrument of ratification of the UN Convention on the Rights of Persons with Disabilities.

As the largest democracy in the world, India has developed a system of local self-government with democratically-elected institutions of representative government at all levels, i.e., the village, the district, the state and at the national level. The effort to make participatory democracy more meaningful to every Indian citizen underpins what is perhaps one of the greatest social experiments in the world today, namely, the transfer of decision-making power to nearly one million elected women local government representatives. As a result, women are not merely the beneficiaries of change in India, but are its instruments.

As the world's largest democracy, it was also natural for India to support the establishment of the UN Democracy Fund. We had made an initial contribution of \$10 million to this Fund and remain actively and constructively involved in realizing the objectives for which it has been set up. As a small

token of our commitment to this laudable initiative, I have the privilege of announcing a further pledge of \$10 million to the UN Democracy Fund.

**Mr. President,**

The international system cannot be reordered meaningfully without comprehensively reforming the United Nations. If the Organization is to remain the cornerstone of the international architecture in this century, it cannot remain mired in the realities of the 1940s. Despite substantive implementation of the UN reform agenda that emerged from the Outcome Document of the World Summit in 2005, such reform will inevitably remain incomplete without comprehensive reform and expansion of the Security Council, and revitalization of the General Assembly. Elements and ideas on the reform of the Security Council have been discussed for well over a decade, through numerous reports and interminable consultations. It is now time for inter-governmental negotiations to commence in order to make the Security Council more democratic, representative and responsive. We, with partners from Africa, Latin America and Asia, tabled a resolution on September 11, 2007, spelling out the principles on which reform ought to be based if it has to be meaningful. These principles are: expansion in both permanent and non-permanent categories of membership; greater representation for developing countries, including representation for developed countries that is reflective of contemporary world realities; and comprehensive improvement in the working methods of the Security Council, including ensuring greater access to island and small states. We welcome recent statements from this podium by President Bush of the USA and other world leaders on the need for UNSC reform in both permanent and non-permanent categories. It is high time that we collectively brought these ideas to implementation.

**Mr. President,**

Reform of the United Nations would also be incomplete without revitalization of the General Assembly. The central goal of such revitalization must be the restoration and enhancement of the role and authority of the General Assembly, as originally envisaged in the Charter.

Given the significance of developmental activities for the developing world, India sees a corresponding need for the reform of UN's operational activities for development. Since these activities are aimed at supporting the work of Member States, it follows that Members must determine their direction and shape through an intergovernmental process. The litmus test for any reform

proposal is whether it improves the support extended by the UN to the efforts of programme countries. India would, therefore, judge reform proposals by their impact on the ground, the resultant improvement in the effectiveness of the system, and by the impact on transaction costs for the UN development system.

**Mr. President,**

Steps to achieve the complete elimination of nuclear weapons have also only made limited headway. Despite some progress, the world remains far from achieving the objective of total elimination of nuclear weapons. India's long-standing commitment to universal, non-discriminatory and comprehensive nuclear disarmament is embodied in the vision of late Prime Minister Rajiv Gandhi for a "nuclear-free and non-violent world". This vision was put forward nearly two decades ago.

It remains undiminished today. Indeed, it is all the more relevant today, given the fact that peaceful uses of nuclear energy can address the inexorably growing demand for new and non-polluting sources of energy to fuel economic development. We will be bringing proposals to member states and this organisation to see how we can refocus on general and complete disarmament, particularly nuclear disarmament. It is disarmament that is our agreed goal, and that subsumes arms control and non-proliferation.

It is well known that India has an impeccable record in preventing the proliferation of sensitive technologies. This is in keeping with our commitment to being a responsible nuclear power. India is ready to work with the international community to develop a new international consensus on non-proliferation. The international community needs to intensify the effort to address the very real threat posed by the link between proliferation of WMDs and related materials and technologies to non-state actors. The risk posed by the intersection between proliferation and terrorism is real and serious. The central objective must be to ensure that our solidarity in words is translated into action.

**Mr. President,**

The adoption of the United Nations Global Counter-Terrorism Strategy last September was a noteworthy development, signaling the will of the international community to combat this menace in a holistic and coordinated manner. Welcome as the strategy is, there is much more that needs to be

done to combat the menace that international terrorism has become. India is convinced that without the early adoption of the Comprehensive Convention against International Terrorism, the global struggle against terrorism remains incomplete and likely to succeed only partially. We must ensure that there is zero tolerance for all forms of terrorism.

**Mr. President,**

In conclusion, I would express the hope that our deliberations in the year ahead will lead us to enlightened action. With maturity and resolve we will successfully overcome the many challenges before us.

Thank you Mr. President.

**582. Observance of the First International Non-Violence Day at the Special Plenary Session of the United Nations General Assembly: Speech of Ms. Sonia Gandhi.**

**New York, October 2, 2007.**

Your Excellency President Srgjan Kerim,

Your Excellency Foreign Minister Dlamini Zuma,

Your Excellency Secretary General Ban Ki-moon,

Excellencies,

Ladies and Gentlemen,

It is an honor to address the United Nations General Assembly, as we observe on Mahatma Gandhi's birth anniversary, the "International Day of Non-violence" for the first time. This is a collective homage of the world community to one of the greatest men of all time, an homage that rises above politics and speaks to all humankind. May I convey to the General Assembly, the gratitude of over a billion people of my country for this tribute. I also extend our sincere appreciation, to all those member states who co-sponsored the resolution and extended their support to it. To South Africa in particular on whose very soil, Mahatma Gandhi, on the 11th of September 1906 started his political and spiritual journey, the "Satyagraha" or "Truth Force" movement.

War, conflict and bloodshed, have long been rooted in human history and the human psyche as the preordained and inevitable instruments of power. Violence has come to be regarded as the norm and, nonviolence as a mere aberration. It is striking, as one observer has pointed out, that there is no proactive word for nonviolence in almost any language. It has not been regarded as a concept in itself, but simply the negation of something else.

Other concepts have their own antonyms: war and peace, sin and virtue, hatred and love. Yet even though all the world's religions preach nonviolence, there is no affirmative, independent word for it. Thus, in our very thought processes, the concept of violence has been central, that of nonviolence marginal.

Not surprisingly, then, fallacies about non-violence abound. Some think that it is a sign of weakness or cowardice. Nothing could be further from the truth. Nonviolence goes far beyond passive resistance or even civil disobedience. To practice it in its true spirit demands strict discipline of mind: the courage to face aggression, the moral conviction to stay the course and the strength to do so without harbouring any malice towards the opponent.

At the heart of Mahatma Gandhi's philosophy of nonviolence, was his belief - that strength comes from righteousness, not force. Power comes from truth, not might. Victory comes from moral courage not imposed submission. He held that means and ends are inseparable, and that in fact the means themselves shape the ends. He believed unworthy means can never produce worthy ends.

History, both past and contemporary, confirms that violence only begets violence in an unending spiral, fostering hatred and revenge. Violence seeks to impose and overwhelm, which is why its victories are transitory. Nonviolence seeks to engage and persuade, which is why its results are enduring.

The Gandhian practice of nonviolence took many forms, but it always required an intense engagement with the opponent. The victory that Mahatma Gandhi strove for was to win over the adversary, not to vanquish him. The dialogue that he fostered, was founded on a spirit of genuine tolerance - the appreciation and understanding of the "other" or "others". He asked us to introspect, to reach out and engage, to look within and ask to what extent are we ourselves responsible?

Can anyone really claim a monopoly over truth and righteousness? We

must allow space for understanding and accommodation, for the soaring spirit of humanity to rise above the hopelessness and despair which threatens to ravage the human soul.

It is often said that Mahatma Gandhi's times, were radically removed from those we live in today. Some question the relevance of his methods in today's fast-paced and globally interlinked world, where threats to peace, security and social harmony abound. But the essential validity of Mahatma Gandhi's truth has not changed, because human nature itself has not changed.

Looking back, if the 20th century was the most bloody in human history, it was also the century where non-violence saw its greatest triumphs, cutting across the boundaries of continents and faiths. It is worth remembering that among the myriad civil disobedience movements, the only army of non-violence, was the one led by Khan Abdul Ghaffar Khan known to history as 'The 'Frontier Gandhi'.

Today individuals and movements all over the world, continue to develop innovative, nonviolent ways to overcome oppression, combat discrimination and build democracy. These are the successes which keep the flame of hope burning bright.

Mahatma Gandhi himself was, first and foremost, a man of action. While he was indeed a man of deep contemplation, he was also a man of galvanic energy. It is this energy, that enabled him to overcome resistance arising from hostility, indifference and cynicism. It is this energy that gave him the resilience to press ahead, in spite of tremendous obstacles and tribulations. As he himself once said: "we must ourselves become the change we seek."

As we look around us today, we see violence everywhere.

- U Violence against each other reflected in the spread of terrorism, the disturbing emergence of non-state players and our collective failure to move towards comprehensive, universal nuclear disarmament.
- U Violence against the poor and the vulnerable, against women and children, caused by social strife and inequities spawned by economic globalization.
- U And violence against Planet Earth reflected in man-made, climate-changing activities and unsustainable lifestyles.

Even as we are inspired by Mahatma Gandhi's life, let us today affirm our commitment to the Gandhian way, a commitment that is reflected in demonstrable actions and results. Let us ensure that this Day, does not get reduced to an annual ritual. Let us strive to adopt his methods to our present day challenges, with earnestness and perseverance.

Ladies and gentlemen it is not the relevance of Mahatma Gandhi that is in question today. What is in question today is whether we have the courage to emulate, what he preached and practiced, what he lived and died for. There are some who believe that violence and aggression, are innate in human nature. There are those who have shown that human beings, can and have often evolved to a higher stage.

For Mahatma Gandhi, the remarkable personality we honour today, a man who achieves complete non-violence, "is not a saint".

He is "truly a man".

Let us then strive to follow this path of non-violence and in so doing become "truly human".

I thank you.

**583. Press Release of the Ministry of External Affairs on the election of India by the UN General Assembly to the Independent Audit Advisory Committee and the Advisory Committee on Administrative and Budgetary Questions.**

**New Delhi, November 2, 2007.**

India was today elected by acclamation by the Fifth Committee of the UN General assembly to the Independent Audit Advisory Committee (IAAC) and the Advisory Committee on Administrative and Budgetary Questions (ACABQ).

Shri V.N. Kaul, Comptroller and Auditor General of India was elected as a member of the newly established Independent Audit Advisory Committee (IAAC) of the United Nations.

The IAAC was mooted by the World Summit 2005 which asked for strengthening management reforms in the UN subsequent to which the

Secretary-General, submitted a report entitled "Investing in the United Nations: for a stronger Organization worldwide", which outlined 23 broad reform proposals including setting up of the IAAC. The IAAC was established in December 2005 vide UN General Assembly (UNGA) Resolution No. 60/248 and will be operational from October 2007. The creation of the IAAC will contribute to the efforts to improve accountability of the UN Secretariat towards Member States and create a comprehensive management accountability and oversight framework in the United Nations.

The IAAC is composed of only 5 members, elected by the UNGA. The candidates have been evaluated and attested through consultations with an external relevant institution, such as the International Organization of Supreme Audit Institutions (INTOSAI). This ensures that only highly competent and qualified people are chosen for this sensitive task. The IAAC's function is to advise the GA on the effectiveness of the UN's audit and other oversight functions and on accounting and disclosure practices. It would also advise the GA on the effectiveness of risk management procedures and identify deficiencies in the UN's internal control framework as well as advise the GA on operational implications of issues and trends of UN's financial statements and reports.

Shri Kaul, who is an Indian Administrative Officer of 1965 batch, has had a long and distinguished career and has served in various capacities within and outside India. He has considerable international experience having worked in UNESCAP and has served on various international bodies including UN Panel of External Auditors and as the Secretary general of ASOSAI.

Shri Nagesh Singh, First Secretary in the Permanent Mission of India to the UN Offices at New York, was elected to represent India on the ACABQ. The ACABQ is a 16-member subsidiary organ of the UNGA which advises it on administrative and budgetary matters.

**584. Remarks by Permanent Representative at the UN Nirupam Sen on Agenda Item 9 - Report of the Security Council and Agenda Item 122 - Equitable Representation on and increase in the Membership of the Security Council and other related matters - Joint Debate in the General Assembly.**

**New York, November 13, 2007.**

Please see Document No. 658.

## **DISARMAMENT**

**585. Statement by Permanent Representative to the Conference on Disarmament Jayant Prasad on Nuclear Disarmament at the Conference on Disarmament.**

**Geneva, February 13, 2007.**

**Mr. President,**

First, allow me to say that we are most happy to see you in the chair. Over the past week, in accordance with the organisational framework for the first part of the 2007 Session of the Conference on Disarmament, we have undertaken useful discussions on agenda items 1 and 2, both in the plenary held on 6th February and, thereafter, in six informal meetings. In this connection, I should like to express my delegation's appreciation for the initiative taken by the collective presidencies of the Conference for this year. In particular, we would like to compliment Ambassador MTSALI, as the first and incumbent President. The three distinguished Coordinators who have presided over the informal meetings on agenda items 1, 2 and 3, Ambassador STROMMEN, Ambassador TREZZA, and Ambassador MEYER also deserve our commendation for conducting the respective proceedings in an exemplary way, which is a good augury for the work of the Conference this year.

2. The discussions last week have reflected the resolve of UN Member States, contained in the final document of the first special session of the General Assembly devoted to disarmament and the UN Millennium Declaration, that nuclear disarmament is the most critical issue on the global disarmament agenda and that our ultimate goal is the complete elimination of nuclear weapons.
3. While maintaining a credible minimum nuclear deterrent, India continues to be committed to the goal of nuclear weapon free world, through global, verifiable and non-discriminatory nuclear disarmament. India's responsible nuclear doctrine is based on no first use and non-use of nuclear weapons against non-nuclear weapons States. The doctrine also reaffirms India's readiness to join multilateral negotiations for the reduction and elimination of nuclear weapons. India has continued to observe a moratorium on nuclear explosive tests. We are ready to participate in negotiations, in the Conference, on a non-discriminatory, multilateral and internationally

and effectively verifiable treaty banning the production of fissile material for nuclear weapons or other nuclear explosive devices.

4. During the course of the informal discussions, we have spelt out India's specific proposals to build a consensus that strengthens the ability of the international community to move towards the goal of nuclear disarmament. The proposals presented have already been reflected in the non-paper on agenda item 1, compiled by Ambassador Strommen, that lists and clusters all concrete proposals for substantive issues that require more focussed attention during the second part of the annual session, with a view to commencement of negotiations.
5. In order to facilitate further consideration of practical steps for the progressive and systematic efforts to attain the cessation of the nuclear arms race and nuclear disarmament, and the prevention of nuclear war, I am separately requesting the Conference secretariat to circulate to the members of the Conference the text of India's working paper on nuclear disarmament presented on 6th October 2006 at the First Committee of the General Assembly at its 61st Session. This will facilitate the further discussions on agenda items 1 and 2 in the forthcoming meetings of the Conference.
6. We have gained from the format of the discussions, which have been held mostly in an informal setting. This has allowed for a freer exchange of ideas, besides providing greater clarity on the agenda issues that lie before us. India will remain engaged, together with other delegations, in seeking ways to begin substantive work on all principal issues on the agenda of the Conference in a manner that takes into account the concerns and priorities of its constituents and secures their support. We are hopeful that the recommendations and proposals presented by the Member States and our further deliberations will contribute to an agreement on the programme of work of the Conference.

I thank you, Mr. President.

---

#### **Annex: A Working Paper by India on Nuclear Disarmament**

The international community has long recognised that nuclear weapons pose the greatest danger to humankind and therefore, it is

essential for it to take urgent steps towards realisation of the goal of their complete elimination. The UN General Assembly, in its very first resolution, Resolution 1(I) of 1946, adopted unanimously, sought the elimination, from national armaments, of atomic weapons and all other major weapons adaptable to mass destruction and to use of atomic energy only for peaceful purposes, a goal that has been reaffirmed by the General Assembly on several occasions thereafter.

2. The Final Document of the First Special Session of the General Assembly devoted to Disarmament (SSOD-I), the only document on nuclear disarmament adopted by consensus by all member States, affirmed and accorded the highest priority to the goal of nuclear disarmament and outlined concrete steps to achieve that objective. It pointed out that the achievement of nuclear disarmament would require urgent negotiation of agreements, at appropriate stages, and with adequate measures of verification satisfactory to the States concerned, for (i) the cessation of the qualitative improvement and development of nuclear weapon systems; (ii) the cessation of production of all types of nuclear weapons and their means of delivery and of the production of fissionable material for weapon purposes; and (iii) a comprehensive, phased programme with agreed timeframes, whenever possible, for progressive and balanced reduction of stockpiles of nuclear weapons and their means of delivery, leading to their ultimate and complete elimination at the earliest possible time. It emphasized that in the task of achieving the goals of nuclear disarmament, all nuclear weapon States, in particular those among them that possess the most important nuclear arsenals, bear a special responsibility. It also emphasized that the process of nuclear disarmament should be carried out in such a way and requires measures to ensure that the security of all States is guaranteed at progressively lower levels of nuclear armaments. The principles and objectives, which were agreed by all, remain of continuing relevance and need to be reaffirmed by the international community.
3. The International Court of Justice (ICJ) concluded in 1996 that: "there exists an obligation to pursue in good faith and bring to a conclusion negotiations leading to nuclear disarmament in all its aspects under strict and effective international control." The UN Millennium Declaration reiterated the commitment of the Member States of the United Nations to strive for the elimination of weapons of mass destruction, in particular nuclear weapons, and to keep all options

open for achieving this aim. Various proposals for nuclear disarmament have since been considered, including in a number of studies ranging from the Canberra Commission to the more recent WMD Commission. The Pugwash Movement and the NGO Community have also made valuable contributions to the nuclear disarmament discourse.

4. The Non-aligned Movement, described as the largest peace movement in history, has always accorded the highest priority to nuclear disarmament. The XIV Havana NAM Summit reaffirmed the Movement's principled positions on nuclear disarmament and emphasized the necessity to start negotiations on a phased programme for the complete elimination of nuclear weapons with a specified framework of time, including a Nuclear Weapons Convention.
5. The international community is far from achieving the objective of the total elimination of nuclear weapons, though there has been some progress in this regard. In particular the Russian Federation and the United States have taken steps to reduce their nuclear weapons stockpiles, and India welcomes such efforts. Notwithstanding these reductions the global threat posed by nuclear weapons has not subsided. In recent years another dimension has been added by the possibility that terrorists and other non-State actors may acquire and use weapons of mass destruction, including nuclear weapons and so-called "dirty-bombs".
6. Despite the end of the cold war, the international security situation is still characterised by lack of trust and political will amongst states to make progress towards the complete elimination of nuclear weapons. The non-nuclear-weapon States have serious concerns about the commitment of nuclear-weapon States to nuclear disarmament. The absence of any reference whatsoever to disarmament and non-proliferation in the 2005 World Summit Outcome underscored this fact. The Final Document of SSOD-I enshrined the essential principle of mutually reinforcing linkage between disarmament and non-proliferation. States that have voluntarily undertaken disarmament and non-proliferation obligations under respective treaties must implement them fully and faithfully.
7. Nuclear disarmament and nuclear non-proliferation are mutually reinforcing processes. Effective, credible and comprehensive system

of export controls, which at the same time do not hinder legitimate applications of science and technology for peaceful and developmental purposes, could be building blocks of a move towards universally acceptable non-discriminatory norms and effective international non-proliferation arrangements. Non-proliferation policies must also be forward looking, so as to allow for the expansion of international cooperation in the peaceful uses of nuclear energy for countries desirous of increasing the share of nuclear energy as a non-polluting energy source, in a manner that is safe, secure and proliferation resistant.

8. International efforts in nuclear disarmament would yield tangible results when they are backed by an international consensus. The Conference on Disarmament is the sole multilateral negotiating body on disarmament. The Disarmament Commission is the universal deliberative forum. The UN Charter endows the General Assembly with a responsibility on disarmament matters. The General Assembly must explore the convening of the Fourth Special Session on Disarmament, subject to consensus on its objectives and agenda. These remain the best fora to enable the emergence of a consensus and to make effective contribution to the goal of nuclear disarmament and the complete elimination of nuclear weapons worldwide.
9. India has played an active role in the international community's endeavours towards nuclear disarmament. India was the first to call for a ban on nuclear testing in 1954 and a non-discriminatory treaty on non-proliferation of nuclear weapons, as distinct from non-dissemination, in 1965. India's proposition on non-proliferation was predicated on the principle that the progressive steps towards elimination of weapons of mass destruction must be based on a balance of obligations between those who possess such weapons and those who do not. In 1978, India proposed negotiation for an international convention that would prohibit the use or threat of use of nuclear weapons. In 1982, India called for a 'nuclear freeze'- a prohibition on production of fissile materials for weapons, on production of nuclear weapons and related delivery systems.
10. In 1988, India presented the Rajiv Gandhi Action Plan to the General Assembly that provided a holistic framework seeking negotiations for a time-bound commitment for the complete elimination of nuclear weapons to usher in a world free of nuclear weapons and rooted in

non-violence. This Action Plan was by far the most comprehensive initiative on nuclear disarmament, covering issues ranging from nuclear testing, fissile material for nuclear weapons to a time bound elimination of stockpiles. India, together with 27 other members of the Group of 21, in August 1996, presented to the Conference on Disarmament a Programme of Action, as contained in document CD/1419, for the elimination of nuclear weapons, with a specified time frame. This was further endorsed by the Group of 21 in documents CD/1570 and CD/1571.

11. So long as the States that possess nuclear weapons continue to believe that nuclear weapons constitute a critical element of their security strategy, the goal of the complete elimination of nuclear weapons will remain elusive and distant. Therefore, reducing the salience of nuclear weapons in strategic and security doctrines and policies is essential for realizing the goal of complete elimination of nuclear weapons. Alignment of nuclear doctrines to a posture of 'no-first-use' and non-use against non-nuclear-weapon States by all nuclear weapon States will be an important step towards achieving this objective.
12. The non-nuclear weapon States have persistently sought legally-binding assurances from the nuclear-weapon States against the use or threat of use of nuclear-weapons against them. They have regarded the security assurances provided so far by the nuclear-weapon States as inadequate, conditional and non-binding. Legally-binding assurances on use or threat of use of nuclear weapons against non-nuclear weapon States would further reduce the nuclear danger and mitigate the sense of insecurity among non-nuclear weapon States and, thereby, strengthen the non-proliferation regime. India firmly supports a policy of 'no-first use' and non-use of nuclear weapons against non-nuclear weapon States. India is ready to join multilateral negotiations to enshrine its commitment to no-first-use and non-use of nuclear weapons against non-nuclear weapon States in legally binding agreements. An agreement among the States possessing nuclear weapons on a global 'no-first-use' posture will engender strategic stability and reduce the danger of the accidental or unintended use of nuclear weapons.
13. The international community succeeded in negotiating Conventions on total elimination of biological and chemical weapons mainly

because their use had already been prohibited through the 1925 Geneva Protocol and States were prepared to relinquish these weapons as they did not foresee the likelihood of their use or their contribution to ensuring security. There is no reason why nuclear weapons cannot be eliminated in the same manner. A prohibition on the use or threat of use of nuclear weapons would be essential for eventual elimination of nuclear weapons.

14. The General Assembly resolution on a "Convention on the Prohibition of the use of Nuclear Weapons", first presented by India in 1982, requests the Conference on Disarmament to commence negotiations on an international convention prohibiting the use or threat of use of nuclear weapons under any circumstances. The resolution reflects India's belief that a multilateral, universal and binding agreement prohibiting the use or threat of use of nuclear weapons would help generate necessary political will among States possessing nuclear weapons to engage in negotiations leading to the total elimination of nuclear weapons; it would also contribute to mitigation of the nuclear threat in the interim, pending the complete elimination of nuclear weapons.
15. The General Assembly resolution on "Reducing Nuclear Danger" manifests India's conviction that the hair-trigger posture of nuclear forces carries the risk of unintentional, unauthorized or accidental use of nuclear weapons leading to a nuclear war with catastrophic consequences. The very real danger posed by the increased risk of systems and components falling into the hands of non-State actors or rogue actors within State structures, has further aggravated the existing dangers. Unilateral, bilateral and regional confidence-building measures, could supplement international agreements in reducing nuclear danger as also the risk of accidental nuclear war.
16. Progress towards the goal of nuclear disarmament will require a climate of mutual confidence in the international community to conclude universal non-discriminatory and verifiable prohibitions on nuclear weapons leading to their complete elimination. No effort must be spared in consensus building to this end.
17. We would urge the international community to intensify dialogue, so as to build a consensus that strengthens the ability of the international community to initiate concrete steps towards achieving the goal of nuclear disarmament based on the following elements:

- Reaffirmation of the unequivocal commitment of all nuclear weapon States to the goal of complete elimination of nuclear weapons;
- Reduction of the salience of nuclear weapons in the security doctrines;
- Taking into account the global reach and menace of nuclear weapons, adoption of measures by nuclear-weapon States to reduce nuclear danger, including the risks of accidental nuclear war, de-alerting of nuclear-weapons to prevent unintentional and accidental use of nuclear weapons;
- Negotiation of a global agreement among nuclear weapon States on 'no-first-use' of nuclear-weapons;
- Negotiation of a universal and legally-binding agreement on non-use of nuclear weapons against non-nuclear weapon States;
- Negotiation of a Convention on the complete prohibition of the use or threat of use of nuclear weapons;
- Negotiation of a Nuclear Weapons Convention prohibiting the development, production, stockpiling and use of nuclear weapons and on their destruction, leading to the global, non-discriminatory and verifiable elimination of nuclear weapons with a specified timeframe.

**586. Remarks by Permanent Representative to the Conference on Disarmament Jayant Prasad at the Plenary Meeting on the Presidential Proposal for a draft decision at the Conference on Disarmament.**

**Geneva, March 23, 2007.**

**Madame President,**

Since we are meeting in the formal plenary, my delegation would once again wish to congratulate you heartily on your assumption of the presidency of the Conference at this critical juncture of its history. We would like to thank in particular Ambassador Mtshali of South Africa and Ambassador March of Spain, your two predecessors this year, who conducted themselves in an exemplary manner in chairing the Conference. We would also like to convey a warm word of welcome to our new and highly erudite colleague from Nigeria who will add to the collective wisdom of the Conference.

2. We welcome the unveiling of document L.1 on CD's programme of work, which contains the collective wisdom of the six presidencies for 2007. I shall promptly transmit this proposal to my government for careful consideration, advice and instructions.
3. In its general approach, the proposal before us takes on board all the core issues before the Conference and, in that respect, inherits the spirit of the other proposals on the table that enjoyed a broad measure of support within the Conference. This inclusion of four core issues in CD's future programme of work shows a collective willingness to take into account the concerns and priorities of all the constituents of the Conference.
4. We note, however, that in terms of the specific mandates, the treatment of the four issues is markedly different. In this context, we would like to reiterate our consistent position, in respect of an FMCT, of the importance we attach to the negotiation of a universal, non-discriminatory and verifiable treaty. There should, therefore, be sufficient understanding on fundamental parameters before formal negotiations are launched.
5. Another change in the P-6 proposal is the manner in which the four issues are to be substantively dealt with by the Conference. Our

task would be considerably facilitated if the procedure of working through Coordinators appointed by the Conference is given, what you described earlier this afternoon, "a more structured form." This can be done easily by carefully spelling out the working methods and reporting mechanisms, which must conform to the rules of procedure of the Conference. We are seeking greater clarity on this issue only to ensure that it will advance the next phase of work of the Conference.

6. India has a multilateral vocation and is ready to participate in the substantive work of the Conference, should it decide on appropriate parameters and methods to do so by consensus.

**587. Remarks by Permanent Representative to the Conference on Disarmament Jayant Prasad at the Plenary meeting of the Conference on Disarmament.**

**Geneva, May 16, 2007.**

**Madam President,**

At the start of the second part of the 2007 annual session of the Conference on Disarmament, I should like to first thank you, and the Ambassadors of South Africa and Spain, for your leadership of the Conference. My delegation shares the sense of forward movement prevailing in the Conference this year.

2. For India, at the current stage of CD's activities, establishing a programme of work remains the top priority and we are supportive of initiatives that would facilitate reaching consensus on it. We are happy to note that the presidential draft decision contained in document L.1 focuses on this issue. You, Madam President, have clarified in the plenary that the draft decision and CD's schedule of activities "will, for all practical purposes, constitute a programme work." For us, certainly, this does very much constitute a programme of work.
3. To ensure the smooth conduct of negotiations, there should be sufficient understanding on the fundamental parameters of the unfolding programme of work, especially on its substance. This is

required so that we embark upon a successful venture and for a positive outcome of the substantive work that we hope to undertake in the Conference.

4. The true vocation of the Conference is to engage in negotiations to arrive at multilateral, non-discriminatory legal instruments on the disarmament issues listed on the Conference agenda. The Conference has also engaged in exploratory discussions that precede negotiations, such as identification of issues, which we have conducted during the course of last year and the first part of the current annual session, as also clarification of objectives, on which an understanding amongst the constituents of the Conference is a prerequisite for successful negotiations.
5. Since we are engaged in that process now, it would be appropriate for my delegation to reiterate that, on a fissile material cut-off treaty (FMCT), we attach importance to the negotiation of a universal, non-discriminatory and effectively and internationally verifiable treaty and that it would be desirable for this to be clarified by the presidency in line with documents CD/1299 and CD/1547. India was supportive of the mandate on FMCT contained in the UNGA resolution 48/75L, which, India had co-sponsored. This support was reiterated by India at important moments when CD considered the matter, in 1995, following the adoption of CD/1299, and in 1998, following the adoption of CD/1547. We sincerely hope that there is sufficient common understanding on this fundamental issue as we proceed towards FMCT negotiations in the Conference.
6. In order to protect the negotiating position of my delegation, it would have been ideal to engage in FMCT negotiations in an Ad-hoc Committee and not have negotiations presided over by a coordinator. You, Madam President, clarified that the functions of the coordinators would be "comparable to those of a subsidiary body." Since the coordinators could not be designated as such, it might help very much if the clarifications provided by you earlier could be incorporated, even in a summary form, in the complimentary presidential statement.
7. My delegation would encourage the presidency to continue consultations so that the Conference is able to arrive at a decision that takes into account the interests and concerns of all delegations. We have to go beyond appealing to the good sense and wisdom of

delegations. It is only through a consultative process that the presidency can engender ideas that would persuade all CD members to arrive at a consensus.

8. India will continue to participate constructively in the ongoing efforts to reach a consensus on CD's programme of work.

**588. Statement by Permanent Representative to the Conference on Disarmament Jayant Prasad at the Preparatory Committee Meeting for the First Conference of High Contracting Parties to Protocol V on Explosive Remnants of War.**

**June 18, 2007.**

**Mr. Chairman**

My delegation, on whose behalf I take the floor, is most happy to see you in the chair of the Preparatory Committee Meeting. We would like to compliment you on the thorough preparation you have undertaken to secure a successful outcome both of this meeting and of the First Conference of the States Parties to Protocol V on Explosive Remnants of War scheduled in November 2007.

The CCW Convention and its five annexed Protocols embody the principle that parties to an armed conflict must prohibit the use of weapons that have indiscriminate effects and that cause unnecessary suffering or superfluous injury. They either ban or restrict the use of specific types of weapons used in armed conflict to protect non-combatant civilians from the effects of these weapons as well as to protect combat troops from excessive and inhumane injury. While mitigating the humanitarian concerns arising from the use of specific weapons or weapon systems, the Convention also takes into account their military necessity and strikes a balance between the two.

India is among those States Parties to CCW that have ratified all five of its Protocols. We have taken necessary steps to fully implement our obligations under these Protocols. India, therefore attaches particular significance to the CCW processes and is fully committed to the humanitarian principles represented by its protocols.

India has had special association with Protocol V, holding the presidency of CCW States Parties in 2002-03 when this Protocol was negotiated and concluded, and subsequently, in 2004-05, coordinating the Working Group on Explosive Remnants of War. We were also among the first lot of adherents to Protocol V. We are confident that when fully and effectively implemented, the Protocol will go a long way in mitigating the humanitarian concerns arising from explosive remnants of war, including cluster munitions.

Now that this Protocol has entered into force, it is of utmost importance that the States not party to it are encouraged to join it. India, therefore, supports the plan of action adopted last year to promote universality of Protocol V and the Convention itself.

Since ratifying the Protocol last May, Government of India began taking requisite measures for its implementation. Information concerning compliance with the Protocol has been disseminated to formations of the security forces. Our delegation will be in a position to present an implementation report within the stipulated timeframe. We, therefore, look forward to comprehensive stocktaking of the implementation of Protocol V at the November Meeting of its Contracting Parties.

**589. Remarks by Permanent Representative to the Conference on Disarmament Jayant Prasad at the Plenary Meeting of the Conference on Disarmament.**

**Geneva, June 19, 2007.**

**Madam President,**

Since we have a couple of days prior to the next plenary scheduled on Thursday, 21 June to reflect on your question, I would like to say a few words at this stage on the propositions you have placed on the table. Before I do so, let me first compliment you on your able leadership of the Conference and for the clarity and panache with which you are leading us in our collective endeavour of reaching an agreement on a programme of work. I should also like to thank Ambassadors of South Africa, Spain and Sri Lanka for their sustained efforts towards exploring the best way forward to arrive at a

consensus on a programme of work, which has eluded this Conference for almost a decade now.

2. In your statements on 14 June and today, you have shared with us your assessment of where we stand on the draft presidential decision contained in document L.1. My delegation would like to thank you for engaging in an open-ended informal consultative process on L.1 ?in a spirit of compromise and accommodation?, to which the UN Secretary General referred in his message to this Conference read out on 14 June, and which, indeed, is the basis for any multilateral negotiation project. My delegation has participated constructively and will continue to do so in our collective efforts to reach a consensus on a programme of work, taking into account the priorities of the constituents of this Conference.
3. During your presidency, you have made sincere efforts in accommodating the views of Member States on the presidential draft decision through a complementary presidential statement on its implementation, contained in CRP.5, as a possible way forward. This, together with an additional draft decision ?to establish even further clarity by an explicit expression of the relationship? between L.1 and CRP.5, addresses some of the concerns about the process raised by several delegations. We appreciate the clarifications concerning the work of the coordinators, reporting process and applicability of rules of procedure of the Conference. We also note the stipulation that L.1, taken together with a schedule of activities, will indeed constitute a programme of work.
4. The creative way of linking the two documents suggested by you, however, falls somewhat short of integrating them. My delegation's preference would be for a unitary decision consisting of three textual components, which are on the table: first, the draft decision as contained in L.1; second, the draft complementary statement as contained in L.1; and third, the understanding of the Conference on the implementation of the decision. They can be arranged logically and sequentially in a simple, neat, coherent and integrated text, articulating a unitary and unified understanding. It has the additional merit of avoiding multiplicity of documentation and unnecessary speculation regarding the comparative import of the three elements.
5. We had earlier emphasised the need for a clear understanding on fundamentals so as to ensure the smooth conduct of discussions on

negotiations once the CD has adopted its decision. In this regard we had sought clarifications on the mandates being assigned to various coordinators. In particular with regard to FMCT, we had very clearly indicated the importance we attach to a universal, non-discriminatory and internationally and effectively verifiable treaty prohibiting the future production of fissile material for nuclear weapons and other explosive devices. My delegation would urge you to continue with your consultations so that we are able to arrive at a sufficient common understanding on this fundamental issue. A common understanding on this subject among the constituents of the Conference would only help in the conduct of FMCT negotiations and its successful outcome.

6. Having said that, let me conclude by assuring you that for India, establishing a programme of work remains the utmost priority and we share with you a sense of forward movement prevailing in the Conference this year, beginning, as you recalled, with the substantive discussions held in the first part of CD's annual session. My delegation will continue to participate constructively in your ongoing efforts to reach a consensus on CD's programme of work.

**590. Statement by Permanent Representative to the Conference on Disarmament Jayant Prasad at the Meeting of Experts of the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction (BTWC).**

**August 20, 2007.**

**Mr. Chairman,**

Let me begin by congratulating you for the dynamic leadership you have provided this Convention since its 6th Review Conference last year. This meeting of experts is a result of the decisions of the Review Conference for the success of which we owe you a great deal. Given your consummate skills, my delegation is confident that the meeting of experts will have equal success.

As we begin to take stock of the ways and means to enhance national

implementation of the Biological and Toxin Weapons Convention, it is well worth reminding ourselves of the success of the international community in translating into action their common resolve to eliminate an entire category of weapons of mass destruction. This provided a good example for a similar effort in the area of chemical weapons, which led to the Chemical Weapons Convention and the ongoing world-wide destruction of chemical weapons facilities and stocks. We need a similar effort in the area of nuclear weapons.

Meanwhile, it is imperative that the norms against biological weapons contained in BTWC are fully upheld and implemented, especially in the context of a growing threat of proliferation of biological weapons and bio-terrorism. Advances in biotechnology, genetic engineering and life sciences hold great promise and equally great risks. The intrinsic capacity for the development of biological warfare agents will expand at the same speed as the pace of civilian research. The greater availability of expertise, the dissemination of scientific information and reduction in costs have brought the making and deploying of biological warfare agents within the capacity of terrorists.

The short and straightforward text of BTWC, containing simply stated commitments, does not elaborate the fine distinction between prohibited and permitted activities. Moreover, the prohibitions contained in the Convention, for want of provisions on verification of compliance, critically depend on the commitment of the States Parties to observe these prohibitions. That is why we have always emphasized the responsibility of States Parties to fully implement their obligations under the Convention and adopt national measures, including the enforcement of legislative and administrative measures, to ensure their compliance with all the provisions of the Convention.

We are, therefore, pleased that the very first meeting of experts for the new inter-sessional work programme is devoted to national implementation, considerable ground on which was initially covered in the course of the meetings of experts and States Parties in 2003. Our ensuing deliberations will catalyze fresh ideas and throw up best practices on how to implement the Convention more effectively. In this connection, we would like to express our appreciation for the important contribution made by some States Parties, the concerned international organisations as well as civil society organisations and think tanks in providing us with significant material on the core issues that we hope to consider in this meeting. Their active participation, including that of the national public health stakeholders, augurs

well for our deliberations. My delegation will be making presentation on both the issues selected for this meeting.

We are also pleased to note the establishment of the Implementation Support Unit. The ISU has already commenced the much needed organisational support that the Convention was so much in need of. We are confident that the ISU will assist greatly in the full and effective implementation of the Convention, including the promotion of international, regional and sub-regional cooperation and the universalisation of the Convention.

We are fortunate for the success so far in our common endeavour in banning biological weapons. This meeting of experts, and the later meeting of States Parties, we hope, will further the coherence, cooperative atmosphere and commitment that have emerged as the key characteristics of the Convention's work programme. A steady and cooperative approach will help consolidate our past achievements. My delegation, Mr. Chairman, remains committed to working with you towards this end.

I thank you.

**591. Statement by Member of Parliament and Member of the Indian Delegation to the UN Ms. Sushma Swaraj at the First Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 16, 2007.**

Please see Document No. 622.

**592. Statement by Permanent Representative to the Conference on Disarmament Ambassador Jayant Prasad at the Ninth Annual Conference of the States Parties to Amended Protocol II to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May be Deemed to be Excessively Injurious or to have Indiscriminate Effects.**

**Geneva, November 6, 2007.**

**Mr. President,**

My delegation is most happy to see you in the chair of the 9th Annual Conference of the States Parties to the Protocol on Prohibitions or Restrictions on the Use of Mines, Booby-Traps and other Devices (Amended Protocol II) of the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons which may be Deemed to be Excessively Injurious or to have Indiscriminate Effects (CCW Convention). The Swiss contribution to the CCW process is well recognised and we welcome your guidance of the Conference. You have our fullest support to ensure its success.

India ratified the Amended Protocol in September 1999, within a year of its entry into force. 88 of the 103 States Parties to the CCW Convention, representing an overwhelming majority of the global population, including the major landmine producing States, are now party to the Protocol. It remains a comprehensive, legally-binding instrument addressing the humanitarian risks posed by the indiscriminate and irresponsible use of anti-personnel mines as well as anti-vehicle mines, while taking into account their continued military necessity. We welcome Cameroon, Niger and Tunisia as its latest adherents.

The Amended Protocol strengthens the erstwhile regulation of landmines and booby traps by extending its scope to cover both international and internal armed conflicts, banning the use of non-detectable anti-personnel mines, for their detection and removal at the end of a conflict, prohibiting their transfer, and limiting the use of non-self-destructing or self-deactivating mines to monitored and marked areas to prevent non-combatant casualties. If fully implemented, it will contribute significantly to addressing humanitarian concerns, while allowing States to use these mines in a responsible and regulated manner.

In keeping with its commitment to faithfully implement the Protocol, India has fulfilled its obligations with regard to all its technical parameters. Since 1st January 1997, India has not produced any non-detectable mines. The design and development of detectable anti-personnel mines was completed and all necessary technical issues resolved, with 8 grams metallic rings fitted on all anti-personnel mines stocked for operations. Furthermore, Government of India is in the process of increasing the existing scales of its minefield marking and laying stores.

It would be appropriate at this Conference to provide details of India's national implementation of Amended Protocol-II under specific heads.

#### **Imparting information to the armed forces**

- The provisions of the CCW Convention and Amended Protocol-II are being regularly disseminated to the armed forces, through presentations on the subject at seminars, symposiums and conferences held under the aegis of the Army.
- Military courses of instruction include this subject in the syllabi of relevant army training programmes as a mandatory requirement, both for the officers and other ranks, including junior commissioned officers.
- A booklet on India's obligations under Amended Protocol-II has been published and handed out to all armed forces formations and units.
- Officers of the Ministry of Defence, Ministry of External Affairs and the Services Headquarters interact regularly for exchanging ideas and information on the implementation of the provisions of the Protocol.

#### **Imparting information to the civilian population**

- An integral part of our government's efforts to avoid civilian casualties is to enhance public awareness on landmines, in particular anti-personnel landmines. The Indian army has disseminated information on mines laid along the border areas, as part of military operations, to the concerned civilians, besides placing warning signs at suitable locations. Mine awareness programmes in the relevant locations have also been conducted at the village level.
- Media representatives have been briefed by the Army to disseminate

information on the preventive measures required to prevent civilian casualties resulting from exercises or operations.

#### **Mine clearance programmes**

- India's armed forces have not used mines for maintenance of law and order or in internal security situations, or even for combating terrorists and terrorist organisations, including those that have indiscriminately used improvised explosive devices and mines. The Corps of Army Engineers continues to aid civil authorities in defusing and clearing such devices.
- Whenever and wherever the army has used mines for defensive military operations, the mines have been laid within fenced perimeters and marked, in accordance with the requirements specified in Amended Protocol-II. Post-operations, these mines have been cleared by trained troops and arable land handed back to the owners at the earliest.

#### **Rehabilitation programmes**

- Whenever landmine casualties have occurred, concerted efforts have been made to rehabilitate the affected persons by providing monetary compensation, employment and assistance, including prosthetics for mine victims.

#### **International cooperation for mine clearance**

- India remains committed to providing mine-related assistance under the UN umbrella. India is one of the largest contributors to the UN peacekeeping operations the world over. Cambodia, Angola and Afghanistan, where we have carried out de-mining operations, are perhaps the most heavily mined countries in the world. In Cambodia, the Indian Army had deployed de-mining supervising teams as far back as 1991. After training several de-mining platoons, de-mining of specific areas was entrusted to these teams, resulting in hundreds of square kilometres of land being cleared of mines. Our training effort towards this end continues even today. In Angola, the Indian Army had undertaken large-scale de-mining operations under the UN umbrella in 1995. More recently, in connection with the Indian Government's programme of constructing a road in the heavily mined south-western part of Afghanistan, from Zaranj to Delaram, we have

undertaken a de-mining operation since December 2005, which is very nearly done, and the road construction now is in full swing.

#### **Technical cooperation and assistance**

- India has been a ready provider of technical assistance and expertise for mine clearance and rehabilitation programmes in international de-mining efforts. Besides contributing to participating in national, regional and international workshops and seminars, an Indian Army team imparted training to the Cambodian Army on de-mining operations in March 2007. Thereafter, the trained Cambodian army detachments have undertaken de-mining operations in Sudan under the aegis of UNMIS, starting from mid-2007.

India remains committed to the cause of addressing humanitarian suffering caused by certain conventional weapons, in consonance with our legitimate security concerns. The States Parties to Amended Protocol-II have undertaken modest, yet important steps in prohibited the indiscriminate use of mines and their intentional use against civilians. In stipulating that mines, booby traps or other devices must not be targeted against civilians or civilian objects or used indiscriminately, the Protocol effectively applies the core principles of the CCW Convention concerning the prohibition on the use of weapons that are indiscriminate and the prohibition on the use of weapons of a nature that cause unnecessary suffering or superfluous injury. We welcome the cooperative atmosphere of our discussions at the Conference and hope that the mutual exchange of technology and experience among the States Parties will help in promoting the universalization of the Protocol.

**593. Statement by Permanent Representative of India to the Conference on Disarmament Jayant Prasad at the Plenary of the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May be Deemed to be Excessively Injurious or to have Indiscriminate Effects.**

**Geneva, November 7, 2007.**

**Mr. Chairman,**

My delegation is very pleased with your assumption of the chair of the meeting of the High Contracting Parties of the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons which may be Deemed to be Excessively Injurious or to have Indiscriminate Effects (CCW Convention). We are confident that the meeting will have a successful outcome under your leadership. We are delighted to have Ambassador Sergio Duarte, the High Representative of the UN Secretary General in our midst and would like to thank him for reading Secretary General's encouraging message.

India is privileged to be part of a small group of countries that have ratified or otherwise acceded to the entire CCW package: Protocol I, Amended Protocol II, Protocols III, IV and V as well as amendment to Article I of the Convention. India has shouldered responsibilities entrusted to it in previous years to nurture the CCW processes, including its Presidency in 2002-2003, when Protocol V on Explosive Remnants of War was negotiated and concluded.

The CCW Convention embodies the principle that the right of the parties to an armed conflict to choose the methods or means of warfare is not unlimited. It prohibits the employment, in armed conflicts, of weapons, projectiles and materials and methods of warfare of a nature that cause superfluous injury or unnecessary suffering. The Convention and its Annexed Protocols, while stipulating measures to mitigate humanitarian concerns arising from the use of specific weapons and weapon systems, also take into account their military necessity and strike a balance between the two.

The CCW Convention now has 103 adherents. It is of utmost importance that the States that are not party to it are encouraged to join the Convention and the Protocols annexed to it. Good work has been carried out in this

context since the Review Conference held last year by Ambassador Francois Rivasseau and we are happy to know that you, Mr. Chairman, will now contribute to that work. India attaches high importance to the Plan of Action and the Sponsorship Programme to promote the universality of the CCW. The Government of India has decided to make a contribution of US dollars ten thousand to support efforts in this regard.

India believes that States Parties are primarily responsible for the full and effective implementation of their obligations under the Convention and the Protocols to which they are bound. We were satisfied with the decision on a compliance mechanism contained in Annex II of the Final Declaration of the last Review Conference. We hope to engage in discussions to finalise and approve the standardized reporting formats as well as their registration form for the pool of experts. To cater to the increased workload, we must give serious thought to strengthening the Secretariat supporting the CCW process.

The entry into force of Protocol V on ERW is a significant development. We call upon all States that have not already done so to accede to the Protocol. We are confident that, when fully and effectively implemented by a wide cross section of countries, Protocol V would go a long way towards mitigating the humanitarian concerns associated with ERW.

The Group of Governmental Experts has continued its valuable work in areas related to ERW: consideration of the implementation of existing principles of international humanitarian law and possible measures, including on cluster sub-munitions, aimed at minimizing the humanitarian risks of these munitions becoming ERW. We would like to compliment Ambassador Karklis for his leadership at the last GGE. India will continue its contribution in the GGE during the course of next year.

With regard to Mines other than Anti-Personnel Mines and finding common ground on the key remaining issues of detectability and active life span, we hope that States Parties will demonstrate flexibility in order to adopt a legally binding protocol on MOTAPM that would maintain the balance between humanitarian concerns and the military utility of these weapons.

The CCW process is primarily concerned with the application of existing IHL principles for regulating the use of specific types of weapons, weapon systems and munitions in order to mitigate the humanitarian risks associated with their use. Indeed, the CCW Convention is one of the principal IHL legal instruments and has proven its dynamism. All of us, party to it, have

a collective responsibility to ensure that there is an adequate and timely response to the current challenges posed by advancements in weapons technology or changes in methods of warfare.

Therefore, while we should continue to encourage the States Parties to fully meet their IHL obligations within the CCW framework, we must not lose sight of the importance of the international community as a whole coming up with a new and strengthened format that would, by common agreement, reaffirm and strengthen the application of international law in regulating methods of warfare and in protecting the victims of warfare.

The last time the international community had an opportunity to undertake such a comprehensive review was at the 1979 UN Special Conference. This resulted in the CCW Convention in 1980. In the ensuing three decades, there has been a fundamental transformation of the international landscape. The Cold War has ended, the nature of conflicts has changed and new technologies in warfare have emerged. There is also a new consciousness, both among Governments and NGOs, about the need to address the conditions of victims of conflict, through sustained post-conflict and peace building efforts. Victim assistance is now a major objective of our common efforts.

We feel that there is need for a renewed debate and discussion on strengthening the obligations of all States to consider whether the adoption of new weapon systems or methods of warfare should, in some circumstances, be prohibited under the applicable rules of international law. It is pertinent to recall that measures related to prevention of military uses of new technologies in certain circumstances were integral to the 1988 Rajiv Gandhi three-stage Action Plan on Disarmament. Further, given the changing circumstances, we feel it is time for the international community to consider ways and means to continue the codification and progressive development of the rules of international law applicable to advanced conventional weapons which have devastating and indiscriminate effects, or hinder post-conflict peace building efforts or have lasting negative effects on the environment or fragile eco-systems.

We believe that these are complex and interrelated issues that do not lend themselves to easy or old solutions. Addressing these questions will require new thinking and new approaches that must be evolved through dialogue and consultation. The CCW process is an appropriate forum to initiate such consultations, which must also extend to the larger international community. Given adequate preparation and a focussed agenda, it is possible that the

discussions and debate within this forum can be a stepping-stone for a larger initiative at the UN to take on board those that are outside the CCW process. India looks forward to working with the CCW Parties to achieve our common objectives.

Before ending, Mr. Chairman, my delegation would like to express its appreciation to the International Committee of the Red Cross and NGOs within the CCW process for their contributions, which have energised and enriched our work.

I thank you for your attention.

**594. Statement by Permanent Representative to the Conference on Disarmament and Head of the Indian Delegation Jayant Prasad at the 2007 meeting of the states parties to the Convention on the Prohibition of Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on their destruction.**

**December 10, 2007.**

**Mr. Chairman,**

My delegation is happy to see you chairing the Annual Meeting of the States Parties of Biological and Toxin Weapons Convention (BWC). We would like to thank you for your leadership and for imparting a sense of forward movement that we feel in the context of the Convention since the Review Conference held last year.

We congratulate you on your efforts to enlarge our membership and would like to welcome the delegations of Gabon, Kazakhstan, Montenegro and Trinidad and Tobago to the Convention's fraternity. We join the call to the signatory States to the Convention that have not yet ratified it, to do so, and to the other States who have not signed the Convention, to become party to it at the earliest.

We appreciate greatly the efforts of the Implementation Support Unit and the services it has rendered to State Parties in the short period since its

establishment, especially the speed with which it set up the restricted area website and the facilities for electronic submission and publication of CBMs.

While we have embarked upon a new inter-sessional work programme, we must remind ourselves of the need to strengthen the Convention to deal with the widening threat spectrum arising from possible malevolent uses of biotechnology, which is creating new ways of manipulating basic life processes. The dramatic progress in the field of synthetic biology has increased the possibility of engineering living organisms. Moreover, DNA synthesis and genomic technologies utilise equipment and materials that are readily available and relatively inexpensive and much of the relevant information is accessible on e-databases. Adding to the spectre of possible new and deadlier microorganisms and toxins is the growing possibility that non-State actors could acquire and use biological warfare agents as new instruments of terror.

We associate ourselves with the statement of the Non-Aligned Movement delivered by Cuba earlier today, particularly its emphasis on strengthening the Convention through multilateral negotiations for a non-discriminatory, legally binding agreement, including on verification, dealing with all the articles of the Convention in a balanced and comprehensive manner. In the face of the emerging challenges, verification of compliance will be an important element in providing the assurance that all States Parties are meeting their commitments and obligations.

The Meeting of Experts held last August has provided useful inputs on the issues that are to be discussed in our meeting. As outlined in the 'synthesis' document L.1 presented by you, Mr. Chairman, a host of issues are to be addressed in order to enhance national implementation and increase regional cooperation to implement fully the obligations under the Convention. Since the intrinsic capacity for the development of advanced biological warfare agents could expand at the same pace as the pace of civilian research, States Parties require to exercise utmost vigilance in strictly complying with the provisions of the Convention. Continued effort towards identifying likely sources of danger and formulating and implementing national measures to avert them would be vital for fulfilling the obligations of the States Parties under the Convention. This would go hand-in-hand with the formulation and enforcement of effective national measures, including on export and import controls, which have been comprehensively listed in document L.1.

Biological agents and toxins do not respect national frontiers: indeed, recent

events have underlined again that diseases spread rapidly across continents. Regional and sub-regional cooperation, therefore, are essential for enhanced security as much as for increasing the knowledge base within regions for combating the dangers that may arise both from naturally occurring and deliberately induced outbreak of disease. We need to strengthen national and regional capacities in the public health infrastructure, as also the existing level of preparedness for the prevention, response and recovery capabilities against biological attacks. India has offered fellowships to other developing countries, as also the use of its infrastructure, to help countries in the region investigate disease outbreak. The Indian Council of Medical Research's centres provide hands-on training, in association with WHO, in use of modern technologies in outbreak investigations to countries in the South-East Asia region. We have also established regional consultations with Bangladesh, Bhutan and Nepal on cross border infection controls.

Unfortunately, a majority of States Parties lack resources for enhancing national implementation and forging greater regional cooperation. The development of national, regional and international capabilities for surveillance, detection, diagnosis and combating of infectious diseases will require a substantial investment, as also a much greater level of commitment to increased international assistance and cooperation as provided for in Article X of the Convention. Some international organizations such as the World Health Organization, the Food and Agricultural Organization, and the World Organization for Animal Health are already helping in combating human, animal and plant diseases, and we commend them for their efforts. A substantial effort is also required by States Parties themselves, from within the framework of this Convention.

**Mr. Chairman,**

The BWC is at a crucial juncture. Our recent efforts have nurtured interest in the Convention. In order to strengthen it, however, much more needs to be done. My delegation remains committed to assisting you in this task in active association with fellow States Parties to the Convention.

**INDIA'S FOREIGN RELATIONS - 2007**

**SECTION-IX**

**INDIA AT THE UNITED NATIONS**

**595. Statement by Permanent Representative at the UN  
Nirupam Sen at the handover ceremony of the  
Chairmanship of the Group of 77.**

**New York, January 10, 2007.**

**Mr. Chairman,**

First of all let me congratulate you and Pakistan on a well deserved election as Chair of G-77. We would like to convey our deep appreciation to South Africa for the effective leadership it has provided to the Group of 77 in the past year, when the developing countries had to deal with many important and complex issues. These have been ably detailed in the statement of Her Excellency Dr. Nkosazana C. Dlamini Zuma, Minister for Foreign Affairs for South Africa prior to her handing over the gavel to Your Excellency.

2006 was indeed a challenging year during which several developments of great significance to developing countries took place. First and foremost, the challenge before the Group was to build on the momentum generated by the 2005 World Summit not only in terms of promoting international cooperation for development but also in addressing systemic issues – creating an international economic governance conducive to development. Representing the Group of 77, South Africa articulated the concerns and interests of the developing countries forcefully and effectively. We would like to convey our special appreciation to Ambassador Dumisani Kumalo and his team for the competence and dedication with which they served the Group during the 61st session of UNGA, ECOSOC and other important meetings as well as during the follow-up to the 2005 World Summit Outcome in the areas of development and management reforms so important for the developing countries.

The developing countries still find their policy space increasingly circumscribed. If globalisation is inevitable, multilateralism has to be its life sustaining mechanism. Hence the voice of developing countries and their further empowerment in the international arena remains vital. The Secretary General accurately said that it is the developing countries that need the UN more; clearly the developing world is more in need of a rule based multilateral order which would help to even out uneven playing fields. Hence the Hon'ble Foreign Minister of South Africa in a striking and important address emphasized the much needed reform of international economic

institutions whose policies impinge on the developing countries and appositely quoted the Noble Prize winning economist Stiglitz. Agreements reached in the past year in the context of development follow-up to the 2005 World Summit Outcome and the strengthening of the ECOSOC assume significance in terms of strengthening the role of the United Nations in the promotion of international cooperation for development, through monitoring the fulfilment of commitments especially by the developed countries, and in the review and assessment of international economic policies, in particular the performance of the international financial and economic institutions, and make recommendations where needed. The latter is particularly significant as most of the developing countries have capacity constraints to assess the impact of such policies. The challenge now is to consolidate the gains that developing countries made in 2006 and work towards the implementation of the agreements reached. Developing countries would also need to be vigilant to proposals relating to enhancing the effectiveness of the delivery of development assistance by the United Nations in the context of system-wide coherence. At a time of some exhaustion, it was difficult to mobilize the energies and cohesion of the Group on issues like the real strengthening of ECOSOC or scales of assessment etc. South Africa, as Chairman, contributed substantially to achieving this mobilization and cohesion: this is the true light in its laurels for the memory of future time. It is this work that needs to be maintained and continued. As the great Latin American writer Eduardo Galeano once said, collective efforts and cohesion is necessary in order not to give way to "indignity, amnesia and resignation".

In the context of Secretariat and management reforms the Group of 77 performed admirably in the past year. On issues like lifting of spending cap, proposals of the Secretary-General in his report on 'Investing in UN for a stronger Organisation', in particular governance and oversight, human resources management, financial management, ICT and procurement, substantial progress was made largely reflecting the positions taken by the Group. It was once again a victory reflecting the cohesion and solidarity of the Group. There are unfinished agenda items which are of significant interest to developing countries, especially relating to governance and oversight so critical for developing countries, which would be coming up in the course of this year. My good friend Ambassador Kumalo quoted a beautiful poem. This reminded me of another poem (which speaks of the love and solidarity referred to in the poem quoted by Ambassador Kumalo) written to Toussaint L'Ouverture who led the revolution in San Domingo in the eighteenth century which set up the first independent black republic:

“Thy friends are exultations, agonies/And love and man’s unconquerable mind”. The G-77 has experienced both exultation and agony but the most important has always been love and solidarity and the unconquerable mind. You had doubted, Mr. Minister, Ambassador Akram’s love for poetry but I am sure he would have to develop it because, in the context of G-77, poetry and love and solidarity are indivisible.

We welcome Pakistan and its able Permanent Representative Ambassador Munir Akram their taking over the Chairmanship of the Group of 77. We are confident that they will provide effective leadership to the Group this year in collectively meeting the challenges that confront the developing countries and wish them every success in guiding and leading the Group of 77.

Thank you, Mr. Chairman.

**596. Statement by Permanent Representative at the UN Nirupam Sen on Agenda Item 47: Integrated and Coordinated implementation of and follow up to the outcome of the major United Nations Conferences and Summits in the Economic, Social and Related fields; Agenda Item 113: Follow up to the outcome of the Millennium Summit and Agenda Item No. 149: United Nations Reforms: Measures and Proposals, in order to discuss the progress achieved in the work of the Peacebuilding Commission at the United Nations General Assembly.**

**New York, February 6, 2007.**

**Your Excellency, Madame President,**

Let me begin by expressing my delegation’s appreciation to you for scheduling this discussion on an important subject, at such short notice. We also thank you, Madame President, the President of the Security Council and the President of the General Assembly; as well as the Chairman of the Peacebuilding Commission, the Chairs of the Country-Specific configurations of the PBC and the Chair of the PBC working group on

Lessons Learnt, for the important statements made, as well as for the very important work they have undertaken.

Madame President, we also thank you for your decision to write to potential donors to seek further contributions to the Peacebuilding Fund, to ensure that the funding target is met. As a contributor to the Peace Building Fund, we welcome your support to the Fund.

I should also like to state our appreciation to the delegation of Jamaica, the coordinator of the Caucus of the Non-Aligned Movement within the PBC, for its diligence and for their statement today. We align ourselves with his statement.

**Madame President,**

While the statement made by our colleague and friend from Jamaica eloquently encapsulates the collective position of the Non Aligned Movement on this issue, I would like to very briefly explore a few ideas and make a few suggestions in our national capacity, with a view to encourage some introspection.

To start with, it has been of concern to us that since the establishment of the Peacebuilding Commission last year, we have spent a considerable amount of time on "housekeeping issues". Initially, when we were collectively engaged in defining what this body would do and how it would go about achieving its goals, this may have been a valid exercise. However, at this stage, I submit that we cannot continue indefinitely discussing preliminary issues such as reporting responsibilities, participation and operational matters to the detriment of the larger goal of assisting in the consolidation of peace in post-conflict societies. To do so would be to miss the wood for the trees.

Secondly, in terms of procedure and priority, we accept the premise that the Country-Specific Meetings are a crucial element in ensuring that assistance and advice are speedily and effectively administered to candidate countries. However, it is difficult to accept that this 'process mechanism' takes precedence over the Organizational Committee, which is the steering mechanism of the Peacebuilding Commission. But we recognize that there are alternative views on this subject. Therefore, perhaps we should not ask ourselves which takes precedence. Instead, let us ask ourselves the more practical question: how the work of the Organizational Committee and the Country-Specific configurations can be harmonized and made more complementary.

In a similar vein, we believe that the success of the Commission is critically dependent on a harmonious and effective Organizational Committee. To reiterate the metaphor of steering, if 31 pilots argue over a ship's steering wheel, the ship will only run aground. It is therefore our view that we need to change the nature of discourse within the Organizational Committee. To some extent, this can be addressed if there is a larger sense of overarching purpose to our meetings. But over and beyond that, we need to find ways to increase mutual trust, to begin with, by creating a more collegial and consultative approach. The PBSO, the UN Secretariat and indeed, each of the member states on the OC, share a responsibility to do so.

We do not believe that such a broad understanding will be difficult to reach. The statements made last week by a number of partners in the peacebuilding process reflect a belief in the existence of a common ground. In our view, that common ground lies in recognizing that the goal is to assist candidate countries with funding, mobilize donor support and design policies that would consolidate peace. The painful history of the post-world war years illustrates the fragility of peace in post-conflict societies (here Nietzsche has sometimes been proved right – “peace is an interregnum between two periods of war”), therefore all of us equally emphasize the need for expeditious action. Consequently, we hold it self-evident that the Peacebuilding Commission is not merely about donors of money and recipients, but also about provision of advice and policy support, both through ‘learning by example’ and through assistance in designing policies based on the specificities of the society concerned. On the one hand, to really contribute fundamentally and be truly relevant, the Peacebuilding Commission would have to examine in depth and advise on the most urgent problems of today such as how to promote some understanding among a country's regional and ethnic leaders; assess the pace of say economic reform or elections, which, if embarked on too early or at the wrong time, may actually retard institution-building and plunge a country back into civil war. On the other, one size clearly does not fit all and what works in a small and more homogeneous country may not in a large and fractured State. Above all, it is important to focus on whether resources are going to the most important place – institution-building.

We also believe that there is no gainsaying the fact that the lead actor in any post-conflict peacebuilding instance must be the nation concerned. While we welcome inputs from all sections of society, both nationally and internationally, the primary focus cannot but be to strengthen the capacity of a post-conflict State to govern effectively and to mobilize human and

material resources to achieve development. Every other perspective that is provided is useful, but equally, we should recognize that a non-national perspective can only be segmental; useful though they may be, such perspectives can only reflect part of the picture. The appropriate image is a circle whose circumference may run through and encompass many countries but whose centre is in one country.

This brings me to my final point. We believe that we need to renew our focus and our commitment to the larger cause of assisting the candidate countries that are before us. We need to listen more closely to their concerns and react with greater dispatch to their requests. If we do so, in a manner that most directly addresses their concerns, we will not only be able to assist the states concerned in the process of post conflict peace consolidation, but would have also demonstrated the efficacy of this new mechanism that the PBC is. This would have beneficial effects ranging from a more result-oriented discourse within the PBC, to greater donor willingness to assist not only the candidate countries themselves, but also to fund the PBC.

**Madame President,**

To summarize, therefore: it is our view that the “teething troubles” of which we are wont to speak, can be addressed once we place the larger picture and the overarching goal before ourselves. Once we do so, the debates over what are, in the final analysis, only minutiae, will recede into the background. It is only then that the PBC will come into its own. It is our hope that with the rapid acceleration of the PBC’s work in the coming months, all of us will be able to return to you at the first anniversary of the establishment of the PBC, with a more optimistic report card, and in a more forward-looking frame of mind.

I thank you.

**597. Statement by Permanent Representative at the UN Nirupam Sen on 'promoting full employment and decent work for all' taking into account its under-relations with poverty eradication and social integration [Agenda Item 3(a)] at the 45<sup>th</sup> session of the Commission for Social Development.**

**New York, February 10, 2007.**

**Mr. Chairman,**

Allow me, on behalf of the delegation of India, to convey to you our warmest felicitations on your election. I would like to assure you of my delegation's full cooperation in the deliberations of this Commission. Our congratulations also to other members of the Bureau. We broadly associate ourselves with the statement made by Pakistan as Chairman of the Group of 77.

**Mr. Chairman,**

In 1995, the World Summit for Social Development committed all countries to address, in a concerted manner, the challenges of poverty eradication, the expansion of productive employment and the reduction of unemployment as well as social integration. Current indicators on the progress made in each of the above three areas present a dismal picture. No doubt, the global labour force increased by 438 million workers to about 3 billion workers from 1995 to 2005. However, unemployment worldwide rose from 6 % to 6.3 % during the same period. Developing countries continue to register an increase in their unemployment rate; the most glaring has been the case of Africa, in particular Sub-Saharan Africa. It is noteworthy that, despite the increase in GDP growth rates, the unemployment rate continues to rise. Continued dependence on agriculture, high demographic growth, significant increase in youth unemployment and a record toll on the labour force caused by HIV/AIDS continues to make the challenge of full employment and decent work much more difficult in many parts of the world.

There are fears, many well founded, that liberalisation and globalisation are creating an environment that is not conducive to expanding employment, especially in the private sector. Some distinguished economists have argued that rising unemployment is not due to globalisation but as a result of technology. In terms of economic logic, it should not be forgotten that the increasing demand for labour saving technology is inexorably driven by

globalisation with its cost cutting competitive pressures. John Stuart Mill's statement in the 19th century that workers have not benefited from the introduction of machinery seemed to be wrong during most of the 20th century but is beginning to seem right again. However, Luddism is not the answer. What is needed is not computer smashing but computer education and generally investment in education, skills and concerted efforts for a different national and international environment.

Nationally, a partnership between private and public sector as well as social security has to accompany the unleashing of entrepreneurial initiative. Private enterprise mostly finds it difficult to take account of the social costs of unemployment. It is worth remembering that the waste caused by the inefficient allocation of capital is not the only kind of waste. Unemployment can be even more wasteful not just economically but in terms of wasted lives, "so many strong men's courage broken, so many hands numbed as though by nightshade". Externally, globalisation means that inefficient enterprises have to close down under competitive pressure which causes unemployment. The IMF programmes combine encouraging privatisation with high interest rates. This makes job creation more difficult. Sequencing is critical and has often been ignored and hence a fast pace of liberalisation before ensuring social security, training in new skills and an adequate regulatory framework has often created problems. The IMF therefore needs to update and integrate even into its current activity its original Keynesian mandate of providing resources to strengthen aggregate effective demand. One of Keynes's children – ITO – though stillborn had the mandate to prioritise the objective of full employment rather than simply rules and it was recognised that positive action on employment was required because getting prices right, comparative advantage and liberalising trade were not enough to maximise welfare.

Trade barriers for developing countries remain (even the tariffs, in actual terms, imposed by the developed on developing countries are far higher than on fellow developed countries). The job destruction through the inability of many developing countries' farmers to compete, as a result of subsidies in the developed world, is well-known. As India's Commerce Minister famously said, we can deal with a flood of goods coming in but we cannot deal with a flood of subsidies. In fact, the latest report - World Economic Situation and Prospects 2007 – makes the point that one of the reasons why unemployment is not really decreasing significantly in spite of growth is the shift away from agriculture, including from foodcrops. In the case of non-agricultural goods, fair trade liberalisation could have offset the

unemployment-creating effects of liberalised imports because exporters are more productive than non exporting plants and higher exports mean more job creation and less job destruction for the economy but this effect is impeded by what have been described as “subtle trade barriers”.

The conclusion to this argument is self evident: there needs to be a fundamental reform of global economic governance which would ensure changes in voting structure and accountability. The United Nations General Assembly therefore has mandated the ECOSOC in the resolution on its strengthening (61/16) to periodically review international economic policies and these have to include an evaluation of the policies of international economic institutions.

**Mr. Chairman,**

India has been focusing on promoting full and productive employment and decent work. The Prime Minister of India, Dr. Manmohan Singh, has recently emphasized the ‘need for a growth process that is much more inclusive, a growth process that raises incomes of the poor to bring about a much faster reduction in poverty, a growth process which generates expansion in good quality employment, and which also ensures access to essential services such as health and education for all sections of the community’. He has also stressed that ‘the most effective weapon against poverty is employment’.

Employment growth accelerated to 2.6% during 1999-2005 outpacing population growth. Employment generation, on a sustainable basis, has been one of the important objectives of India’s planned economic development. India’s Five Year Plans have always conceptualised productive employment for all. During the Tenth Five Year Plan (2002-07), particular attention was paid to the policy environment influencing a wide range of economic activities with large employment potential, such as construction, real estate and housing, transport, small scale industries, information technology as well as IT Enabled Services, financial services and tourism.

**Mr. Chairman,**

India has been implementing various employment as well as self-employment generation programmes, in addition to a number of poverty alleviation programmes. Prominent self-employment programmes for educated and uneducated unemployed people, particularly youth and

women, include *Swarna Jayanti Shahari Rozgar Yojana*, Prime Minister's *Rozgar Yojana*, *Swarnajayanti Gram Swarozgar Yojana* and the Rural Employment Generation Programme. The Prime Minister's Bharat Nirman Scheme on the six critical areas of rural infrastructure would enhance rural economic activities and generate both more incomes and more rural employment.

Another notable initiative undertaken in India is the National Rural Employment Guarantee programme [NREGP] launched in 2006. It makes the right to work a fundamental right by providing 100 days assured wage employment annually to every rural household, and thus creates a social safety net, infrastructure and access to health in rural areas. At least one-third of the beneficiaries of this programme would be women. Productive employment and decent work also depend on higher productivity of labour and enhancement of skills. The Indian Parliament is considering an Unorganised Sector Workers Social Security Bill. This would roll back any commodification of labour. The National Rural Health Mission is striving towards health for all. Pluralism, freedom of speech and association in a vibrant Indian democracy are crucial in satisfying some of the aspirations of working people. Even those occasionally locked out of a private factory are never locked out of political space.

**Mr. Chairman,**

In conclusion, Mr. Chairman, my delegation welcomes the Secretary-General's affirmation of the need for creating an enabling environment at the international and national level as a key challenge for realising full employment and decent work. We hope that the current session of the Commission for Social Development would provide more insights into the effective realisation of the Millennium Development Goals, particularly to halve extreme poverty by 2015 and foster social integration by making employment a central objective of national and international macroeconomic policies.

Thank you, Mr. Chairman.

**598. Statement by Deputy Permanent Representative at the UN Ajai Malhotra at the General Debate of the Special Committee on Peacekeeping Operations.**

**New York, February 27, 2007.**

**Mr. Chairman,**

India attaches considerable importance to this session of the Special Committee on Peacekeeping Operations. We are confident that you will guide it to a positive outcome and assure you of our full cooperation in doing so. We thank Under-Secretary-General Guehenno for highlighting the priorities in peacekeeping for the coming year and compliment his team for its dedication and hard work. We associate ourselves with the statement made by Morocco, on behalf of the Non-Aligned Movement.

**Mr. Chairman,**

The report of the Secretary-General (Doc A/61/688) outlines the enormous challenges that have arisen consequent to the unprecedented surge in peacekeeping. There has been a sustained increase in the total number of personnel to nearly 100,000, deployed in 18 peacekeeping operations around the world. These numbers are set to increase in 2007. Moreover, the issues facing peacekeeping today are not only because new missions are being established or old ones expanded, but also due to the volatile and insecure environments in which UN forces have to function, the growing complexity of the difficult tasks assigned to them, and the tools that they are provided with.

We welcome the efforts by the Secretary-General to respond to peacekeeping challenges by strengthening and rationalizing structures in the UN via building military planning, management, and operational capacities, and appreciate his briefings and interactions with Member States. The proposal for realignment of DPKO by creating two Departments - Department of Peace Operations (DPO) and Department of Field Support (DFS) - is substantive, requiring an in-depth examination by Member States in the Special Committee.

While we do not wish to pre-judge the detailed examination of the proposals by experts in this Committee, the recommendations to consolidate important aspects of peacekeeping deserve to be welcomed. Among these are the strengthening of the authority of the SRSG and the Head of Mission to be

the ultimate authority at the Mission level for all aspects of UN operations and support; the holding of the Head of Mission accountable for proper resource management in accordance with established policies and procedures; the consolidation of communication and information technologies so crucial to modern combat; the consolidation of defence procurements through transfer of resources from Department of Management to DFS; the establishment of regional procurement offices; and above all joint senior decision bodies as well as integrated operational teams. We welcome these changes and hope that they will make UN peacekeeping even more tightly-integrated, effective and professional.

Mr Chairman, unity of effort requires clear command, control and reporting structures and arrangements to be in place, beginning with the mission in the field and going right up to the Headquarters. We look forward to the Special Committee on Peacekeeping Operations conclusively assessing the impact of proposed measures against the template of ensuring the overriding priorities of "unity of command and integrity of effort" as well as the "safety and security" of troops.

The safety and security of UN peacekeepers is of vital concern to troop contributors who place their soldiers at risk in pursuance of the UN ideal. The 89 deaths of peacekeepers in 2006, including that of an Indian peacekeeper, Corporal Mohan Singh Gurung, while doing his duty with the UN Mission in Sudan earlier this month, is a reminder of the importance of fully addressing safety and security concerns.

In this context, the UN must also enhance its capacity for information gathering and assessment and sharing it with field units along with concrete recommendations for preventive action. Reliable operational and tactical intelligence is essential for the successful conduct of military operations and in order to pre-empt potential threats to the security and safety of personnel.

UN field operations also continue to be constrained by complex bureaucratic procedures essentially conceived in a non-operational context. The fluid and unpredictable environment confronting UN Peacekeeping Operations, particularly during times of crisis, requires flexibility to adapt quickly to changing circumstances on the ground. This necessitates good logistics planning and close integration of the uniformed and administrative components of a mission. As the tasks of a Head of Mission are diverse and complex, it is important that the Force Commander be provided with operational and administrative flexibility to tackle crisis situations. In this

context, the C-34 should study, and the UN should absorb, the experiences acquired by UNIFIL last summer, when almost overnight that Mission had to establish alternate re-supply lines and casualty evacuation routes while simultaneously ensuring the safety and security of peacekeepers.

Mr Chairman, we would encourage the Secretary-General to also address the issue of consolidation of peacekeeping accounts while undertaking administrative reorganization and streamlining. This would provide an opportunity to tackle the issue of selective financing of peacekeeping missions that is sometimes resorted to. Member States should be entitled to cash surpluses from missions only if they do not have dues to other peacekeeping missions. Such consolidation will help the Secretary-General better manage the finances of peacekeeping missions. It will address the chronic cash deficits faced by some missions, while ensuring more predictable troop cost and contingent owned equipment reimbursements to Member States. It will also help address the concern of developing countries that contribute the overwhelming majority of peacekeeping troops, yet continue to be owed considerable sums of money.

Mr Chairman, India has supported energising the mechanism of triangular consultations between Troop Contributing Countries, the Security Council and the UN Secretariat. Most Member States participating in last week's debate on Reform of Working Methods of Security Council laid particular stress on this aspect. Private Meetings under Resolution 1353 format continue to be held on the eve of renewal of Mission mandates, leaving little scope for serious or meaningful discussions. It is important that TCCs be involved early and fully in all aspects and stages of mission planning and that their views find their way into mission mandates.

We welcome the Secretary-General's efforts to deepen ties between the UN and the African Union. The World Summit in September 2005 had supported the development and implementation of a ten year plan of capacity building with the African Union. India supports these efforts. We share close and historic ties with Africa and are involved in bilateral capacity building in many African countries. Notwithstanding this important capacity building exercise, the UN cannot absolve itself of "its responsibility under the Charter for the maintenance of international peace and security". The real challenge before the UN is to strengthen peacekeeping without regionalising it.

As regards conduct and discipline of troops, we are convinced that sexual exploitation and abuse are totally unacceptable forms of behaviour. We

fully support the implementation of a policy of zero tolerance and encourage raising the awareness of those with managerial and command responsibilities and the establishing of standards of conduct, training and investigation. Careful preparatory training in terms of a multi-cultural, pluralistic and tolerant outlook is as important as subsequent swift punitive action, once culpability is established. We look forward to finalizing the revised Draft MOU and Draft Comprehensive Strategy of Assistance and Support to Victims of Sexual Exploitation.

Mr Chairman, we welcome the establishment of an Integrated Training Service (ITS) and would encourage the Department of Peacekeeping Operations to utilise and benefit from the considerable field expertise of the Troop Contributing Countries.

As regards Security Sector Reform, we must have in place a coherent framework to clarify the various dimensions of the concept. This should take place in relevant UN inter-governmental bodies, especially the Special Committee and the Peacebuilding Commission.

The role of Civilian Police in peacekeeping has grown substantially. We have noted the establishment of initial Standing Police Capacity and look forward to engaging in constructive discussions with the Police Adviser regarding future action with regard to this Capacity and its integration into the UN Peacekeeping structure in the field. We would also like to emphasise the need for adequate transparency in ensuring representation of qualified candidates from Troop Contributing Countries in senior leadership positions.

Mr Chairman, India stands solidly committed to assist the UN in the maintenance of international peace and security. We have a proud history of UN peacekeeping dating back to its inception in the 1950s. We have contributed nearly 100,000 troops, and participated in more than 40 missions. India has also provided and continues to provide eminent Force Commanders for UN Missions. We salute the 113 Indian Army personnel, as well as peacekeepers from other countries, who have made the supreme sacrifice by laying down their lives while serving in UN Missions.

India has also traditionally been contributing lady military and police officers to a number of UN Missions. In response to the Secretary-General's call for increased representation of female personnel in field missions, we feel particularly honoured to have provided the first full Female Formed Police Unit for peacekeeping work. This unit is currently assisting the UN Mission in Liberia in reaching out to the most vulnerable sections of society, i.e.

women and children, in a post-conflict environment, besides performing its normal duties.

In conclusion, Mr Chairman, we are fully committed to the purposes and principles of the UN and look forward to making UN peacekeeping an ever more effective and efficient tool in the maintenance of international peace and security.

Thank you, Mr Chairman.

**599. Statement by Permanent Representative at the UN  
Nirupam Sen on the Situation in Afghanistan at the  
Security Council.**

**New York, March 20, 2007.**

**Your Excellency, Mr. President,**

At the outset I convey the regrets of Ambassador Nirupam Sen, Permanent Representative of India, for his inability at the last minute to address this august body on behalf of India. I have the honour to read this statement on his behalf.

India joins other delegations in congratulating you on your outstanding stewardship of the Security Council for this month. We also thank Special Representative Koenigs and UNDOC Executive Director Costa, for their informative and lucid briefings. For India, given our historic and cultural ties with the Afghan people, today's topic is one of great importance, especially as the Security Council considers extending the mandate of the UN Assistance Mission in Afghanistan (UNAMA).

**Mr. President,**

The ongoing effort to help Afghanistan emerge from war, strife and privation remains the responsibility of the international community, in particular, the States of the region. Hence, consolidation of the hard-won gains since the fall of the regressive Taliban regime must be a long-term strategic objective for all of us; not merely a tactical maneuver for the present.

At the outset, therefore, the latest report of the Secretary General on

Afghanistan accords well with India's own assessment of the situation on the ground. However, sections of the report on the security situation make depressing reading, not the least of which is the frequent use of the term "insurgents"; to us, this is a euphemism that does not begin to describe extremists and terrorists of the most vicious sort. The report also throws Afghanistan's steady slide into violence into sharp relief. India has consistently held that one cannot negotiate with those who choose the path of terror. Three months ago, India had noted that it was not evident that efforts to find ways of negotiating peace in the more troubled provinces of Afghanistan were succeeding. Sadly, the Secretary General's report and the increasing trend of suicide attacks by terrorists only reinforce this point. Tolerating the spiral of violence is not an option, and a strong, unified international voice condemning international terrorism is the need of the day. We must maintain a robust response to terror, while simultaneously focusing upon the most rapid possible expansion of capacity in Afghanistan to deliver effective governance, development and the dividends of peace. The reason for this prioritization is as simple as it is self-evident: development, good governance and other symbols of democracy are based primarily on peace and stability.

It is in this context that we welcome the completion of the expansion of ISAF, the current strategy of deploying more Provincial Reconstruction Teams, and the effort to expand the capacity and the size of the Afghan National Army and the Afghan Police. It is particularly creditable, as the report notes, that the Afghan Army is taking an active part in combat operations while it is under training, and simultaneously dealing with a situation of "improving" logistics support, administrative institutions and so on. Assistance for the national Budget, to enable a rapid expansion of capacity for the Police and the Army, remains inadequate, and this is a cause for concern. It must be part of the international community's long-term strategy to enable the Afghan state to support appropriately-equipped, well-funded, pan-Afghan institutions of State that exercise the State's monopoly over the use of force. Until there is predictability and irreversibility of this process, it is unlikely that efforts to disband illegally armed groups will be taken forward meaningfully. Until Afghan forces of law and order are not fully empowered, the nexus between drug trafficking and terror cannot be broken.

**Mr. President,**

This brings us to the question of development. Under normal circumstances,

timetables for reconstruction do not need to be so tightly telescoped, and benefits can be spread thinly and as widely as possible. The situation in Afghanistan however, requires that development follows in the wake of security, and thus, it is occasionally less than even-handed. The example of drug trafficking is particularly relevant. At one level, firm action is required against drug lords and their mercenaries, as well as those who process the raw material. But having taken such action, the effort must be to rapidly follow-up by providing alternative sources of employment to farmers and other unwitting victims of the drug industry. In such circumstances, it is difficult to ensure a fully even-handed approach.

In this context, we note that there is often a tendency amongst donors to seek to resolve all possible problems in the recipient country at once. This is natural, and to an extent, understandable. However, one cannot be prescriptive in providing assistance, as this is often the surest way to alienate the recipients of our good intentions. It is our view that donors must let the Afghan government and people draw up their list of developmental priorities, and these may occasionally differ from our own. Once basics such as food, medicine, shelter and education are provided for, in an atmosphere of relative security, it is natural that the recipients of assistance will want to build upon such gains incrementally.

We should also focus on the many achievements of Afghanistan in the past five years as a case of the glass being half-full, not bemoan the half that remains empty. The Afghan leadership would be the first to acknowledge the existence of corruption, the far-from-complete access of people to Afghan public service institutions and judiciary, its still-evolving political system. But there can be little doubt that given the widespread anarchy of past decades, ongoing campaigns of terror, drought and devastation, whatever has been achieved so far is nothing short of miraculous. The list of chores ahead of the Afghan State merits the widest and most sustained programme of assistance from all of us.

**Mr. President,**

This brings us to the role of regional and international assistance, and the need for closer and more effective coordination between international organizations and stakeholders in Afghanistan. In this context, I commend the efficacy of the Joint Coordination and Monitoring Board process, which has begun to coordinate the work of an array of international actors from the region and beyond. India is ready to continue to contribute to such an effort. In this context, it is essential to underline that despite the myriad

challenges before us in Afghanistan, the countries of the region cannot but play a larger and more direct role in reintegrating Afghanistan into the region. Indeed, lasting development in Afghanistan will eventually be based on a revival of the age-old commercial, social, cultural and political ties that made Afghanistan the cross-roads of East and West Asia, South Asia and Central Asia.

India is attempting to support precisely such a transformation. India had the honour to join Afghanistan in hosting the Second Regional Economic Cooperation Conference in November 2006 in New Delhi, at which both Prime Minister Manmohan Singh and President Karzai were present. As the incoming Chair of SAARC, we are delighted to host Afghanistan at its first SAARC Summit in early April this year in New Delhi. We believe that this will strengthen regional cooperation, while also enabling SAARC to reach out to Central and West Asia. We also believe that Afghanistan's entry into SAARC will help SAARC address issues relating to transit and free flow of goods across borders, which will lead to greater economic development of Afghanistan and the region as a whole.

Bilaterally, India has continued to make strenuous efforts to support reconstruction in the widest possible spectrum of activities in Afghanistan. Our current commitments exceed US \$ 750 million, and cover the gamut of activities, from large projects such as road construction, power transmission lines, construction and refurbishment of dams, to more locally-relevant projects such as supplying and refurbishing hospitals, schools, community organizations, cold storage plants and so on. We are also mindful of the need to support investment in capacity building, within Afghanistan, and through the provision of over 500 scholarships a year to study in India. It is also our endeavour to ensure that our assistance is widely spread among the regions of Afghanistan.

In conclusion, Mr President, India will endeavour to assist to the extent possible, in every activity that can buttress peace in Afghanistan. We see this as an investment in our region, and as a means of assisting a fraternal people. In all our efforts aimed towards reconstruction and development of Afghanistan, we have ensured close involvement of the Government of Afghanistan and the welfare of its people. With this as our common goal, I reiterate India's abiding commitment to support reconstruction efforts in Afghanistan.

I thank you, Mr. President.

**600. Statement by Permanent Representative at the UN Nirupam Sen on Agenda Item 113: Follow up to the Outcome of the Millennium Summit: Report of the Secretary General (A/61/836): Recommendations contained in the Report of the High Level Panel of the United Nations System-wide Coherence in the areas of Development, Humanitarian Assistance and the Environment at the 61<sup>st</sup> session of the UNGA.**

**New York, April 16, 2007.**

Madam President,

We thank the Secretary-General for his report, A/61/836, on the recommendations of the High Level Panel on UN's System-wide Coherence and you, Madam President, for initiating this intergovernmental process giving us the opportunity to comment mainly on the process of consideration of the report's recommendations but also briefly on the substance. We broadly associate ourselves with the joint statement on behalf of G-77 and NAM delivered by the Chair of G-77.

Madam President,

The report of the High Level Panel covers a broad spectrum of issues, which include the functioning of the UN funds and programmes at the country level, their governance structure, the funding arrangements, the business practices that they employ, the relationship with the Bretton Woods Institutions, strengthening of the UN gender architecture, and a host of other issues.

The contents of the HLP report are complex and technical. Many of its recommendations provide guidance that can only serve as pointers to the directions recommended by the Panel. There is often lack of clarity and detail on the precise operationalization of the recommendations. The Panel has obviously left the details to the Secretariat.

The report of the Secretary-General provides his views and recommendations on some of the elements covered by the HLP report. However, information on operational aspects of specific recommendations of the Panel is not available even in this report. It is a telling comment that even after over five months of the release of the HLP report in November last year, the Secretariat is struggling with the operational details. This

should give us a fair idea of the time that the UN development system would need to invest in implementing the Panel's recommendations. It seems to us a strange preoccupation at the half-way mark for the achievement of the MDGs.

The Secretary-General acknowledges the need for "a process of review and dialogue to build broad-based common understanding of its objectives, contents and proposals". We agree with the Secretary-General that there is much in the Panel's report that needs the development of "common understanding". A good example is the One UN approach itself. In paragraph 12 of his report, the Secretary-General provides some information on how the "one United Nations" approach will be tested. He states that "this exercise will provide an essential test of the application of the principles advocated by the Panel in different countries, and an analysis of the results and experiences will be presented to the relevant governing bodies at the end of the year". As the reports on the eight pilots would become available only by the end of the year, we are unable to understand how we are expected to pronounce on the Panel's recommendations even before the results of these pilots have been made available. Perhaps the logical way to consider this report would be to await the results of the pilots before consideration of the report as a whole is begun.

At the beginning of his report (paragraph 9), the Secretary-General recommends, "the proposals in the report should be pursued as an integrated and coherent whole, as the report was crafted as such with many of the recommendations connected to one another". We agree that the contents of the report cannot be split up for consideration in different parts of the UN. An integrated and coherent approach can be the only option. This, however, does not imply that the recommendations of the Panel come as a package. We believe that it is during the intergovernmental consideration of the recommendations that Member States will decide on the Panel's recommendations that merit further consideration and implementation.

Madam President,

A better performing UN development system is first and foremost in the interest of developing countries. It is the developing countries, who as programme countries, are the recipients of the UN's operational activities for development. We are convinced that the reform of the UN should be aimed at making the system more responsive to the needs of developing countries, through a better delivery and effectiveness of UN development

assistance. Thus, “coherence” is not an end in itself. We are, therefore, convinced that what needs to be measured at the end of the pilots is not just the “how” of the Panel’s recommendations but the “how much”. We need to know how much the UN agencies saved on their transaction costs, how much of their reporting burden was reduced and how much improvement was achieved in the delivery of development assistance to support the efforts of developing countries in pursuing their national development plans and priorities.

While measuring the development impact of improved coordination, and “coherence”, it is also important that we measure the cost incurred to achieve this better performance. We have repeatedly asked for the expenditures incurred by UN funds and programmes on “coordination”. So far, we have learnt that better coordination leads to long-term savings. We would like to see precise figures of coordination related expenditures incurred by the funds and programmes over the years, including the expenditures on the RC system. The HLP report makes further recommendations for enhancing coordination or “coherence”. We would like to know how much this would cost the UN system before we consider the likely benefits that may emerge from these recommendations.

The Secretary General has assured us that due consideration would be given to the High Level Panel’s proposal to establish an independent task force to further eliminate duplication within the United Nations system, and consolidate United Nations entities, where necessary, building on the foundations of the Panel’s work. This exercise would seem to make the parallel process of mandates review undertaken by member States through an informal working group of the GA duplicative.

Madam President,

The details sought by us today as well as those promised by the Secretary General in his report will enable us to carry out a cost benefit analysis during inter-governmental discussions. The TCPR had an optimal balance of the one and the many, creating a synergy while preserving the energy inherent in each separate mandate. Coherence and One UN are not an end in themselves unless we believe with Shelley that “the One remains, the many change and pass”; while stitching a new jacket we should be careful that it does not become a straight jacket. It would be a pity if the UNDP were to lose its role in human development and development policy advice on cross cutting development issues and become a mere coordinator and manager with a diluted focus on development and poverty. Making

human rights a conditionality and losing the substance of the Right to Development would be a poor bargain. The Sustainable Development Board does not seem a sustainable concept: the supervisory role of the member States and that of each executive board in respect of individual mandates of funds and programmes should not be compromised.

The resolution on strengthening ECOSOC was passed after the report was submitted. We need to first implement the strengthened mandates (especially the periodic review of international economic policies which should include the policies of BWIs) before considering alternatives. The most important event in contemporary UN and BWIs is the event that has not happened at all - the reform of the UN Security Council and the reform of the Bretton Woods Institutions. In the shadow of that non-reform which is the source of much fundamental incoherence, systemwide coherence may hardly touch the periphery of real change for the better. It is doubtful if mere administrative and institutional reorganisation can be a substitute for genuine institutional reform.

We hope that you will lead the consultations that would decide about the kind of process that can be adopted to do justice to the consolidated intergovernmental consideration of the contents of the HLP report and the report of the Secretary-General on its recommendations.

Thank you, Madam President.

**601. Statement by Permanent Representative at the UN  
Nirupam Sen on the Relationship between Energy,  
Security and Climate at the UN Security Council.**

**New York, April 17, 2007.**

**Your Excellency, Madam President,**

Please accept our warmest congratulations to a fellow Commonwealth country on having the Presidency of the Council and our appreciation of the manner in which it is conducting the proceedings. We are delighted that you are personally chairing today's discussions. Climate change issues loom large in today's global environment agenda. This issue was in the forefront in 1992 when it was included on the agenda of the Rio Summit on Environment and Development. Consideration of climate change received much-needed momentum with the adoption of the United Nations Framework Convention on Climate Change and, thereafter, through the Kyoto Protocol agreed in 1997. The international community needs to be vigilant to moves that would "make global warming [debate on climate change issues] cool again".

2. We have read with interest and attention the UK Concept Paper on Energy, Security and Climate. We must confess, with all respect, that we have some major conceptual difficulties. We of course know the obvious: climate change is not a threat in the context of Article 39, nor can we contemplate Article 41 measures! High per capita carbon emitters are in debt to those with low per capita carbon emissions because they are exploiting much more than their share of environmental space, space in the carbon sink that does not belong to them. An international economic system that has historically been based on externalizing the consequences of pollution is both unjust and impracticable. The main responsibility to take action to reduce the threat of climate change rests with the developed countries, in accordance with the principle of common but differentiated responsibility, as enshrined in the United Nations Framework Convention on Climate Change. In this topsy-turvy world, just as the Swiss linear formula in the WTO demands more than full reciprocity from developing countries, so also a careful reading of the Stern Report suggest that between now and 2050, all the GHG abatements proposed would take place in developing countries with developed countries taking credit for GHG reduction effected solely

by commercial investments with the increased cost of the energy service being borne by the developing countries and CDM type transfers of credits. This would negate the present global Compact on Climate Change, affect growth in developing countries and increase insecurity.

3. The Stern Report has been read with interest in India. It cites Richard Nordhaus extensively. Neither he nor Prof. Stern have overcome the uncertainty in and difficulty of calibrating catastrophic scenarios. In fact strong uncertainty is ignored. The result therefore is to present a political argument as the outcome of an objective scientific modelling process. Nordhaus himself has concluded that the Stern review is "a political document". That this objection applies equally to Nordhaus's work only makes it more telling. These catastrophic scenarios therefore cannot be treated as threshold events that are known in the real meaning of the word. Hence their possible consequences in terms of border disputes, migration, energy supplies, societal stress and the like can hardly be discussed in any meaningful manner.
4. In marked contrast, a more immediate and quantifiable threat is from possible conflicts arising out of inadequate resources for development and poverty eradication, as well as competition for energy. The concerns of developing countries centre on poverty eradication, a pre-requisite for which is to accelerate growth in developing countries. In turn, by mitigating the potential for conflict, poverty eradication has positive implications for global peace and security. Reduction of greenhouse gas emissions in developed countries also has a potentially significant positive impact on security, by moderating the impetus for privileged access to energy markets. Efforts to impose greenhouse gas commitments on developing countries would simply adversely impact upon the prospects of growth in developing countries. On the other hand, cooperation of developing countries through the carbon market would be conducive to their growth. However, a pre-requisite for GHG abatement in the carbon market is enhanced, legally binding commitments by developed countries. Considered solely in the context of climate change, poverty alleviation is dependent on climate change adaptation measures. Far more important than an uncertain international security threat is the existential threat to many small island developing states and it is, therefore, crucial to mobilize resources and technology for immediate adaptation measures there.

5. To tackle the problems that may lead to conflict, action is required on resource flow, adaptation and technology. Diversion of ODA resources from economic growth and poverty eradication in developing countries is not the answer. Besides new and additional resources, there is need to upscale the realization of resources from the carbon market. Equally there is a need to reach an agreement on IPRs for affordable access to technologies as well as for collaborative R&D to develop technologies based on the resource endowments of developing countries.
6. Energy is a critical input for development. For developing countries, a rapid increase in energy use per capita is imperative, if national development goals, and the Millennium Development Goals, are to be realized. It is essential that developing countries have the policy space to address their energy needs in the light of their individual circumstances. Concerns over energy security have heightened with the recent sharp increase in energy prices. This has resulted in a renewed focus on energy diversification and efficiency. All significant energy sources – whether conventional or advanced fossil fuels based, or renewable, or clean energy—must remain in policy reckoning to address energy needs for sustainable development. At a conference in New Delhi earlier this year on Mahatma Gandhi's idea of non-violent resistance, one of our leaders said that "To be equitable, economic growth has to be sustainable. To be sustainable, economic growth has, in turn, to be all inclusive. It is actually 'sarvodaya' or 'the rise of all'. Mahatma Gandhi insisted that such a rise must be respectful of land in harmony with nature and the earth's long term future". For those delegations who are interested, I am appending some facts on India's implementation of sustainable development.
7. The appropriate forum for discussing issues relating to Climate Change is the UNFCCC. In so far as international peace and security are concerned, developed countries reducing their GHG emissions and energy consumption will considerably reduce such threats through a reduction in the need for privileged access to energy markets. Nothing in the GHG profile of developing countries even remotely reflects a threat to international peace and security, yet their taking on GHG mitigation targets will adversely impact their development (the best adaptation to the adverse impact of Climate Change) and thereby increase insecurity. Conceptually and logically even if one assumes that catastrophic scenarios are certain (which

is not the case) the only way to discuss what can be done about the physical effects of Climate Change is in the UNFCCC. The UN Security Council does not have the expertise and may not have the mandate: to make an uncertain long term prospect a security threat amounts to an informal amendment of the Charter. This can only be done through Article 108/109 procedures. While preventing a far reaching adverse change in the climate of the world we have to promote a far reaching change for the better in the climate of the Security Council. This too requires Article 108/109 procedures.

**I thank you Madam President.**

**Appendix  
(With reference to Para 6 of the Statement)**

- India's current per-capita GHG emissions are only 23% of global average, 4% of the US, 12% of EU, 15% of Japan.
- India, with 17% of the population of the world, has only 4% of global GHG emissions
- India's energy intensity of GDP has reduced from 0.30 kgoe per \$ GDP in PPP terms in 1972 to 0.17 kgoe per \$ GDP in PPP terms in 2003; this is marginally better than that of Germany.
- There has been effective delinking of energy sector growth from economic growth. In recent years India has delivered a GDP growth of 8% per annum with only 3.7% growth in its total primary energy consumption.
- In all the major energy intensive sectors – steel, aluminium, fertilizer, paper, cement, levels of energy efficiency are at global levels. Especially in the cement sector, the energy efficiency of Indian plants are among the world's highest.
- In all the major energy intensive sectors – steel, aluminium, fertilizer, paper, cement, levels of energy efficiency are at global levels. Especially in the cement sector, the energy efficiency of Indian plants are among the world's highest.
- The share of renewables in total primary energy is still at 34%.

**602. Statement by Deputy Permanent Representative at the UN Ajai Malhotra at the 29<sup>th</sup> session of the Committee on Information.**

**New York, May 2, 2007.**

**Mr. Chairman,**

At the outset, kindly accept my congratulations on your election as our Chair. Please do also convey our best wishes to the other office bearers on the bureau, upon their election.

I would also like to take this opportunity to acknowledge the outstanding contribution made by the previous Under-Secretary-General for Communications and Public Information, Mr. Shashi Tharoor, and to warmly welcome his successor, Mr. Kiyotaka Akasaka, and convey to him our very best wishes for every success in his important new assignment.

Our welcome also goes to the delegations of Thailand and the Dominican Republic, the two new members of this Committee. My delegation also aligns itself with the statement of the G-77, delivered earlier by the distinguished representative of Pakistan.

**Mr. Chairman,**

This debate provides an occasion to reiterate the central concerns of Member States over the process of dissemination of information. For us, the defining characteristic of the work of this Committee lies in its relationship with the Department of Public Information, and the ensuing cooperative effort to continually improve upon the delivery of relevant information inputs to millions of potential users across the world. Against this backdrop, I would like to briefly touch upon the following points of interest to my delegation:

Perhaps the most important issue we need to focus on is how to make the work of the Department of Information as relevant and accessible as possible to the largest number of users, enabling it to be an effective conduit for the flow of information between the UN and the peoples of the world. For this, it is essential that the widest possible spectrum of technologies be utilized. This includes the use of modern technologies, such as webcasts and podcasts, as well as cost-effective and more traditional forms of communication, such as the radio and print media, which remain of great

importance in reaching out to people in parts of the developing world. Many countries simultaneously straddle several centuries in technological terms, and it is vital that the product presented by DPI is disseminated through a wide menu of media channels. While we appreciate the efforts made so far in this regard, we believe that there remains room for further improvement.

We also fully support the effort to facilitate the emergence of a more linguistically equal world, in which information is disseminated not merely in the official languages of the UN, but also in other languages. There is also merit in increasing the level of local content and local involvement in the production of programme material. Doing so will have the advantage of making information more relevant locally, while simultaneously encouraging local talent and creativity to involve itself in the work of the UN.

A related issue, Mr. Chairman, is the question of UN Information Centres, which are crucial in enhancing the public image of the UN and in disseminating its message, particularly in the developing world. We agree with the view expressed by many delegations that our goal should be to strengthen, rather than weaken, these information outposts of the United Nations. Hub and spoke models may appeal in certain managerial contexts, where local sensitivities and regional variations need not be important. However, it makes little sense to employ them in a people-intensive sector such as the media.

The argument in favour of a more relevant outreach effort by the UN is also related to the larger objective of creating more locally relevant content and greater local involvement in the work of the United Nations. This should logically also be a larger objective of the UN, since the UN will in turn become more widely relevant by virtue of being more locally accessible.

We also need to dwell on the issue of content management. We appreciate the work being done to provide information that is relevant and meaningful, while simultaneously being interesting and entertaining. This is no easy task, and efforts made in this direction have been highly creditable. However, those working on content management should never be satisfied with the status quo, but should be motivated by a constant desire for further improvement. While it is important that the DPI's programmatic products continue to cover the gamut of UN activities, such products must also improve their coverage and projection of the most significant activities of the UN, in particular, those that impact most upon the lives of people. These include humanitarian activities and the work performed, often under extremely arduous circumstances, by those who serve the UN by keeping

the peace in strife-torn lands. We would continue to urge that DPI and DPKO work in tandem to further raise awareness about UN peacekeeping and highlighting peacekeeping success stories. This would go a long way towards generating goodwill and projecting a better image for the UN and its peacekeepers, both locally and globally. In this context, we welcome the creation of a Joint Public Information Working Group on developing an overall strategy to increase awareness of the achievements and challenges of UN peacekeeping. We look forward to being kept informed about its efforts.

In conclusion, Mr Chairman, I would like to assure you of India's support as you guide the work of this Committee, as also of our support to the DPI as it tackles the formidable challenges before it.

Thank you, Mr. Chairman.

**603. Statement by Permanent Representative at the UN  
Nirupam Sen on Agenda Item 46: Follow up to the  
Outcome of the twenty-sixth special session:  
Implementation of the Declaration of Commitment on HIV  
Aids at the 61<sup>st</sup> session of the UNGA.**

**New York, May 21, 2007.**

Madam President,

We thank the Secretary-General for the useful report focussing on the progress made since the High-Level Meeting on HIV/AIDS a year ago. The report provides a good overview of the most recent developments in the global AIDS response and serves as a useful interim assessment for the more comprehensive review next year.

Madam President,

A lot of progress has been made in recent years in dealing with the HIV pandemic. There has been a renewed concern among donor countries who have mobilized resources for countries affected by HIV/AIDS. The Global Fund, set up a few years ago has pledged assistance of over \$ 10 billion to over 130 countries to fight HIV, Malaria and TB. The affected countries have in turn laid strong foundations for giving an effective response

to this epidemic. Steps have been taken by national governments to raise domestic resources to expand access and strengthen the implementation of the various initiatives under the HIV/AIDS control programmes.

Yet, what has been achieved so far falls short of what needs to be done. While 2 million people in low and middle-income countries were receiving antiretroviral therapy, 2.9 million people died from AIDS in 2006. The Secretary-General identifies some important areas. These include the need to prevent new infections through keeping the preventive efforts at par with the epidemic's growth, national target setting, and a move from working on an emergency footing to a longer-term effort to lay the groundwork for sustainable progress. The Secretary-General rightly highlights the need for enhanced resources particularly international funding for public health and development, as many countries, especially low-income countries, cannot achieve universal access goals without external resources.

Madam President,

India remains a low prevalence country with overall HIV prevalence of 0.9 percent. However, we are cognizant of the gravity of the problem and the urgent need for a strong commitment to reverse its further progression, as the epidemic masks several sub-epidemics. Moreover, with India's large population, this low percentage converts into a large number of HIV infected people. A young, mobile population coupled with rapid economic and social transformation that India is undergoing add to the complexity of the HIV/AIDS epidemic. The last few years have seen the epidemic moving from high-risk groups to the general population with women, youth and the rural population being highly vulnerable.

India is making significant progress in addressing the challenges posed by the HIV epidemic. Integrated with the National Rural Health Mission, our flagship programme for addressing inequities in accessing health services in rural areas, the HIV/AIDS strategy seeks to balance prevention with the continuum of care and treatment. With prevention as the key, the strategy focuses on expanding access to preventive services.

The National AIDS Control Organisation (NACO) has developed a clear and effective response for every segment of the community, highlighting that each individual is at risk and that prevention is the key. NACO has been engaged in scaling up its programmes through Targeted Interventions for High Risk Groups, strategizing comprehensive Information, Education and Communication packages for specific segments and scaling up of the

service delivery component. The 3 million elected representatives of the local self-governments at the village level, including a million women, are being involved in the effort, as are a large number of NGOs. There is increased focus on women and youth and enhanced emphasis on widespread awareness campaigns to increase awareness about the disease and its preventive methods.

To facilitate a strong multi-sectoral response to combat HIV effectively, a National Council on AIDS (NCA) headed by the Prime Minister of India, and consisting of cabinet Ministers and leading civil society representatives, has been constituted. Under its direction, a multi-sectoral response is underway, involving participation of the private sector, civil society and key Government Departments.

Research and development efforts on HIV/AIDS remain strong. In view of their enormous potential, vaccine development initiatives continue, and the fruits of these efforts should be available in a few years. Two centres of excellence set up at the National AIDS Research Institute in Pune, Maharashtra and the Tuberculosis Research Centre in Chennai, Tamil Nadu have been engaged in clinical evaluations and trials. A prototype of candidate vaccine based on DNA and MVA has also been developed for HIV-1 subtype 'C' at the All India Institute for Medical Sciences, New Delhi.

Madame President,

India's first National Paediatric Programme on HIV/AIDS was launched on 30<sup>th</sup> November 2006 to enhance coverage of Children Living with HIV/AIDS and providing them specific paediatric formulations. Close to 3500 children are receiving treatment in paediatric formulations. Paediatric drugs have been provided to 86 ART centres and arrangements are being made to supply to the rest of the centres.

NACO also organised a series of events on World AIDS Day 2006, which included:

- An address by the President of India to both Houses of Parliament to reassert their commitment to fight against the HIV epidemic.
- Release of a special postage stamp to commemorate the Day.
- A cultural show with popular film personalities and singers, committed to HIV/AIDS prevention.

- Broadcast of a 30 minute special programme in 24 languages from 174 stations of the All India Radio.
- Press advertisement highlighting the commitments and achievements of the National AIDS Control Programme.

Madam President,

India is a source of low priced and effective essential drugs for several countries in the developing world. Indian pharmaceutical companies have been able to obtain US FDA approval for over 14 drugs, which will further ease the availability of affordable drugs.

We have come a long way since we committed ourselves to goals related to the HIV pandemic. In the moving words of one of our leaders, HIV is “a most deadly scourge, a disease that is not a medical or a scientific subject alone but a poignant social issue as well”. India is fully committed to zealously responding to the HIV/AIDS pandemic in a multi-pronged, multi-sectoral and multi-dimensional way.

Thank you, Madam President.

**604. Statement by Joint Secretary (Technical Cooperation) of the Ministry of External Affairs Ms. Primrose Sharma on South-South Cooperation for development at the 15<sup>th</sup> session of the high-level Committee on South – South Cooperation.**

**New York, May 29, 2007.**

**Mr. President,**

We congratulate you and other members of the Bureau on your election and thank the outgoing Bureau for the work done over the last two years. We broadly associate ourselves with the statement delivered by the Chair of the Group of 77.

The countries of the South have seen dramatic progress over the last twodecades despite the many continuing challenges, including those posed by a globalising world. Today, there are hardly any goods or services needed

in the South that cannot be sourced from the South itself. As developing countries move towards market-based economies, in an era of globalization that has not brought the expected economic benefits to every country, cooperation amongst them remains relevant. This can help in mitigating the adverse effects of international economic policies and to achieve the positive potential that these forces of integration have in them for the developing world. It is, therefore, not surprising that the share of developing countries in total world trade has risen in the last two decades and that intra-South trade has been growing. Developing countries need to continue working together to overcome their shared vulnerabilities and disadvantages and to maximize the benefits that would accrue to them from the process of globalization.

Countries in the South also need skills and expertise in high technology areas and for expanding mechanisms for transferring experiences in the development of human resources. In the past two decades scientific and technical competence has grown substantially in countries of the South to create significant complementarities between them. What is required is the will and the investments to put these complementarities to productive use.

**Mr. President,**

Our discussion in this High Level Committee is focused on “the Role of the United Nations in Strengthening South-South and Triangular Cooperation”. The UN, with its universal membership, is uniquely placed to play an important role on the debate on globalization and the development of an equitable and inclusive world economy. The report of the Administrator informs of the continuing support extended by UNCTAD for South-South trade by providing a forum for developing countries to address the consequences of globalization. UNCTAD makes a useful contribution by disseminating advisory services, policy research and analysis.

One of the practical areas where UN funds and programmes can make a tangible and immediate contribution is through UN operational activities for development. By using Southern expertise and procuring from the South, that which is needed for implementing their development programmes in developing countries, UN funds and programmes would help develop capacity within the South, in the implementation process itself. This would further stimulate South-South Cooperation. UN funds and programmes can also serve as reservoirs of experiences and best practices within the South and facilitate the exchange of these best practices. Given the common development experiences of developing countries, experiences from within

the South are more likely to be relevant to each other. The decision of the UNDP Executive Board in 2004 to include South-South Cooperation among the drivers of development effectiveness in the Multi-Year Funding Framework was, therefore, timely.

The preparation of a roster of Southern experts needs to be speeded up. As only 22 UNDP country offices reported that there is increased national interest in South-South Cooperation, there is need to get the other country offices to participate in such exchanges. UNDP needs to work on the bottlenecks identified in the Report, through additional support to South-South cooperation and increased involvement of the Country Offices to address the gaps. Given the importance of mainstreaming South-South Cooperation in UN operational activities, the Special Unit should continue its activities in the existing arrangements and with the current structures and level. What is needed is greater commitment from UNDP and other funds and programmes to use the capacities, expertise and experiences of the South in addressing the challenges facing the South, rather than the creation of high level positions.

**Mr. President,**

India has believed in the imperatives of South-South Cooperation since its independence. This inspired us to establish cooperative technical and economic links with a very large number of developing countries. A deliberate and systematic effort has been undertaken to spread the reach of our South-South cooperation activities to different regions of the globe. The Indian Technical and Economic Cooperation or ITEC, which was launched in 1964, has provided over US \$3 billion worth of technical assistance covering 156 developing countries. It is also this commitment that drives India's cooperation with NEPAD, and the TEAM-9 initiative focussed on West Africa. Work is underway on implementing India's initiative for a connectivity mission in Africa to support tele-education, tele-medicine, e-governance, infotainment, resource mapping and meteorological services, across the continent.

There is also growing cooperation between India and the Pacific Island Forum and the CARICOM countries. India's "Regional Assistance Initiative" for Pacific Island Forum members, would, over the coming, years implement a wide-ranging package for Pacific Island countries, covering sustainable development, SME and capacity building through workshops and training courses, scholarships for higher studies etc. Cooperation with CARICOM countries ranges from provision of higher education in India, experts for

flood forecasting/ disaster management, establishment of IT training Centres and infrastructure. The initiative undertaken by Brazil, India and South Africa, the IBSA initiative, is another manifestation of our commitment to South-South Cooperation. IBSA has undertaken a project each in Africa and Latin America and more are in the pipeline.

One of the challenges that developing countries face is that of inadequate capacity. India has therefore, engaged in sharing with other developing countries, expertise in areas of its excellence. India has been cooperating with its fellow developing countries for a long time. Since 2004 concessional lines of credit amounting to US \$1.4 billion have been approved for disbursement and a further US \$850 million are in the pipeline. The soft credit has been extended for infrastructure development, like water supply, power and transmission projects, irrigation, construction of roads and railway lines, supply of equipments such as tractors, pumps, etc. to farmers as well as pharmaceutical plants. The cooperation extended by India helps in capacity building in developing countries, thus, leading to South-South partnerships.

Over 6000 participants from developing countries receive training annually in India in over 250 institutions and universities, with many of them gravitating towards hi-tech areas such as IT. An increasing number of Indian experts are deputed to other developing countries in meeting developmental challenges. India has set up projects relating to vocational training in several partner countries in Asia and Africa for promoting IT and SME, the sectors in which India has significant strengths, as well as Entrepreneurship Development Centres in South-East Asian countries. We have now expanded our capacity building cooperation efforts to such contemporary issues as special courses for capacity building in the WTO for African diplomats and officials, on SMEs for equity fund and private managers, and for African cotton exporters, as also in environment related fields, among others. India is increasingly being requested to assist in the agricultural field. As the foremost milk producer in the world, the Indian dairy industry has, of late, become a focus of interest under our South-South Cooperation programme. India is a strong advocate of collaboration in regional projects, particularly in areas such as infrastructure, poverty alleviation and dealing with cross border challenges such as natural disasters, pandemics like HIV AIDS, and Avian Flu, and terrorism in all its forms and manifestations. India has offered US \$ 100 million for the SAARC Development Fund (SDF) to be utilized for projects in other SAARC countries on poverty alleviation once the SDF, with its three windows – Social, Economic, and Infrastructure - is operationalised.

**Mr. President,**

The biennial meetings of the High Level Committee provide a useful opportunity for highlighting the issues and concerns of developing countries in their quest for developing their economies and their search for an equitable and inclusive world economy. South-South Cooperation is a very useful vehicle for the development of capacities within the South. We hope to receive strong support from the UN system for South-South Cooperation and also in facilitating triangular cooperation by bringing in resources from the North for cooperative programmes amongst countries of the South. Much remains to be done and we would encourage UNDP and the Special Unit for South-South Cooperation located within it, to make more concerted efforts in furtherance of South-South Cooperation.

Thank You, Mr. President.

**605. Statement by Permanent Representative at the UN  
Nirupam Sen at the informal meeting on Revitalization  
of the General Assembly at the 61<sup>st</sup> session of the UNGA.**

**New York, June 12, 2007.**

**Mr. Co-facilitator,**

We thank the co-facilitators for their work resulting in the draft resolution for today's discussion. We recognize the enormous effort invested in the process of widespread consultations, including bilateral interviews, roundtable interactive debates, as well as written responses sought through a questionnaire. The process has been democratic and inclusive and geared to hearing the views of every delegation represented in this august body. The co-facilitators have brought both idealism and energy to their task.

The resolution emerging from these consultations contains ideas that appeared to have the most widespread acceptance. New ideas or further movement on accepted ideas can emerge only from reflection upon what is currently available, followed by negotiations, consisting of several rounds of informal informals. After some important amendments necessary to ensure conformity with the Charter and recent agreements, we can consider the draft resolution as a basis for our work. However, if we have to move

beyond agreed language and build upon progress made in the 60th UNGA, as perhaps implied by Ambassador Badji, we feel that such informals would have to be held.

**Mr. Co-facilitator,**

We broadly associate ourselves with the statement made by Algeria on behalf of NAM.

The starting point in this discussion can be the language used to express agreed concepts. Paragraphs that reflect agreed principles or reflect ideas agreed recently would be best expressed in language derived from previous resolutions. This is simply a practical thing that would facilitate forward movement. The reason is that agreed language, though not the most creative, does represent the balance that we have been able to achieve in the past. It is also not our intention to redefine the role or functions of the GA. We do not need to try to reinvent the wheel, especially when the wheel comes from the Charter. However, the further task, if we all so desire, is how to ensure that the wheel does not spin in one place but actually advances.

As the purpose of this exercise is not to rewrite the Rules of Procedure, we would prefer that language on the role of the General Committee be consistent with the Rules of Procedure or be taken from agreed language of the recent past. Ops 3 and 7, in particular should be made consistent with the Rules of Procedure, while OP 5 can be deleted. OP 8 contains a mix of two ideas. The first part regarding the level of participation in the GA is a decision that is the prerogative of each delegation, while the second part on time limits for statements is inconsistent with para 73 of the Conclusions of the Special Committee on the Rationalization of the Procedures and Organization of the GA.

It is necessary to remember that we are engaged in this exercise to strengthen and revitalize the General Assembly. The improvement in the procedures and working methods of the GA are only the first step. They are a means to an end, not an end in itself. The revitalization process must focus on substantive measures to restore and enhance the role and authority of the GA, including in the maintenance of international peace and security; as the chief oversight organ; deciding on management and procurement for peacekeeping operations, among others, as provided for in the Charter. This can not be done by giving flexibility to the Secretariat over issues that are in the domain of the GA as the chief oversight organ. We would seek

deletion of OP 21 giving more flexibility since this issue has not found favour with the majority of Member States in the Fifth Committee.

It is in the same context that we would suggest changing the title and reordering the contents of Annex B. By combining the role of the GA and its working methods in the same section, the impression created is that the role of the GA is determined or influenced by its working methods. In GA resolution 60/286, as also in 59/313 and 58/126, the cluster on the role of the GA deals with the "role and authority of the GA". Working methods of the GA are dealt with in a separate cluster in all three resolutions, while 58/316 is devoted almost entirely to the working methods of the GA and the Main Committees. Annex B should, therefore, be appropriately renamed and its contents reorganised.

The President of the GA can play an important role in the process of strengthening and revitalizing the GA. Recent resolutions have, therefore, focussed on strengthening the role and leadership of the PGA. The PGA's Office has been strengthened by providing additional staff and other measures have also been agreed to. It is now time to assess the usefulness and adequacy of the several measures adopted. We do not believe that this resolution can pronounce on the budget for the PGA's Office. That is an issue for the Fifth Committee to consider. However, the draft resolution includes an interesting proposal to change the procedure for the election of the PGA. We would not like to take away (in fact we would like to reaffirm) the prerogative of the regional groups in the election of the PGA and would therefore suggest that OP 21 be amended so that the same country is encouraged to propose more than one candidate. We do not believe that this would deter Foreign Ministers from coming forward: after all Presidents and Deputy Prime Ministers have not hesitated to enter the contest for the post of Secretary-General and they have not been selected.

Annex D on selection of the Secretary-General seems to be back-tracking on what has already been agreed. Resolution 60/286 adopted towards the end of last GA, devotes Cluster II to a substantive and detailed consideration of the process of selection of the SG. Apart from recalling Article 97 of the Charter, it draws from relevant resolutions, namely 11/1 and 51/241. It calls for the process to be made more transparent and inclusive of all Member States, provides for consultations with all Member States by the PGA to identify potential candidates, as well as for presentation of views by the candidates to all Member States of the GA. Given that the process of selection of the SG has only recently been concluded, the need for this

section of the draft resolution may be questioned by some. However, we believe that it is necessary to discuss this issue now that we have the advantage of distance from any imminent change in the SG's office. However, further movement or progress on the agreed language can only come out of negotiations.

We reiterate the questions already posed by NAM on the issue of implementation of resolutions. We need to focus on why some of the provisions of previous resolutions on GA revitalization have remained unimplemented. In this context, we request that para 23 be changed to reflect the language of OP 2 (c), (d) and (e) of resolution 59/313. The language as currently drafted is not in keeping with Article 15 of the Charter.

**Mr. Co-Facilitator,**

We are aware of the strenuous efforts that have been invested in the process of preparing this draft resolution. We respect the democratic process that you have adopted. However, further progress on this important issue can emerge only out of serious negotiations. In the meantime, we hope that distortions that have crept into the language would be rectified so that we do not contradict the Charter, nor backtrack on recent agreements. To summarise the conclusion, let me refer to the metaphor of the page of the journal which should certainly be in conformity with the directives of the GA; however if we change the correlation of forces then the page would change by itself and remain changed.

Thank you, Mr. Co-Facilitator.

**606. Statement by Minister of State Anand Sharma while introducing the draft resolution on “International Day of Non-Violence” at the UNGA.**

**New York, June 15, 2007.**

**Madam Chairperson,**

I have the honour to introduce, under Agenda Item 44, the draft resolution contained in document A/61/L.62, entitled “International Day of Non-Violence”. Apart from the 114 co-sponsors named in the L.62 document, I have the pleasure to inform that a further 26 Member States have also joined as co-sponsors, giving this draft resolution a total of 140 co-sponsors.

**Madam Chairperson,**

The idea of promoting such a resolution originated from the Declaration adopted at the international conference on "Peace, Non-Violence and Empowerment – Gandhian Philosophy in the 21st Century" convened in New Delhi in January this year to commemorate the centenary of the Satyagraha Movement launched by Mahatma Gandhi in South Africa. Attended by representative leadership delegations of 91 countries and 122 organisations besides many eminent personalities, including philosophers and Nobel laureates, the participants in that Conference solemnly vowed to nurture the values espoused by Mahatma Gandhi and articulated the collective yearning for a new way forward to address the problems of hunger and dehumanising poverty, which continue to plague humanity, to build a just and equitable world where people live with dignity and in peace and harmony with each other in diverse and pluralistic societies.

**Madam Chairperson,**

The wide and diverse co-sponsorship of this draft resolution reflects the universal respect that Mahatma Gandhi commands and the enduring relevance of his humane philosophy. In his own words, “Non-violence is the greatest force at the disposal of mankind. It is mightier than the mightiest weapon of destruction devised by the ingenuity of man”. His “novel mode of mass mobilisation and non-violent action” brought down colonialism, strengthened the roots of popular sovereignty, of civil, political and economic rights, and greatly influenced many a freedom struggle and inspired leaders like Badshah Khan, Nelson Mandela, Martin Luther King Jr. and many others.

This draft resolution seeks to declare Mahatma Gandhi's birth anniversary, October 2, as the International Day of Non-Violence. By doing so, we would be highlighting the holistic nature and the continued relevance of the Mahatma's message for our times, indeed for all times to come. It encompasses the rejection of violence against oneself, against others, against other groups, against other societies and against nature. Non violence, in his own words, "has no room for cowardice or even weakness". It also "necessitates complete abstention from exploitation in any form".

**Madam Chairperson,**

The draft resolution before the General Assembly is simple but significant. Tabled under the agenda item 'Culture of Peace', it reaffirms in its preambular paragraphs the universal relevance of the principle of non-violence and seeks to secure a culture of peace, tolerance, understanding and non-violence. Vide its first Operative Paragraph it decides to observe and celebrate October 2 every year as the International Day of Non-Violence. Its second Operative paragraph invites all Member States, the UN system, regional and non-governmental organisations, to commemorate the day in an appropriate manner and disseminate the message of non-violence, including through education and public awareness. It also requests the UN Secretary-General to recommend ways to assist Member States in organising activities to commemorate the Day, to take necessary measures to observe the Day by the UN system, and to keep the 63rd session of the UN General Assembly informed about the implementation within the UN system of the present resolution as regards the observance of the International Day of Non-Violence.

**Madam Chairperson,**

Promoting the principle of non-violence in such a focussed manner would, it is hoped, significantly contribute to the realisation of the goals set out in the 1999 UN Declaration and Programme of Action on a Culture of Peace. The designation of October 2 as "International Day of Non-Violence" would also advance the implementation of the goals of the International Decade for Culture of Peace and Non-Violence for the Children of the World [2001-2010].

**Madam Chairperson,**

While concluding, I would like to thank each and every one of our co-sponsors and supporters for helping us pilot this resolution at the UN General

Assembly. It is also the hope of the co-sponsors that this draft resolution would be adopted without a vote.

Thank you, Madam Chairperson

**607. Statement by Permanent Representative at the UN  
Nirupam Sen at the informal consultations of the  
plenary on the UN High Level Panel Report:  
Humanitarian Assistance.**

**New York, June 20, 2007.**

**Mr. Co-Chair,**

We thank you for organizing the informal consultations on the section on humanitarian assistance in the report of the UN High Level Panel on System-wide Coherence. We congratulate you on your appointment as Co-Chairs. Your two colleagues in the case of UN Security Council reform were only given the title of persons. Possibly the implication was that the majority should try to be as close to being non-persons as possible. Since you are Co-Chairs and not just persons, we hope that this would not be the aim of the System-wide coherence reform. We need to ensure that we do not seek to ameliorate humanitarian disasters through an institutional disaster. System-wide coherence should not obliterate particularities through a post-post modernist dystopia. We support the positions expressed by the Joint Coordination Committee of NAM and G77. As a country contributing to CERF and to disaster relief in our region, permit me to make a few observations.

These informal consultations come not a moment too soon. We are currently engaged in the preparations for the ECOSOC and are discussing the draft of the UNDP Strategic Plan. The recommendations of the HLP report touch upon areas covered by both these processes. The draft UNDP Strategic Plan draws upon the ideas contained in the HLP report. UNDP has proposed that it should be adopted in September 2007. If the Plan is adopted as proposed, there would be little point in discussing those sections of the HLP report that would have been incorporated in the Plan. Our discussions would then amount to trying to lock the barn door after the horse has bolted.

**Mr. Co-Chair,**

As with the other sections of the report, we have several questions on the section pertaining to humanitarian assistance. While some of the report's recommendations are not in keeping with existing intergovernmental agreements, others need further clarification. At the beginning of any discussion on UN humanitarian assistance we need to recall GA resolution 46/182. The annex to this resolution provides the Guiding Principles for the provision of UN humanitarian assistance. While emphasizing the importance of humanitarian assistance to the victims, the Guiding Principles recognize the need to fully respect the sovereignty, territorial integrity and national unity of States. They recognize that the affected State has the primary role in initiation, organization, coordination and implementation of humanitarian assistance within its territory. The Panel appears to have overlooked these Guiding Principles when it recommends the coordination and leadership role of the Emergency Relief Coordinator at the global level and the humanitarian coordinators at the country level. In line with the above, we do not agree with the formulation regarding the partnerships between the UN, national governments, and NGOs. We believe in the lead role of the affected government in such relationships. We look forward to developing our understanding on this issue during our discussions.

The report recommends higher funding for humanitarian assistance, as well as for early recovery. While we support these recommendations, we find the report does not expand on where these additional resources would be raised from and how. We would welcome further clarification on this aspect.

**Mr. Co-Chair,**

We disagree with the report's recommendation asking the humanitarian agencies to clarify their mandates and to enhance their cooperation on Internally Displaced Persons. The mandates of UN agencies are clarified by Member States. It is not for the agencies to assign mandates to themselves, or to shed them. We are confused about the segregation of one issue, namely the issue of IDPs. The report does not clearly define the term as it was understood by the Panel and we are not sure if there is a clear definition of this term in the UN context. Moreover, IDPs are the citizens of the country in which they are located and hence the responsibility of the government.

We support the focus on early recovery in the Panel's report. However, we

would believe that the discussion on transition from relief to development should not end at early recovery. There is need to focus on the continuum from relief to recovery, to reconstruction and development. In fact, GA resolution 59/250 on TCPR emphasizes the element of planning the transition to development from the beginning of the relief phase. There is also need to clarify what the report means when it recommends that UNDP should take the lead in early recovery. Is this lead role envisaged in the context of a 'cluster approach' or is it meant to provide a clear and over-riding mandate to UNDP. This clarification also has a bearing on the UNDP Strategic Plan. Moreover, we need to clarify the question of mobilization of resources for transition.

**Mr. Co-Chair,**

The Panel report's section dealing with humanitarian issues provides some interesting ideas, especially on the issue of transition from relief to development. However, there is much in this section that needs to be further clarified. It is also useful to remember that the purpose of this exercise is to improve the UN's coordination of humanitarian assistance. The intention is not to re-write existing intergovernmental agreements.

Thank you Mr. Co-Chair.

**608. Statement by Permanent Representative at the UN Nirupam Sen at the informal consultations of the plenary on the UN High Level Panel Report: "Gender Entity".**

**New York, June 21, 2007.**

**Mr. Co-Chair,**

We thank you for organizing the informal consultations on this very important issue. We are grateful to the Secretary-General for sharing his views with us.

We agree with the HLP report when it says that the importance of achieving gender equality cannot be overstated. We also agree on the need for the UN to pursue the objectives of gender equality and women's empowerment far more vigorously. We are less sure of its assessment that the UN system's contribution has been incoherent, under-resourced and fragmented. Under-resourced, yes, incoherent, perhaps, and fragmented, may be .

Mahatma Gandhi once said that a “woman has the right to participate in the very minutest detail in the activities of man and she has an equal right of freedom and liberty with him.” As we chart the future course for the UN on gender equality and women’s empowerment, we would like to measure the proposals on their ability to assist the efforts of countries towards achieving the vision of gender equality articulated by the Mahatma over seventy years ago. In a more specifically economic context, the Indian Nobel prize winning economist Amartya Sen has demonstrated the impact of gender on general economic development. However, this is entirely different from trying to make it a conditionality.

The Panel’s recommendations arise out of the overall thesis that coherence and consolidation can achieve results. A vision of gender equality and women’s empowerment that brings to women the freedom and liberty equal to man is a big dream. It involves action on multiple fronts and achievements in a number of areas ranging from health care, including reproductive health, education to women’s rights. Can this be done by a single voice, no matter how powerful it might be? A strong voice can help, but for achieving gender equality and women’s empowerment, strong effort would be needed on multiple fronts. Perhaps some fragmentation in the sense of plurality is necessary to confront an issue whose footprints can be found in such multiple areas.

**Mr. Co-Chair,**

We can support the Panel’s recommendations for a higher level representative for women. An Under-Secretary General would have the appropriate status for participating in the CEB meetings. Simultaneously, however, we would wish to see the work of individual funds and programmes strengthened in their respective areas or mandates. This includes UNIFEM. We are not sure of the impact of a merger of the Secretariat bodies that would inevitably have more of a normative role, with UNIFEM, which has an operational mandate. We are also unsure of how the work of individual agencies would be strengthened by the creation of a gender entity focused mainly on policy advice, advocacy and monitoring but also trying to combine this with an operational and technical role. While monitoring of commitments is equally applicable to both developed and developing countries, advocacy and policy advice should not represent an upstream shift at the cost of technical support at the ground level. We have to bear in mind the needs of developing countries for grass roots support for innovative and appropriate technical assistance. This would require upgrading the technical capacity

of the agencies themselves. The recommendations of the HLP report have not focused adequately on these dimensions.

GA resolution 59/250 (TCPR) provides a clear mandate for strengthening of gender in the work of the funds and programmes. It provides guidance for enhancing the effectiveness of gender specialist resources, gender focal points and theme groups. TCPR calls for UN development system to avail itself of the technical experience of UNIFEM on gender issues. We believe there is need to examine the recommendations of the Panel with the guidance provided by TCPR, as in some areas the recommendations of TCPR are stronger than those of the HLP report. In recent years, some agencies have been making considerable efforts in this direction. While UNICEF and UNFPA already have a strong gender focus, UNDP too has made efforts over the last few years to improve its gender focus. We would need to examine the ongoing work in individual funds and programmes on gender to understand where and what kind of action is called for. Perhaps a system-wide evaluation of the UN development system on gender equality and women's empowerment would provide us better guidance.

**Mr. Co-Chair,**

As we said earlier, one crucial issue that has hampered the efforts of the UN development system to provide support to countries is inadequate funding. We believe that a strong push for gender needs strong resources, and not only new centralized, extensive bureaucratic structures. HLP report itself states that too often, "reform" has meant adding extra layers of bureaucracy, outweighing potential benefits. We would like to bring about real progress on an issue of such crucial importance; not just something that is symbolic but substantial, concrete and wide ranging progress on the ground and throughout the UN system, encompassing inter alia the programmes and agencies.

Thank you, Mr. Co-Chair.

**609. Statement by Permanent Representative at the UN  
Nirupam Sen on the maintenance of International Peace  
and Security: Natural Resources and Conflict at the  
Security Council.**

**New York, June 25, 2007.**

**Your Excellency, Mr. Minister**

Let me begin by welcoming you, and by expressing appreciation for the Belgian Presidency of the Security Council in the current month. India appreciates the opportunity afforded to member States to participate in today's timely discussion on a subject of vital interest for all of us. The concept paper circulated by the Permanent Mission of Belgium earlier this month afforded us a most useful starting point for the discussion.

**Mr. Minister,**

The issue is important because so many developing countries are crucially dependent on natural resources (for instance a third of Africa's export income is from natural resources). At the same time, often these natural resources cause and prolong conflict, leading to lower growth and higher poverty sometimes than in natural resource poor countries; as in a Greek tragedy, the saviour is also the damned. This is the nature of the "natural resource curse". Conflict holds back development but a certain kind of development also leads to conflict. Globalisation sharpens inequality and regional imbalances, often stimulating natural resource-rich regions of a country to try to break away. Similarly, IMF- encouraged deflationary policies and elimination of subsidies as well as WTOencouraged trade liberalisation has substantially reduced rural purchasing power and tipped the scales of the "natural resource curse" into conflict. Rotberg and Easterly have both shown that five resource-rich countries in conflict were during the preceding ten years more than sixty five percent of the time (in the case of Sierra Leone eighty three percent) under an IMF programme.

In any treatment of the linkage between natural resources and conflict, full and permanent sovereignty of each State over its natural resources is a key principle that is immutable. While conflict prevention through better management of the exploitation of resources is theoretically an idea worth considering, it is in practical terms, fraught with legal and operational complexities. We are therefore of the view that the best method of preventing

conflict, prior to its outbreak, lie in more comprehensively addressing the problems of inequality and economic deprivation. Creative solutions are needed to the crisis of expectations and the disparities in economic development. These cannot be divorced from international economic governance – making globalisation fair, making the Doha round truly developmental and comprehensively reforming the IMF.

With regard to resources prolonging conflict, it appears that the international community is arriving, through trial and error, at a useful approach, whose contours are only now becoming visible. A judicious mixture of sanctions to prevent illegal exploitation of natural resources and certification schemes, such as the Kimberley Process, has begun to yield some results. In the instance of rough diamonds, this approach appears to have been successful because it approaches the problem at the level of extraction, and from the standpoint of processing and trading. This is also perhaps because such an approach is inclusive enough to visualize a role for the entire international community, including civil society. The Kimberley Process also has merit in its approach to the trade in diamonds, by creating a certification scheme that validates and regulates production of rough diamonds. Last, but not least, such a mechanism avoids the pitfall of treating the issue of resources fuelling conflict as a matter purely related to peace and security. As a result, major diamond trading and processing nations such as India have engaged constructively and actively with the Kimberley Process.

Apart from this, we find some useful suggestions in the concept paper, such as authorizing a role for the UN Mission and the UN peacekeeping forces in conflict-torn countries. However, such a mandate would need to be very carefully drawn up, both to limit their role to a supporting one, at best, to prevent other forms of potential misuse, and to ensure that neither the UN mission nor the peacekeeping forces are diverted from their core responsibilities. Questions of capacity, training and accountability will need to be addressed at the stage of planning such a mandate. Therefore, we would urge that evolving a consensus on these aspects should be an exercise carried out with the widest-possible consultations, including with troop contributing countries.

Lastly, there is the aspect of creating a post-conflict consensus on the use of natural resources in the process of peace consolidation. To evolve recommendations and approaches on this aspect, we could perhaps formally task the Peacebuilding Commission with this responsibility, as a mechanism established by all States precisely for such purposes. It should

suffice, therefore, to underline the fact that effective and consensual exploitation of natural resources not only brings tangible benefits to all segments of society, but also provides the intangible benefit of creating a useful and desirable habit of cooperation among former foes in a postconflict society.

I thank you, Mr. Minister.

**610. Remarks<sup>1</sup> by Permanent Representative at the UN  
Nirupam Sen at the meeting of the open-ended working  
group on the Question of Equitable Representation on  
and increase in the membership of the Security Council  
and other matters related to the Security Council.**

**New York, July 19,, 2007.**

**Madam President,**

I thank the distinguished Permanent Representatives of Lichtenstein and Chile for their Report to you on the consultations regarding “The Question of Equitable Representation on and increase in the membership of the Security Council and other matters related to the Security Council” and I thank you for convening these discussions today, for your initiative and leadership. The distinguished Permanent Representative of Egypt asked for flexibility from the P-5 and IBSA. One country in IBSA is from the African Union and two are from the G- 4. The very fact that their Foreign Ministers have come together to pronounce on such a sensitive subject is itself an index of flexibility. We agree with the authors of the Report on the need for flexibility but flexibility has to be demonstrated in response to a definitive proposition and in this case there is no text. A questionnaire or a straw poll would have greatly assisted in formulating a text and giving it the requisite initial legitimacy. As the Report correctly says the member States should have full ownership of the text. Every time we seem to be beginning again. After more than a decade of consultations, we embark on fresh consultations all the time. As Mary Shelley said, “the beginning is always today”. Unfortunately, we cannot go on skirmishing around the context much longer without producing a text. We need to move definitively from the context to the text.

1. The text has been developed by Mr. Sen from his extempore remarks

What should be our approach to the Report? It could be like the angel at the Rheims Cathedral door: amused but accepting. The Report's statement that the status quo is unacceptable to the overwhelming majority is sound. Nothing is constant except change. Flux is the law of life. The desire for something fixed where all is moving is destructive. It is a sign of privilege holding on to unjust power. Historically this has never worked. It also causes tension, an unnecessary wastage of political energy; one cannot hold back progress and democratization. The attempt to do so is behind the hitherto vitiated UN reforms, dysfunctional institutions, continuing violence and an unjust world.

The Report is also correct in reflecting the view of member States that UN reform is incomplete without a meaningful reform of the Council. This is more than a cliché. We have seen this recently and clearly in the problems that bedevil the revitalization of the General Assembly when we tackle any real or concrete issue of political decision-making, however small. The UN Security Council, like a pyramid has to rest on the wide base of support of the General Assembly. Today, the UN pyramid is standing not on its base but on its apex and is in danger of toppling over. It is equivalent to the Security Council standing on its head, and with all respect, this is not always a strong pedestal to stand on. On June 7, 2007, the former DSG Sir Mark Malloch Brown in his "Holmes Lecture: Can the UN be Reformed?" to the Academic Council on the UN System used the arresting metaphor of an institutional chiropractor in relation to UN Security reform and went on to say that once "this critical piece of the organization's spine is properly aligned", then "the alignment will fall down through the lower spine, arms, and legs as the whole UN body politic recalibrates itself". The connection with GA revitalization becomes obvious: unless the GA elects Permanent Members and then holds them accountable through a draconian review, the balance of power or the correlation of forces cannot change; encroachment will continue; it is precisely for this reason that Model 'B' did not gather majority support.

The distinguished representative of one of the Member States was fighting old battles all over again. He mentioned the principles of good faith, equity and law. He went on to speak of the necessity of "well above 2/3rd support" when the Charter, the GA Rules of Procedure and GA Resolution are clear. This I presume is an example of law. He opposed voting directly and even immediate negotiations implicitly. This I presume is an example of good faith. Incidentally, the logical implication of the Report's assertion, that support exceeding (only "exceeding" and not "well above") the legally

required 2/3rd majority is preferable, is sound because without voting, or at any rate, a straw poll there is no certain way of definitively determining this. He claimed that both the Reports exclude Permanent Membership. This I presume is accuracy and good faith. One of his friends, the distinguished Permanent Representative of Spain, at least accurately noted the first option in the first Report as taking us to Permanent Membership. We appreciate the current Report's paragraphs on the review process which provide a balance through at least a kind of teleological perspective on the expansion of permanent and nonpermanent membership and on the veto. Here permit us to gently point out that, unless the phrases "the creation of permanent seats" and the "creation of additional non-permanent seats" are a tautology, there is a conceptual confusion regarding permanent members and permanent seats for the simple reason that all seats in the existing Security Council are permanent; only some members are permanent and some are not. The distinguished Representative of the Member State referred to tried to speak for the African Union. We have a preference for letting the African Union speak for itself and we have listened attentively to the distinguished Permanent Representatives of Uganda, Mauritius and Egypt.

Before I develop this theme, permit me to address the question of working methods. The distinguished Permanent Representative of Switzerland expressed his discontent with what the Security Council has done on working methods and clearly stated that he cannot be optimistic since the first halting step in the Council on working methods has produced nothing. He then went on to contradict himself by proposing measures on working methods to the very Council that has rejected even much more modest steps. In other words, he would add further discontent to his already existing discontent. The question is why the non-permanent members were not able to implement any new working methods. It is because these can only be implemented by new permanent members elected and held accountable for doing this. In the light of his own judgement and feelings we are somewhat perplexed by the fact that the distinguished Permanent Representative of Switzerland is prepared to pursue working methods separately. We support new working methods without reservations.

It is a pity that the Report still speaks of "Notions" on a way forward. After more than a decade we are still at the stage of Notions, not even concrete ideas, not to speak of a text for negotiations. As the Report makes clear all key decisions are only postponed to a later date; the problem of pressure on many countries is solved by postponing the day of decision; there is a

preference for being perennially subject to pressure rather than summoning the energy to create a system where such pressure cannot be exerted or would be minimal. Instead of definitive support for finding a solution in the next Session we are to continue taking "further concrete steps". In short we shall continue to travel hopefully rather than arrive, in fact go on traveling and never arriving, preferring, in Thoreau's phrase, the infinite expectation of the dawn to the dawn itself.

The tautology at the heart of the interim model is that all models are interim because they are subject to review. Increasingly it is clear that even the present structure of the Security Council, (the status quo) is interim till the mounting tide of problems and discontent with the solutions overwhelms it by reducing it to irrelevance. The distinguished Permanent Representative of Spain asked why option 'A' in the first Report remains in some way in the second and why the middle two options have not been made the basis for further consideration. The answer was given by the Chair of the Non-Aligned Movement that we cannot have reform for the sake of reform. Let me develop this a little. The interim model becomes an exercise in art for arts sake: as Nietzsche said, the most common human frailty is forgetting what we were trying to do in the first place. Ototar Brezina, the great Czech symbolist poet once said that in conversations we have with ourselves the answers are given before the questions. Some of our friends seem to be having such a conversation and therefore their answers have no relation or relevance to the questions – how to introduce a system of checks and balances in the Security Council, how to make decisions more optimal, thereby reducing the need for the use of force.

The interim model may be for democratization but would leave untrammelled power untouched; it may be for greater representation but without any representation among permanent members; it may be for checks and balances but with nothing to check or balance the Permanent Members; it may be for smaller additional numbers but through expanding the UNSC in such a way as to make it unwieldy without making it effective, the worst of both worlds, a double jeopardy. Paradoxically the two middle interim options reinforce the case for immediate extension of the veto because, in the absence of length of tenure, the only instrument for introducing checks and balances, of countervailing power, would be the veto. Is this the direction we wish to pursue?

The distinguished Permanent Representative of Egypt therefore correctly emphasized that we need to agree now on what the interim model is a transition to. We have to agree on the end point and not leave every thing

to an open review. That is why we firmly support the distinguished Permanent Representative of Mauritius and request the President of the General Assembly to immediately commence work on having a text prepared for expeditious inter-governmental negotiations on a comprehensive reform of the Security Council in both permanent and non-permanent categories with greater representation to the developing countries, including in the permanent category, a comprehensive improvement in the working methods of the Security Council that would specially ensure greater access to island and small states, as well as a provision for a review. The distinguished Permanent Representative of Brazil has rightly quoted the Ministerial Communiqué issued on July 17, 2007 by the Foreign Ministers of IBSA countries and I would repeat the phrase on making the Security Council more democratic, legitimate, representative and responsive.

Some friends on this side of the divide have spoken of the need to ensure that the UNSC reflects the new world situation marked by the rise of certain powers. Some friends on the other side of the divide have, in previous debates, sought to invalidate this argument by saying that the world situation is also characterized by the rise of many middle powers. They are perfectly correct but they totally miss the point. The struggle for change here is a microcosmic reflection of the real macrocosm of the struggle in the world outside. Sometimes we show less clarity, less courage than many an ordinary worker, peasant or protestor in the world outside. The question is not of making a few countries permanent members to reflect the real world today but the much more crucial one of the distribution of power in an enduring way, of creating a more just world. This can only be done by first counter posing new centres of power to existing ones in the permanent membership and second by holding these accountable through reviews and the right of recall. Some of our friends on the other side of the divide may find it more convenient to build castles in the air; the problem is that these sometimes turn out to be sand castles and the falling sand can only blind the eye and distort the vision. One day or another we would have to sincerely and seriously address these problems. Till then every solution would be interim. This is the real meaning of the expression “La luta continua”.

**611. Statement by Permanent Representative at the UN  
Nirupam Sen at the Thematic debate on climate change  
in the 61<sup>st</sup> session of the UNGA.**

**New York, August 1, 2007.**

**Madam President,**

I thank you for arranging this thematic debate on Climate Change in the UN General Assembly.

I shall try to deal seriatim with the issues listed at the beginning of the paper circulated with your letter of July 9, 2007: scientific assessment; adaptation and mitigation; the role of the private sector; possible next steps in the multilateral process.

A realistic course of action on Climate Change has to be based on science and not on treating it as a post-modernist religion. And science has uncertainties which have to be recognized. A precautionary approach can be invoked in the absence of scientific certainty but environmental concerns should not become additional conditionalities on growth in developing countries. The Rio Declaration had also inter alia recognized that environmental standards set in one society could have an adverse socio-economic impact if applied in countries at different levels of development.

A scientific approach also means recognizing the facts and their relative proportions. Allow me to address the issue of "large emitters" - a classification that does not exist in the Framework Convention or any other UN agreement, yet appears surprisingly in several recent UN documents. The developed countries have followed a kind of Ecological Kuznets Curve except that they have externalized the problem (the effects of pollution) on to the developing world and there are some trends that they also wish to externalize the cost of the solution. The present state of greenhouse gasses concentration in the atmosphere is the result of over a century and a half of unabated emissions by the developed countries, which even today are at extraordinarily high levels. They have created an 'irreparable rift' in the 'metabolic interaction' between man and nature by appropriating the global commons and the carbon absorption capacity of the biosphere to their benefit. According to research studies and modeling results, Annex I countries (developed countries) would continue to contribute more to greenhouse gas emissions in future also. These countries have clearly accepted their responsibility and need to show leadership in emissions

abatement. Strict equity would mean that till the excessive amounts of greenhouse gasses in the atmosphere have been soaked up the developed countries ought to be held down to less than a per capita equal share. However, an equal per capita basis can be accepted as a fair distribution. Major polluters most certainly do not include developing countries such as India with small carbon footprints in per-capita terms.

India, with 17% of the world population has only 4% of global GHG emissions. Moreover, in per-capita terms India's GHG emissions of 1 ton/annum are just about a quarter of the global average of 4 tons per annum, 4% of the US, 12% of EU, 15% of Japan. There has also been effective de-linking of energy sector growth from economic growth; currently, the primary energy consumption growth rate is 3.7% per year, against GDP growth exceeding 9%. It is worth noting that this is in contrast to the developed countries and even a few major developing countries where higher growth has followed the traditional pattern of increased use of energy. India has made major efforts to reduce energy intensity of GDP and in PPP terms it is now 0.16 kgoe per \$ GDP in PPP terms down from 0.30 kgoe per \$ GDP in PPP terms in 1972; this is the same as that of Germany. Moreover, in all the major energy intensive sectors – steel, aluminium, fertilizer, paper, cement, levels of energy efficiency are at global levels. We also have strategies for energy conservation. We have developed an Energy Efficiency Code for Buildings and using a combination of market mechanisms and the CDM, we are launching one of the biggest efforts world-wide for use of CFLs to replace conventional light bulbs at affordable prices for the consumer. This also includes taking care of their disposal to allay fears of any mercury contamination. The share of renewables in total primary energy is still at 34%. Our Prime Minister has made it clear that India's per capita GHG emissions will at no stage exceed those of developed countries even while pursuing policies of development and economic growth.

What, in our view, are realistic next steps on Climate Change in the multilateral process?

- « The process of burden sharing must be fair. It should take into account where the primary responsibility for the present levels of GHG concentration rests and not perpetuate poverty among developing countries.
- « No strategy to deal with Climate Change should foreclose for developing countries the possibilities of accelerated social and economic development.

- « The principle of common but differentiated responsibility and respective capability is very important.
- « The time is not ripe for developing countries to take quantitative targets as these would be counter-productive for their development processes.
- « The determination of any particular stabilization goal and the timeframe in which it should be achieved needs to be made at the United Nations Framework Convention on Climate Change.
- « Adaptation is the key for developing countries. It needs to be adequately resourced without diversion from funds meant for development, which, in any case, is the best form of adaptation. Encompassing many small islands within its territory, India is entirely sensitive to the very serious concerns of the small island developing countries that arise out of climate change and the imperative to fully assist them in tackling it.
- « The resources required for Adaptation are of a similar order of magnitude as for GHG Mitigation. For this we should realize resources from the entire carbon market.
- « It is important that critical and promising clean technologies are made affordable for developing countries, where there is a large reliance on fossil fuels.
- « The IPR regime should balance rewards for the innovators with the common good of humankind.
- « Many needed technologies based on resource endowments of developing countries (e.g. biomass) do not yet exist, or are too expensive. Collaborative R&D between developing and developed country R&D institutions can address this gap.
- « The Clean Development Mechanism (CDM) needs to be expanded to include approvals for programmatic approaches. Enhanced level of GHG abatement commitments by the developed countries would significantly stimulate CDM projects.
- « We believe that the Carbon market has a significant role to play in tackling climate change and that we should spur private sector involvement in climate related technologies and investment.

« With the process to determine the GHG reduction commitments of developed countries after the initial Kyoto period (2012) having already started, we hope that developed countries would come forward and take on substantially larger emission reduction targets than the 5.2% in Kyoto I and complete these negotiations by 2008/09.

**Madam President,**

A scientific approach also requires us to address not just the symptoms but the cause. It is the production and consumption patterns of developed countries that created the metabolic rift through dumping ecological wastes into the atmosphere. Mahatma Gandhi had recognized the problem in the early years of the 20th century. Sustainable development requires sustainable patterns of production and consumption and this is where we need to concentrate our efforts. Invigorated negotiations under the provisions of the UNFCCC encompassing GHG mitigation at a significant level in developed countries along with their real cooperation with developing countries on adaptation and technology development & cost effective transfer can result in pragmatic, practical solutions which are to the benefit of all humankind.

Thank you Madam President.

**612. Statement by Finance Minister and Special Envoy of the Prime Minister P. Chidambaram during high level event on climate change convened by the Secretary General: "The Future In Our Hands: Addressing the Leadership Challenge of Climate Change" at the Thematic Plenary on the "Challenge of Adaptation - from Vulnerability to Resilience".**

**New York, September 24, 2007.**

**Honourable Co-Chairs,**

May I begin by expressing our appreciation for the initiative of the Secretary-General in convening this High-Level Event. I am confident that this event will assist in moving forward the process in the United Nations Framework Convention on Climate Change [UNFCCC]

Like many developing countries, India is an energy deficient country. In 2006-07, we produced 662 billion units of electricity from all sources for a population of over a billion people. Energy is the *sine qua non* of development. We are obliged to explore every option available to us to produce or procure energy. However, we are profoundly concerned about environmental degradation and climate change.

Our per capita consumption of energy is 530 kgoe of primary energy compared to a world average of 1770 kgoe. Our per capita emission of CO<sub>2</sub> is among the lowest in the world: it is approximately 1 tonne per annum as against a world average of 4 tonnes per annum. Currently, developing countries bear an inordinate share of the burden of Climate Change, though this is due to the high-level of emissions of developed countries. Developing countries are, therefore, obliged to significantly augment their capacity to cope with and adapt to climate change.

We acknowledge the principle of common but differentiated responsibilities.

We uphold the view that adaptation is the key for developing countries and that it needs to be adequately resourced without diverting funds meant for development. In any case, development is the best form of adaptation.

Adaptation has been integral to India's development process. We are challenged constantly by climate variability. We spend every year over percent of our GDP in development measures with strong adaptation content

like cyclone warning and protection, coastal protection, flood control, drought relief, and food security.

In 2001, we passed the Energy Conservation Act. We have notified an Energy Efficiency Code for new commercial buildings.

A new Electricity Act was passed in 2003. The Act mandates the procurement of electricity from renewables and has given a major fillip to the wind energy sector.

In 2006, the Government of India adopted a National Environment Policy. This year, we set up a special committee to look into the impact of climate change. The committee will study the impact of anthropogenic climate change on India and identify the measures that we may have to take in the future. In addition, we have constituted a Council on Climate Change chaired by the Prime Minister to coordinate national action plans.

We have taken a number of measures that are inherently supportive of sustainability and clean development. We have insisted on the use of CNG for public transport; we have introduced the metro rail in many cities; and we have commenced a major bio-diesel program including mandatory blending of ethanol in petrol.

We have also launched the Green India project that will be the world's largest afforestation project covering six million hectares of degraded forest land.

We have managed the demand side through targeted interventions. As a result, we have raised energy efficiency in all the major energy intensive sectors – steel, aluminium, fertilizer, paper and cement. We propose to make available Compact Fluorescent Lamps at the price of normal incandescent bulbs.

### **Honourable Co-Chairs,**

The earth's atmosphere is a common resource for all of humankind. The problem lies not in accessing this resource but in its excessive usage. India is committed to sustainable development, and that means sustainable patterns of production and consumption.

India is also fully sensitive to the concerns of small island developing states that arise out of climate change and will join efforts to assist the small states.

The Prime Minister of India has made the offer that India's per-capita GHG emissions would at no stage exceed the per capita GHG emissions of developed countries. This is the starting point to reach a just and fair agreement.

Adaptation can become a reality if we are able to put new and intelligent technologies to use. We urge the countries of the world – specially the developed countries – to seize the opportunity.

Thank you.

**613. Statement by Chairperson of the United Progressive Alliance Mrs. Sonia Gandhi on the occasion of the first observance of the International Day of Non-Violence at the informal plenary of the UN General Assembly.**

**New York, October 2, 2007.**

Please see Documet No. 584

**614 Statement by Permanent Representative at the UN Nirupam Sen on Agenda Item 62 [a] Implementation of the outcome of the World Summit for Social Development and of the 24<sup>th</sup> special session of the General Assembly [b] Social Development, including question relating to the World Social Situation and to Youth, Ageing, Disabled Persons and the Family, and [c] follow up to the International Year of Older Persons; Second World Assembly on Ageing at the 3<sup>rd</sup> Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 9, 2007.**

**Mr. Chairman,**

On behalf of the delegation of India, I would like to convey to you and other members of the Bureau our warmest felicitations on your election. For me it is a special pleasure to be at this meeting presided over by you, given the close bonds of friendship and cooperation that link our two countries together. We are confident of the success that your able stewardship will bring to the Third Committee. I would like to assure you of my delegation's full cooperation in the deliberations and work of this Committee. I wish to thank the Under-Secretary General for Economic and Social Affairs for his statement yesterday in this Committee. My delegation broadly associates itself with the statement made by the Chair of 77.

**Mr. Chairman,**

Major UN Conferences held since the World Summit for Social Development in 1995 have underscored the role of productive employment in achieving the primary goals of the Summit, namely, of poverty eradication and promoting social development. A cursory glance at the progress made so far reveals a dismal picture.

Sub-Saharan Africa has suffered a setback since the 1990s in meeting the Millennium Development Goal (MDG) target of halving extreme poverty and hunger by 2015. The global labour force increased by 438 million workers to about 2.9 billion workers from 1995 to 2005; however, unemployment rose from 6% to 6.3% during the same period. Moreover, despite the fact that the global economic output increased by 3.8 percent per annum, the unemployment rate continues to rise, giving rise to the

phenomenon of 'jobless growth'. Developing countries continue to register an increase in the unemployment rate.

A major challenge for a number of developing countries is to counteract jobless growth and reconcile market forces with the objective of a decent work agenda. The Kuznets Curve is a myth: inequality and high growth do not automatically eventually lead to greater equality and social justice: direct antipoverty programmes are necessary as a social protection measure. In addition, it is imperative that the persons working in the informal sector are also brought within the ambit of social protection systems. India is implementing the Act passed by our Parliament on Social Security for Workers in the unorganised sector. Continued dependence on agriculture and high demographic growth continues to make the challenge of full employment and decent work that much more difficult to achieve in many parts of the world.

Private enterprise mostly finds it difficult to take account of the social costs of unemployment. The UNSG's Report, therefore, rightly stresses the necessity of partnerships between Governments and the private sector particularly to explore the means to promote corporate social responsibility as an instrument for achieving productive employment and decent work for all.

The UNSG's Report also emphasizes the need for making globalisation more inclusive. Externally, globalisation means that inefficient enterprises have to close down under competitive pressure, which causes unemployment. Thus, active labour market policies empowering those marginalised from the labour market would be necessary as a means to combat social exclusion. On the other hand, liberalization of the economy has to follow a certain level of development of economic and scientific capacity. Sequencing is, therefore, critical but has often been ignored.

**Mr. Chairman,**

The Prime Minister of India, Dr. Manmohan Singh, has recently emphasized the 'need for a growth process that is much more inclusive, a growth process that raises incomes of the poor to bring about a much faster reduction in poverty, a growth process which generates expansion in good quality employment, and which also ensures access to essential services such as health and education for all sections of the community'.

Employment growth in India accelerated to 2.6% during 1999-2005

outpacing population growth. Employment generation, on a sustainable basis, has been one of the important objectives of India's planned economic development. India's Five Year Plans have always conceptualised productive employment for all. During the Tenth Five Year Plan (2002-07), particular attention was paid to the policy environment influencing a wide range of economic activities with large employment potential, such as construction, real estate and housing, transport, small scale industries, information technology as well as IT Enabled Services, financial services and tourism. It also gave high priority to micro and small enterprises, which today provides employment to 29.5 million people, apart from contributing around 39% of country's manufacturing output and about 34% of exports.

**Mr. Chairman,**

India has been implementing various employment as well as self-employment generation programmes, in addition to a number of poverty eradication programmes. Prominent self-employment programmes for educated and uneducated unemployed people, particularly youth and women, include *Swarna Jayanti Shahari Rozgar Yojana*, Prime Minister's *Rozgar Yojana*, *Swarnajayanti Gram Swarajgar Yojana* and the Rural Employment Generation Programme. The Prime Minister's Bharat Nirman Scheme on the six critical areas of rural infrastructure would enhance rural economic activities and generate both more incomes and more rural employment.

Another notable initiative launched in India in 2006 is the National Rural Employment Guarantee programme [NREGP]. It has now been extended to the entire country and is one of the largest Social Security measures in history. It makes the right to work a fundamental right by providing 100 days assured wage employment annually to every rural household, and thus creates a social safety net, infrastructure and access to health in rural areas. At least one-third of the beneficiaries of this programme would be women. Productive employment and decent work also depend on higher productivity of labour and enhancement of skills. The National Rural Health Mission is striving towards health for all. Pluralism, freedom of speech and association in a vibrant Indian democracy are crucial in satisfying some of the aspirations of working people.

**Mr. Chairman,**

India ratified the International Convention on the Rights of Persons with Disabilities last week, reiterating its commitment to the elimination of barriers that persons with disabilities face. It also an important step towards fulfilling

a Constitutional mandate of developing an inclusive society, including persons with disabilities.

With an estimated 76.6 million older persons, India is taking a number of measures for their welfare. The National Council for Older People advises and coordinates with the Government in formulation and implementation of policies and programmes for aged people. A draft bill is under active consideration for promoting maintenance, care and protection of older persons. We are committed to the Madrid International Plan of Action, which also provides guidance on capacity-building on ageing at national, regional and international levels.

**Mr. Chairman,**

In conclusion, Mr. Chairman, my delegation welcomes the Secretary-General's affirmation of the need for creating an enabling environment at the international and national level as a key challenge for realising full employment and decent work. The need of the hour is to explore ways for the effective realisation of the Millennium Development Goals, particularly to halve extreme poverty by 2015 and foster social integration, by making employment a central objective of national and international macroeconomic policies.

**615. Statement by Permanent Representative at the UN  
Nirupam Sen on the Report of the Peace-building  
Commission and the Report of the Secretary General on  
the Peace-building Fund at the 62<sup>nd</sup> session of the UNGA.**

**New York, October 10, 2007.**

**Mr. President,**

Thank you for presiding over today's event; I am really pleased to see you chairing this event at which I am taking part. Let me also thank you for scheduling today's timely discussion on the Peacebuilding Commission and the Peacebuilding Fund. Let me begin by expressing our appreciation for the work that Japan has already put in as Chair of the PBC, for the PR of Angola, for his work over most of the past year as the first Chair of the PBC; for the Chairs of the country-specific configurations and for the Chair

of the Working Group on Lessons Learned. We also associate ourselves with the statement made by the distinguished PR of Jamaica, on behalf of the Non-aligned Movement, and we thank him for his work as NAM coordinator in the PBC.

**Mr. President,**

India is strongly committed to the objectives and work of the PBC, and have also contributed to the resources of the PBF. We have read the report of the PBC, and that of the UN Secretary-General on the PBF. We note the important points made in these reports. Indeed, since we were associated with the finalization of the PBC report, we are well-acquainted with it! These reports will be of lasting value to the international community, and to the PBC, as we chart our course in the area of peace consolidation in the year ahead.

**Mr. President,**

Without dwelling on these reports, which are public documents, I must point out that much is left unsaid. In the case of the PBC, this is natural, since multilaterally negotiated reports inevitably highlight the lowest-common denominator. Nevertheless, it encapsulates several of the more important achievements of the group, which are not inconsiderable developments, and are worthy of praise. However, I would like to focus upon some elements that are not reflected, but are of central importance, in India's perspective, for the future work of the PBC.

Firstly, we need to collectively exert greater efforts to move beyond debating issues of process to implementing measures. Process issues distract us from the real purpose of the PBC, which is to assist countries on our Agenda with focused, topical advice, and through the marshalling of resources. To us, it seems evident that we can only resolve this problem by confronting it squarely, not by bypassing it and moving on. Therefore, while it is understandable that some see the empowerment of the Country-specific configurations as a means to deliver concrete outcomes, this is not a durable solution. The solution lies in making the Organizational Committee, which is the steering mechanism of the PBC, work better. We must therefore harmonize the deliberations of both the Organizational Committee and the Country-Specific configurations, and make both more result-oriented.

Secondly, while providing advice is both logical and natural for a body that is defined as an 'advisory body', there is a need to also listen to those

whom we wish to assist. Sometimes the discourse in the PBC, whether within the OC or the Country-specific configurations, does not suggest that this is the case. At one level, countries on the Agenda of the PBC do need to hear the full gamut of views and suggestions, made with the best of intentions, by each of us. Providing good, constructive and candid advice dispassionately is important, and therefore it is difficult. But this is not nearly as difficult as listening carefully to what the various actors on the ground are saying. While their views may diverge from our advice, meaningful advice must involve a two-way dialogue, not one-way transmission. Here it would help if the countries concerned could also tell us clearly the areas in which their need for assistance is most critical. Such inputs should form the basis of more focussed, action-oriented and practical discussions within the PBC.

I might add in this context, that the PBC could certainly do better—at least, we could certainly be more creative—regarding the form in which the PBC provides advice. For instance, would it have a better impact if the PBC facilitates access by target countries to eminent specialists who have the expertise to provide advice in key areas of peacebuilding?

Thirdly, while it is important to focus upon the advisory role of the PBC, there is occasionally a tendency to neglect its role in focusing international attention and in particular, assisting in the marshalling of resources. Important though it may be, advice alone will not consolidate peace. The mobilization of resources is the key vehicle by which post-conflict societies can begin to address critical issues in peace consolidation. Thus far, this aspect has received inadequate attention in the PBC, and we look forward to discussing creative solutions by which the PBC could be more involved with this central aspect of peace consolidation.

In this context, I should draw attention to the Peacebuilding Fund. We welcome its operationalization, and the fact that it has begun to disburse “catalytic funding” to Sierra Leone and Burundi, as recommended by the Organizational Committee of the PBC, and also to other countries in need of emergency assistance. However, while the operation of the PBF is certainly within the letter of its founding resolution, we are not fully convinced that it is operating fully within the spirit of that resolution. To be candid, far more transparency is needed in the operation of the PBF; much more consultation with the PBC, and more prompt relaying of information to the PBC regarding the utilization of Funds. This is essential not only for purposes of information, but for the credibility of the PBF. Ultimately, since the PBF

is based on contributions from member States, it would only detract from its sustainability if it is not more transparent and consultative.

My fourth point relates to the capacity of the PBC and its support mechanism, the Peacebuilding Support Office (PBSO). While the PBSO has done well in assisting the PBC even as recruitment for the PBSO was underway, there is now a need for greater involvement of the larger UN system—in New York and on the ground—in the work of the PBC. The PBSO alone cannot compensate for the entire UN system. Other arms of the Secretariat, including the UN Country Team, must provide information to the PBC on developments on the ground in the target countries where the PBC is involved. This is particularly so since the PBC is comprised of member states who may not always have diplomatic representation on the ground in the countries concerned. We all know that access to good, succinct and relevant information from the ground is usually priceless, and this is nowhere more so than in the PBC.

The last—though certainly not the least—point relates to perspective. We must keep in mind that the ultimate goal of our collective efforts is to enable countries on our Agenda to develop the capacity to implement development programmes and to consolidate peace independent of our direct involvement. That is to say, irrespective of how many actors we may wish to listen to on the ground, the protagonist can only be one: the government of the country concerned. The primary focus cannot but be to

strengthen the capacity of a post-conflict State to govern effectively and to govern well. If it does so, it will be able to mobilize human and material resources to achieve development, and it is development that is the most enduring guarantee of any longterm peace consolidation strategy. Only then will we have truly succeeded in our efforts.

**Mr. President,**

I conclude by once again underlining India's commitment to the fullest participation in the PBC, and in continuing to work to make this organization not only effective, but above all, relevant to the challenges for which it was created.

I thank you.

**616. Statement by Permanent Representative at the UN Nirupam Sen on Agenda Item 106: Crime Prevention and Criminal Justice and Agenda Item 107: International Drug Control at the Third Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 11, 2007.**

**Mr. Chairman,**

We thank the Secretary-General for his reports on Agenda items 106 and 107 on 'Crime Prevention and Criminal Justice', and 'International Drug Control'.

The World Drug Report 2007 points to remarkable progress made by Southeast Asia in eliminating sources of supply of heroin, as poppy cultivation in the area stands reduced by more than 85% over the last decade. The declining trend in global coca cultivation and cocaine manufacture continued during 2006. There are, however, serious concerns over concentration of opium production in Afghanistan – accounting for 92% of global opium production in 2006. As the Executive Director of the UN Office on Drug and Crime (UNODC) pointed out last week, '75% of the Afghan opium is cultivated in southern Afghanistan ... in the regions controlled by the Taliban'. There is an urgent need for the international community, together with UN agencies particularly UNODC, to act earnestly to eliminate illicit drug production as it poses an enormous threat to the social and economic fabric of the countries affected.

**Mr. Chairman,**

The Report of the UN Secretary-General points to significant progress made by Member States in many sectors of the Political Declaration and related measures adopted by the 20th Special Session of the General Assembly devoted to countering the world drug problem. The UN Secretary-General also highlights areas requiring immediate action, such as comprehensive monitoring systems to prevent trafficking in and abuse of amphetamine-type stimulants, higher levels of international technical and financial assistance to most vulnerable countries and improved data collection and evaluation capacity. In the context of the review in 2008 of the progress towards achieving the goals and targets set at the 20th UNGA Special Session, all relevant stakeholders including Member States should identify the challenges still confronting them so that collective strategies could be devised to effectively address them in the coming years.

**Mr. Chairman,**

Terrorism remains one of the major challenges to international peace and security. It undermines the very foundation of freedom and democracy, enjoyment of human rights and the continued existence of open and democratic societies. India continues to be subject to heinous terrorist attacks in which innocent civilians became victims. These incidents reinforce the importance of a strong international resolve and a coordinated global approach to confront the threat posed by terrorism.

The adoption of the United Nations Global Counter-Terrorism Strategy in September 2006 was a noteworthy development, signaling the will of the international community to combat this menace in a holistic and coordinated manner. There is much more that needs to be done to combat the menace of international terrorism.

The Prime Minister of India, Dr. Manmohan Singh, has emphasized that “the specter of international terrorism is one such phenomenon evolving out of the churning that has accompanied globalization processes. It is imperative to contend with both trans-border, regional and global ramifications of local problems as well as the reverse. In devising strategies to meet trans-border challenges, we must now consider ways of evolving multinational strategies.” Without the early adoption of the Comprehensive Convention against International Terrorism, the global struggle against terrorism will remain incomplete. We must ensure that there is zero tolerance for all forms of terrorism.

**Mr. Chairman,**

We appreciate the growing activities of UNODC in counter-terrorism efforts, especially its technical assistance activities at the national, regional and international levels, within the framework of its global project on strengthening the legal regime against terrorism. UNODC’s work has contributed significantly to increasing the number of countries that have ratified all twelve universal legal instruments relating to terrorism. The focus of technical assistance activities of UNODC is shifting from the phase of ratification support to the phase of legislative implementation and support for national counter-terrorism capacity building for criminal justice systems. We recognize that there is a mismatch between the demands placed on UNODC for implementation assistance, as more countries ratify more international instruments, and the resources at its disposal. We, therefore, support increased resource allocation for

UNODC counter-terrorism activities from the UN regular budget and voluntary contributions.

Permit me Mr. Chairman at this juncture, to express our support for the point made by Jamaica in their statement on behalf of CARICOM on the closure of the UNODC's Office in the region, which continues to be affected by "transnational crime and the international drug trade". While efforts are underway to increase the UNODC's overall resources, it should utilize the resources it has optimally. Also financial efficiency is not the only criterion. UNODC is a specialized agency of the UN created to serve the interests of Member States, including the smallest and most vulnerable. Hence, it has to revisit this issue.

**Mr. Chairman,**

India has been examining the need to amend the Code of Criminal Procedure for ensuring fair and speedy justice and further streamlining the criminal justice system. During the last two years, significant changes have been made so as to improve and strengthen the investigative and prosecution machinery and process, streamline procedures, especially trial court procedures, address the problems of under-trials, systematize the procedures concerning grant of bail, and put in place a comprehensive scheme for compensation of victims. Amendments to the Code of Criminal Procedure have also been made to prohibit the arrest of women after sunset and before sunrise and to provide special protection in respect of women victims.

India is a signatory to the UN Convention against Transnational Organized Crime and its three Protocols, and is taking steps towards their ratification. Bilateral agreements have been entered into for developing joint programmes to prevent money laundering, to counter terrorism, and organised crime. Domestic legislation has been strengthened further with the enactment of the Money Laundering Act. India has also signed the UN Convention against Corruption.

**Mr. Chairman,**

The close nexus between trans-national organised crime, illicit drugs, money laundering and illegal arms transactions, on the one hand, and international terrorism on the other, significantly undermines international peace and security. To move towards a world free of illicit drugs and of narco-terrorism would require concerted efforts at national, regional and international levels.

India remains fully committed to working closely with other countries, bilaterally and through regional and international cooperation, to address trans-national organised crime, illicit drugs, money laundering and illegal arms transactions.

Thank you, Mr. Chairman.

**617. Statement by Permanent Representative at the UN  
Nirupam Sen on Agenda Item 108: Measures to Eliminate  
International Terrorism at the 6<sup>th</sup> Committee of the 62<sup>nd</sup>  
session of the UNGA.**

**New York, October 11, 2007.**

**Mr. Chairman**

We take this opportunity to congratulate you on your election as Chairman of this Committee and also congratulate the Bureau members on their election. We assure you of our full cooperation and support.

We thank the Secretary General for his annual report on the implementation of Para 10 of the “Declaration on Measures to Eliminate International Terrorism” that presents measures taken at the national and international levels for the prevention and suppression of international terrorism as well as information on incidents caused by international terrorism. We would also like to thank Ambassador Rohan Perera for his report on the meeting of the Ad Hoc Committee established by General Assembly Resolution 51/210.

**Mr. Chairman,**

Terrorism continues to remain one of the major threats facing the international community. Since the last year when we met in this forum, terrorists have struck in India, United Kingdom, Yemen, Lebanon, Algeria, Turkey and many other places. This reinforces the fact that terrorism is a threat to all states, to all peoples, which can strike anyone, anytime, anywhere. It’s a global threat that requires a global response.

**Mr. Chairman,**

we continue to firmly reject the notion that any cause can justify terrorism.

Nothing can ever justify the targeted killing of innocent men, women or children. The senseless slaughter of innocents reinforces the urgency with which we need to unitedly and resolutely confront terrorism everywhere and at all levels and clearly proclaim that terrorism can never be accepted or justified. As a character in one of Schiller's plays says, one cannot create a fairer world through terror or establish justice through lawlessness. There is a wide and unbridgeable gulf between a freedom fighter on the one hand and a terrorist suicide bomber on the other. The former sacrifices his own life alone, the latter also sacrifices the lives of innocent civilians; the former gives up his life so that innocent people may live, the latter gives up his life so that innocent people may die. The former's action is life enhancing; the latter's is only a form of necrophilia. Democratic societies have the advantage of encouraging secular, democratic and progressive opposition forces which prevents fundamentalist forces from monopolizing political space.

The international community should send a clear signal to terrorists that their actions will not be tolerated, irrespective of the motivations underlying them. This principle was affirmed in the 1994 Declaration and various UNGA resolutions on measures to eliminate international terrorism that unequivocally assert that "criminal acts of terrorism intended or calculated to provoke a state of terror in the general public, a group of persons or particular persons for political purposes are, in any circumstances, unjustifiable, whatever the considerations of a political, philosophical, ideological, racial, ethnic, religious or other nature that may be invoked to justify them".

### **Mr. Chairman**

The United Nations Global Counter Terrorism Strategy also condemns terrorism in all its forms and manifestations. It signals the will of the international community that it would no longer tolerate the actions of the sponsors and abettors of terrorism or of those who willfully fail to prevent terrorists from utilizing their territories.

A strong response to terrorism requires broad-based international cooperation, compressing the space available to terrorists, and increasing the capability of States to address terrorist threats. It requires sustained and specific cooperation by a variety of national, regional and global agencies. We hope that the Strategy would provide the impetus to unite the international community in its fight against terrorism via practical

measures that facilitate cooperation by way of extradition, prosecution, information exchange, and capacity building.

Welcome as the strategy is, there is much more that needs to be done to combat the menace that international terrorism has become. Without the early adoption of the Comprehensive Convention against International Terrorism, the global struggle against terrorism will remain incomplete.

We continue to believe that agreement on it is attainable. The definitional issue is a red herring. The CCIT is not concerned with terrorism as a philosophical category but terrorist acts that are specific crimes and these have defined. We are encouraged by the fact that serious attempts are being made to resolve the outstanding issues. The new proposal submitted by the facilitator after extensive bilateral consultations is an attempt to narrow down differences. We thank her for all her efforts. Several other proposals also still remain on the table. We call on all delegations to seriously examine these proposals and work together to reach a compromise that will satisfy all parties and help in the finalization and adoption of the CCIT. We believe that when adopted, CCIT would provide a solid legal basis for the fight against terrorism. Most of these proposals make the CCIT perfectly consistent with international humanitarian law. And this is as it should be. After all it would be a dreadful paradox if democratic societies were to make civil liberties so precious as to curtail them. This central point of democratic societies has been cogently put by Hegel in his "Phenomenology of Spirit": the life of the spirit is not life that shrinks from death or keeps itself untouched by its devastation but that endures it and maintains itself in spite of it.

**Mr. Chairman,**

UN General Assembly has successfully established a comprehensive legal framework in the field of counter-terrorism. The 13 major UN instruments relating to specific terrorist activities remain fundamental tools in the fight against terrorism. India is a Party to all the 13 major legal instruments. India ratified the 2005 International Convention for the Suppression of Acts of Nuclear Terrorism in May this year. This Convention provides a legal basis for international cooperation to prevent terrorists from acquiring nuclear weapons. The effectiveness of this instrument depends on the degree to which States Parties respect, abide by and enforce its provisions. Key in this regard is strengthening the security of fissile materials stored in nuclear facilities. If governments fulfill their duties under this Convention, the agreement will work well and accomplish its purposes.

India also attaches utmost importance to the fulfillment of its obligations under the relevant counter terrorism resolutions of the United Nations. It has filed five National Reports to the Counter Terrorism Committee, giving a comprehensive picture of steps taken by India to counter terrorism. A 14 member composite delegation of UN counter-terrorism experts had visited India last year. A detailed presentation of India's counter-terrorism strategy was made to the Committee. India has also entered into several bilateral and multilateral agreements to cooperate with other States in curbing the scourge of terrorism.

The challenge of confronting terrorism is not new to us. India has been a victim of terrorism for more than two decades. As victims, we are committed to eradicating this threat from our societies.

Thank you, Mr. Chairman

**618. Statement by Member of Parliament and Member of the Indian Delegation to the UN Rameshwar Oraon in the General Debate of the Special Political and Decolonization (Fourth) Committee at the 62<sup>nd</sup> session of the UNGA.**

**New York, October 15, 2007.**

**Mr. Chairman,**

It gives me great pleasure to congratulate you on your election as Chairman of the Fourth Committee, as well as to congratulate other members of the Bureau. I assure you of my delegation's full cooperation and support during this 62<sup>nd</sup> session of the UN General Assembly. I would also like to take this opportunity to express appreciation to Ambassador Madhu Raman Acharya of Nepal for his skillful handling of the Committee's work in the last GA session.

**Mr Chairman,**

Despite having progressed into the twenty first century, we continue to grapple with the vestiges of colonialism, a bygone system that runs contrary to the fundamental principles of this Organisation. Colonialism

is anachronistic, archaic and outmoded; it contravenes the fundamental tenets of democracy, freedom, dignity and human rights. While remarkable progress has been made in removing countries from the grip of colonialism, 16 areas still remain on the list of Non-Self Governing Territories. This serves as a reminder that the process of decolonisation is incomplete and much more needs to be done. We are now in the seventh year of the Second International Decade for the Eradication of Colonialism [2001- 2010] and unless we intensify our work to implement the various resolutions and recommendations to eradicate colonialism, the Special Committee of 24 may well need a further decade to complete its work.

Our approach to the task that lies ahead must therefore blend urgency and activism on the one hand, and sensitivity and circumspection on the other. We must, first and foremost, take into account the needs of the people of these Territories and their special circumstances. An appropriate format and timing for the completion of decolonization in each territory needs to be focused upon. Ascertaining the political aspirations of the people in each of these Territories, and taking into account the stages of development of each Territory, are critical inputs for making decisions that enable them to develop indigenous political and socio-economic institutions and structures of their choice. The importance of eschewing a “one size fits all” approach cannot be overstated; the focus should instead be on a case-by-case approach, with a view to making real progress in each Territory.

Dissemination of relevant information regarding options that may be available to the people in the Territories is crucial. All too often, the local population may be unaware of their legitimate political options. For real constitutional and political advancement to occur, the peoples of a Territory require sustained access to unbiased information on the licit options of political equality before them, namely, independence, free association with an independent state or integration with an independent state, as clearly defined under Resolution 1541 [XV] of the General Assembly.

Two important tools that could serve to bridge this information deficit in the process of decolonisation, are the visits of UN Missions to Non Self-Governing Territories and the conduct of Regional Seminars by the Special Committee of 24 on Decolonisation. The instrumentality of visiting Missions helps in the collection of adequate and first-hand

information on conditions in the Territories and for ascertaining the wishes and aspirations of the peoples concerning their future status. Such missions are important in the context of furthering modalities and action plans for decolonisation and observing acts of self-determination. We hope that the administering Powers would extend their full cooperation to the Special Committee in facilitating such visiting missions. Similarly, we favour the holding of regional seminars by the Special Committee, in an effort to mobilize world opinion to support and assist the peoples of the Territories in speedily ending colonialism. The idea of combining visiting Missions to certain Territories with seminars in order to optimize available resources is a worthy one, which should be pursued. In this context, we look forward to the holding of the next seminar in the Pacific region in 2008.

The role of the administering Powers is an important factor. A spirit of cooperation and flexibility has largely imbued their actions in recent years. We call upon them to further build upon this positive spirit by, in particular, assisting the Special Committee of 24 in devising specifically tailored action plans for the decolonisation of certain Territories in their quest for self-determination. The case of Tokelau is one such example. We extend our full support to the preparations by New Zealand and the Territorial Government for the referendum scheduled for this month in exercise of the right to self determination by the people of Tokelau.

We hope that such instances of partnership will serve as a guide to other administering Powers which continue to resist the international dialogue established by the United Nations on the political and constitutional development of the territories under their administration. We support an interactive dialogue on the objective reality in the Territories would be to the benefit of all concerned, in particular, the people of these territories.

We should like to express our appreciation for the work of the Special Committee. We agree with the Chairman's contention that the focus should now be on implementation. We support moves to concentrate efforts to produce a plan of implementation for the wider United Nations system in order to organize actions already called for, into concrete activities, in furtherance of complete decolonization by 2010. We are convinced that only through such a pro-active approach, which we must carry forth into 2008, will we be able to fulfill the mandate for decolonisation by the end of this decade. We would like to assure the Chairman of the Committee of 24 of our

full support and involvement in his efforts to move the agenda ahead and successfully complete the mandate of the Special Committee.

**Mr Chairman,**

Last Thursday in its statement before this Committee Pakistan had, for a limited and selfish foreign policy objective, made a reference to the Indian State of Jammu & Kashmir that was unwarranted and completely irrelevant to the work of this Committee. Pakistan would have been better served if it were to focus on giving the right of self determination and democracy to its own people, rather than making out of context and factually incorrect comments about others. Not only is Jammu & Kashmir an integral part of India, but it has for long had a democratically elected Government in place. India is of the view that bilateral matters should continue to be discussed bilaterally, and not raised in multilateral fora. There is a need also to be vigilant against the voicing of sentiments or usage of language that would be tantamount to supporting terrorists as they unsuccessfully seek to undermine long established democratic and pluralistic societies.

**Mr Chairman,**

In conclusion, as a founding member of the UN and the Special Committee of 24 on Decolonisation, we share solidarity with other erstwhilecolonized peoples and nations. We consider it an honour to re-dedicate ourselves to the cherished ideals of freedom, democracy, human rights, dignity and peaceful co-existence, while reaffirming our commitment to achieving the goal of complete decolonisation.

Thank you, Mr Chairman.

**619. Statement by Member of Parliament and Member of the Indian Delegation to the UN Subash Maharia on Agenda Item 80: Criminal Accountability of the UN Official and Experts at the 6<sup>th</sup> Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 15, 2007.**

Thank You Mr. Chairman

We thank the Secretariat for the Note on the subject and for providing the necessary inputs that will enable Member States to make an informed decision on the short term and long term measures required to be taken to ensure the criminal accountability of United Nations Officials and Experts on Mission.

We also commend the efforts of the Ad Hoc Committee, which at its first meeting devoted considerable time on understanding the nature and extent of the problem and the remedies currently available.

**Mr. Chairman**

We are extremely concerned that in spite of clear codes of conduct for United Nations peacekeepers and a policy of zero tolerance, cases of sexual abuse and exploitation and other criminal acts continue to be reported. Such acts taint the image and reputation not only of the United Nations, but also of the sending States. United Nations peacekeepers are sent on humanitarian missions in conflict ridden areas and, working together with UN agencies, their task is to re-establish the rule of law, curb violence, and promote good governance and reconciliation to help the host country recover from the trauma of conflict. It is regretful that those tasked with upholding the rule of law sometimes do not observe the law themselves. The goal of security, development and human rights for all must be strongly advanced and those UN personnel held responsible for violating the codes of conduct must certainly be held accountable.

We therefore concur that it is essential to ensure that all United Nations personnel are neither exempt from the consequences of criminal acts committed at their duty station, nor unjustly penalized. The legal gap in jurisdiction has been identified as the main barrier in this regard and to

address the problem the Secretariat has proposed several short term and long term measures.

As regards the short term measures, we support the proposal that the General Assembly could adopt a resolution strongly 'urging Member States to establish, as a minimum, jurisdiction over their nationals who commit serious crimes as they are known and defined in their existing domestic criminal laws, where that conduct also constitutes a crime under the laws of the host State'. This would fulfill the requirements of double criminality, which is a condition precedent in some jurisdictions to invoke jurisdiction. Other short term measures proposing inclusion of similar language requiring Member States to ensure accountability in Mission specific resolutions of the Security Council and the Memorandum of Understanding with contributing Member States can also be considered.

As regards long term measures, the Secretariat has expressed its support for development of a Convention to close the legal gap in matters of jurisdiction.

**Mr. Chairman,**

At the meeting of the Ad hoc Committee in April this year, my delegation had stated that future deliberations on long term measures may not be focused or geared only towards elaboration of a convention. We still feel that the gaps in the current system can be plugged through various other means, like those suggested in the Secretariat's Note under the rubric of short term measures or through development of a model law as indicated in the Report of the Group of Legal Experts.

We are not fully convinced at this stage of the necessity of developing a convention. Many States, including India, do not need a convention to establish jurisdiction over their nationals for crimes that have been committed outside their territory. Such jurisdiction already exists. If only a small number of States do not assert extraterritorial jurisdiction for ordinary crimes then that problem should be addressed through more focused efforts directed at those countries.

The other fundamental issue that we see is the 'scope *ratione personae*', particularly with respect to military personnel employed as experts on mission. Despite very cogent explanation and rationale provided by the Secretariat for the distinction between military observers

and military members of national contingents, it may be difficult to implement differential treatment under national laws.

As regards "establishment of jurisdiction", the recommendation by the Group of Legal Experts that the host State should itself establish criminal jurisdiction conforms to principle of territoriality but needs to be carefully examined particularly in situations where the legal/law enforcement machinery for gathering such evidence may be missing or, even if available, is weak and hence unable to function effectively. The Secretariat's Note identifies several options for such situations but such ad hoc measures may not be able to produce reliable, credible and legally admissible evidence.

Further, any future legal regime on the subject in the form of a binding international treaty/convention may require a long time to get adopted and it will be effective and enforceable only between the States parties. Therefore, we believe that at this juncture it is important to first implement the short term measures and assess their efficacy and after such assessment take a decision, if needed, on any long term measures.

Thank you Mr. Chairman

**620. Statement by Permanent Representative at the UN  
Nirupam Sen on the question of Afghanistan at the  
Security Council.**

**New York, October 15, 2007.**

**Mr. President,**

Let me begin by expressing my appreciation for your successful stewardship of the Security Council over the past fortnight. Let me also express my appreciation for the dedication shown by Special Representative Tom Koenigs, and wish him all the best in future.

**Mr. President,**

Today's debate on Afghanistan is most opportune, taking place a fortnight after the High-Level Meeting chaired by the UN Secretary-General and His Excellency, President Karzai. As on that occasion, today's meeting affords us an opportunity to reaffirm our commitment to the stabilization and reconstruction of Afghanistan. As the Minister of External Affairs of India noted two weeks ago, India is fully committed to implementing the benchmarks of the Afghanistan Compact and to addressing the inter-related security, political and developmental challenges facing Afghanistan.

The central task in Afghanistan involves addressing, in the face of insecurity created by vicious terrorist violence, the socio-economic challenges that are the result of decades of strife, destruction and privation. The challenge before the international community is, on the one hand, to ensure security while helping resolve these problems, while on the other, to transform our respective high-level political commitments into operational strategies and concrete outcomes on the ground. Only if we succeed in all three tasks can we create the conditions that engender greater national ownership of security, reconstruction and developmental processes in the long-term. It is an unavoidable reality that it is only in the long-term that we can rebuild national institutions destroyed over the decades.

Therefore, our collective goal must be to build upon the significant successes recorded thus far, while recognizing the fact that the road ahead is long. We must redouble our political and economic commitment to help Afghanistan over the medium- to long-term, and ensure that our determination is unshaken by short term developments. The resolve displayed by UNAMA in this context, in expanding its presence to 17 offices,

is commendable. We look forward to further expansion as and when capacities are created.

In this context, no challenge is more of a test of our collective resolve than that posed by the security situation. It is also the threat that could most quickly undermine our collective efforts in Afghanistan. Therefore we cannot and must not underestimate the ferocity of the Taliban and Al-Qaeda resurgence. India fully appreciates the Government of Afghanistan's position that the challenge of terrorism, in particular the growing trend of suicide attacks, cross-border infiltration, and the nexus between terrorism and drug trafficking requires a robust international political solution and a stronger domestic military response. At the same time, as our Minister underscored, security challenges must be addressed realistically. That is to say, we in the international community must provide appropriate responses, including security enforcement and economic and developmental strategies that rapidly bring the benefits of governance and development to people in the worst-affected districts. We can ill-afford partial solutions that provide only temporary relief in limited areas: terrorism cannot be fought piecemeal.

With regard to the inter-related aspect of addressing the developmental challenge, India believes that the good work being undertaken by the international community in Afghanistan can only be sustained in the longterm if we invest in developing Afghan human resources. For this, a multipronged approach is required: on the one hand, we must invest in rebuilding infrastructure and generating employment, and on the other, we must progressively transfer the necessary skills and managerial authority to the Afghan people so that they can take on the ownership of these projects.

For our part, I must underline that India's commitment to the rebuilding and development of Afghanistan remains unflinching. Our assistance programme, which has been in place since the Berlin Conference, has now reached US\$ 750 million. Of this total pledge, India has already disbursed around US \$ 300 million in the implementation of various assistance projects since 2002. Our projects cover the gamut of activities, ranging from capacity building projects to infrastructure creation and reconstruction.

With regard to capacity-building, India has trained more than 2,700 Afghan citizens in India. Since 2006, we have annually trained 500 Afghan public officials in short-term courses and 500 Afghan students at University-level courses in India. India is also implementing a capacity-development programme in public administration, in partnership with the UNDP, to depute

30 Indian civil servants to assist in various Afghan Ministries. In addition, India is including a strong capacity-development component in all its infrastructure projects in Afghanistan. As regards projects, apart from completion of ongoing mega-infrastructure projects, India is now simultaneously focusing upon Small Development Projects. These include activities that require the participation of local communities. Such projects are aimed at providing the most direct “peace dividend” to communities that are yet to see the benefits of development. India has worked to align its assistance programmes with Afghan priorities. Our projects are being implemented in close coordination with Afghan stake-holders, focusing particularly on local implementation, management and ownership of assets.

**Mr President,**

As a country with traditionally close historic, cultural and regional links with Afghanistan, it is natural for us to see regional cooperation as the third pillar for stabilizing Afghanistan. Regional economic cooperation is an important benchmark of the Compact, and is a strategic element of the Afghanistan National Development Strategy. Afghanistan’s entry into the South Asian Association for Regional Cooperation in April 2007 will not only further strengthen its historical links with the South Asian region, it will also provide the region lasting benefits in free trade and shared economic activities. In this context, several important regional cooperation events have taken place over the past few years, including the Kabul and New Delhi Regional Economic Cooperation Conferences.

However, the central challenge remains the need to develop coordinated measures to implement the programmes formulated in these regional processes. These include addressing key and topical challenges, such as cross-border terrorism, upgradation of law enforcement and governance capacities, facilitation of overland transit as well as expansion of trade and business linkages.

**Mr. President,**

In conclusion, at the macro-level, our best response to those who seek to drive the international community out of Afghanistan is to display our heightened sense of resolve. We can only succeed by showing that our commitment is long-term and our resolve is unshaken. Most importantly, we must work together in a more effective partnership with the Government of Afghanistan. As the latest report of the UN Secretary-General underlines, strong leadership from the Afghan government must be matched by “greater

donor coherence”, and a strong commitment from all of us in the neighbourhood. This remains the key to collectively building upon the gains made since the Bonn Conference.

I thank you.

**621. Statement by Member of Parliament and Member of the Indian Delegation to the UN Santosh Bagrodia on Agenda Item 52: Macro-economic Policy Questions; [b] International Financial System and Development; and [c] External Debt Crisis and Development at the Second Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 15, 2007.**

**Mr. Chairman,**

We would like to thank the Secretary-General for the detailed and comprehensive reports on the macroeconomic policy questions being considered on the agenda today. We associate ourselves with the statement made by Pakistan on behalf of the Group of 77.

**Mr. Chairman,**

It is a matter of grave concern that 2006 was the tenth year in succession with net financial resources transfer from developing countries to developed countries. Rather than promoting transfer of resources from developed to developing countries in order to assist national development efforts of the latter, the international financial architecture appears to support and encourage such flows. Worse, this resource transfer is steadily increasing, and has now reached US\$ 0.6 trillion. Surely, this gigantic sum of money would have been better utilized in promoting poverty eradication in developing countries!

Despite variations across countries, reserve accumulation accounts for a significant portion of the resource flow from developing countries to developed countries. The Secretary-General's reports have correctly highlighted this to be “selfinsurance” reserves i.e. reserves to minimize the need for reliance on international bailout in case of future crisis. It has also

correctly noted that these reserves are for precautionary reasons, not mercantilist. We must collectively acknowledge that such actions are a direct consequence of conditionalities, later proven to be harmful, imposed by the Bretton Woods Institutions [BWIs] in their lending policies. Such actions are also a telling comment on the failure of these institutions in fulfilling their basic mandate, including in the guarantee of global financial stability. We have been witnessing a growing trend among borrowers to pre-pay their loan obligations rather than continue with BWI mandated “policy packages”. This is also highlighted in the Secretary-General’s report, which notes the large negative flows from BWIs during the last three years. We fully agree with the Secretary-General that this pattern raises profound questions about the role of these institutions in financing for development, and on their continued relevance and effectiveness. There is an urgent need to address the fundamental structural problems of the international financial architecture.

We have repeatedly stressed on the need for urgent reform of the BWIs in order to provide greater legitimacy and increase the effectiveness of these institutions. The reform must enhance the voice and participation of developing countries in these institutions, thereby responding to the needs of concerns of the majority of countries affected by their operations. The Secretary-General is right in stating that “comprehensive governance reforms aimed at solving the problem of under-representation of developing countries in global financial institutions are indispensable at this time”. Given its unique role and legitimacy, the United Nations must oversee this process and conduct periodic reviews of BWIs. The newly strengthened Economic and Social Council [ECOSOC] would be the most appropriate body to implement this. For this purpose, there is an urgent need to effectively strengthen the technical capacity of the Department of Economic and Social Affairs, so that it could assist the ECOSOC in discharging these functions.

**622. Statement by Member of Parliament and member of the Indian Delegation to the UN Ms. Sushma Swaraj at the First Committee of 62<sup>nd</sup> session of the UNGA.**

**New York, October 16, 2007.**

**Mr. Chairman,**

My delegation is most happy to see you, a distinguished representative of a friendly country, in the chair of the Committee on Disarmament and International Security, the First Committee of the General Assembly, which has been the incubator of several important global disarmament initiatives since its inception.

2. Indeed, the very first resolution adopted by the General Assembly, Resolution 1(1) of 1946, unanimously and unambiguously called for elimination from national armaments of atomic weapons and of all other major weapons adaptable to mass destruction, and the use of atomic energy only for peaceful purposes, a goal reaffirmed by the General Assembly repeatedly. The very existence of nuclear weapons, and consequently the ever present possibility of their use, poses a threat to mankind. This is the central message of the first UNGA resolution and the Final document of SSOD-I.
3. The ban on biological and chemical weapons raised the hope that a similar prohibition could be imposed on the remaining weapon of mass destruction, namely nuclear weapons. However, nuclear weapons stockpiles, both strategic and non-strategic, are still too large, and mostly on hair-trigger readiness. The threat of nuclear war remains real.
4. Our goal has to be the total elimination of nuclear weapons for a nuclear-weapon-free world. This was the core of the Action Plan presented by former Prime Minister Rajiv Gandhi at the Third Special Session of the General Assembly on Disarmament in 1988. It provided a holistic framework for disarmament with those with the biggest arsenals having greater responsibility for nuclear disarmament. Speaking before the General Assembly on October 1 the Minister for External Affairs of India said "India's longstanding commitment to universal, non-discriminatory and comprehensive nuclear disarmament is embodied in the vision of late Prime Minister Rajiv Gandhi for a "nuclear-free and non-violent world". This vision

was put forward nearly two decades ago. It remains undiminished today. Indeed it is all the more relevant today, given that fact that peaceful uses of nuclear energy can address the inexorably growing demand for new and non-polluting sources of energy to fuel economic development." The Minister for External Affairs also stated that we would be bringing proposals to Member States and this organisation in this regard.

5. Once the international community agrees on the goal of a nuclear weapon free world, all states could work together to elaborate incremental and progressive steps for realising that goal. Simultaneously, the international community could also craft a security system in which States do not feel the need to develop, produce, stockpile or use weapons of mass destruction. Both would require changes in attitudes, doctrines and national security postures to bring them more in line with today's globalised, interdependent world.
6. While maintaining a credible minimum nuclear deterrent, India remains committed to nuclear disarmament, which enjoys strong domestic consensus. India has remained steadfast to the goal of a nuclear weapon free world, to be achieved through global, verifiable and non-discriminatory nuclear disarmament. India's responsible nuclear doctrine is based on no first use and non-use of nuclear weapons against non-nuclear weapons States. We are prepared to turn these commitments into multilateral, legally-binding obligations. The doctrine also reaffirms India's readiness to join multilateral negotiations for the reduction and elimination of nuclear weapons. India has continued to observe a moratorium on nuclear explosive tests. We are ready to participate in negotiations, in the Conference, on a non-discriminatory, multilateral and internationally and effectively verifiable treaty banning the production of fissile material for nuclear weapons or other nuclear explosive devices, subject to its meeting India's national security interests. We also believe that the Conference on Disarmament must find practical ways of addressing the issue of nuclear disarmament in a comprehensive and nondiscriminatory manner.
7. Mr. Chairman, our commitment to nuclear disarmament is reflected also in the resolutions that have we been sponsoring in the First Committee and the General Assembly. We are convinced that a

multilateral, universal and binding agreement prohibiting the use or threat of use of nuclear weapons under any circumstances would contribute to the elimination of the nuclear threat and create a climate for negotiations for an agreement on the prohibition of nuclear weapons. We, therefore, intend to once more table the resolution that requests the Conference on Disarmament to begin negotiations on such a convention.

8. While the international consensus to ban nuclear weapons develops, we should take measures to mitigate the dangers posed by these weapons. We propose to table again the resolution on reducing nuclear danger, which offers modest and practical proposals, calling for a review of nuclear doctrines, as also urgent steps to reduce the risks of unintentional and accidental use of nuclear weapons, including through de-alerting and detargeting of nuclear weapons.
9. Besides the threat to the safety and security of mankind from the likely use of nuclear weapons by States, there is now a new threat emanating from possible use of weapons of mass destruction by terrorists and non-State actors. We hope that the resolution on measures to prevent terrorists from acquiring weapons of mass destruction, which has been adopted by this Committee and the General Assembly by consensus since 2002, will receive similar endorsement this year, with an even greater number of sponsorships. In this context, we welcome the entry into force of the International Convention for the Suppression of Acts of Nuclear Terrorism on 7 July 2007.
10. As a responsible nuclear power, we stand for strengthening global nonproliferation, as proliferation has already affected our security interests adversely. A constructive dialogue needs to be evolved for stemming proliferation without unduly constraining peaceful uses of nuclear energy.
11. India remains constructively engaged in collateral disarmament processes, including on small arms and light weapons, the Biological and Chemical Weapons Conventions and the Convention on Certain Conventional Weapons. India has completed destruction of 84 per cent of its chemical weapons stockpile and is committed to destroying its entire stockpile by April 2009. India was also among the first 23 States to ratify Protocol-V of CCW on Explosive

Remnants of War that entered into force last year. With this, India has become one of 25 countries to have signed and ratified CCW and all its five Protocols.

12. The First Committee and the General Assembly have a special role in forging a better understanding on the entire range of issues on the global disarmament agenda. Through such an exercise, they can promote purposive actions internationally and provide useful direction to the disarmament negotiating body, the Conference on Disarmament. The challenges and opportunities in the areas of disarmament, non-proliferation and international security require multilateral solutions. They also need a renewed commitment by States and a global compact to undertake collective obligations. India, on its part, is ready for such an exercise.

I thank you, Mr. Chairman

**623. Statement by Member of Parliament and Member of the Indian Delegation to the UN Dr. Rameshwar Oraon on Agenda Item 85: Report of the Special Committee on the Charter of the UN and on the strengthening of the role of the Organization at the 6<sup>th</sup> Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 16, 2007.**

**Mr. Chairman,**

At the outset, we wish to thank Ambassador Towpik of Poland, the Chairman of the 'Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization', for his skilful guidance of the last session in February. We would also like to extend our appreciation to the other Members of the Bureau.

Maintenance of international peace and security is the primary responsibility of the Security Council, which acts on behalf of all members of the UN in the discharge of its duties. The Security Council, which mandates sanctions, has the nodal responsibility for finding solutions to the problems of third States affected by UN sanctions. Article 50 of the UN Charter confers the

right on third States confronted with special economic problems, because of the Security Council sanctions, to consult the Security Council for solution to those problems. We do not consider Article 50 of the Charter as merely procedural. It obliges the Security Council to find definitive solutions to the problems of affected third States. India's stand has been from the beginning that the Security Council should hold the primary responsibility towards the affected third States, as a part of its sanctions imposing decisions. India aligns itself in this regard with the Statement made by Cuba on behalf of NAM that the Security Council is obliged to directly focus upon the effects on third States of any sanctions under Chapter VII of the UN Charter.

**Mr. Chairman,**

We thank the Secretary General for his report on "Implementation of the provisions of the Charter of the United Nations related to assistance to third States affected by the application of sanctions". We are pleased to note the various measures taken by the Security Council to mitigate the effects of sanctions, ranging from standardizing humanitarian exemptions to developing delisting procedures and establishing a focal point. These measures are aimed at ensuring that sanctions are targeted and have consequently led to significant reductions in unintended economic consequences for third States. In this regard measures like defreezing of funds to allow contractual dues are also steps in the right direction. We are pleased to note that due to various steps taken so far no Member State has approached any sanctions committee concerning special economic problems arising from the implementation of sanctions.

These important steps have been successful as in the recent past the Security Council, as part of the international community's effort to counter global terrorism, has moved from sanctions against States to targeting individuals and non-state entities. However, these measures may not really work if the Security Council decides to mandate a major new sanctions regime directed against a State. The issue of third country hardships considered by some to be moot now is likely to resurface again in such a situation. Therefore, we think that the Russian proposal still remains relevant and adoption of fair and clear procedures in the UN sanctions process will strengthen its effectiveness and credibility. In this regard a comprehensive framework would provide the requisite transparency and certainty in procedures. India therefore supports the idea of establishing a working group within the Sixth Committee to take up the matter of sanctions and third States.

As regards the Russian proposal on Peacekeeping Operations under Chapter VI of the UN Charter, we believe that while the political and operational aspects of peacekeeping are being dealt with by other specialised committees, this Committee could contribute to the subject from the legal angle. The allocation of the agenda item on 'Comprehensive Review of the Peacekeeping Operations in all their respects' to the Sixth Committee also reflects the need for focused legal scrutiny of the subject.

Turning to the joint proposal of the Russian Federation and Belarus seeking an advisory opinion of the ICJ on the legal consequences of use of force without a decision of the Security Council taken pursuant to Chapter VII, we are of the view that consideration of such a reference would provide an opportunity to clarify the position on certain important legal aspects.

**Mr. Chairman,**

A Cuban proposal aimed at redefining the powers and functions of the General Assembly and its relationship with the Security Council has been under the consideration of the Special Committee on UN Charter for some time now. India attaches great importance to the reform of the United Nations, including the revitalization of the General Assembly and a comprehensive reform of the Security Council. The continuing encroachment of the mandates of the General Assembly by the Security Council is of great concern to the general membership of the United Nations. The clear demarcation of powers in the Charter or the expansion of non permanent membership has not prevented this. Only an expansion in the permanent membership with new permanent members held accountable through reviews would introduce the necessary checks and balances that would prevent such encroachment. We reiterate India's commitment to the strengthening of the United Nations and enhancing of its efficiency.

**Mr. Chairman,**

We regard the Repertory of Practice of the UN organs to be a valuable source of information on the application of the Charter and an indispensable tool for the preservation of the institutional memory of the United Nations. We support the continuation of work on it. We also support updating of the Repertoire of the practice of the Security Council.

**In conclusion, Mr. Chairman,**

We are encouraged that the Special Committee after many years has been

able to make modest progress and adopt some important decisions. Its decision on improvement of working methods of the Committee, we sincerely hope, would lend a new momentum to the work of this important Committee. In this respect we are willing to look at new proposals that would contribute to the revitalization of the work of the Special Committee and the United Nations and are confident that these would garner wide support.

Thank you, Mr. Chairman.

**624. Statement by Member of Parliament and Member of the Indian Delegation to the UN Prasanna Acharya on Agenda Item 63: [a] Advancement of Women and [b] Implementation of the outcome of the Fourth World Conference on Women and of the 23<sup>rd</sup> special session of the UNGA at the Third Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 16, 2007.**

**Mr. Chairman,**

We thank the UN Secretary-General (UNSG) for his reports on Agenda Item 63. We have also studied with interest the UNSG's Report on 'Intensification of efforts to eliminate all forms of violence against women'. My delegation broadly associates itself with the statement made by the Chair of the Group of 77.

The 2005 World Summit reaffirmed that full and effective implementation of the Beijing Declaration and Platform for Action and the Outcome of the 23rd UNGA Special Session by all countries is essential for achieving the internationally agreed development goals, including the Millennium Development Goals (MDGs). The focus after the 2005 World Summit has rightly shifted to identification of sources for financing gender. While primary responsibility rests with the country concerned, the international community should match up to its commitment by provision of new and additional financial resources, transfer of technology, sharing of experiences, expertise, information and data, technical cooperation and capacity-building.

Notwithstanding the normative and legal advances over the last several

decades, particularly as regards the rights of women and their social and economic advancement, the gap between de jure and de facto equality remains in much of the world. The need of the hour is speedy implementation of legislative and policy measures for greater empowerment of women, besides gender mainstreaming at all levels. It is also equally important to address the continued violation of the rights of the girl child and the detrimental impact it has on society as a whole. We support the Secretary-General's call that the international community while addressing the vulnerabilities of the girl child, should advocate protection measures and also welfare and development of the girl child characterized by four Es—equality, education, enabling environment and empowerment.

**Mr. Chairman,**

The UNSG concluded in his Report on 'Mainstreaming a gender perspective into all policies and programmes of the UN system' that much more needs to be done to overcome challenges and to bridge capacity and knowledge gaps within the UN system. Lack of knowledge among the senior managers, including the resident coordinators, on how to operationalize gender mainstreaming policies is a matter of concern. Another area requiring immediate attention is achieving 50/50 gender distribution, especially at senior and policy-making levels in the UN. We support the UNSG's recommendation to strengthen gender mainstreaming accountability frameworks within the UN system.

**Mr. Chairman,**

Gender equity and equality has been a key guiding principle of the Common Minimum Programme of the Government of India. As the Prime Minister of India, Dr. Manmohan Singh, noted "We remain deeply committed to this objective because I believe no civilized society, no modern polity, no developing economy can ignore the aspirations and the rights of women." India's planning process is fully committed to enabling women to be equal partners in development. A separate Department for Women and Child Development, created in 1985, was upgraded to a Central Ministry in 2005. An essential component of the 11th National Five Year Plan (2007-12) for gender empowerment and equity includes special measures on four aspects namely violence against women, economic empowerment, political participation and women's health. The Joint Parliamentary Committee of the Indian Parliament on Empowerment of Women continues to play a crucial role in monitoring the application of gender equality principles in all legislation and also to ensure that legislation in India is gender responsive.

The reservation in India twelve years ago of one-third of urban and local selfgovernment seats for women marked a turning point in our effort to empower women. As a result, over one million Indian women at the grassroots level have been brought into political decision-making. A similar reservation of seats for women in the Indian Parliament remains under consideration.

**Mr. Chairman,**

To realise the goal of reducing the female poverty ratio by 5% by 2007 and by 15% by 2012, a number of result-oriented programmes have been initiated in India. A National Rural Employment Guarantee programme was launched in 2006, which provides 100 days assured wage employment annually to every rural household with at least one-third women beneficiaries. The Government actively encourages and supports group initiatives in formation of women's self-help groups. Today there are more than 2 million women self-help groups in the country supporting more than 10 million rural families. India is implementing the Act passed by our Parliament on Social Security for Workers, including women workers, in the unorganised sector. To enhance women's employability in high-end vocations, strong emphasis is being laid on skill building through exclusive institutes of vocational training. New schemes are being implemented to widen the base of women entrepreneurs, including special schemes promoted by financial institutions/banks. As a result, the number of women entrepreneurs in India has risen very considerably.

Government initiatives for gender equality have been buttressed by the proactive role of the higher judiciary, particularly the Supreme Court of India. The right to approach the Supreme Court for enforcement of fundamental rights is itself a fundamental right and in proceedings under Article 32 viz. Right to Constitutional Remedy, the Court has addressed issues of concern to women in several innovative ways.

Another crucial step taken towards gender mainstreaming is in institutionalization of gender-sensitive budgeting. Gender budgets have now become an integral part of the budget exercise. So far 50 Central Ministries have set up gender cells in order to mainstream gender concerns in their policies and programmes. All Ministries in the Government are required to prepare outcome budgets that will ensure effective utilisation of the amount allocated for women in the budget.

Violence against women is found in all countries and must be urgently and

seriously addressed. The enactment by the Indian Parliament in 2005 of 'The Protection of Women from Domestic Violence Act' constitutes an important milestone in tackling this scourge in India. We look forward to the UN Secretary-General's global campaign on violence against women to be launched towards the end of 2007.

**Mr. Chairman,**

In the UN context, India was honoured to provide the first-ever Female Formed Police Unit, which recently joined the UN Mission in Liberia (UNIMIL). This participation also reflects India's commitment to assist the UN in more effectively reaching out to vulnerable sections particularly women and children, in conflict and post-conflict societies.

India stands ready to work with the international community for early realisation of the Millennium Developmental Goals through effective implementation of gender empowerment and gender mainstreaming both within and outside the UN.

Thank you, Mr. Chairman.

**625. Statement by Member of Parliament and Member of the Indian Delegation to the UN Ms. Sushma Swaraj on Agenda Item 64 [a] and [b] - New Partnership for Africa's Development: Progress in Implementation and International Support and Agenda Item 47: Decade of roll-back of malaria in developing countries particularly in Africa at the 62<sup>nd</sup> session of the UNGA.**

**New York, October 18, 2007.**

**Mr. President,**

We thank the Secretary-General for the Fifth consolidated Report on Progress in Implementation and International Support for New Partnership for Africa's Development (NEPAD) and the other reports prepared for this joint debate. We broadly associate ourselves with the statement made by the Chair of the Group of 77. But I would like to deal with some of the issues discussed in the Report.

**Mr. President,**

First of all, I will talk about Malaria. It is regrettable that Malaria continues to plague several regions of the world, particularly in many parts of Africa. As a former Health Minister of India, I can say with authenticity that this disease affects people of all ages but is particularly dangerous and debilitating in young children and pregnant women. It disproportionately affects poor people and exacerbates the poverty of poor countries and communities by incapacitating the work force, decreasing economic productivity and reducing output. In rural areas, where the transmission season generally coincides with planting and harvesting season, malaria imposes a dual burden on the poor. The human suffering and economic losses caused by malaria are unnecessary as the disease is preventable, treatable and perfectly curable too. The Report talks about mosquito nets and adequate resource flow. That is necessary. But what is more necessary is protecting access to affordable generic medicines, which, I am sorry to say, the present IPR regime does not protect. Therefore, I would like to emphasize that the UN should try to improve this situation. Equally necessary is economic development that historically eliminated malaria from the developed world. For this, capacity building, science and technology and a truly developmental Doha Round are all necessary. Many essential matters flow from this imperative of economic development.

**Mr. President,**

The Secretary-General's Report on 'Causes of conflict and the promotion of durable peace in Africa' states that the last few years have witnessed many positive developments in Africa and that the number of armed conflicts has been significantly reduced. The Secretary-General is right in saying that more action is needed both to strengthen and support Africa's own efforts to bring peace to the continent and to tackle the wider sources of armed conflicts.

In this context, India welcomes the creation of the Peace Building Commission. India is strongly committed to the objectives and work of the PBC, and has contributed to the resources of the Peace Building Fund. The mobilization of resources is the key vehicle by which the international community can assist post-conflict societies in addressing critical issues in peace consolidation, on the basis of national ownership of this process. Hopefully this would bring the Bretton Woods Institutions (BWIs) into the ambit of a larger perspective. It is worth remembering that many African countries where conflicts have broken out were, during the preceding

decade, under an IMF programme for 60 to 80% of the time: economic advice given to them on trade, subsidies and agriculture made many reel back into civil conflict. Therefore, the UN has to play a central role in the reform of BWIs, including a much greater voice and participation of developing countries, which would make the BWIs more responsive to their needs, including those of Africa.

India has been one of the oldest, largest and most consistent contributors to UN Peacekeeping missions in Africa. Indian soldiers have been part of the UN Peacekeeping and Observer Missions in more than 10 African countries including the first UN Mission to Congo established in 1960. Presently, there are more than 8,000 Indian personnel on ground in Africa. The Indian soldiers have been recognized for their humanitarian and basic infrastructure projects, including provision of medical, water and vocational training assistance programmes. India has also contributed lady military and police officers to UN Missions in Africa. In a response to Secretary-General's call, India provided the first full female formed police unit for peacekeeping work in Liberia at the beginning of this year. In addition to its normal duties, this unit has been successful in reaching out to the most vulnerable sections of society i.e. women and children.

**Mr. President,**

Despite positive developments, the Secretary-General reminds us of the serious challenges that lie ahead; challenges posed by poverty, economic development, access to basic education, healthcare and adequate nutrition that are stumbling blocks to unleashing the latent talent of the African peoples. It is in this context that the Report of the Secretary General on NEPAD assumes significance. NEPAD reflects the commitment of African countries to implementing their own programmes of development and self-reliance, and the commitment of the international community to support these efforts.

The Secretary-General's Report highlights the extensive measures and actions taken by African countries and organizations to implement the objectives of NEPAD. The Report highlights details of achievements of African countries in the areas of infrastructure, agriculture, health, education, environment, information and communication technology, science and technology, gender mainstreaming and civil society involvement as well as the progress of the African Peer Review Mechanism.

While several measures have been initiated by the international community

to support NEPAD, and there is indeed a greater understanding and awareness about the special needs of Africa, NEPAD can succeed only if the global partnership delivers in terms of resources. That the total ODA to Africa provided by the Development Assistance Committee (excluding debt relief) declined in real terms in 2005 and stalled in 2006 or that with the continuation of present trends, the Group of Eight will not be on track to meet their commitment of doubling aid to Africa by 2010, cause pessimism. Timely fulfillment of the commitments made by the Group of Eight at the 2005 Gleneagles Summit, as well as those made at the 2007 Heiligendamm Summit is an imperative.

The problem of indebtedness has received the attention of the international community. The Multilateral Debt Relief Initiative (MDRI) and the HIPC Initiative combined are currently helping African countries through savings in debt servicing. The MDRI will, however, not be fully successful unless donor countries adequately offset the lost debt repayments to the International Development Association and the African Development Fund, thus maintaining their capacity to issue new grants and affordable loans.

As we have seen, external assistance and an optimal enabling international economic environment have to be governed by the logic of economic development. For instance, the Doha Round has to address the problem of tariff escalation so that there is an incentive for Africa to specialize in processing rather than in raw-materials. Consequently, trade that helps development, reform of the international financial architecture, meeting ODA commitments and the like are all essential for the achievement of the objectives of NEPAD. Historically, the invasions of Africa were in search of raw-materials, ivory, gold and diamonds. Unless there is a complete break with this, the difference will be one of degree rather than kind from those who marched in the armies of Cecil Rhodes. The great African writer Chinua Achebe in his "Anthills of the Savannah" has made the point that the most important problem in Africa is not governance but foreign manipulation. This prevents the coming into their own of the "poor and dispossessed" who are "the bruised heart that throbs so painfully at the core of Africa's being".

**Mr. President,**

India's solidarity with Africa goes back a long time. The Hon'ble Foreign Minister of South Africa, speaking at the informal Plenary of the UN General Assembly on 2nd October 2007 to observe the First International Day of Non-Violence, said that South Africans are proud to claim Mahatma Gandhi

as one of their own because it is in South Africa where he developed and fashioned Satyagraha as a tool of liberation.

India's economic cooperation with Africa is undertaken through the contribution to NEPAD, as well as through several bilateral and other projects and programmes. Initiatives such as Team-9 (Techno-Economic Approach for Africa-India Movement), the cooperation with the African Union and the Southern African Development Community and others are in addition to the several bilateral cooperation efforts between India and Africa that cover inter alia infrastructure (including railways), food processing, information and communication technology, pharmaceuticals and small & medium enterprises. Indian companies while contributing to economic growth are encouraged to use the mechanism of joint ventures and employ African managerial and labour talent.

India has been making its contribution to Africa's human resource development efforts through training of personnel under the ITEC programme (with an outlay of one billion dollars) and provision of experts to several African countries. Cooperation through the supply of materials and medicines, including anti-retroviral drugs to fight HIV/AIDS are a part of our overall effort. The Pan-African e-network project is proceeding on schedule. The network is aimed at sharing India's expertise in the fields of healthcare and education with all the countries of Africa and will connect 53 African countries into one network through satellite, fiber optics and wireless links to provide tele-education, tele-medicine and voice and video conference facilities amongst African Heads of State.

In conclusion, I would like to express the hope that with such initiatives, very soon we will see a self-reliant Africa, an economically and technologically vibrant Africa. We wish them all the best.

I thank you, Mr. President.

**626. Statement by Member of Parliament and Member of the Indian Delegation to the UN Santosh Bagrodia on Agenda Item No. 61: [a] to [c] – Operational Activities for the Development of the UN system; Triennial Comprehensive Policy Review of Operational Activities for Development of the UN system; and South – South Cooperation for Development at the Second Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 18, 2007.**

**Madam Chairperson,**

India welcomes this opportunity to participate in the discussions on this important agenda item. We thank the Secretary-General for the comprehensive documentation prepared for our discussions. We associate ourselves with the statement made by the Chair of the Group of 77.

The TCPR process provides a valuable opportunity to Member States to take stock of the functioning of the operational activities for development of the UN system and to make recommendations for the future work of the UN development system based on the present context and conditions while keeping in mind the longer term perspective. The review assumes added significance this year given that we are touching the half way mark for the achievement of the Millennium Development Goals (MDGs) and not enough progress has been made so far. This lends urgency to our task of improving the effectiveness and efficiency of the UN development system to enable it to make a meaningful contribution to the efforts of countries to achieve the MDGs.

**Madam Chairperson,**

Financing of the UN Development System is perhaps the most fundamental factor in the ability of the UN system to deliver effectively. However, the Secretary- General's Report (A/62/73) states that official development assistance diminished in 2006 to 0.3% of the GNI of countries members of the OECD/DAC, from 0.33% in 2005. Without overlooking either the reasons for this or the increase in ODA over 2004, the data underscores the need for urgent effort, given the large shortfall in the resources required to attain the MDGs.

We note with concern from the Report (A/62/73) that the share of core resources in the total contributions received by the UN system has been falling continuously and decreased from 54.4% in 2003 to 44.3% in 2005 in real terms. The growing reliance on supplementary funding undermines the core mandates of the entities of the UN development system. We note, moreover that if all humanitarian funding is subtracted from the total amount of supplementary resources, the growth in resources for long term development cooperation would not be as significant. The predictability and the dependability of funding for development is another important issue. While there has been some progress in this regard, we are not comforted by the observation of the Secretary-General that multi-year funding frameworks have not significantly advanced the predictability of funding.

If the UN development entities are to continue their activities in fulfillment of their mandates, there is no alternative to adequate core resources. The growth of supplementary funding is reported to be a definite factor in increasing the transaction cost of all entities, hindering efforts to maximize efficiency. The failure to make full cost recovery has also been raised by the Report as an important matter with policy implications that requires urgent attention. The lack of full cost recovery creates the false impression that the management of projects from supplementary funding is more efficient than the regular programmes, which undermines the entities' ability to attract core funding in the long term. We hope that these issues would be addressed by Member States during the consideration of this agenda item.

**Madam Chairperson,**

GA Resolution 59/250(TCPR) emphasizes the role of capacity building in development and the role of the UN development system in this area. We have noted the efforts of the Chief Executives Board (CEB) in implementing the recommendations of Resolution 59/250. In the current context, the UN development system must address the capacity building needs of countries of very diverse profiles and needs. We would, therefore, also emphasize the need for capacity building within the system. This should be done through training of existing staff. However, where necessary, we should not be shy of supporting the recruitment of new professional staff.

We note that UN development entities have become increasingly mindful of the need to give priority to the engagement of national staff and the use of national expertise and institutions. It is also useful that the practice of national execution is becoming widespread. We support the continued

strengthening of the use of national execution as well as national expertise and institutions. The UN development system must also make serious efforts to adapt its efforts to the existing financial and technical capacities of the recipient governments and their national institutions.

National ownership and leadership of the development process, and the coordination of all external aid by the recipient country, adds to the sustainability of results, while building capacity at the same time. National ownership and leadership have been emphasized in several GA and ECOSOC resolutions. Continued emphasis and strengthening of national ownership and leadership should therefore be one of the primary objectives of the UN development system.

**Madam Chairperson,**

India has a long standing commitment to South-South Cooperation. This commitment is reflected in the large number of bilateral projects and cooperation efforts with other developing countries. We, therefore, welcome the effort that the UN development system is investing in South-South Cooperation. However, we believe that there is a long way to go. Not only is there need for adequate funding for this purpose by the UN development entities and through triangular cooperation, there is also need for greater use of the experience, expertise, knowledge and capacities of the South in the ongoing work of the UN development system. Entities of the UN development system should make greater effort to mainstream modalities to support South-South cooperation in their programmes and through their country level activities and country offices. Contributions of the developed countries, through resources for replicating experiences, and through technological know-how, are also important and add a positive dimension to South-South cooperation.

Gender mainstreaming is another important area of focus. India supports the strengthening of the capacity of the UN development system for gender mainstreaming. In today's world, there is a growing awareness and enhanced effort by the developing countries towards achieving gender equality. While advocacy is important, in the current context there is an even greater need for technical and knowledge based support to developing countries' efforts towards strengthening gender equality and empowerment of women. The UN development system needs to equip itself to better support these efforts.

While we examine the aspect of gender mainstreaming in the work of UN

development entities, we cannot ignore the aspect of gender balance within the UN. We may acknowledge the greater awareness, and perhaps commitment, to this objective within the UN Secretariat; but we must express concern at the significant decline in the representation of women at senior levels, especially in the professional category, as also the relatively low percentage of woman Resident Coordinators. We are also concerned at the lack of analysis about the representation of women from developing countries, a need emphasized by Resolution 59/250. We believe that any consideration of gender parity in the UN is incomplete without a discussion about the representation of women from developing countries, especially at senior levels.

The Report highlights the need for adequate funding in the context of transition from relief to development as well. We underscore the need for enhancing the focus on the transition from relief to development especially in post-natural disaster situations. Following the establishment of the Peacebuilding Commission and the Peacebuilding Fund, this area remains a significant gap.

**Madam Chairperson,**

We would like to briefly touch upon the issue of reform. The purpose of the reform of the UN development system is to improve its efficiency through reduced transaction costs and to enhance its effectiveness by increasing the impact on the ground. The report of the Secretary-General informs us about the increased allocations for the Resident Coordinator system and additional posts of Country Directors, but not about the savings achieved, nor about the impact on reporting burdens of field offices, or the consequent improvement in delivery. In addition, the reform proposals should display the flexibility to address the diverse set of needs of developing countries, both large and small, low income and middle income, as well as countries recovering from conflict. The ongoing reform and other reform proposals, such as those presented in the context of System-wide Coherence must prove their value on these criteria through a thorough examination and evaluation.

I thank you, Madam Chairperson

**627. Statement by Member of Parliament and Member of the Indian Delegation to the UN Rameshwar Oraon in the Special Political and Decolonization Committee (Fourth Committee) on Agenda Item 35: Questions Relating to Information.**

**New York, October 22, 2007.**

**Mr. Chairman,**

At the outset, kindly accept my congratulations on your election as our Chair. Please do also convey our best wishes to the other office bearers of the Committee.

I would also like to take this opportunity to appreciate the comprehensive statement by Under-Secretary-General for Communications and Public Information, Mr. Kiyotaka Akasaka, on the introduction of this agenda item. I am confident that the Department of Public Information (DPI) under his dynamic leadership would play a pivotal role in disseminating the message of United Nations across the world.

My delegation broadly associates aligns itself with the statement of the Chair of G-77.

**Mr. Chairman,**

The defining characteristic of the work of this Committee lies in its relationship with the Department of Public Information, and the ensuing cooperative effort to continually improve upon the delivery of relevant information inputs to millions of potential users across the world. Against this backdrop, I would like to briefly touch upon the following points of interest to my delegation.

Perhaps the most important issue we need to focus on is how to make the work of the Department of Information as relevant and accessible as possible to the largest number of users, enabling it to be an effective conduit for the flow of information between the UN and the peoples of the world. For this, it is essential that the widest possible spectrum of technologies be utilized. This includes the use of modern technologies, such as webcasts, as well as cost-effective and more traditional forms of communication, such as the radio and print media, which remain of great importance in reaching out to people in parts of the developing world. Many countries simultaneously

straddle several centuries in technological terms, and it is vital that the product presented by DPI is disseminated through a wide menu of media channels. While we appreciate the efforts made so far in this regard and take note of improvements made in the UN home pages, DPI's audio library and media accreditation system, there remains room for further improvement.

We also fully support the effort to facilitate the emergence of a more linguistically equal world, in which information is disseminated not merely in UN official languages, but also in other languages. There is also merit in increasing the level of local content and involvement in the production of programme material. Doing so will have the advantage of making information more relevant locally, while simultaneously encouraging local talent and creativity to involve itself in the work of the UN.

A related issue, Mr. Chairman, is the question of UN Information Centres, which are crucial in enhancing the public image of the UN and in disseminating its message, particularly in the developing world. We agree with the view expressed by many delegations that our goal should be to strengthen, rather than weaken, these information outposts of the United Nations. Hub and spoke models may appeal in certain managerial contexts, where local sensitivities and regional variations need not be important. However, it makes little sense to employ them in a people-intensive sector such as the media. We take note of the workshop that is planned in Bangkok in January 2008 for UNICs in Asia and the Pacific and hope it would contribute to meeting the challenges.

The argument in favour of a more relevant outreach effort by the UN is also related to the larger objective of creating more locally relevant content and greater local involvement in the work of the United Nations. This should logically also be a larger objective of the UN, since the UN will in turn become more widely relevant by virtue of being more locally accessible.

We appreciate the work being done to provide information that is relevant and meaningful, while simultaneously being interesting and entertaining. This is no easy task, and efforts made have been highly creditable. However, those working on content management should never be satisfied with the status quo, but should be motivated by a constant desire for further improvement. While it is important that the DPI's programmatic products continue to cover the gamut of UN activities, such products must also improve their coverage and projection of the most significant activities of the UN, in particular, those that impact most upon the lives of people. These

include humanitarian activities and the work performed, often under extremely arduous circumstances, by UN peacekeepers.

We would continue to urge that DPI and DPKO work in tandem to further raise awareness about UN peacekeeping and highlighting peacekeeping success stories. This would go a long way towards generating goodwill and projecting a better image for the UN and its peacekeepers, both locally and globally. In this context, we would encourage DPI to play a more effective role in rebutting mischievous news stories based on, unverified and distorted facts intended to cast UN Peacekeepers in a negative light.

We commend DPI for its efforts to promote and publicise the first observance of the International Day of Non-Violence on 2 October 2007, the birthday of Mahatma Gandhi. We would urge it to work even more actively to give ever greater momentum to the dissemination of the message of nonviolence worldwide.

In conclusion, Mr Chairman, I would like to assure you of India's support as you guide the work of this Committee, as also of our support to the DPI as it tackles the formidable challenges before it.

Thank you, Mr. Chairman.

**628. Statement by Member of Parliament and Member of the Indian Delegation to the UN Subash Maharia on Agenda Item 81: Report of the United Nations Commission on International Trade Law on Work of its 40<sup>th</sup> session at the 6<sup>th</sup> Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 22, 2007.**

**Thank you Mr. Chairman,**

India attaches considerable importance to the work of the United Nations Commission on International Trade Law and its efforts to establish and promote modern private law standards on international trade.

We are pleased to note the progress made by the Commission at its fortieth Session in July. We welcome the completion of work on this important topic that would promote access to low-cost secured credit. We support

the effort towards harmonizing UNCITRAL and UNIDROIT model laws on this subject and preparation of an annex in this regard.

A second annex to the draft Guide on 'security rights in intellectual property' would be an important addition to the subject as a significant part of corporate wealth is included in intellectual property assets. The participation of international organizations with expertise in the area would help ensure the successful and timely completion of this work.

**Mr. Chairman,**

The Working Group on Arbitration is currently engaged in revising the UNCITRAL Arbitration Rules. Given the fact that a number of arbitration centers have adopted these UNCITRAL Rules, it becomes important that any revision of these rules should not lead to the alteration of the structure of the text. We are also of the view that the Working Group should adopt a generic approach applicable to all types of arbitration, rather than a dispute specific approach.

**Mr. Chairman,**

My delegation would like to express its appreciation to the Working Group on Transport Law, which has completed the second reading of the draft convention and has made good progress on a number of complex issues. We also note with satisfaction the progress of other Working Groups.

As regards the working methods of the Commission, we welcome the comprehensive review being undertaken in this regard. Given the highly technical nature of the work, we would support inclusiveness and transparency.

We also note with appreciation the continuing work under the CLOUT system. It continues to be one of the important technical assistance activities being undertaken by UNCITRAL and contributes greatly to the benefit of practitioners in the developing world and law students.

We commend the efforts of UNCITRAL towards coordination of activities of international organizations in the field of international trade law and are confident that the Commission will be able to carry out its plans for further development of international legal instruments in the field of international trade law.

Thank you, Mr. Chairman.

**629. Statement by Member of Parliament and Member of the Indian Delegation to the UN Mrs. Sushma Swaraj on Agenda Item No.70: Human Rights Question: [a] Implementation of Human Rights Instruments; [b] Celebration of the 60<sup>th</sup> Anniversary of the Universal Declaration of Human Rights at the 3<sup>rd</sup> Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 23, 2007.**

**Mr. Chairman,**

We thank the UN Secretary-General for his report titled "Effective Implementation of international instruments on human rights, including reporting obligations under international instruments on human rights", and other reports under the agenda item 70 (a) on "Promotion and protection of human rights: Implementation of human rights instruments". We would also like to thank the delegation of Benin for timely inclusion of a sub-agenda item titled "Celebration of the 60th anniversary of the Universal Declaration of Human Rights".

**Mr. Chairman,**

The 2005 World Summit, in its elaboration of the role of human rights, acknowledged that peace and security, development and human rights are the pillars of the United Nations system and the foundations for collective security and well-being. Beginning with the adoption of the Universal Declaration of Human Rights (UDHR) in 1948, a body of covenants and conventions have been evolved to promote universal respect for and observance of human rights and fundamental freedoms all over the world. As human rights are indivisible and inter-related, it is appropriate to place economic, social and cultural rights, including the right to development, at the same level as civil and political rights. The purpose of development, in the words of the UN Charter, is to "promote social progress and better standards of life in larger freedom". The treaty bodies created to assess the implementation of obligations of States should regard development, democracy and human rights as a single compact while doing so.

**Mr. Chairman,**

Effective and coordinated implementation of international human rights

instruments is of vital importance and we welcome, therefore, the efforts of the Chairpersons of the human rights treaty bodies to attain an integrated and balanced administration of rights. Attempts to radically restructure the treaty bodies as proposed by the UN High Commissioner for Human Rights in the form of a Unified Standing Treaty Body to replace the existing seven treaty bodies, is not a panacea for existing problems. Not only is such a proposal fraught with serious legal challenges but it also ignores the distinct and unique scope and nature of different Conventions. The ongoing innovative efforts to change working methods and to streamline reporting requirements of Member States through revised harmonized guidelines, including guidelines on a common core document and treaty-specific documents, are steps in the right direction. The treaty body system should strive to ensure human rights protection at the national level through the implementation of the human rights obligations undertaken by the States Parties with optimum fulfillment of reporting requirements.

The creation of the treaty bodies was pushed forward by the developing countries about six decades ago. There was hope and faith placed in the work of the United Nations in achieving freedom, equality and dignity for all. What we see today is a gradual erosion of that faith. Tendency of politicisation of the treaty bodies is also a cause for disquiet. Unless this trend is reversed and the balance on the promotional aspect of human rights restored, universalization of the treaty instruments will continue to remain a dream.

**Mr. Chairman,**

India has been actively participating and supporting the efforts of the international community to evolve a normative framework for promotion and protection of human rights. Representing India at the historic debate of the first session of the Commission of Human Rights in 1947 which propounded the Universal Declaration of the Human Rights (UDHR), Dr. Hansa Mehta, a parliamentarian and social activist, hoped that the UDHR would be of an imperative nature and an "instrument" binding on all member states. Dr. Mehta also made sure that the UDHR spoke with power about equal rights for women well before they were recognized in most legal systems. Subsequent Indian delegations have continued to participate actively in finalisation of international conventions.

Three significant developments during the 61st session of the UNGA are the adoption of two international conventions viz. UN Convention on the Rights of Persons with Disabilities and the International Convention for the

Protection of All Persons from Enforced Disappearances, and the adoption of a Declaration viz. UN Declaration on the Rights of Indigenous Peoples. I am happy to inform that India became the seventh country to ratify the UN Convention on the Rights of Persons with Disabilities. India also signed the International Convention for the Protection of All Persons from Enforced Disappearances on the first day it was opened for signature in Paris in February 2007. It also supported the adoption of the UN Declaration on the Rights of Indigenous Peoples by the UNGA in September this year.

India has also been paying considerable attention to meet its reporting obligations. The second and third combined report of India was considered by the Committee on Elimination of Discrimination against Women (CEDAW) in January this year, and the report to the Committee on the Elimination Racial Discrimination (CERD) in February this year. India also submitted its latest report to the Committee on Economic, Social and Cultural Rights (ICESC) in October 2006.

**Mr. Chairman,**

As we move towards the 60th anniversary of the Universal Declaration of the Human Rights in 2008, the Member States should undertake a close introspection of the progress made so far in evolution of a normative framework of human rights as well as the methods adopted for its effective realisation. The treaty body system has an immense role to constructively aid and guide States Parties to implement their international legal obligations and also in ensuring that the human rights of all people are protected.

I thank you, Mr. Chairman.

**630. Statement by Member of Parliament and Member of the Indian Delegation to the UN Prasanna Acharya on Agenda Item 128: Capital Master Plan at the 5<sup>th</sup> Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 23, 2007.**

**Mr. Chairman,**

I would like to thank Mr. Michael Adlerstein, Assistant-Secretary General & Executive Director of the Capital Master Plan (CMP) for introducing the Secretary-General's report on this agenda item. We welcome his appointment to this important office and wish him all success in his assignment. We also thank Mr. Rajat Saha, Chairman of the Advisory Committee on Administrative and Budgetary Questions (ACABQ), for introducing the relevant report of the Advisory Committee. We express our appreciation to the Board of Auditors for its report on the CMP for the year ending 31st December 2006.

My delegation associates itself with the statement made by the Chair of the Group of 77.

Last year, following many years of tedious negotiations, the General Assembly had approved the budget and the strategy for the much needed Capital Master Plan to renovate and refurbish the UN headquarters building in New York. Member States had been persuaded into adopting the Strategy IV based on detailed briefings and extensive negotiations, as the best possible option for undertaking the most complex project ever undertaken by the Organization. At this juncture, we would be less than honest if we do not say that we are a little surprised, not just due to the CMP related time and cost overrun but also by the fact that a new Accelerated Strategy IV is now being proposed to us as a better way forward. While we are appreciative of the merits of the proposed Accelerated Strategy IV, as it expedites the project from 7 to 5 years and that too within the approved budget of Dollars 1.867 billion; makes up for the lost time; lowers construction-related risks and reduces the disruption of the Organization's work due to prolonged construction activity, we wonder why these elements which also existed in the past were not incorporated in the original Strategy-IV that had been presented to Member States. Henceforth, we should be vigilant that as we embark on the CMP strategy that might be eventually chosen, a proper risk assessment for the project is undertaken and plans to mitigate those

risks are also put in place, so that we are not back to square one in the future. We also call for all recommended technical surveys and studies related to the project to be undertaken before the construction starts in order to ensure that safety and security of the structure is not compromised due to this lacuna.

While the complexity of the decision-making process by Member States in the UNGA is well-known and should be factored into all proposals presented by the Secretary-General, we are disturbed by the ACABQ's comments regarding the risk of lack of commitment to the project on the part of some of the involved UN departments as a reason for cost overrun and delay in implementing the CMP. It should be made abundantly clear that the CMP belongs to all of us: the Member States, their peoples and UN Staff. Therefore, total commitment and full cooperation and coordination on the part of all concerned UN departments is not just an expectation, but an imperative. It is the solemn duty of all heads of departments to ensure that they deliver whatever is required of their departments for an effective and efficient implementation of the CMP. In that regard, we hope the newly appointed Executive Director would provide the required leadership to overcome these challenges.

One cannot argue with the economics of the proposed accelerated- Strategy IV for the CMP. It proposes to give us the renovated UN headquarters building, within the approved budget, in a shorter time-frame. As mentioned in the Secretary-General's report, this Strategy would also identify an amount of Dollars 190.1 million out of a total cost overrun of Dollars 219.6 million, through "value engineering". While agreeing with the ACABQ that the planned value engineering exercise is worth pursuing, we would keenly monitor it and also evaluate its outcome. Needless to say, pursuit of value engineering should not be at the expense of quality required for the CMP.

The UN belongs to all Member States and in that spirit of collective ownership, my delegation calls for increased procurement opportunities for vendors from developing countries for the CMP project. The GA resolution 61/251 has called for procurement processes to be conducted in a transparent manner. We would caution against inserting unnecessary restrictive clauses in tender documents that might exclude vendors from developing countries on flimsy grounds.

The bottom line for my delegation is that eventually whatever strategy is approved by Member States for implementing the CMP, we would require firm assurances against any further cost escalations, strict adherence to

the construction schedule and delivery of highest quality construction for the project. We look forward to further clarifications in the informal discussions.

Thank You.

**631. Statement by Permanent Representative at the UN  
Nirupam Sen on Agenda Item 78: Responsibility of States  
for Internationally Wrongful Acts at the 6<sup>th</sup> Committee of  
the 62<sup>nd</sup> session of the UNGA.**

**New York, October 23, 2007.**

We thank the Secretary General for his useful Report containing compilation of cases in which international courts, tribunals and other bodies have referred in their decisions to the International Law Commission's State responsibility articles and commentaries, including the draft articles provisionally adopted from 1973 to 1996.

We also take this opportunity to acknowledge once again the excellent work done by the International Law Commission on the Draft articles on responsibility of States for internationally wrongful acts. We wish to express our appreciation to Mr. James Crawford, the Special Rapporteur on State Responsibility for enabling the Commission to complete the second reading in just four years, while the first reading in comparison took more than forty years. We are equally grateful to the other four Special Rapporteurs for their notable contribution to the subject of State Responsibility.

We have commented on the various aspects of the law of State Responsibility at each stage of the development of the Draft Articles. The draft articles have several merits. They are concise and the concepts involved have been made less complicated for application. Some of the most difficult articles have been refashioned and they exhibit sensitivity to the needs of States in difficult circumstances.

The Draft Articles no longer provide for the concept of State crimes. The Commission has brought in its place the concept of serious breach of an obligation arising under a peremptory norm of general international law. The commentary to this article gives several illustrations of such norms.

The complexity of the concept of countermeasures and synergies between the countermeasures section and provisions on attribution of state conduct, the timing of an international law breach, circumstances precluding wrongfulness, the remedies available for injuries and standing to invoke responsibility, all merit a mention as some of these articles incorporate what has been termed as constructive ambiguities.

**Mr. Chairman,**

Some speakers have argued in favour of a Convention or at least a Resolution. The argument regarding not taking any steps that could unravel the careful balance in the text should make us cautious on both these ideas. Additionally, it is worth recalling that there are now only six from the original twelve crimes that had been identified and included in the draft Code and the concept of crimes has been replaced by serious breach of obligation. It also needs to be remembered that colonialism and serious harm to the environment were also listed in draft Article 19 on State Responsibility adopted in the first reading by the ILC. It was argued by developed countries that these were only of historical relevance. The current relevance of the latter is becoming more acute by the day as we are seeing in the UN and shall see at Bali. After the warmth of debate on State crimes, it was a little anti-climactic that we ended with jus cogens and erga omnes. In the case of such peremptory general international law obligations, these are not very different from those applicable to other serious breaches except for the obligation to bring the breach to an end. But this was a natural and reasonable conclusion and hence we can see that the careful balance we have referred to is a delicate balance reached with difficulty and demanding future caution.

**Mr. Chairman,**

The international structure is still decentralized and we cannot rush ahead of institutional developments and the development of the international legal system without risking counterproductive effects. Jennings had spoken of the "inadequacy of the international legal system" and said that we should not float on "flights of erroneous fancy from the Nuremberg Tribunal" and delude ourselves that we "are developing international law". Therefore, Mr. Chairman, we are of the view that at this stage it will be prudent to maintain the careful balances in the text that the ILC struggled for years to achieve. A subject that took more than forty years to fructify would best serve the needs of international community, to quote from David Caron, only if "it is

weighed, interpreted and applied with much care". In this regard, for the present, we are happy to note the reception of the ILC's articles on State Responsibility into international law through State practice, decisions of courts and tribunals and writings of jurists.

**632. Statement by Member of Parliament and Member of the Indian Delegation to the UN Santosh Bagrodia on Financing for Development at the High Level Dialogue of the UNGA.**

**New York, October 24, 2007.**

**Mr. President,**

We welcome this opportunity to participate in the High-level Dialogue of the General Assembly on Financing for Development. This meeting is particularly opportune in the light of the Review Conference on the Implementation of the Monterrey Consensus on Financing for Development, to be held in Doha in 2008.

**Mr. President,**

Effective implementation of the commitments undertaken at Monterrey remains its weakest link, with commitments not being transformed into concrete action. This is particularly true of action with regard to 'systemic issues', which underpins progress in all other areas of the Monterrey Consensus. Real progress in implementing the Consensus has to involve a fundamental and comprehensive reform of the international financial and monetary architecture in order to address its democratic deficit, with enhanced voice and participation of developing countries in decision making and norm setting. Only then can we ensure a more conducive environment for addressing the challenges of financing for development. While a few steps have been taken, much more remains to be done.

Ensuring enhanced and predictable financial resource flows for developing countries in order to assist them in pursuing their development agenda is at the core of the Monterrey Consensus. Unfortunately, progress towards this basic objective has been limited. There is a clear recognition of the huge gap that exists between the resources required by developing countries

to achieve Internationally Agreed Development Goals, including the Millennium Development Goals, and the projected resource flows. This is compounded by the fact that actual resource flows are far less than commitments undertaken.

A case in point is the Official Development Assistance [ODA]. While there has been an increase in private flows to some developing countries, the importance and need for ODA cannot be overemphasized. Private sector inflows do not effectively reach social sectors or infrastructure projects, and cannot eliminate the need for ODA or involvement of public sector investment. Impact of private flows on employment generation, which is recognized as an indispensable element of domestic resource mobilization, has also been marginal in many cases. The Monterrey Consensus explicitly recognizes the role of the State in socio-economic development, and of public investment. Hence, the drop in ODA last year, and the projections of negative trends for future ODA flows, are a matter of grave concern. It is estimated that ODA will taper off in 2007 and will be no more than 0.36 per cent by 2010. We believe there is a need for a more robust and efficient monitoring mechanism to track ODA flows, and the implementation of Goal 8 of the Millennium Development Goals. The continuing, and increasing, flow of financial resources from developing countries to developed countries is another concern that we have been collectively unable to address. Further, counting debt relief that does not lead to release of resources for development on account of debt arrears, as aid, is another flaw in the current system. We hope the Development Cooperation Forum of the strengthened Economic and Social Council will take the lead in examining these important issues, including undertaking a periodic review of the policies of Bretton Woods Institutions.

**Mr. President,**

Enhancing trade is a crucial component in ensuring the sustainability of development. Developing countries still face severe market access restrictions. We reiterate the need for early and substantive progress at the Doha round of trade negotiations, based on the primacy of the development dimension. It is illogical to link the interests of subsistence farmers in developing countries with the subsidized and trade-distorting agricultural practices in many developed countries, or with the issue of Non-Agricultural Market Access. The overarching principles of "less than full reciprocity" and "special and differential treatment" remain categorical imperatives. In putting these into practice, I am happy to reiterate that by

the end of 2007, imports from Least Developed Countries into India will face a zero tariff regime.

Reforms of the international financial architecture should include trade financing so that export credit agencies and multilateral development banks act in a countercyclical manner. We also need to both stimulate new and innovative sources of finance and ensure that they do not weaken the resolve of developed countries to meet their ODA targets and do not crowd out other forms of finance.

The issue of external debt, despite progress by a few countries, continues to pose significant challenges to developing countries, particularly low-income countries and Least Developed Countries. Hopes of releasing additional resources for development through debt cancellation have been realized only marginally since many countries had debt arrears. The pace of debt relief initiatives has also been very slow, and the impact of past debt-constrained structural adjustment policies have not been overcome. Moreover, debt relief measures have not addressed holistically the underlying problems, covering the need for greater policy space towards inclusive economic growth, better terms of trade, greater access to markets and investment flows. We believe that new measures for debt restructuring and mechanisms such as an international debt commission overseen by the United Nations through the Economic and Social Council, are required urgently to address the issue of external debt of developing countries.

**Mr. President,**

In conclusion, I would like to reiterate the importance of effective implementation of the Monterrey Consensus. We hope that the 2008 Review Conference would focus on strengthening implementation and follow-up.

Thank You.

**633. Statement by Member of Parliament and Member of the Indian Delegation to the UN Rameshwar Oraon on Agenda Item 31: International Cooperation in the peaceful uses of Outer Space in the General Debate of the Special Political and Decolonization Committee [Fourth Committee] of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 25, 2007.**

**Mr. Chairman**

The Indian Delegation is pleased to see you chair our deliberations on international cooperation in the peaceful uses of Outer Space at this Session. We would also like to take this opportunity to warmly congratulate Dr. Gerard Brachet of France for successfully guiding the deliberations of the 50th session of COPUOS.

This year marks fifty years since the Sputnik became the first man-made object to orbit the earth. The United Nations General Assembly and the UN Committee on Peaceful Uses of Outer Space (COPUOS) have made significant contribution since then to strengthening international space cooperation and to maintaining the peaceful character of outer space. This has benefited both spacefaring and space-using nations. As we look ahead at exciting new ventures in the next fifty years of the space age, my delegation is convinced that international cooperation, particularly under UN auspices, would play an even more important role than it has since the launch of Sputnik.

India participated actively in the deliberations of the 50th Session of the COPUOS during which the Committee reviewed the works and recommendations of the 44th Session of the Scientific and Technical Sub-committee and the 46th Session of the Legal Sub-committee. The Indian Delegation is delighted that during the 44th Session of the S&T Sub-committee of the COPUOS, consensus has been reached on the acceptance of the Space Debris Mitigation Guidelines document. The Indian delegation considers this as one of the significant and concrete results being achieved towards successful implementation of the UNISPACE-III recommendations. Similarly, the contributions of the Legal Sub-committee over the years in developing the international legal regime of Outer Space have been quite noteworthy. In our view, the Legal Sub-committee occupies a leading and prestigious role in evolving and safeguarding the entire body of International Space Law, which is founded on ethical principles.

My delegation endorses the report of the COPUOS.

### **Mr Chairman**

The Indian Space Programme continues to prioritise utilization of Space technology for socio-economic development. This has resulted in specific user driven application programmes using remote sensing, meteorological and communications satellite systems. Let me briefly present for the information of delegates the significant achievements made by India in the space field since the last session.

During January 2007, Indian Space Research Organisation (ISRO)'s Polar Satellite Launch Vehicle, PSLVC7, successfully launched four satellites. These included two national primary satellites and two auxiliary satellites belonging to an international customer. In March 2007, India's communication satellite INSAT-4B designed for meeting Direct-to-Home television broadcasting requirements was successfully launched by European Ariance-5 launch vehicle from Kourou, French Guyana. It carried 12 high power Ku-band and 12 C-band transponders. In April 2007, India's workhorse Polar Satellite Launch Vehicle, PSLV-C8, successfully launched the 350 kg AGILE satellite of the Italian Space Agency. Last month, ISRO's Geo-synchronous Satellite Launch Vehicle GSLV-F04 successfully launched the national communication satellite INSAT-4CR.

In the area of Space Application programmes for national development and in the context of our effort to provide quality education across the country, the Tele- Education project undertaken a couple of years back has made considerable impact. ISRO has also undertaken a Tele-Medicine project with a view to reaching medical expertise to remote and inaccessible areas. The number of Tele-Education, Tele- Medicine and Village Resource Centre networks has increased in recent years providing for better outreach. The Village Resource Centre is a single window delivery mechanism for a variety of space based products and services, such as teleeducation, tele-medicine, information on natural resources for planning and development at local level, interactive advisories on agriculture, fisheries, land management, live stock and water resources management. Today the Village Resource Centres that have been established across the country are providing valuable inputs to the local community and helping them in addressing a variety of social and economic challenges.

**Mr Chairman**

A very important element of India's space activity has been international cooperation. We continue to cooperate with a number of space related agencies through bilateral and multilateral agreements.

In 2006, two major workshops were held in India. The first, held in August 2006, was sponsored by the UN, India and the United States and focused on "Tele- Medicine in the Reconstruction of Afghanistan". The other was in the context of the International Heliophysical year 2007 and focused on basic space sciences. The Indian Space Research Organisation is also participating in the Sentinel Asia project initiative, conceived under the aegis of the Asia-Pacific Regional Space Agency Forum.

India hosted the 58th International Astronautical Congress at Hyderabad from 24th to 27th September 2007 under the umbrella of International Astronautical Federation, International Academy of Astronautics and International Institute of Space Law. Special events befitting the 50th anniversary of the space age were organized during the Congress.

**Mr Chairman**

India takes special interest in sharing its expertise and services in the application of space technology with developing countries. The Centre for Space Science and Technology Education Asia and Pacific Region, affiliated with the UN is an initiative in this direction. The Center has so far carried out 26 Postgraduate programmes of a duration of nine months and 3 are currently under way. In addition, it has organized a number of short-term courses/workshops. So far 708 scholars from 30 countries from the Asia-Pacific region and 26 scholars from 16 countries outside the Asia-Pacific region have benefited from the educational activities of the center.

**Mr Chairman**

Utilization of outer space for peaceful purposes serves the interests of all nations. The long-standing international consensus on peaceful uses of outer space could be undermined by deployment of weapons in outer space or of weapons that target assets in outer space. There is a need therefore to redouble efforts to ensure that space remains the common heritage of mankind for peaceful uses and to avoid any steps towards its weaponisation. This is the responsibility in particular of all space-faring nations. India supports a multilateral engagement to build consensus on international

instruments banning the weaponisation of outer space and for elaborating CBMs and transparency measures in outer space activities.

In recent times, the free availability of high-resolution imagery of sensitive areas on the Internet has emerged as a concern for many nations. There is a risk that such information may be misused by irresponsible actors, especially terrorists. In this context, it is important that guidelines consistent with national policies are evolved to regulate the availability of such sensitive data in the public domain.

Mr Chairman, the UN has an important role to play in increasing awareness of the relevance of space applications for sustainable development and in encouraging nations to take up space application programmes. India would continue to participate actively in UN activities for cooperative uses of space science and for maintaining outer space as a shared, peaceful heritage of mankind.

Thank you.

**634. Statement by Member of Parliament and Member of the Indian Delegation to the UN Subhash Maharia on Agenda Item 86: The Rule of Law at the National and International level at the Sixth Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 25, 2007.**

Thank You Mr. Chairman,

India strongly supports adherence to the rule of law both at the national and international level. We see promotion of the rule of law as an essential tool for ensuring sustainable development and peaceful coexistence and cooperation among States.

We welcome the establishment of the Rule of Law Coordination and Resource Group, with a small Secretariat Unit acting as a focal point for coordinating system-wide rule of law activities. The Group is expected to act as a repository of rule of law materials, expert rosters, web resources and best practices, in close cooperation with the relevant lead entities. Nevertheless, we wish to

point out that policy issues being debated elsewhere in the United Nations in the context of "system wide coherence" should not be linked to the coordination functions of this group or unit.

We understand that the 'Secretariat Unit' will serve as the 'Rule of Law Assistance unit' that was envisaged in the Outcome Document 2005. We hope that the setting up of the Resource Group and Secretariat Unit would help in coordinating the activities of all specialized agencies and organizations of the United Nations and ensure that there is no replication in their work on the promotion of the rule of law. This is necessary as presently several international organizations have technical assistance programmes whereby they undertake law reform assessments to assist developing countries inter-alia in drafting of national legislation to implement specific conventions and organize training activities to facilitate its implementation and interpretation. UNCITRAL, UNCTAD, UNEP and UNODC to name a few, all have well developed technical assistance programmes.

It is evident that the United Nations needs to rationalize and harmonise its rule of law work, and coordinate more effectively within the United Nations and with outside actors. Towards this end the Secretary General was requested to prepare an inventory of the current activities of various UN entities devoted to the promotion of the rule of law. We thank the Secretary General for submitting an interim Report and await the Final Report next year.

**Mr. Chairman,**

Another Report by the Secretary-General on "Uniting our strengths: enhancing United Nations support for the rule of law", in the context of transitional justice, groups the rule of law activities of the United Nations into three "baskets"- Rule of law at the international level; Rule of law in the context of conflict and post-conflict situations; and Rule of law in the context of long-term development. To achieve these objectives, the Secretary General has proposed that a division of labour among the key United Nations actors in which designated lead entities would assume clearly defined coordination and other responsibilities for specific areas of rule of law activity.

To achieve the aforesaid integrated approach and comprehensive strategy for all rule of law assistance activities, a more detailed identification of the nature and scope of technical assistance being provided by each entity would be crucial. We hope that the comprehensive inventory to be submitted by the Secretary General at the sixty third GA Session would also focus on this aspect.

**Mr. Chairman,**

As regards the agenda item before the Sixth Committee, the challenge before us is how to have a structured discussion on the subject. Given the enormous scope and content of the topic, we support the suggestion that the Sixth Committee should choose only one or two subtopics each year and have a detailed discussion on them.

In this regard my delegation would favour giving equal emphasis to both the national and international aspects of the rule of law. However, many delegations still have doubts and reservations about the exact nature and scope of this topic. Therefore, we consider that it would be useful to have an exchange of views both on the scope of 'rule of law at the national level' and 'scope of rule of law at the international level' so that Member States can arrive at a common understanding. The proposal submitted by the Non Aligned Movement seeks to address this concern. A widely shared understanding of the subject, its scope and purpose would facilitate more focused work in future.

Thank You, Mr. Chairman

**635. Statement by Permanent Representative at the UN  
Nirupam Sen on Agenda Item 128: Proposed program  
budget for the biennium 2008-09 at the Fifth Committee  
of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 26, 2007.**

**Mr. Chairman,**

We would like to thank the Secretary-General, Mr. Ban Ki-moon for introducing the proposed programme budget for the biennium 2008-2009. We express our appreciation of the Chairman of the Advisory Committee on Administrative and Budgetary Questions (ACABQ) for introducing the relevant report of the Advisory Committee. We also thank the Chairman of the Committee for Programme and Coordination for introducing the report of the CPC. My delegation associates itself with the statement made by the Chair of the Group of 77.

**Mr. Chairman,**

A budget is a financial statement that reflects the goals and vision of the organization and allocates resources efficiently and in a prioritized manner between these. A financially sound budget, reflecting accurately the priorities of the United Nations, is essential for attaining the goals that we as Member States have set for the Organization. Unfortunately, the proposed budget for the biennium 2008-2009 falls short on both counts of budgetary rigor and accurate reflection of the Organization's priorities.

The regular budget is expected to present the fullest possible picture of the Organization's requirements for a given period. Some unpredictability is unavoidable and has to be addressed through supplementary demands, which should be an exception rather than the norm. What we are witnessing here is the opposite. Important items with significant budgetary implications, such as reforms of the DPKO/DFS, DPA, ICT, Enterprise Resource Planning and costs related to the decisions of the Human Rights Council and ECOSOC, are being presented outside the scope of the regular budget, making supplementary demands the norm and marginalizing the regular budget. This episodic approach to the budget process subverts the budgetary system and budgetary discipline. It deprives us of a complete picture of resource deployment, thereby blurring our judgment about the prioritized allocation of resources. The budget becomes a mere epiphenomenon.

The UN depends on core-funding, voluntary funding and the peacekeeping budget. We, therefore, have a fragmented structure of finance. Combining this with a piecemeal structure of the budget is a recipe for disaster. The Secretary General spoke of the budget as a compact. The Report "Towards a Compact" of the Four Nations Initiative (comprising Chile, South Africa, Sweden and Thailand) makes the important point that a compact means trust and "trust and the lack of it has both political and technical aspects". The technical aspects of the budget that we have outlined would undermine trust and therefore the compact. The above Report as well as Canada on behalf of CANZ and Norway this morning spoke of the importance of result based budgeting as an instrument of transparency and accountability and therefore a management tool. We agree. However, result based budgeting has been used for the mechanical purpose of the budget and not as a management tool.

**Mr. Chairman,**

The Secretary General described peace, human rights and development as three pillars that have to go hand in hand, otherwise “we cannot hope to achieve our goals”. He also outlined how an ounce of prevention is better than a tonne of cure and hence advocated the strengthening of the preventive diplomacy capacity of DPA. Going deeper than preventive diplomacy is development which can make both less necessary. Most important of all, the Secretary General said that economic advancement and social equity cannot be geopolitical after-thoughts. The budget outlay shows development to be a geopolitical after-thought with more geopolitical thoughts in the shape of political and security outlays to follow this sad and solitary geopolitical after-thought. The Secretariat in preparing the budget has not heeded the Secretary General’s vitally important and wise guidance. A truly balanced and equitable budget should have the Secretary General’s guidance as its foundation. Resource allocation between development on the one hand, and peace & security and human rights on the other is completely lopsided. In the budget proposals, we observe that the increase in resources for promotion of sustained economic growth and sustainable development has been limited to eighteen new posts, translating to a 0.5% real growth. Development in Africa has been “strengthened” by one post. Similarly no increase has been proposed for the Regular Program of Technical Cooperation. It is puzzling that the Development Account budget has remained constant at \$16.48 million, when more and more resources are being demanded and allocated for other areas. The starkness of the current situation is more evident if compared to the indicative target of \$200 million originally set for the Development Account.

In contrast, human rights with 36 new posts and peace & security with 35 new posts, not including the 34 additional posts for the proposed DPA reform, have been treated more generously. The picture becomes clearer if we add to these figures the burgeoning extra-budgetary resources, amounting to \$ 6.6 billion for the biennium 2008-2009, which will be utilized mainly for peace & security and human rights & humanitarian assistance. As an example, from a net increase of 428 posts under these resources, 260 are for the Office of the High Commissioner for Human Rights.

Without undermining the importance that we attach to the other two pillars, we find that the budget exhibits an indifference to development, which is the top priority for the overwhelming majority of the Member States and a necessary condition for durable peace and security. We agree with the EU

on the imperative of budgetary discipline and the need to prioritize. Our priority is development. We call for an urgent redressal of this imbalance through allocation of greater resources for development-related entities like DESA, the Regional Commissions and UNCTAD. Given the reported flaws in the funding mechanism of the Development Account, we also call for new and practical proposals for financing it.

**Mr. Chairman,**

We have often heard the argument that the annual extra-budgetary contribution of \$15 billion to various UN agencies and programs is addressing the development needs and that the small-budgeted, development-related entities in the UN Secretariat do not reflect the real quantum of resources devoted for development and in fact are duplicative. Firstly, extra budgetary resources should reinforce the core-funding for core objectives and not substitute these because this skews priorities preventing proper integration into the budget. Of course member States need to pay their assessed contributions in full and on time. As former British Prime Minister Harold Macmillan once said: "There is the compulsory subscription and the voluntary subscription. The only difference between them is this. The compulsory is the one that you do not pay if you do not want to, and the voluntary is the one that you need not to pay unless you wish to" (quoted in Appendices to the Report 'Towards a Compact'). We are well aware that the modest resources for development in the regular budget are not a panacea for poverty eradication and development. Nonetheless, we are convinced that instruments like the Development Account, the Regular Programme of Technical Cooperation, UNCTAD, DESA, etc., are important for promoting development. Even though small, they act as catalysts and have a multiplier effect. The beneficiaries have time and again emphasized the relevance and usefulness of these programmes. We suggest that rather than undermining these, our endeavor should be to further strengthen these entities through provision of adequate resources to enable them to fulfill their mandates in an efficient and effective manner.

**Mr. Chairman,**

While being one of the staunchest supporters and practitioners of South-South cooperation, we believe that South-South Cooperation is not and cannot be a substitute for the fulfillment of commitments of development assistance made by the developed countries. As indicated in his introductory remarks, we look forward to the Secretary-General's proposals on strengthening the Secretariat to better serve this aspect of development.

**Mr. Chairman,**

Africa's needs have been recognized as a priority for the Organization. We appreciate the vital role played by the Office of Special Adviser for Africa and the Economic Commission for Africa (ECA) in Africa's march towards growth and development. While calling for expediting the appointment of the Special Adviser for Africa at the earliest, we convey our unequivocal support for initiatives to strengthen the ECA and the UN Office in Nairobi.

**Mr. Chairman,**

Resources are always finite. However, better results can be achieved through efficient resource allocation and sound management practices, which is the responsibility of the Secretariat. While adequate and high-quality human resources are a sine qua non for execution of the Organization's work programme, the United Nations is not an employment generation scheme, with creation of posts amongst its objectives. We are troubled by the fact that in the proposed regular budget, the cost of posts is estimated at \$ 2.7 billion out of a total regular budget of \$4.3 billion i.e. approximately 63% of the regular budget. If we include the extra-budgetary posts outlay of \$2.76 billion, the total cost of posts for the Organization amounts to \$5.5 billion i.e. 52% of the total budget. This essentially means that more than half the resources of our Organization go into staff costs. It is the responsibility of the management to increase the percentage of resources devoted to implementing the mandated programme of work rather than encourage a proliferation of posts on the pretext of programme support. Following the 1997-1998 SG's Report (A/51/950) the central reform was to cut Secretariat administrative costs by US\$200 million annually reducing administrative spending from 39% to 25%. Instead this has increased to 52% and 63%, more than twice the target figure of the reform. We have regressed. This is not reform but a counter reformation.

**Mr. Chairman,**

A budget is house-keeping. The UN budget is international house-keeping. It is a close reflection of this building. Like it, it is falling to pieces. We need a capital master plan (incidentally we strongly support the new CMP) to put this budget on its feet. Every buttress of this budget's gothic building is a flying buttress. The budget is ultimately also a political document and reflects the priorities of the UN in the shape of a financial statement. A cure for lack of resources is ad hoc donor-driven funding. A cure for inequalities and socio-economic problems that explode into civil conflict is peacekeeping.

Development is unimportant. It is a different vision of the world that the UN budget promotes – a sadder, diminished and less harmonious world. The budget needs to be fundamentally revised before it can be accepted. It has little to do with development, less with optimal use of resources and nothing at all with budgetary discipline. Technically it is inadequate and politically it is flawed.

We are confident that under your able stewardship this Committee would arrive at an outcome which would respond to the various concerns that have been raised by member States. I assure you of my delegation's constructive engagement in the deliberations ahead.

I thank you Sir

**636. Statement by Member of Parliament and Member of the Indian Delegation to the UN Prasanna Acharya on Agenda Item 52[a]: Macroeconomic Policy Questions: International Trade and Development at the Second Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 26, 2007.**

**Mr. Chairman,**

We thank the Secretary-General and the United Nations Conference on Trade and Development [UNCTAD] for the report on "International Trade and Development". We associate ourselves with the statement made by Pakistan on behalf of the Group of 77.

**Mr. Chairman,**

We share the Secretary-General's views on the importance of international trade as an engine of economic growth and development. Coupled with greater market access for developing countries, it is a crucial tool for developing countries in their efforts to eradicate poverty and to achieve the Millennium Development Goals. However, for developing countries to truly benefit from trade, the international trading regime must be made more equitable. Restrictions on market access by developed countries through tariffs, quotas and subsidies on products of interest to developing countries,

which detract from guaranteeing a fair and level playing field for developing countries, must be eliminated. Trade must be made pro-poor by linking exports to poverty-sensitive sectors of developing countries, and by supporting value addition in those countries, instead of perpetuating the role of developing countries as providers of raw materials.

In this regard, the Secretary-General has correctly emphasized the imperative of the development dimension in achieving progress in the Doha round of trade negotiations. The need for adherence to this mandate remains critical in order to realize a non-discriminatory and equitable multilateral trading system that contributes to meeting the development aspirations of developing countries. The paradigm shift in the international trading system needs to be recognized, and interests and concerns of developing countries must be given due weightage.

**Mr. Chairman,**

Progress on negotiations in agriculture remains the core issue at the Doha round. It is unfair to compare the subsistence farmers in developing countries, who have no other means of livelihood, with the subsidized large-scale commercial farming in many developed countries. Such subsidies have significant implications on food security and rural development in developing countries. We urge developed countries to demonstrate flexibility towards genuine reduction and elimination of such subsidies.

Given the enormous impact of the agricultural sector on developing countries, it is also unfair to link negotiations on agriculture with those on non-agricultural market access [NAMA]. To ensure sustainability of development, it is important that nascent industrial development in developing countries is not harmed and we do not face de-industrialization. We must ensure that the enshrined principles of “less than full reciprocity” and “special and differential treatment” are fully respected.

With regard to services, we agree with the Secretary General that Mode 4 can significantly enhance world welfare. Unfortunately, this is an area where developed countries have made the minimum binding commitments, which is further reduced owing to a number of entry conditions, as well as administrative and procedural requirements. We stress the need to ensure liberalised, commercially meaningful and effective market access in Mode 4. This would create a win-win situation by bringing tangible benefits to both developing and developed countries.

Technology plays a particularly key role in promoting development. Issues that affect humankind at large must be given special treatment. In this regard, we call for early action on the development-related mandate concerning Trade-related Aspects of Intellectual Property Rights [TRIPS] in the Doha Ministerial Declaration. We support flexibilities in the Agreement on TRIPS for public health concerns and stress the need to extend such flexibilities to climate-change technology transfer. We also support measures to make intellectual property rules fully supportive of the objectives of the Convention on Biological Diversity, particularly with regard to disclosure, prior informed consent and equitable benefit sharing. We need to consider setting up a special Committee of Experts in order to expedite action on these issues.

**Mr. Chairman,**

Promoting the benefits of trade must take into account the special needs of many developing countries, particularly Small Island Developing States, Landlocked Developing Countries and Least Developed Countries. Greater efforts must be made by the international community to build capacity, improve trade-related infrastructure and provide technical assistance, so that developing countries can remove supply side constraints and take advantage of international trade to promote development. There is urgent need to fully operationalise the "Aid for Trade" initiative. In order to address preference erosion, developed countries must implement their commitments to lower preferential rates to zero and, more importantly, enhance the utilization of Generalised System of Preference Schemes by rationalising rules of origin. Despite our constraints as a developing country, I am happy to reiterate that by the end of the year, LDC imports into India will face a zero tariff regime. I may add that we also provide assistance to numerous other developing countries, particularly in Africa, through our technical assistance programme.

Before concluding, Mr. Chairman, let me reiterate our support to UNCTAD. We believe UNCTAD has a critical role to play in providing support to developing countries, and there is a pressing need to enhance its resources. We also thank the Government of Ghana for offering to host UNCTAD XII, and look forward to its deliberations on trade policies, with particularly focus on globalization and development.

Thank you.

**637. Statement by Member of Parliament and Member of the Indian Delegation to the UN Aruna Kumar Vundavalli on Agenda Item 87: Report of the International Atomic Energy Agency at the 62<sup>nd</sup> session of the UNGA.**

**New York, October 29, 2007.**

**Mr. President,**

The delegation of India thanks the Director General, IAEA, for presenting the annual report of the agency to the General Assembly. On the occasion of its 50th anniversary, it is gratifying to recognize the unique place that the IAEA has within the UN system. The prestige, credibility and authority of IAEA in this century rests to a very large measure on the consistent good work done by its Secretariat under the wise leadership of Dr. El Baradei. Over the last half century the growth of the Agency's and India's nuclear programmes have evolved side by side. IAEA's achievements in the past half century have done much to contribute to the emergence of a nuclear dawn in coming years.

The world today is on the threshold of a paradigm shift. On the one hand demand for energy continues to rise and it is clear that 70% of the growth will come from the developing countries. It is imperative that this need is met if the benefits of development are to be accessed more equitably by the vast majority of under privileged mankind in the developing countries. On the other hand there is the challenge of addressing the serious consequences for future generations of unmindful and unsustainable use of fossil energy leading to global warming and climate change. Nuclear power can certainly play an important role in this context by helping to meet the ever growing demand for energy without the serious environmental consequences associated with the use of fossil fuels. India therefore notes and supports all the Agency's activities related to the promotion of nuclear power. We believe that the Agency has a crucial role to play in allaying misapprehensions in the public and Member States about the safe design, operation, maintenance and decommissioning of nuclear power plants as well as the waste disposal and environmental aspects taking into due account the current advances in relevant design and technology areas. We encourage the publication of TECDOCS, organization of training workshops and technical conferences, maintenance and dissemination of nuclear knowledge towards achieving this objective.

**Mr. President,**

India has been pursuing its robust three stage nuclear programme designed to maximize the energy potential from its domestic uranium and thorium resources, which will contribute around 25% share of electricity generation in the country by the year 2050. The objective is to realize the huge energy potential that can be obtained from these nuclear energy resources without having to add to the global carbon dioxide burden. The programme is moving ahead steadily with the first stage consisting of indigenously developed Pressurised Heavy Water Reactors (PHWRs) well into a commercially successful programme. The second stage has commenced with the construction of 500 MWe Prototype Fast Breeder Reactor (PFBR), which is now fairly advanced. The third stage is about to begin with the start of construction of a technology demonstrator, the 300 MWe Advanced Heavy Water Reactor (AHWR). The three stages are being implemented sequentially to reach the goal of large scale thorium utilization and are linked through their respective fuel cycles, which are also well underway. During the calendar year 2006, the generation of electricity from domestic nuclear power plants was 17,794 million units (MU's). While Unit-4 of RAPP operated continuously for a record 373 days, Unit-1 of the Kaiga Atomic Power Station recorded an uninterrupted operation for 356 days.

We are looking forward to the possibility of opening up of international civil nuclear cooperation. We expect such cooperation to be sustainable, free from interruptions and consistent with our national policy of closed fuel cycle. Such initiatives also open up the possibility of export of reactors and services. India today is the only country to have a live technology, design and infrastructure for small PHWRs with a unit capacity of 220 MWe, which have a great potential for export, particularly to countries with small grids wishing to enter nuclear power generation with relatively modest investments and infrastructure. Given the large manufacturing base and relatively low manufacturing costs, there is also a potential for India becoming a manufacturing hub for equipment and components for the global nuclear industry.

**Mr. President,**

India supports all activities of the Agency related to advanced technologies namely, Accelerator Driven Systems, High Temperature Reactors for non-power applications such as hydrogen production and nuclear desalination. We attach great importance to the INPRO programme, (International Project on Innovative Nuclear Reactors and Fuel Cycles), have been associated

with it since its inception, and have contributed significantly to its progress. We are happy to note the continued growth in its membership and stand committed to ensuring the successful implementation of its Phase-2 activities.

In the area of Material technology, we note with approval the Agency's activities aimed at improving the utilization of nuclear fuel for both LWR's (Light Water Reactors) and PHWR's through increased burnup and the associated degradation and failure issues. In this context, India hosted an International Conference on: "Processing, Performance and Phenomena" and a satellite conference on: "Materials Behaviour far from Equilibrium" in cooperation with IAEA in December, 2006, in Mumbai.

**Mr. President,**

India commends the Agency for the activities related to capacity building and Nuclear Knowledge Maintenance for sustainable energy development aimed at providing training to several Member States in using the analytical tools and databases as detailed in the report.

We take note of and appreciate the Agency's work programme and achievements under nuclear applications in food and agriculture, human health and nutrition, Programme of Action for Cancer Therapy (PACT), water resources management, protection of the environment, and Industry. India has donated a state of the art teletherapy machine Bhabhatron II to PACT with Vietnam being the intended beneficiary. We note and support the Agency's activities envisaged under Nuclear Science.

In the area of nuclear security and physical protection, India has organized a number of workshops and training courses under the aegis of IAEA for the Asia Pacific Region. So far we have conducted four regional training courses on Physical Protection on Nuclear Installations and also regional training courses on Physical Protection of Radioactive sources. In addition, we have conducted regional training courses on advanced equipment and response of criminal unauthorized acts involving nuclear or other radioactive material and on regulatory authority information system training course. India is among the first countries to deposit its instrument of ratification to the amendments to the Convention of Physical Protection of Nuclear Material. We note with approval the round the clock operations of the Agency's Incident and Emergency Centre, the Emergency Preparedness review conducted by the Agency, and the establishment of a Centre for Advanced Safety Assessments Tools.

In the context of Safety of Nuclear Installations, we note with satisfaction the activities undertaken by the Agency for promoting safety culture in Member States. In India, the World Association of Nuclear Operators (WANO) completed peer reviews of the Atomic Power Stations at Kakrapar, Narora, Kaiga, Rawatbhata and Tarapur. We offered our TAPP-3 unit for pre-startup Peer Review by an expert team of WANO. Similar reviews for RAPP-5 and Kaiga-4 are also planned for the next year.

India attaches high priority to Nuclear Verification and notes with approval all the activities undertaken by the Agency in a transparent and impartial manner. Our delegation has actively participated in the Special Committee on Safeguards and Verification within the framework of the IAEA statute to consider ways and means to strengthen the Safeguards system.

**Mr. President,**

A global nuclear energy renaissance increasingly appears not just inevitable but a necessity. However, it will rest on fragile foundations unless robust inclusive partnerships are built on the basis of trust and mutual understanding, which will function on a reliable and predictable basis. The adoption of closed fuel cycle options to maximize energy availability needs to be an integral part of this. We have justifiable concerns about the risks related to safety of the environment and proliferation rising out of irresponsible behaviour of state and non-state actors. However, we need to be even more concerned about the vastly enhanced security risks to which future generations would be exposed as a result of the storage of spent fuel for tens of thousands of years. There are, thus, risks and challenges but they are within the professional competence of existing technology and institutional control. Answers can easily be found if every responsible partner is seen not as a problem but as a part of the solution.

Thank you, Mr. President

**638. Statement by Member of Parliament and Member of the Indian Delegation to the UN on the Agenda Item 30: Effects of Atomic Radiation in the Fourth Committee [Special Political and Decolonization] of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 29, 2007.**

**Mr. Chairman,**

India welcomes the election of the distinguished representatives of Canada, Germany and Egypt as Chairman, Vice Chairman and Rapporteur of UNSCEAR for its 56th and 57th session. India reiterates its recognition of the important scientific work of UNSCEAR (United Nations Scientific Committee on Effects of Atomic Radiation) which has immense implications for the health of thousands of occupational workers and people undergoing radiation treatment, the general public as well as the persons who are living in high natural radiation areas and last but not least, our environment.

India is appreciative of UNSCEAR's work as reflected in the completion of the review of the 5 scientific annexes i.e. 'Epidemiological studies of radiation and cancer', 'Epidemiological evaluation of cardiovascular disease and other non-cancer diseases following radiation exposure', 'Non-targeted and delayed effects of exposure to ionizing radiation', 'Effects of ionizing radiation on the immune system' and 'Sources to effects assessment of radon in work places and homes'.

We note that UNSCEAR is also in the process of completing its review of additional issues such as 'Radiation exposure of public and workers', 'Accidental radiation exposure', 'Exposure arising from medical uses of radiation', 'Effects of radiation on non-human biota' and 'Health effects due to the Chernobyl accident' etc. UNSCEAR has to verify the authenticity of scientific data, critically apply statistical analyses and develop models for that purpose. Often, there are no proper systems for collection of such data in many countries. In this connection, it may be pointed out that though the use of radiation for medical purposes such as X-ray examinations, computerized tomography and nuclear medicine is on the rise in many countries, proper documentation of patient or attendees' exposure and monitoring of these facilities is not being done. It must be borne in mind that today medical radiation exposure contributes next only to the natural radiation exposure.

The biological and health effects of natural radiation exposure require continuous monitoring and international agencies should step in to ensure critical assessment of these effects. In view of the uncertainties regarding the biological effects of low dose and low dose rate radiation exposure, natural laboratories like the one existing in Kerala's south western coast should be the focus of detailed scientific enquiry. There is as yet no evidence of any significant deleterious effect of this enhanced natural exposure. Unfortunately, only deleterious effects attract public attention. Therefore, such data, though very important to radiation risk evaluation for nuclear power plants, is ignored.

The dogmatic adherence to the Linear No Threshold (LNT) hypothesis as a corner stone for radiation protection, has put an unnecessary economic burden on the increasing number of countries that are seeking to develop nuclear electricity generation as a cleaner and cheaper (in the long run) option. It is high time that these regimes are revisited.

Central to this reevaluation of the LNT is the "attributability" of radiation effects. Biological and health effects are very complex. More than one type of agent and signaling processes may trigger the same effect eg. cancer. The non-radiation causes such as smoking, diet etc may synergize or add to a marginal radiation effect. Therefore, the analysis of confounding factors is very critical and how much of an effect can be attributed to radiation exposure is a matter of serious discussion. India understands that a debate and discussion has started in the UNSCEAR on this aspect. India would also desire that the cancer centric consideration of deleterious health effects of radiation exposure should not overshadow the other possible effects such as congenital malformations, in utero effects and cardiovascular effects etc. in deciding the exposure limits.

In order to engage highly qualified and eminent scientists in different areas of radiation effect assessment as consultants to prepare the draft documents, UNSCEAR needs adequate budgetary support. The organization of the annual scientific sessions of UNSCEAR which are essential to fulfil its mandate also require adequate funding. It is, therefore, essential that funding of UNSCEAR through UN be enhanced.

Thank you, Mr. Chairman.

**639. Statement by Member of Parliament and Member of the Indian Delegation to the UN Saleem I. Shervani on Agenda Item 48: Integrated and Coordinated Implementation of and follow up to the outcomes of the major United Nations Conference and Summits in the Economic, Social and Related Fields at the 62<sup>nd</sup> session of the UNGA.**

**New York, October 30, 2007.**

**Mr. President,**

We welcome the opportunity to express our views on the agenda item “Integrated and Coordinated Implementation of and follow-up to the Outcomes of the major United Nations conferences and summits in the economic, social and related fields”, particularly on the crucial role of the Economic and Social Council in this regard. We thank the Secretary-General for his report on this issue.

**Mr. President,**

We agree with the Secretary-General that over the last 15 years, the major United Nations conferences and summits have together resulted in the emergence of a comprehensive shared vision of development. Further, as the report notes, the 2005 World Summit embraced a broader concept of internationally agreed development goals, not just limited to the Millennium Development Goals, which can be reached through the implementation of the broader set of commitments undertaken at the major United Nations conferences and summits. We also welcome the recognition in the report of the critical role played by the Economic and Social Council in fostering a comprehensive development agenda of the United Nations through an integrated and coordinated implementation of the commitments.

In this regard, we welcome the strengthening of the Economic and Social Council last year and the incorporation of new elements in its functioning. Of these, the Annual Ministerial Review has already been instituted. We believe that this annual event must have a special focus on evaluating the implementation of the “global partnership for development” and cannot remain limited to assessing national efforts made at achieving the Millennium Development Goals. The Development Cooperation Forum has an important role to play in overseeing trends in international development cooperation.

The objective must be to ensure that such cooperation is aimed at assisting developing countries in implementing their national development strategies, rather than imposing additional aid conditionalities.

We are happy that the Economic and Social Council has finalized a two-year programme of work for 2008 and 2009 in respect of the Annual Ministerial Review. We believe that this would provide the necessary lead time to the various entities of the United Nations system to focus their efforts on the important themes chosen by the Economic and Social Council. However, it is also important for the Council to analyse and discuss topical and emerging issues, and not be constrained by the previously agreed programme of work. In this regard, we emphasize the importance of the thematic debate in the high-level segment of the Council's substantive session, and urge the early finalization of the theme for the 2008 session.

We believe that the key element of Economic and Social Council's activities regarding the development agenda relates to its acknowledged role as a principal body for coordination, policy review, policy dialogue and recommendations on issues of economic and social development. In this regard, we underline the importance of the new mandate given to the Council last year for undertaking a regular and periodic review and assessment of international economic and development policies and their impact on development.

**Mr. President,**

International economic, financial and trade policies play a crucial role vis-à-vis the development efforts of developing countries. Unfortunately, current institutional structures do not effectively take on board the concerns and perspectives of developing countries in the formulation and implementation of policies, even though developing countries are most affected by such policies. The large precautionary accretion of reserves by developing countries as a result of conditionality-based lending by the Bretton Woods Institutions; continuing burden of conditionalities, even after modification of Structural Adjustment by the Bretton Woods Institutions; current fragilities, if not crisis, of the financial system; a history of inappropriate advice from the Bretton Woods Institutions such as during the Asian financial crisis; the declining relevance and effectiveness of these institutions in financing for development; the continuing problems relating to external debt and debt sustainability; the negative trends in flow of Official Development Assistance, which continues to remain crucial in assisting development efforts, are some of the telling indicators of the need for an urgent and fundamental reform of

the international financial and economic architecture. Such reform must enhance the voice and participation of developing countries in the decision-making and norm-setting process. Given its unique role and legitimacy, the United Nations, through the Economic and Social Council, must oversee this process.

The strengthened mandate of the Economic and Social Council, and the need for the United Nations to play a central role in reviewing the international economic, financial and trade policies, including a periodic review of the policies of the Bretton Woods Institutions, from the development perspective, will remain on paper unless it is backed up by adequate technical resources and expertise. We call for the United Nations system, particularly the secretariat of the Economic and Social Council, to be strengthened and provided with adequate resources and expertise so as to assist in the effective discharge of these activities. We need to also consider innovating mechanisms like an international debt commission, and a committee of experts overseen by the United Nations (to assist in accelerating the development mandate of the Agreement on Trade Related Aspects of Intellectual Property Rights). The latter is particularly critical in relation to its impact on issues that affect mankind including public health, benefit sharing of use of genetic resources and affordable environment-friendly technologies (crucial for addressing climate change).

In conclusion, Mr. President, we would like to reiterate the importance of keeping the development agenda at the heart of the efforts of the United Nations, and of an integrated and coordinated implementation of commitments made in the major United Nations conferences and summits through the Economic and Social Council.

Thank you.

**640. Statement by Member of Parliament and Member of the Indian Delegation to the UN A. Krishnaswamy on Agenda Item 82: Report of the International Law Commission: Chapter VI: Expulsion of Aliens; Chapter VII: Effects of Armed Conflicts on Treaties; Chapter VIII: Responsibility of International Organizations; Chapter X: Other Decisions and Recommendations at the Sixth Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 30, 2007.**

Thank You, Mr. Chairman,

I thank the Chairman of the International Law Commission, Mr. Ian Brownlie, for his comprehensive introduction of the Report of the 59th Session of the International Law Commission on the first cluster of topics.

In connection with the topic "Expulsion of aliens", we commend the Special Rapporteur, Mr. Maurice Kamto, for his second and third reports dealing, respectively, with the scope of the topic and definitions, and with five draft articles on certain general provisions limiting the right of a State to expel an alien. The topic is particularly important and urgent in view of the global upsurge in the phenomenon of migration, including irregular migration.

We support the general approach taken by the Special Rapporteur. It is essential that the right of a State to expel aliens is exercised in accordance with the relevant rules of international law, including those relating to the protection of human rights and to the minimum standards for the treatment of aliens.

**Mr. Chairman,**

The Commission has sought information on domestic legislation of States on some aspects of this topic. Indian law does not provide for deprivation of nationality or for expulsion of nationals. A person who voluntarily acquires another nationality is deemed to have surrendered his Indian nationality. However, Indian law now recognises dual citizenship through a registration process and grants dual citizens the right of free entry and residence.

**Mr. Chairman,**

On the topic "Effects of armed conflicts on treaties", we commend the Special

Rapporteur for his third report. We also commend the working group which examined several issues that had been identified in the Commission's consideration of the third report presented by the Special Rapporteur.

On the scope of the topic, we reiterate our view that it should be limited to treaties concluded between States and not include treaties concluded by international organizations; the definition of "armed conflict" should be considered independently of its effects on treaties; and that the scope of an "armed conflict" should be limited to conflicts between States and not deal with internal conflicts, as treaties are entered into by States, and internal conflicts do not directly affect treaty relations. The frequency or intensity of internal conflicts by themselves would not justify their inclusion in the present text and could be dealt with by the Vienna Convention on the Law of the Treaties. The Tadic Case, referred to the possibility of an armed conflict on the territory of one State assuming or having the character of an international conflict. However this would not justify extending the scope of the topic to all internal armed conflicts especially those that do not have the required character of an international conflict.

All relevant circumstances, including the object and purpose of the treaty, the nature and intensity of the conflict or the situation that arises there from and the nature of the treaty obligation itself, and subsequent actions of the parties in relation to the treaty, should be taken into account for determining whether the treaty or some of its provisions could continue in force, in the context of armed conflicts. The principle of non-automatic termination or suspension contained in Draft Article 3 was useful in that it encouraged the stability and continuity of treaty relations,

**Mr. Chairman,**

Draft Article 7 provides a listing of treaties which, on the basis of necessary implication from their object and purpose, are considered as continuing in operation during an armed conflict. It is necessary to identify some general criteria for determining the type of treaties that would continue to apply during an armed conflict. In particular, treaties that expressly apply in case of or during an armed conflict, and therefore, can in no circumstances be terminated by an armed conflict, should be identified and considered separately from other treaties.

**Mr. Chairman,**

I now turn to the topic "Responsibility of International Organizations". We

would also like to convey our appreciation to the Special Rapporteur Professor Gaja on his fifth Report on the topic dealing with the content of the international responsibility of an international organization.

The fifth report contained 14 draft articles, dealing with general principles of the content of international responsibility of an international organization; reparation for injury and the issue of serious breaches of obligations under peremptory norms of general international law. The fifth report followed, like the previous reports, the general pattern of the articles on Responsibility of States for internationally wrongful acts.

Draft articles 31 to 34 and 36 dealing with general principles of the content of international responsibility of an international organization, follow closely the wording of the corresponding provisions on Responsibility of States for internationally wrongful acts. Draft article 35 correctly emphasizes the special relationship between an international organization and its members whereby, unlike a State which could not rely on the provisions of its internal law as justification for failure to comply with the obligations entailed by its responsibility, an international organization might be entitled to rely on its internal rules as a justification for not giving reparation towards its members.

We further commend the Special Rapporteur for the substantial progress on the topic made at this session which resulted in the adoption of Articles 31 – 45 after consideration by the Drafting Committee, as well as commentaries to these Articles.

**Mr. Chairman,**

The Commission has sought our comments on Draft article 43, relating to an obligation of members of a responsible international organization to take, in accordance with the rules of the organization, all appropriate measures in order to provide the organization with the means for effectively fulfilling its obligation to make reparation. In our view, this article deals essentially with obligations of States and its inclusion in draft articles on responsibility of international organizations is not appropriate.

**Mr. Chairman,**

On Chapter X of the Report, we welcome the Commission's decision to include on its programme of work, two new topics, "Protection of persons in the event of disasters" and "Immunity of State officials from foreign criminal jurisdiction" and the appointment of Special Rapporteurs for these topics.

We also welcome the Commission's decision to undertake an examination of the possibility of including the topic "Most-favoured-Nation clause" in its longterm programme of work. The conclusion in recent years of a large number of bilateral agreements on investment protection and on preferential trading and free trade arrangements, all of which include the obligation to provide mostfavoured- nation treatment, have resulted in a substantial body of state practice in this field and the Commission could play a useful role in providing clarification on the meaning and effect of the most-favoured-nation clause especially in the field of investment agreements.

Thank you, Mr. Chairman.

\* \* \* \* \*

**641. Statement by Member of Parliament and Member of the Indian Delegation to the UN Mohammad Salim on Agenda Item 21: Necessity of ending Economic, Commercial and Financial Embargo imposed by the United States of America against Cuba at the 62<sup>nd</sup> session of the UNGA.**

**New York, October 30, 2007.**

**Mr. President,**

We align ourselves with the statement made by the Chair of the Group of 77. The nearly five-decade old economic, commercial and financial embargo imposed by the United States of America has been the subject of debate by this august body annually since 1991. The embargo has been reinforced by domestic laws of the United States of America, through which the extra-territorial reach of the embargo encompasses foreign companies as well as foreign subsidiaries of US companies doing business with Cuba or Cuban entities. Such domestic laws include the Cuba Democracy Act of 1992 and the Helms-Burton Act of 1996.

**Mr. President,**

The international community has been categorical in repeatedly expressing its opposition to the extra-territorial aspect of the embargo that has been implemented in accordance with US domestic laws and regulations. We fully share this call by the international community. This Assembly has repeatedly rejected the imposition of laws and regulations with extra-

territorial impact and all other forms of coercive economic measures. Through its resolutions, it has called upon all States to respect their obligations under the United Nations Charter and international law, as well as repeal and invalidate laws and measures that have "extraterritorial effects" affecting the sovereignty of other States, the legitimate interests of entities or persons under their jurisdiction and the freedom of trade and navigation.

The continuation of the embargo on Cuba, particularly through its extraterritorial effects, has hampered the country's ability to pursue its development imperatives. It has also caused hardship on its population in a variety of ways. The impact of the embargo has been particularly severe in the area of medical care through reduction in access to medical equipment, medicines, and diagnostic aids. Other affected areas include food aid deliveries, educational sector, international trade and investment, transportation and access to financial markets. In addition, an indirect negative extra-territorial impact of the embargo has been on Cuba's efforts to provide assistance under South-South cooperation in the field of medicine, particularly to African countries. The United Nations Conference on Trade and Development concludes in the report of the Secretary-General that the embargo by the United States of America has led to an adverse impact on gross domestic product growth, export revenues, industrial and agricultural production, trade and social sectors such as food, health, education, communications and science and technology, as well as trade diversion.

These embargoes and economic blockades are against the spirit of unhindered trade and commerce without barriers. The embargo has achieved nothing except creating hindrances in the path of development for the people of Cuba. The continuation of the policy of sanction and blockade against the opinion of the overwhelming population of the world is nothing but a desire to continue an age old unjust arrangement. This is all the more untenable in an era of 'globalisation' when its advocates are loudly proclaiming and working for barrier free trade and commerce and seamless movements of goods and services around the world.

**Mr. President,**

Given their geographical proximity, the United States of America and Cuba should be natural partners in trade, commerce and investment. We believe that a considerable part of the business sector in the United States of the America would like to benefit from unhindered access to the Cuban market

and that many US citizens would like to establish greater contacts with Cuba through tourism. The exports of agricultural and medical products from the United States of America to Cuba, insofar as permitted by the Trade Sanctions Reform and Export Enhancement Act of 2000, is testimony to the interest and potential of trade and business contacts between the two countries. Various legislative attempts in the United States of America to relax the embargo also support this view. We, therefore, look forward to the lifting of sanctions and embargoes against Cuba.

In conclusion, Mr. President, let me reiterate India's opposition to unilateral measures by countries, which impinge on the sovereignty of another country, including attempts to extend the application of a country's laws extraterritorially to other sovereign nations. The international community must work towards creating a just international economic environment conducive to development for all countries, free from sanctions and embargoes.

Thank you.

**642. Statement by Member of Parliament and Member of the Indian Delegation to the UN Aruna Kumar Vundavalli on Agenda Item 70: Human Rights Questions; [b]: Human Rights Questions, including alternative approaches for improving the effective enjoyment of Human Rights and Fundamental Freedoms; [c] Human Rights Questions: Human Rights Situations and Reports of Special Rapporteurs and Representatives; and [e] Convention of the Rights of Persons with Disabilities at the Third Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, October 31, 2007.**

**Mr. Chairman,**

I would like to thank the UN Secretary-General (UNSG) for his reports, and the Special Rapporteurs and Representatives of the UNSG for their presentations under the sub-agenda items 70 (b), (c) and (e) relating to 'Human rights questions'. I would also like to thank the UN High

Commissioner for Human Rights for her statement last week before the Third Committee under this agenda item.

**Mr. Chairman,**

Mr. Jean Ziegler, Special Rapporteur on the Right to Food, states in his report that the number of victims of hunger and malnutrition around the world increased every year since 1996, and reached an alarming figure of 854 million people. His recommendation that all States should ensure that their international policies, including international trade agreements, do not negatively impact on the right to food in other countries, is timely and pertinent. He also cautioned that conversion of food into bio-fuels could seriously impact on the right to food.

Mr. Arjun Sengupta, Chairperson-Rapporteur of the Working Group on the Right to Development, outlined a three-phased roadmap for developing and refining criteria for periodic evaluation of the global partnership for development as contained in Millennium Development Goal (MDG) 8. There is a gradual acceptance that discussions on Right to Development are no longer in the realm of theory and principles, but have moved into design and implementation of policies leading to its realisation. We support the efforts of the Working Group to operationalize the Right to Development that would contribute to mainstreaming it in the policies and operational activities of relevant actors at the national, regional and international level, including multilateral financial, trade and development institutions.

We also recognize the important work of Mr. Paul Hunt, Special Rapporteur on the right of everyone to the enjoyment of the highest attainable standard of physical and mental health, particularly in developing a right-to-health impact assessment methodology that would aid equitable, inclusive, robust and sustainable policy-making. We are happy that Mr. Paul Hunt has accepted our invitation to visit India in November this year.

**Mr. Chairman,**

We are once again faced in this Committee by a major challenge in determining most effective approach for promotion and protection of human rights. We need a self-critical appraisal of whether the international community has managed to achieve a genuine improvement in human rights through giving of 'report cards' against countries or even by undertaking intrusive monitoring. No doubt, instances of gross and systematic violations of human rights anywhere in the world must be

addressed by the international community collectively and in a holistic manner. However, dealing with human rights situations with a specific bias against certain group of countries and as a matter of routine would not promote the cause of protection of human rights. An approach based on dialogue, consultation and cooperation have a better chance of leading to genuine improvement in the enjoyment of human rights by the people of a country. The need for moving away from selectivity and partial approaches is now greater than ever before.

**Mr. Chairman,**

A distinction must always be made between a country that is responsive and has functioning democratic institutions, and one that is inherently repressive and is unable, or unwilling, to improve human rights standards. Foundations for a genuinely holistic conception of human rights can be laid only with democracy, development and respect for human rights and fundamental freedoms. Our collective efforts should focus on improving the capacity of States so that they can embrace rule of law and democracy as essential ingredients for promoting and protecting human rights.

A democratic, pluralistic society with a secular polity, an autonomous and impartial judiciary, a vibrant civil society, a free media, and independent human rights institutions, helps secure effective guarantees for the protection and promotion of human rights in a country like India. The Indian Parliament has been acting as a vehicle to make economic and social rights justiciable to people, particularly those living in rural areas. Notably, the National Rural Employment Guarantee program launched in 2006 provides 100 days of assured employment annually to every rural household. The Supreme Court of India has recognized the justiciability of the right to food. To widen public knowledge of the decision-making process and to promote transparency and accountability in the working of any public authority, the Indian Parliament has enacted the Right to Information Act.

**Mr. Chairman,**

The adoption of the UN Convention on the Rights of Persons with Disabilities in December last year marked an important milestone in recognizing disabled persons as rights holders and active members of society, rather than objects of charity. I am happy to inform that India became the seventh country to ratify the UN Convention on the Rights of Persons with Disabilities. India has been committed to the elimination of special barriers that persons with disabilities face. The Persons with Disability (Equal Opportunities,

Protection of Rights and Full Participation) Act of 1995 and National Policy for Disabled People of 2006 paved the way for recognition of the rights of persons with disabilities. We recognize that much needs to be done to enable effectively enjoyment of the rights enshrined in the Convention by the disabled people in India.

**Mr. Chairman,**

In conclusion, as the world's largest democracy, we consider it an honour to uphold and cherish the human rights and fundamental freedoms of every citizen. I would like to reiterate India's firm commitment to the promotion and protection of human rights. We look forward to engage constructively with other delegations in working for the noble cause of promotion and protection of human rights worldwide.

I thank you, Mr. Chairman.

**643. Statement by Member of Parliament and Member of the Indian Delegation to the UN Shripad Yasso Naik on Agenda Item 45 [a] and [b]: Sports for Peace and Development at the 62<sup>nd</sup> session of the UNGA.**

**New York, October 31, 2007.**

**Mr. President,**

We thank the Secretary-General for his report on 'Sport for development and peace: progress and prospects'. We note the well-organized structure and good presentation of information in the report. The report provides an overview of activities undertaken on various fronts by Member States, the UN system, and other stakeholders. It also makes recommendations for next steps based on lessons learnt.

**Mr. President,**

India supports the efforts of the Secretary-General to highlight the useful role that sports can play in consolidating peace and furthering development. Sport is an easy and relatively inexpensive way of engaging the energies of the youth in a positive and constructive manner. It teaches the spirit of sportsmanship that generates tolerance of spirit and action and respect for

the opponent. It also inculcates discipline through observance of the rules of the game. It develops camaraderie and good-fellowship that enhances the ability of communities to coexist peacefully.

The contribution of sports in furthering development is also recognized. A healthy mind lives in a healthy body. Sports provide physical activity, enhances oxygen intake and improves stamina. It brings people together for a common purpose. Its enjoyable format provides a good vehicle for propagating difficult social messages. Sports improve productivity and foster social harmony and discipline. Indeed, sports can play a subtle, positive and constructive role in development and peace.

**Mr. President,**

India believes that activities related to sports and physical education are a necessary component of human resource development. India has a long tradition of sport and physical education. Ancient Indian scriptures and literature describe the important place of such sports as archery, weight-lifting and wrestling in princely education. A mastery over such sports was considered as important as the knowledge of scriptures. Education in modern India is trying to continue and build upon this heritage and respect for sports and physical education.

In view of the key role of sports and games in national life, the Government of India has taken a number of initiatives to improve the standard of sports in the country. There is wide recognition of the need for broad-basing sports and for provision of modern sports infrastructure. The Government has made efforts towards upgrading the skills of the coaching fraternity, creation of sports infrastructure and building an adequate sports-science backup. Efforts are also being made to encourage the National Sports Federations to make their functioning more effective and focussed. The involvement of the society at large, particularly business and industry, are adding to the efforts of the Government. To encourage sports and sportspersons, a number of prestigious awards are bestowed on sportspersons to recognize their achievements. Several schemes have been put in place to propagate sports and to provide incentives for sporting activities. These include schemes such as the Sports Fund for Pensions for Meritorious Sportspersons, as well as Promotion of Sports and Games in Schools. While the welfare of young sportspersons is covered by the Sports Scholarship Scheme, a National Welfare Fund has been established to assist retired sportspersons. A National Sports Development Fund has been set up to mobilize resources. The Ministry of Youth Affairs and Sports in the Government of India has the national level responsibility for sports.

The Government has also established the Sports Authority of India to pursue the twin objectives of broad-basing of sports and nurturing talent in children through the provision of necessary infrastructure, equipment, coaching and other facilities. These include a Sports Medicine Centre and Dope Control Centre.

**Mr. President,**

We agree with the Secretary-General on the need to enhance the use of sports to help reverse disease and obesity, especially among young people. The report speaks of the role of sports in reversing the spread of HIV/AIDS. While sports may have only a limited role in this regard, the promotion of sports can play a more critical role in reversing the growing trend of juvenile diabetes in urban areas. Regular practice of a sport can also help lower anxiety and high blood-pressure caused by the pressures of modern living amongst the younger generation of today.

We note from the Report of the Secretary-General that despite uneven progress, there is evidence indicating a better integration of sports across all geographical regions. However, the report highlights that the lack of adequate resources, facilities and trained personnel continues to be a key constraint in many countries. Developing countries have to deal with enormous challenges with limited resources. These challenges are even more daunting for the LDCs. The complexion of sports has undergone a transformation in the modern world. The pursuit of sports today requires the availability of modern and highly sophisticated equipment, infrastructure and training. The ready availability of and easy access to such facilities in the developed world leads the international sporting arena towards the developed world. There is, thus, a solemn need for international cooperation and assistance for encouraging the development of sports infrastructure in developing countries.

In this context, we agree with the recommendation of the Secretary-General on the need to make sport and physical education more accessible to larger segments of the world's population, especially those who lack the opportunity and facilities. We also agree with the need to promote investment for expanding sports infrastructure and facilities, including through enhanced resources, sports science and sports medicine programmes, particularly in the developing world. We support the Secretary-General's call for greater efforts for promotion of sports and physical education. This could include advocacy through participation in sports and nonsport events. We are convinced, however, that sporting activities are also the best advocacy tool

for the promotion of sports. We hope that the UN system would focus its efforts on promotion of sports through sports, rather than through conferences and meetings.

**Mr. President,**

Sport is an inalienable part of the educational process and a factor for promoting peace, friendship, cooperation and understanding among peoples. We agree with the Secretary-General that sport and physical education are not luxuries in society and much less so in the developing world. We must, therefore, invigorate our efforts for the promotion of sports for development and peace.

Thank you, Mr. President.

**644. Statement by Member of Parliament and Member of the Indian Delegation to the UN T. C. Gehlot on Agenda Item 55: Implementation of the outcome of the United Nations Conferences on Human Settlements [Habitat ii] and strengthening of the UN Human Settlement Program (UN-Habitat] at the Second Committee of the 62 session of the UNGA.**

**New York, October 31, 2007.**

**Madam Chairperson,**

We thank the Secretary-General for his report on this agenda item. We associate ourselves with the statement made by the Chair of the Group of 77.

**Madam Chairperson,**

We welcome the adoption of the Medium-term Plan of UN-Habitat for 2008- 2013. We look forward to early implementation of the resource mobilization plans. India has always highlighted the importance of housing finance to the poor. We hope that UN-Habitat will now be able to provide longer-term finance to domestic financial institutions.

We also express satisfaction at the adoption by the Governing Council of guidelines on strengthening of local authorities. India has always involved them in decision-making and implementation. Our efforts have involved empowering local authorities, with greater representation to all sections of society.

**Madam Chairperson,**

In the year 2007, global urban population has overtaken the global rural population for the first time in history. A majority of the world population now lives in cities and towns. This trend is expected to continue. It is estimated that by 2025, more than two thirds of the global population will be in cities. Our ability to address urban poverty, urban pollution, urban planning and urban governance will influence our overall well-being in the 21st century.

**Madam Chairperson,**

India has recently launched an integrated programme to promote sustainable development of cities. Titled "Jawaharlal Nehru National Urban Renewal Mission", its implementation includes development of seven basic services to the poor, namely, land tenure, affordable shelter, water, sanitation, education, health and social security.

There are also a number of programmes that promote affordable housing in rural areas. For example, the "Indira Awaas Yojna" aims at reaching out to the rural poor with grant-in-aid for construction of dwelling units and upgradation of temporary houses. We also recognise that the problem of shelter is intricately linked to the eradication of poverty. Policies and programmes of the Government of India give a special focus on improving employment and livelihood in rural areas. The National Rural Employment Guarantee Scheme, the Swarnajayanti Gram Swarozgar Yojna (Golden Jubilee Village Self-Employment Plan) and other programmes aim to generate rural employment opportunities.

**Madam Chairperson,**

Within the framework of South-South cooperation, India has been sharing appropriate technology, particularly in the field of cost-effective, environment friendly and disaster resistant construction. Further, India was happy to host the first Asia-Pacific Ministerial Conference on Housing and Urban Development last December.

Allow me to conclude, Madam Chairperson, by expressing our support to UNHabitat.

Thank You.

**645. Statement of Member of Parliament and Member of the Indian Delegation to the UN A. Krishnaswamy on Agenda Item 73: Report of the International Court of Justice at the 62<sup>nd</sup> session of the UNGA.**

**New York, November 1, 2007.**

**Thank You, Mr. President,**

We welcome the opportunity to address the General Assembly on the Report of the International Court of Justice and thank the President of the Court, Judge Rosalyn Higgins, for her introduction of the Report contained in document *A/62/4*.

We commend Judge Higgins for her dedicated stewardship of the Court and for the Court's impressive achievements over the period under review. This will no doubt further enhance the international community's confidence in this unique organ of international law that has made a distinctive contribution to the maintenance of international peace and security.

**Mr. President,**

India continues to believe that no other judicial organ in the world can have the same capacity for dealing with international legal problems as the ICJ, which is the principal judicial organ of the United Nations entrusted with settling legal disputes between sovereign states and promotion of the rule of law in international relations.

Over the years, the ICJ has been engaged in finding just and equitable solutions to legal disputes between States and there has been a noticeable increase in the number of cases being referred to it. Another significant development is that unlike in the past when the jurisdiction phases of cases occupied most of the Court's time, the Court is now being frequently called upon to deal directly with a diversity of complex substantive issues of international law from all regions of the world.

During the period under review the Court rendered three very important decisions involving cases from Latin America, Africa and Europe. The subject matter of these cases covered issues ranging from diplomatic protection of shareholders, environmental protection to genocide. This affirms once again the important role that ICJ and international law play in the search for solutions

to the problems of an interdependent world in which economic, social and humanitarian issues have assumed paramount importance.

**Mr. President,**

The recent period has witnessed the creation of a number of specialised regional and international courts. Along with it have come concerns about the fragmentation of international law. There is apprehension that similar legal issues or disputes may well be subjected to final and binding interpretations by two different bodies, projecting differing views. There is considerable apprehension that the expansion of the field in this regard could create problems of coherence between different specializations, institutions and norm-systems.

The challenge therefore is to find a balance, on the one hand, between the need for diversity and specialized regimes and solutions and, on the other hand, the importance of maintaining an overall framework or 'system' of international law that offers a sufficient degree of security and coherence. It has been pointed out that "the tool-box of international law – especially general international law and the Vienna Convention on the Law of Treaties – is not perfect but flexible enough to assist negotiators, lawyers and judges in finding this balance".

We welcome the initiative taken by the ICJ President for a regular dialogue between the international courts and Tribunals and exchanges of information with a view to improving the unity of international law and addressing the problem of "overlapping of jurisdictions" or "fragmentation of international law".

Mr. President, in order for the Court to respond effectively to the increasing demands on resources made on it and to carry out its mandate efficiently it is necessary that it must be provided with adequate resources. It is a matter of concern that the 15 judges have to share and rely on five legal professionals to carry out research on complicated questions of international law and to prepare studies and notes for the judges and the Registrar. We therefore, reiterate that the Court's request for individualized legal assistance for all its members is reasonable and may be implemented to enable it to efficiently carry out its designated functions as the principal judicial organ of the United Nations.

We also urge re-examination of Resolution 61/262 that has created a discriminatory salary regime among the 15 Judges of the International Court of Justice and hope that this unintended anomaly will be removed.

Thank You, Mr. President

**646. Statement of Member of Parliament and Member of the Indian Delegation to the UN Aruna Kumar Vundavalli on Agenda Item 82: Report of the International Law Commission – Chapter IV: Reservations to Treaties; Chapter V: Shared Natural Resources; Chapter IX: the Obligation to Extradite or Prosecute at the Sixth Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, November 1, 2007.**

**Mr. Chairman,**

I thank the Chairman of the International Law Commission, Mr. Ian Brownlie, for his comprehensive introduction of the Report of the 59th Session of the International Law Commission on the second cluster of topics.

**Mr. Chairman,**

On the topic “Reservations to treaties”, we congratulate the Special Rapporteur, Professor Alain Pellet, for the presentation of his 11th and 12th reports on the formulation and withdrawal of acceptances and objections and on the procedure for acceptances of reservations, respectively. At this session substantial progress was made on this topic. Thirty-five draft guidelines on the above issues were referred to the Drafting Committee. Nine draft guidelines, dealing with the determination of the object and purpose of the treaty as well as the question of incompatibility of a reservation with the object and purpose of the treaty, together with commentaries, were adopted by the Commission.

The Special Rapporteur has proposed to complete his presentation of problems posed by the invalidity of reservations next year. Therefore, the Commission has sought information from States on several questions relating to their practice on these issues. We will be submitting our written responses to those questions separately.

However, we share the Commission’s view that the “legal effects” of a reservation that is “invalid” in accordance with Article 19 of the Vienna Convention are not clear from Articles 19 – 23. In our view, the invalidity of a reservation cannot lead to the assumption that the treaty is fully binding on the State in question. Such an interpretation would affect the readiness of States to accept treaties.

**Mr. Chairman,**

Turning to the topic of "Shared natural resources", we appreciate the contribution of the Working Group on Shared Natural Resources under the Chairmanship of Mr. Enrique Candioti. I would also like to thank the Special Rapporteur, Ambassador Yamada, on the presentation of his fourth report. The Commission has completed the first reading of a set of 19 draft articles and commentaries on the law of trans-boundary aquifers. These are now before Governments for their comments, and we would be submitting our comments on the same separately.

The Fourth Report of Ambassador Yamada has dealt with the crucial aspect of how the Commission should proceed in its further consideration of the topic, in particular the relationship between the work on groundwaters, on the one hand, and the work on oil and natural gas, on the other hand. The Report makes a good case for the separate treatment of the law on trans-boundary groundwaters. We support the recommendation that the Commission should proceed with and complete the second reading of the law of trans-boundary aquifers independently from its future work on oil and natural gas, since the considerations for dealing with trans-boundary oil and gas resources are different from those relating to trans-boundary aquifers. While some of the regulations of the law of the non-recharging trans-boundary aquifers might be relevant to the question of oil and natural gas, the majority of regulations to be worked out for oil and natural gas would not be directly applicable to groundwater.

**Mr. Chairman,**

Turning to the topic "the obligation to extradite or prosecute", I thank the Special Rapporteur, Mr. Galicki, for his second report on the subject, which has recapitulated the main ideas and concepts presented in his preliminary report, and also presented one draft article on the scope of application. We welcome the plan for further development of the topic proposed by the Special Rapporteur and his ideas on articles to be drafted in the future, including his proposal for a draft article that would provide that: "Each State is obliged to extradite or to prosecute an alleged offender if such an obligation is provided for by a treaty to which such State is a party."

The United Nations Conventions against terrorism, the international conventions against drug trafficking, transnational organized crime, trafficking in persons, and on corruption, all provide for the obligation to extradite or prosecute.

The main objective of the obligation to extradite or prosecute is to ensure that persons accused of serious crimes are denied “safe havens” and can be brought to trial to face the consequences of their criminal acts. This provision serves as an important tool in global efforts in combating serious offences, including those arising out of terrorism.

We look forward to receiving further reports from the Special Rapporteur formulating draft rules on the concept, structure and operation of the obligation to extradite or prosecute.

Thank you, Mr. Chairman.

**647. Statement by Member of Parliament and Member of the Indian Delegation to the UN Mohammad Salim on Agenda Item 56: Globalization and Interdependence at the Second Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, November 1, 2007.**

**Mr. Chairman,**

We thank the Secretary-General for the reports on the agenda item “Globalization and Interdependence” under consideration today. We associate ourselves with the statement made by the Chair of the Group of 77.

**Mr. Chairman,**

The increasing interdependence in the world as a result of the processes of globalization have meant that national policies and actions can no longer be formulated or implemented in isolation from international environment driven by market forces. Accordingly, last year we had requested the Secretary-General to submit a report on the impact of international commitments, policies and processes on the scope and implementation of national development strategies. The resultant report has very eloquently highlighted the difficulties developing countries face in pursuing national development strategies, particularly in the areas of capital flows, aid, trade and technology.

The report serves to reinforce the argument that while globalization, through

enhanced exchange of information, capital, goods and services, technology and people, has provided tremendous opportunities for progress and prosperity, it has also presented significant challenges and constraints for developing countries. As was emphasized in the Millennium Declaration, the benefits of globalization are unevenly shared, while its costs are unevenly distributed. We welcome the recognition in the report of the negative impact of capital flows on exchange rate stability, inflation rates and liquidity, and in the ability of developing countries to implement counter-cyclical measures. Moreover, traditional macroeconomic policy prescriptions of the Bretton Woods Institutions erode space for policy autonomy of developing countries and force them to adopt inappropriate policies that cannot give adequate attention to much needed public investment or social sector development.

For example, problems of liquidity in financial markets of developed countries are tackled with short-term measures to inject liquidity, as should be the case, while similar problems in developing countries are diagnosed as “structural problems”.

In the area of trade, agricultural policies of developing countries are severely affected by the massive subsidies by developed countries, while steady reduction in their industrial tariffs has greatly enhanced the risks of de-industrialization of developing countries. Further, despite international trade laws, developing countries face practical barriers in the form of unfavourable market access regimes and nontrade barriers. In the area of technology access, critical technologies in the area of public health and climate change remain inaccessible and unaffordable for developing countries due to the Intellectual Property Rights regime. Most importantly, developing countries do not have a say in shaping the international financial, economic, trade and technological regimes, which have the maximum impact on developing countries themselves.

**Mr. Chairman,**

The trade-off between the benefits of accepting international disciplines and rules, and the consequent loss of policy space, represent a difficult decision for developing countries. Apart from their marginal role in formulating international regimes, many developing countries lack the necessary capacities to evaluate all options, and analyse the impact of international rules. We reiterate the need for the international community to consider as a whole the issue of a balance between national policy space

and international disciplines and commitments while deciding collectively on future disciplines and commitments, as well as during implementation and interpretation of the existing ones. Greater flexibilities must be provided in current international regimes so that developing countries can have policy space to determine their own development strategies.

We believe that a fundamental reform of the international economic and financial architecture in a time bound manner is required in order to ensure fair globalization, in which the benefits of globalization are more equitably spread. This process must be overseen by the United Nations, which has a unique legitimacy and universality.

**Mr. Chairman,**

Science and technology are critical determinants of development. The scientific and technological base of any country usually has a direct co-relation to the level of development achieved. It is perhaps no exaggeration to say that it is the level of technology, both in terms of access and utilization, that differentiates developed and developing countries. Given the restrictions on access to critical technologies due to existing international regimes, developing countries need to pay special emphasis to accessing and acquiring knowledge resources in order to give a boost to their development paths. India recognizes the importance of science and technology in the development process, and is actively engaged in capacity building not only to become a knowledge producing society but a knowledge sharing and knowledge consuming society.

Developing countries also need to effectively utilise traditional knowledge and biogenetic resources. International technology regimes must integrate the development dimension fully. We also call for pragmatic ways to promote collaborative research and development efforts between developed and developing countries which assist capacity building in developing countries. We reiterate the importance of the World Summit on Information Society, and its follow-up process. In this regard, we also welcome the enhanced mandate of the Commission on Science and Technology for Development.

In conclusion, Mr. Chairman, allow me to emphasize the importance of a conducive international environment that will permit all countries to benefit from the process of globalization.

Thank You.

**648. Statement by Member of Parliament and Member of the Indian Delegation to the UN Mohammad Salim on Agenda Item 34: Comprehensive Review of the whole question of Peacekeeping Operation in all their aspects at the Fourth Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, November 5, 2007.**

**Mr. Chairman,**

We welcome the opportunity to participate in discussions under Agenda Item 34: Comprehensive Review of the Whole Question of Peacekeeping Operations in all their aspects. We associate ourselves with the statement made by the distinguished representative of Morocco, on behalf of the Non Aligned Movement.

India attaches considerable importance to this session of the Fourth Committee. We are confident that you will guide it to a positive outcome and assure you of our full cooperation in doing so. We thank Under-Secretary-General Guehenno and OIC Jane Lute for their comprehensive briefing and interactive session with us. We would like to compliment their teams for their dedication and hard work.

**Mr Chairman,**

We note from the Under-Secretary General's statement that there are 140,000 men and women in the field from 119 member states in 18 peacekeeping operations. These numbers are set to increase further with two new operations coming up in the near future. This unprecedented surge has given rise to enormous challenges in peacekeeping - not only because new missions are being established or old ones expanded, but also due to the volatile and insecure environments in which UN forces have to function, the growing complexity of the difficult tasks assigned to them, and the tools that they are provided with.

We had welcomed the efforts by the Secretary-General to respond to peacekeeping challenges by strengthening and rationalizing structures in the UN via building military planning, management, and operational capacities. The realignment of DPKO by creating two Departments - Department of Peacekeeping Operations (DPKO) and Department of Field Support (DFS) – has been undertaken. However, there is an urgent need to establish clear command structures, coherence in policy and strategy,

effective coordination and integration, as well as ensure preservation of unity of command from Headquarters to the field. We look forward to the mid-term review in 2008 and hope that appropriate corrections would be made from lessons learnt in order to make UN peacekeeping well integrated, effective and professional.

The safety and security of UN peacekeepers is of vital concern to troop-contributing countries who place their soldiers at risk in pursuance of the UN ideal. The 67 deaths of peacekeepers in 2007, including that of an Indian peacekeeper, Corporal Mohan Singh Gurung, while doing his duty with the UN Mission in Sudan, is a reminder of the importance of fully addressing safety and security concerns.

In this context, the UN must enhance its capacity for information gathering and assessment and sharing it with field units along with concrete recommendations for preventive action. Reliable operational and tactical intelligence is essential for the successful conduct of military operations and in order to pre-empt potential threats to the security and safety of personnel. The bureaucracy at Headquarters must actively and continuously engage field missions and positively respond to resolving their problems. We look forward to examining the United Nations Security Management System Draft Policy being prepared by DPKO and DSS.

Mr Chairman, we would encourage the Secretary-General to address the issue of consolidation of peacekeeping accounts while undertaking administrative reorganization and streamlining. This would provide an opportunity to tackle the issue of selective financing of peacekeeping missions that is sometimes resorted to. Member States should be entitled to cash surpluses from missions only if they do not have dues to other peacekeeping missions. This will also help address the concern of developing countries that contribute the overwhelming majority of peacekeeping troops, yet continue to be owed considerable sums of money.

India has supported energising the mechanism of triangular consultations between Troop Contributing Countries, the Security Council and the UN Secretariat. Private Meetings under the Resolution 1353 format continue to be held on the eve of renewal of Mission mandates, leaving little scope for serious or meaningful discussions. It is important that TCCs be involved early and fully in all aspects and stages of mission planning and that their views find their way into mission mandates.

**Mr Chairman,**

We appreciate the effort being made by the DPKO in developing a draft Doctrine which would serve as a practical guide for peacekeeping. In our view the document should focus on planning, deployment, operational and logistical issues. We associate ourselves with the views expressed by NAM and would emphasize that DPKO should take into account the views of member states before publication of the Doctrine. We look forward to continuing our constructive engagement in this process.

**Mr. Chairman,**

India supports the efforts to enhance peacekeeping capacity in African countries. We share close and historic ties with Africa and are one of the oldest, largest and most consistent contributor to UN Peacekeeping missions in Africa, having participated in almost every major operation since the inception of peacekeeping. We are currently involved in bilateral capacity building in many African countries. At the same time, the UN cannot absolve itself of "its responsibility under the Charter for the maintenance of international peace and security". The real challenge before the UN is to strengthen peacekeeping without regionalising it.

As regards conduct and discipline of troops, we are convinced that sexual exploitation and abuse are totally unacceptable forms of behaviour. We fully support the implementation of a policy of zero tolerance and encourage raising the awareness of those with managerial and command responsibilities and the establishing of standards of conduct, training and investigation. Careful preparatory training in terms of a multi-cultural, pluralistic and tolerant outlook is as important as subsequent swift punitive action, once culpability is established. We welcome the General Assembly approved resolution on draft MOU and look forward to its implementation by DPKO at the earliest.

We also note the creation of a Division of Policy, Evaluation and Training establishment of an Integrated Training Service (ITS) and would encourage it to utilise and benefit from the considerable field expertise of the Troop Contributing Countries.

As regards Security Sector Reform, we must have in place a coherent framework to clarify the various dimensions of the concept. This should take place in relevant UN inter-governmental bodies. We would also encourage DPKO to ensure that the Enhanced Rapidly Deployable

Capacities (ERDC) Policy is finalized in an inclusive process so as to ensure that the views of member states are adequately reflected.

The role of Civilian Police in peacekeeping has grown substantially. We have noted the establishment of Standing Police Capacity and look forward to engaging in constructive discussions with the new Police Adviser regarding the utilization of the Capacity and its future requirements. We would also like to emphasise the need for adequate transparency in ensuring representation of qualified candidates from Troop Contributing Countries in senior leadership positions in the Police Division.

Mr Chairman, India stands solidly committed to assist the UN in the maintenance of international peace and security. We have a proud history of UN peacekeeping dating back to its inception in the 1950s. We have contributed nearly 100,000 troops, and participated in more than 40 missions. India has also provided and continues to provide eminent Force Commanders for UN Missions. We salute the 115 Indian peacekeepers, as well as those from other countries, who have made the supreme sacrifice by laying down their lives while serving in UN Missions.

India has also traditionally been contributing lady military and police officers to a number of UN Missions. In response to the Secretary-General's call for increased representation of female personnel in field missions, we were particularly honoured to have provided the first full Female Formed Police Unit for peacekeeping work. This unit is completing its first year in assisting the UN Mission in Liberia and has been successful in reaching out to the most vulnerable sections of society, i.e. women and children, in a post-conflict environment, besides performing its normal duties.

In conclusion, Mr Chairman, we are fully committed to the purposes and principles of the UN and look forward to making UN peacekeeping an ever more effective and efficient tool in the maintenance of international peace and security.

Thank you, Mr. Chairman.

**649. Statement by Member of Parliament and Member of the Indian Delegation to the UN Aruna Kumar Vundavalli on Agenda Item 65: Report of the Human Rights Council at the Third Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, November 5, 2007.**

**Mr. Chairman,**

My delegation would like to thank the President of the Human Rights Council (HRC) for his statement under the agenda item 65 titled "Report of the Human Rights Council".

We welcome the decision of the UN General Assembly (UNGA) to allocate agenda item titled 'Report of the Human Rights Council' to the Third Committee. As the HRC is a subsidiary body of the UN General Assembly, it is natural that all its reports and recommendations be transmitted to the GA Plenary through the Third Committee, where the expertise on human rights issues resides. We are, however, conscious of the delay that may occur in consideration of the Report if it is to be referred to the Third Committee, given the different schedules of the two bodies. This calls for flexible functioning of the Third Committee so that the Report of the HRC is considered in a timely manner in New York. This aspect should be examined while formalizing reporting arrangements between the HRC and the UNGA. Attempts to trivialize this issue by stating that the HRC is a subsidiary body of the General Assembly, but not of the Third Committee, may not advance the goal of ensuring an effective Council. Our streamlining efforts should also look at avoiding duplication in reporting and presentation of reports by the Special Rapporteurs and other mechanisms of the HRC.

**Mr. Chairman,**

Since its inception in June 2006, the HRC has had multiple tasks to complete. Apart from devising an institutional framework, it was actively involved in evolving a new Universal Periodic Review (UPR), and also in reviewing, improving and rationalizing all mandates, mechanisms, functions and responsibilities of the former Commission on Human Rights. In addition, it had to consider pressing human rights situations, thus making its functioning more complicated during the first year.

We commend the Human Rights Council for accomplishing a multitude of complicated tasks, in particular adoption of the institution-building package in June this year. By holding six regular sessions and five special sessions, the HRC has also demonstrated its ability to swiftly react to human rights emergencies.

The Council devised the Universal Periodic Review mechanism vide its resolution 5/1, which we believe has the potential to inculcate a spirit of cooperation and dialogue in the work of the HRC. The stage is now set for the launch of the UPR mechanism in 2008 with the finalization of countries to be reviewed in the first three cycles. The UPR mechanism is a cooperative mechanism, with an emphasis on objective and transparent assessment of human rights situation in a country, sharing of best practices, and provision of technical assistance and capacity-building in consultation and with the consent of the country concerned. We also recognize that the UPR mechanism is evolving, and that the Council should review its modalities based on best practices and lessons learned. We are happy that India, a founding member of the Council, would be reviewed during the first cycle in early 2008.

**Mr. President,**

As regards the review and rationalization of the Special Procedures, some progress has been made by way of holding interactive dialogue with these procedures and with the renewal or discontinuation of some of them. There is, however, a lot more to be done. We are cognizant of the time constraints of the Council, and also the complex nature of the task. The Council should expedite the process of review and rationalization of the Procedures to meaningfully address the areas of duplication as well as gaps hitherto unaddressed. A significant achievement of the Council has been adoption of the resolution 5/2, which delineated a 'Code of Conduct' for its Special Procedures mandate-holders. We hope that this would significantly improve impartiality and objectivity of the mandate-holders, while allowing them to maintain their independence in discharge of their mandates and also making them more accountable to the Council.

A spirit of cooperation and mutual understanding should guide the work of the Human Rights Council. It should continuously strive to promote human rights through international cooperation and genuine dialogue among Member States, including capacity-building and mutual

assistance. We would also like the HRC to emerge as an important forum for voluntary participation and sharing of national experiences and best practices in promotion and protection of all human rights and fundamental freedoms.

We are encouraged by the efforts of the HRC to translate the Right to Development into a reality. Discussions on the Right to Development are gradually moving away from the realm of theory and principles into design and implementation of policies, leading to its realisation. In this connection, we note the significant contribution of the Working Group on the Right to Development. The three-phased roadmap outlined by the Working Group for developing and refining criteria for periodic evaluation of the global partnership for development as contained in Millennium Development Goal (MDG) 8, is a significant step forward.

**Mr. Chairman,**

India remains committed to working to make the Human Rights Council a strong, effective and efficient body capable of promoting and protecting human rights and fundamental freedoms for all.

Thank you, Mr. Chairman.

**650. Statement by Member of Parliament and Member of the Indian Delegation to the UN A. Krishnaswamy on Agenda Item 57: Groups of Countries in Special Situations: [a] Third UN Conference on the Least Developed Countries; [b] Specific Actions related to the Particular Needs and Problems of Landlocked Developing Countries: Outcome of the Third International Ministerial Conference of Landlocked and Transit Developing Countries and Donor Countries and International Financial and Development Institutions on Transit Transport Cooperation at the Second Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, November 5, 2007.**

**Madam Chairperson,**

We would like to thank the Secretary-General for the reports on the agenda item "Groups of countries in special situations" under consideration today. We associate ourselves with the statement made by the Chair of the Group of 77.

**Madam Chairperson,**

The international community took note of the special needs of landlocked developing countries to effectively integrate into the global economy, through the formulation of the Almaty Programme of Action in 2003. This Programme lays emphasis on Transit Transport cooperation, and recognises that the constraints and challenges faced by transit developing countries must be effectively addressed in order to assist landlocked developing countries. It also underlines the inextricable linkages between trade and transit in improving the access of products from landlocked countries. Most importantly, the Programme provides a global framework for its implementation, involving partnerships between landlocked developing countries, transit developing countries and developed country partners.

We look forward to the results of the Five Year Mid-term Review of the Almaty Programme of Action, to be held in 2008. The two thematic preparatory meetings held earlier this year in Burkina Faso and Mongolia respectively have highlighted the limited progress made towards achievement of the goals of the Almaty Programme of Action, and have

underlined the importance of further assistance from the international community. We call for greater financial and technical support for transport infrastructure development, both physical and systemic, and capacity building in landlocked and transit developing countries in order to ensure the seamless integration of transport infrastructure of landlocked developing countries with their transit developing countries, and with any special transit corridor.

We concur with the importance of greater participation of landlocked developing countries in the multilateral trading system and for enhancing trade facilitation. Developed countries should provide enhanced market access to products of special interest to landlocked developing countries. We attach great importance to the ongoing negotiations on trade facilitation at the World Trade Organisation.

As a transit developing country with two landlocked developing country neighbours, India has taken special steps to enhance its friendly and historical links with its landlocked neighbours, including through cooperation on transit trade and transport issues. Special bilateral cooperation agreements are in force for easy transport of their goods through India. We have also extended economic and technical support for infrastructure development and capacity building, apart from promoting regional transport and trade connectivity.

**Madam Chairperson,**

The Brussels Programme of Action provides the framework for addressing the multifarious challenges confronting Least Developed Countries [LDCs]. The report of the Secretary-General has correctly highlighted that the focus of donor assistance must be on enhancing the productive capacity of LDCs in order to achieve sustained economic growth. This has been a recurring finding of various studies and reports. We must move away from a paradigm of offering palliatives to that of tackling the root causes of under-development, so that LDCs can truly achieve their development goals. This requires a proactive approach, involving support to national development strategies through new and additional financing, enhanced market access for products from LDCs, technology transfer at affordable rates, as well as institutional and capacity building.

We are heartened to note that some LDCs have graduated, or are in the process of graduating, from the list of LDCs. This is a tribute to their success in formulating and developing national development strategies. However,

we urge the international community to assist these countries in the post-graduation phase so that their achievements can be sustained. We also support the request by many LDCs for a re-examination of the graduation criteria.

Many LDCs are on track to meet their commitments regarding investment as well as in adopting and implementing national development strategies. Unfortunately, the international community has been tardy in fulfilling its part of the bargain. We note with concern that many donor countries have not met their target of Official Development Assistance to LDCs, and that there has been a drop in such assistance in the case of some donors. We reiterate the importance of Official Development Assistance for LDCs – not all countries have attracted enhanced private capital flows, nor are such flows channeled effectively to social sectors. We urge early fulfillment of their Official Development Assistance commitments by developed countries.

Regarding trade, it is important to sustain development in LDCs through enhanced market access for their products. Further, capacity building measures to diversify their trade needs to be supported by the international community through technical and financial resources. We also call upon developed countries to provide enhanced markets access to products from LDCs. We would like to reiterate that imports into India from LDCs will face a zero tariff regime by end of this year. We attach importance to the ongoing negotiations for the Global System of Trade Preferences.

Despite some improvement, debt problems of LDCs still present impediments in their progress. Channeling aid to write-off debt arrears does not generate additional financial resources. We call for greater collective efforts to address the problem of debt, including through innovative mechanisms like an international debt commission overseen by the United Nations. India has demonstrated its commitment to assist LDCs by writing off the debt owed by seven Highly Indebted Poor Countries [HIPC]. Further, our programme of Technical and Economic Cooperation, under South-South solidarity, has a special focus on assistance to LDCs in general, and with those in our extended neighbourhood, in particular.

Thank You.

**651. Statement by Member of Parliament and Member of the Indian Delegation to the UN T. C. Gehlot on Agenda Item 12: Support by the United Nations System of the efforts of Governments to promote and consolidate New or Restored Democracies at the 62<sup>nd</sup> session of the UNGA.**

**New York, November 5, 2007.**

**Mr. President,**

We thank the UN Secretary-General for his reports under the agenda item 12 titled "Support by the United Nations system of the efforts of governments to promote and consolidate new or restored democracies".

The United Nations has long supported nascent democracies in the conduct of elections and promoted transparent and accountable governance. It has also assisted countries emerging from conflict and political upheaval to build democratic institutions. We welcome the increasing role of the UN in facilitating international cooperation within the framework of the follow-up to the International Conferences of New or Restored Democracies, particularly in providing democracy assistance or advise.

**Mr. President,**

India is honored to be a regular participant at the International Conferences of New or Restored Democracies (ICNRD). It is important to share experiences on democratization and to identify means by which to promote pluralistic and participatory democracy. We note with satisfaction that the participation in ICNRD has grown from 13 countries at the first Conference in Manila in 1988 to 142 countries in Doha in 2006.

Democracy is a powerful ideal, but its successful exercise requires strong and enduring institutions, laws and procedures and the development of a parliamentary culture, whose essence is the accountability of those in authority to the ordinary citizens of the country. An independent and impartial judiciary, a free press, professional civil and military establishments, constitutionally empowered institutions to safeguard the rights of all sections of society, and an independent electoral mechanism; these are some of the more important elements of democracy.

**Mr. President,**

India's democratic heritage is rooted in its cultural ethos of tolerance, respect

for different view points and a ready embrace of diversity. India has demonstrated that stable, long-term growth can be successfully realized alongside a thriving democracy. Indeed, the Indian experience shows that implementation of proactive development policies and economic reforms, when coupled with a liberal democratic polity, leads to overall stability and growth and significant poverty reduction.

India has been sharing its rich experience, institutional capabilities and training infrastructure with nations that have sought its assistance. In the same spirit, India has also been supportive of UN efforts to build the institutional and human capabilities that are necessary to underpin the successful exercise of democracy. As the world's largest democracy, it was also natural for India to support the establishment of the UN Democracy Fund. We had made an initial contribution of \$10 million to this Fund and remain actively and constructively involved in realizing the objectives for which it has been set up. India has recently announced a further pledge of \$10 million to the UN Democracy Fund. It also stands ready to share its experiences and undertake collaborations with other countries under the auspices of the UN Democracy Fund, including in areas such as institutional building, awareness creation and leadership development.

**Mr. President,**

We have noted the Secretary-General's concrete recommendations on how to improve cooperation and coordination between the United Nations and other relevant movements and organisations concerned with the promotion of democracy. Apart from the International Conference of New or Restored Democracies, the United Nations is expanding its interaction with other inter-governmental organisations working in the democracy field, including the Community of Democracies and the Inter-Parliamentary Union. The suggestion that the UN could assist in creating mechanisms for coordination and cooperation among these global democracy movements needs to be carefully considered. UN efforts should perhaps, instead, focus on institution and capacity building in interested Member States.

**Mr. President,**

Our collective efforts should be on improving the capacity of Member States so that they can embrace the rule of law and democracy. The aim should be to continue to strengthen democracy where it is new or restored, and encourage its restoration where the transition to democracy is derailed. As the world's largest democracy, India is ready to join the efforts of Member

States to strengthen the activities of the United Nations to uphold and cherish democratic values.

Thank you, Mr. President.

**652. Statement by Member of Parliament and Member of the Indian Delegation to the UN S. Y. Naik on Agenda Item 51: Information and Communication Technologies for development at the Second Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, November 5, 2007.**

**Madam Chairperson,**

We welcome the opportunity to participate in the discussion on “Information and Communication Technologies for Development”. We associate ourselves with the statement made by the Chair of G77.

**Madam Chairperson,**

This agenda item is of particular importance to developing countries in view of its immense potential in assisting and boosting development efforts. Apart from opportunities offered by the Information Technology and related areas as growing services sector which developing countries can take advantage of, Information and Communication Technologies also exercise a critical positive influence on almost every field through their extension and application, thereby stimulating the development of other sectors of the domestic economy. There exist enormous benefits of using Information and Communication Technologies in, inter alia, reducing transaction costs, expanding access to remote and rural areas, improving marketing capabilities of rural poor, reducing intermediaries in delivery chains and enhancing government accountability and democratic participation. Some areas that have direct linkage with benefits from deploying Information and Communication Technologies include education, health care, financial services, and administrative services.

As countries move up the development ladder, the contribution to the economic output of a country shifts from agriculture to manufacturing to

services. Buoyed by the revolution in the Information and Communication Technology sector since the last decade of the 20th century, the global economy has seen a similar shift to the services sector. This presents a special opportunity for developing countries. By effectively utilizing their comparative advantage in labour and human capital, rather than relying on material resources, developing countries can hope to reap the benefits of this global phenomenon more equitably. In addition, this leads to generation of employment. Thus, the Information Technology revolution presents a real and profound opportunity to increase the pace and scope of the benefits of development.

However, the primary challenge is of developing appropriate human resources, which is crucial for taking advantage of Information and Communication Technologies. This can only be done through capacity building. We also need to focus on making these technologies affordable and user-friendly. Only then can we progress toward bridging the digital divide. We call upon the international community to extend technical and financial support, particularly through the United Nations, so that developing countries can fully bring Information and Communication Technologies within reach of millions. We support the role of the Commission on Science and Technology for Development, and its enhanced mandate on follow-up process to the World Summit on Information Society.

**Madam Chairperson,**

India's has been striving to take advantage of this Information Technology revolution. This sector, particularly the Information Technology Enabled Services sector, has seen astronomical growth rates and has generated growth accompanied by employment. The contribution of this sector to our national economic output is now over 5%, from merely 1.2% at the turn of the century. Business Process Outsourcing [BPO] has been a key element in the rapid growth of global services trade, and has led to the acceptance of an Information Technology based global delivery model. Numerous sectors worldwide have derived benefit of Indian BPOs, including banking, financial services and insurance, telecommunications, manufacturing, retail sector, media, healthcare, transportation and utilities. India has a significant share of the global Information Technology services sector. Export revenues are over US\$ 30 billion annually, and are on track to reach US\$ 60 billion by 2010.

The resultant employment generation from the Information Technology sector growth has made a positive impact on the socio-economic dynamics

of the country. It has also spawned a number of ancillary businesses linked to transportation, real estate, etc. This sector is also a testimony to the success of the private sector and the State working together – a sector led by private initiative and enterprise, but supported by public policies of human resource promotion, enabling legislation, and other inputs.

India is committed to harness the benefit of deploying Information and Communications Technology in diverse areas. We have launched an ambitious programme to promote e-Governance at all levels. The areas include road transport, land records, taxes, agriculture, treasuries, land registration, education, passport, postal service and identification documents. We have also initiated a programme for taking the benefits of Information Technology to the most remote parts of the country. Combined with satellite based communication technology to create wide area networks, the objective is to reach rural areas through initiatives like teleeducation and tele-medicine. In parallel, we are working to make Information and Communication Technologies affordable to the masses.

**Madam Chairperson,**

As part of South-South solidarity, India has been assisting in the setting up of a connectivity project in Africa to support tele-education, tele-medicine, e-governance, infotainment, resource mapping and meteorological services, for 53 countries across the continent using fibre optics and a dedicated satellite. India has also been assisting in projects relating to vocational training in several partner countries in Asia and Africa for promoting Information Technology, setting up Information Technology training centres as well as offering scholarships for training in this area.

I would like to conclude, Madam Chairperson, by emphasizing the importance of Information and Communication Technologies to fast-track development processes, and call for concerted efforts by the United Nations system to assist developing countries in this regard.

Thank You.

**653. Statement by Member of Parliament and Member of the Indian Delegation to the UN Aruna Kumar Vundavalli on Agenda Item 58: Eradication of Poverty and other development issues; [a] Implementation of the First United Nations Decade for the Eradication of Poverty (1997-2006); [b] Women in the Development; [c] Human Resources Development at the Second Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, November 6, 2007.**

**Madam Chairperson,**

We thank the Secretary-General for the reports on the agenda item “Eradication of poverty and other development issues” under consideration today. We associate ourselves with the statement made by the Chair of the Group of 77.

**Madam Chairperson,**

Eradication of poverty remains the central development priority for developing countries. As the report of the Secretary-General indicates, while some progress has been made towards this objective during the first United Nations decade for eradication of poverty from 1997 to 2006, there is a grim reminder that much more remains to be done. Many parts of the world, particularly sub-Saharan Africa, are not on track to meet the poverty target of the Millennium Development Goals [MDGs]. We must also remember that the MDGs are not an end in themselves, and significant challenges of poverty eradication will remain even after achievement of the MDGs. Economic growth has not been accompanied by employment generation, which is crucial for poverty eradication. Moreover, the international community has not fulfilled its promises of providing new and additional financing to support efforts of developing countries. The report correctly notes that, in real terms, spending on core development programmes have remained at the level of the early 1990s.

There is no “one-size-fits-all” answer to the complex problems of poverty eradication. Each country must have the policy space to formulate and implement its own development strategy, based on its unique challenges and conditions. Economic growth must be sustained, pro-poor and inclusive. While the private sector is important, the State must play a role in ensuring

equity and social justice. In addition, a conducive international environment is essential, which can assist developing countries to implement their strategies through aid, enhanced market access and technology transfer. We welcome the recognition of the impact of the ill-designed structural adjustment policies of the international financial institutions on African countries, most of whom are still suffering the effects. There is an urgent need to reform the international financial architecture, overseen by the United Nations. Greater flexibilities are required in international regimes to ensure primacy of the development dimension.

**Madam Chairperson,**

As this body has declared in the past, gender equality and empowerment of women have a critical role in the development process, particularly through a multiplier effect. Participation of women in decision-making and policy formulation, improvement in women's literacy, enhancing women's access to productive resources and opportunities, and investing in women's health and nutrition, significantly enhance sustained economic growth and reduce poverty. In this regard, we emphasize the importance of gender sensitivity in formulating and implementing national development strategies, and call for greater financial and technical resources from the international community to assist developing countries.

India is committed to promoting the participation of women in government decision making. We attach great importance to the empowerment of women. We are actively implementing the commitments undertaken in the Beijing Platform for Action. Through amendment of our constitution, we have provided for a minimum of 33% representation of women in local selfgovernment nationwide. This has led to the mobilization of women in rural areas across the country and has brought over one million women at the grassroots level into political decision-making. We have institutionalised gender-sensitive budgeting and are promoting gender responsive legislations. We are also making efforts to mainstream gender in policies and programmes of various Government departments. The Government actively encourages and supports group initiatives in formation of women's self-help groups. Today, there are more than 2 million women self-help groups in the country supporting more than 10 million rural families. We are also encouraging women entrepreneurs through special assistance schemes.

**Madam Chairperson,**

Developing countries have a comparative advantage in availability of

manpower. However, this human capital can only be utilized effectively for enhancing economic output through proper human resources development. This involves investing, inter alia, in health and nutrition, education and vocational training, so that a skilled workforce becomes available. In today's globalized world, the scientific and technological knowledge base of a country's human resource is a key determinant of competitiveness, productivity and level of development. Use of information and communication technology can significantly assist in this regard, through programmes like tele-education. The development of India's information technology sector is a testimony to the importance of creating a skilled workforce through human resource development.

We agree with the Secretary-General that scientific and technological knowledge cannot be simply transferred and applied. It requires a scientific and technical base in the recipient country, along with effective transfer of technology. However, developing countries often lack the resources necessary to make investments in institutions for technical and tertiary education. Moreover, international technology regimes present barriers in the form of technology denial or prohibitive costs. We call upon the international community to provide financial resources and technical assistance to developing countries towards capacity building, effective technology transfer, collaborative research and development, and setting up of training institutions for imparting advanced vocational training. Only then can developing countries fully utilize their human resources to achieve sustained growth.

Thank You.

**654. Statement by Member of Parliament and Member of the Indian Delegation to the UN Shripad Yasso Naik on Agenda Item 33: United Nations Relief and Works Agency for Palestine Refugees in the Near East at the 62<sup>nd</sup> session of the UNGA.**

**New York, November 8, 2007.**

**Mr. Chairman,**

At the outset, I express India's appreciation to the Commissioner General of the United Nations Relief and Works Agency (UNRWA), for the annual report on the Agency's extremely important work over the past year in Jordan, Lebanon, Syria and the Occupied Palestinian Territories. We also thank the UNRWA Advisory Committee and the members of the working group on the Financing of UNRWA, for their efforts in support of the work of UNRWA. India also places on record its admiration for the difficult and often risky work that UNRWA has carried out over the past nearly six decades, placing service to the Palestinian refugees as its highest priority.

**Mr. Chairman,**

The report, and other reports of the UN Secretary-General under this agenda item, bring out very clearly that UNRWA is faced with a serious crisis. As the report notes, several of the challenges directly impinge upon the well-being of Palestine refugees and the Agency's ability to efficiently and effectively discharge its humanitarian and development responsibilities. The outcome of our collective failure to address these issues will be felt inevitably in the already volatile political and social situation in the region.

The first of the challenges before UNRWA that needs to be addressed is the crisis of financing. The budgetary shortfall of UNRWA is growing, and this takes place at the same time as demands upon UNRWA for assistance and support have increased. The overcrowded refugee camps of the Palestinian refugees—many of whom are in camps for more than one generation—are increasingly in need of upgradation of basic services. Separately, the tightening of access controls including the closure of the Sufa border crossing, the weakening financial position of the Palestinian Authority due to the lengthy international boycott, and the inter-Palestinian conflict has led many refugees to seek assistance for the very first time, after decades of self-reliance. Therefore, there is need for greater international effort to improve UNRWA's financial health.

**Mr. Chairman,**

The insecurity bred by extreme levels of poverty among the Palestinian people in the Occupied Territories is heightened by the perilous security situation in Gaza and the West Bank, particularly since the events of June 2007. At the same time, continued expansion of Israeli settlements, in contravention of the Fourth Geneva Convention and the Road Map, and continued construction of the separation wall will only contribute to a further sense of siege of the Palestinian people. As the report by the Commissioner-General notes, the degree to which civilian lives and safety are currently at risk requires us to think of expedited, creative and forthright political measures to create an environment of stability.

Paralleling its financial constraints, the operational window for UNRWA continues to shrink. It is a matter of grave concern that the security environment has forced UNRWA to evacuate its personnel from Gaza, and that its own access to persons in the Occupied Territories remains tenuous. The detention, on occasion, of its staff by Israel is unacceptable; respect for humanitarian access and the sanctity of humanitarian premises is imperative for all parties on the ground. The regrettably continued levy of fees and charges for the transit of humanitarian goods through Israeli ports is worsened by the increasingly frequent closure of the few existing crossing points into Gaza. The decision to limit crossings to one border point would only further worsen access issues and exacerbate shortages. In the latest briefing to the UN Security Council, the UN Under Secretary-General for Political Affairs had underscored the fact that the “humanitarian situation in Gaza is deteriorating alarmingly”, adding that it was “difficult to see how security concerns could justify the hardship” that such measures were causing.

**Mr. Chairman,**

This leads us to the larger point: the only lasting solution to the problem of the Palestinian refugees is a just, lasting and comprehensive solution to the longstanding conflict in the Middle East. The ongoing cycle of violence and counterviolence only makes the prospects of an eventual peace more remote. It remains critical for the parties to the conflict and the international community—in particular the Quartet—to redouble their efforts to find a way to bring peace to the Middle East. Nevertheless, until that day when a mutually-acceptable peace is in position, it is incumbent upon all of us to fully support UNRWA, as the primary source of humanitarian relief assistance to the Palestinian refugees.

Thank you, Mr. Chairman.

**655. Statement by Member of Parliament and Member of the Indian Delegation to the UN Arun Kumar Vundavalli on Agenda Item 68: Elimination of Racism and Racial Discrimination and Agenda Item 71: Right of Peoples to Self-determination at the Third Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, November 8, 2007.**

**Mr. Chairman,**

I have the honour to speak on Agenda items 68 and 71 on 'Elimination of racism and racial discrimination' and 'Right of peoples to self-determination' respectively. We thank Mr. Doudou Diene, Special Rapporteur on Contemporary forms of Racism, Racial Discrimination and related Intolerance, and Mr. José Gomez del Prado, Chairperson of the Working Group, on the use of mercenaries as a means of violating human rights and impeding the exercise of the right of peoples to self determination, for their statements in the Committee.

The Special Rapporteur has drawn the attention of Member States to the alarming signs of a retreat in the struggle against racism, racial discrimination and xenophobia. In this context, he specifically referred to two serious developments namely the growing acceptance of the usage of racism and xenophobia due to racist and xenophobic platforms of political parties and a rise in racist political violence. He drew attention to the emergence of immigration and asylum issues as the major sources for resurgence of racism and xenophobia. He also referred to the serious nature of defamation of religions and recommended that the United Nations should strengthen the role of inter-religious, inter-cultural and intra-religious dialogue to address the problem.

We support the Secretary-General's call for a multi-faceted approach to combat racism, including through adoption of relevant legislation and amending existing laws combined with action at the national level based on strategies elaborated through national action plans. In addition, effective implementation of the commitments made in the Durban Declaration and Programme of Action of key importance to foster social harmony. We look forward to a constructive dialogue during the two scheduled substantive sessions of the Preparatory Committee in 2008 to finalize the arrangements for the Durban Review Conference to be held in 2009.

**Mr. Chairman,**

India has maintained unwavering support and solidarity for the people of Palestine to attain their inalienable rights, including the right to self-determination. Palestine remains the unfinished task in the realisation of the right of peoples to self-determination. It is in this context that India has consistently urged the resumption of a direct, face to face dialogue of principals, based on the Quartet Principles. We also remain convinced that the Roadmap, as endorsed by UN Security Council Resolution 1515, remains a valid framework of reference for an eventual settlement, even though its originally-envisioned target date for a settlement has already passed.

We are with the overwhelming majority of countries who consistently affirm their commitment to a negotiated two-State solution, accepted by the two principals, that would result in a viable, contiguous, sovereign and independent State of Palestine, existing side-by-side with Israel in peace and security. We support the call of the UN Secretary-General to consider innovative ways by all sides in order to fully implement the Roadmap and thus lead, without delay, to a just, fair, equitable and mutually-acceptable solution to this conflict, based on relevant UN resolutions, including Security Council resolutions.

**Mr. Chairman,**

Attempts continue to be made at the United Nations and elsewhere to reinvent some of the basic principles of the Charter, such as self-determination, and to apply them selectively for narrow political ends. We believe that it is necessary to once again place the concept of right of peoples to self-determination in historical perspective. Relevant international principles re-affirm India's consistent view that self-determination is a right applicable to the peoples of non-self governing colonies and trust territories. Once exercised, this right enables a whole people to freely choose their own form of Government and for all segments of society to collectively participate in national decision making through representative, democratic institutions. The international community has consistently affirmed that the right of self-determination does not extend to component parts or groups within independent sovereign states and any attempts aimed at the partial or total disruption of their national unity are incompatible with the purpose and principles of the UN Charter.

The right to self-determination cannot become an instrument to promote

subversion and erode the political cohesion or territorial integrity of sovereign member states of the UN. It cannot be abused to encourage secession and undermine pluralistic and democratic states. Moreover, there is no room for selfdetermination to be distorted and misinterpreted as a right of a group, on the basis of ethnicity, religion or racial criteria, or any other such categorization, and use it to attempt to undermine the sovereignty and territorial integrity of a state.

**Mr. Chairman,**

In this context, we regret the unacceptable references to the Indian State of Jammu and Kashmir made by the delegation of Pakistan. It would suffice to say that the Indian State of Jammu & Kashmir is an integral part of the Union of India. Its people have exercised their right of self determination at the time of India's independence and have, since then, repeatedly and regularly participated in free, fair and open elections at all levels. In contrast, Pakistan pretends to be a protector of human rights while denying even a semblance of such rights to the people of Pakistan-occupied Kashmir and to the people of Pakistan itself. Pakistani authorities would also do well to listen to their own people, including the judiciary, who are demanding human rights and the rule of law.

By its references Pakistan is trying to divide the ranks of those who support the inalienable rights of the Palestinian people to self-determination. It will never succeed in its efforts.

We do not consider the sentiments expressed by the delegation of Pakistan as being helpful as these have the potential of vitiating an atmosphere that has been painstakingly created as a result of the Composite Dialogue between us so far.

Thank you, Mr. Chairman.

**656. Statement by Member of Parliament and Member of the Indian Delegation to the UN Vijay Krishna at the 2007 Pledging Conference for Development Activities at the Second Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, November 12, 2007.**

**Madam President,**

We thank you on election as President of this Pledging Conference. We thank the Secretariat for the documentation prepared for this 2007 United Nations Pledging Conference for Development Activities.

The development activities of the UN system represent the United Nations to the outside world. For the millions of people in the real world outside, the work of the UN is understood through the activities of the UN funds, programmes and specialized agencies. India is convinced that the development agenda of the United Nations must receive the highest interest and attention of Member States. India believes, along with other developing countries, that the development agenda represents a shared global commitment to poverty alleviation transcending national borders. India believes that through participation in this Pledging Conference a Member State can demonstrate its continued faith in the development agenda of the United Nations.

The voluntary contributions by India to the Funds and Programmes of the UN system are proof of its commitment to multilateralism and to international solidarity in the process of development and poverty eradication. The United Nations Special Fund was established in 1958. For its first five years, India's financial contributions amounted to more than one-third of the total contributions of all developing countries. Since then, our contributions, even though modest, have been amongst the largest from the South and at times larger than those of some OECD countries.

**Madam President,**

I have the honour to announce India's pledges of contributions for operational activities for development of the UN system for the year 2007. These are as follows:

- i) United Nations Development Programme      \$ 4.5 million  
(UNDP)

ii)	World Food Programme (WFP) (for the biennium 2005-06)	\$ 1.92 million
iii)	UN Children's Fund (UNICEF)	\$ 900,000/-
iv)	UN Population Fund (UNFPA)	\$ 500,000/-
v)	UN Development Fund for Women (UNIFEM)	\$ 20,000/-
vi)	UN International Research & Training Institute for the Advancement of Women (INSTRAW)	\$ 1,100/-
vii)	United Nations Environment Programme (UNEP)	\$ 100,000/-
viii)	UN Centre for Human Settlement (UNHABITAT)	\$ 80,000/-
ix)	UN International Drug Control Programme (UNDCP)	\$ 3 0 0 , 0 0 0 / -
x)	UN Relief & Works Agency for Palestine Refugees in the Near East (UNRWA)	\$ 20,000/-
xi)	UN Volunteers (UNV)	\$ 15,000/-
xii)	UN Crime Prevention and Criminal Justice Fund (UNCP&CJF)	\$ 3,000

Thank you, Madam President

**657. Statement by Counsellor at the Permanent Mission of India at the UN Mrs. Neeru Chaddha on Agenda Item 157: Report of the Committee on relations with the host country at the Sixth Committee of the 62<sup>nd</sup> session of the UNGA.**

**New York, November 12, 2007.**

**Mr. Chairman,**

We thank the Committee on Relations with the Host Country for its Report. This Committee provides a useful forum for addressing issues relating to the functioning of Missions of Member States and for enabling their representatives to perform their functions without hindrance.

This year the Committee had examined a number of problems related to transportation, acceleration of immigration and customs procedures, privileges and immunities of diplomatic personnel, entry visas and host country travel regulations. The open and transparent exchange of views in this forum helps in addressing the issues in question in a spirit of cooperation and in accordance with international law.

We appreciate the host country's commitment to fulfill its obligations under the Convention on the Privileges and Immunities of the United Nations and the Host Country Agreement, to accord facilities to missions accredited to the United Nations to ensure their smooth functioning.

**Mr. Chairman,**

The issue relating to imposition of municipal taxes on diplomatic missions is one such issue to which the host country must give due attention. The City of New York has imposed taxes on the premises of the Indian Permanent Mission to the UN that is used to house its diplomats. India is presently pursuing the case on merits in a New York District Court. However, we continue to believe that under international law and Vienna Convention on Diplomatic Relations, my government, being a sovereign, is immune from the jurisdiction of US Courts and is not liable to pay property tax in respect of the portion of the building of the Permanent Mission owned by it and occupied by its diplomats for residential purposes.

We understand that many Permanent Missions are facing a similar problem. We are interested to know what the host country is doing to resolve the

situation that has arisen from a given interpretation of its law. We hope that the host country will devote urgent attention to the matter and take steps to remove the ambiguity in its laws so as to ensure that it grants to the UN Member States and their staff the same privileges as are granted to other diplomats accredited to it. This is a requirement under the Headquarters Agreement between the UN and the United States.

As regards entry visas, immigration and customs procedures, we recognize that the host country has a right to monitor and control entry into its territory and to adopt the requisite security measures it deems necessary. This has to be balanced, on the one hand, with the right of delegations to participate in the work of the UN and, on the other, to ensure that delegations do not misuse their privileges and immunities. Nevertheless, security and immigration officials must also be made aware of the privileges and immunities enjoyed by diplomats and their families with a view to maintaining respect for them.

We also welcome the steps taken to address the parking problems of diplomatic missions and hope that the residual issues in this respect, including the request for parking slots by the Indian Mission, would also be addressed soon.

Thank You Mr. Chairman

**658. Remarks by Permanent Representative at the UN Nirupam Sen on Agenda Item 9- Report of the Security Council and Agenda Item 122: Equitable Representation on and Increase in the Membership of the Security Council and other related matters – Joint Debate in the General Assembly.**

**New York, November 13, 2007.**

**Mr. President,**

I thank you for convening this joint debate on Agenda Item 9 - Report of the Security Council and Agenda Item 122 - Equitable Representation on and Increase in the Membership of the Security Council and Other Related Matters. Let me begin where the Chairman of the Non Aligned Movement

concluded - by congratulating Burkina Faso, Costa Rica, Croatia and Viet Nam for being elected as non permanent members of the Security Council. Let me also thank the distinguished Permanent Representative of Indonesia for introducing the Report of the Security Council No. A/62/2.

The debate was convened on an auspicious day - Veterans Day. If we continue in this manner, we shall witness many veterans of UN Security Council reform in the years to come as in the years gone by. If words alone could reform the Security Council, then this torrent of words would long ago have comprehensively reformed it. We now must move from words to action. During the introduction of the Security Council Report, we heard about thematic debates on natural resources and conflict and the setting up of special tribunals. In terms of the Charter, these are matters for the General Assembly and not the Security Council. In terms of Article 29, the Security Council can certainly set up subsidiary organs but it cannot give them legal powers, on the well established legal principle of Roman law *nemo dat quod non habet* - you cannot give what you do not have. The doctrine of implied powers and subsequent practice are not applicable because the Security Council is concerned with immediate peace and security for which its powers are adequate and the general membership has never specifically approved the practice. The Charter has not been able to bind the Security Council. Non permanent members have not been able to prevent this.

Member states across groups both yesterday and this morning have criticized the Security Council on many issues. They have said that the report lacks analytical content. One of the representatives of the Uniting for Consensus said that there are no substantive elements and the same deficiencies year after year. But then he went on to say that the Council should be expanded only in the non permanent category when non permanent members have not been able to do anything about these deficiencies. In 2002 Singapore did excellent work and for a very short time the report was more analytical but this proved to be a flash in the pan, at best an Indian summer and then things went back to the good or bad old ways. Indeed this year's report also is a collection of facts in the style of Mr. Gradgrind in "Hard Times". Such a total concentration only on facts borders on fantasy. The same representative of Uniting for Consensus said that we should exclude elements that prejudge the final result and then promptly went on to prejudge it by stating that expansion should be limited to only non permanent members. Another member state said that the Council has become virtually inaccessible and most of its sessions are closed. This is a

fact. It is also a violation of Articles 31 and 32 of the Charter. In terms of these articles, the Council has the discretion only to determine if the interests of a member state are affected but once this is obvious it has no discretion on not allowing the member state to participate in its proceedings. This is the clear legal meaning of the Charter. Non permanent members have not been able to ensure adherence to Charter provisions.

On Troop Contributing Countries (TCCs), Argentina and New Zealand did excellent work some years back but this also proved short lived. The Council is in breach of the spirit of its own Resolution 1353 because when TCCs are called for a meeting, the resolution concerned has already been finalized and the issues decided upon so that the meeting is proforma. Resolution 1353 in any case is only a partial and belated attempt to implement the Charter. Article 44 of the Charter is clear: TCCs have to be involved in decisions (not merely discussions) which can be interpreted to mean the right to vote. The Council demands obedience (Article 25) and levies troops which the TCCs provide without any real say in their political and military mandate. It will be recalled that this was an essential feature of the feudal and colonial systems and this enables the Council to 'feed where it has not furrowed and keep warm where it has not woven'. Non permanent members have not been able to maintain the Charter balance, ensure implementation of its articles and therefore it is hardly logical to think that adding more non permanent or even renewable non permanent members can make any difference.

A member state said that the General Assembly is repeating the same criticisms year after year of the Council's working methods. There has been overwhelming criticism of the Council's working methods during this debate. In fact there has been criticism since at least 1949 beginning with the famous Resolution 267 (III) of 14 April 1949. This is a far more radical resolution than the S-5 resolution which only 'invites' the Council to improve its working methods, an invitation the Council has rejected repeatedly. Separating enlargement and working methods has not produced either one or the other. Non permanent members have not and cannot make any difference. Only members elected to the existing permanent category but held accountable through reviews can make a difference. Everything else has been tried for more than half a century and made no difference.

A leading light of the Uniting for Consensus criticized the Security Council for double standards, non analytical reports, closed door sessions, lack of coordination with GA and ECOSOC etc. His criticism was unfair. I may be

accused of paradox. The reason I am saying this is that though he expressed his dissatisfaction, he is quite satisfied to continue with his dissatisfaction. He is quite satisfied to propose expansion in the non permanent category and thereby let the problems he has mentioned remain or even increase. He is content to make statements every year and be satisfied with the euphonious sound of this annual ritual including this debate rather than urgently get down to the concrete business of negotiations aimed at transforming the Security Council. The UFC talks of representation but not representation among the permanent members, of checks and balances but nothing to check or balance the permanent members. The leading light of the UFC spoke of democracy (but not of democratizing the permanent category). In any case he reminded me of the words of Lycurgus, the great law giver of the Spartans: he told somebody, "Do you first set up a democracy in your home". Democracy, like charity, should begin at home. However, let us consider the question of democracy. Another member of the UFC asked if democracy meant leaving the winner in perpetuity.

He forgot to ask if democracy means leaving the untrammelled power of a few untouched in perpetuity. Another representative of the UFC said that repeated elections ensure accountability. I would be the first to agree that this is a necessary condition. But it is emphatically not a sufficient condition. Are the non permanent members accountable and, if so, to whom? Even when regional groups have a clean slate, they often do not find them accountable. The NAM has not found its representatives in the Council accountable many times. Therefore separate action on accountability is needed. Elected permanent members held accountable for ensuring Charter balance and specific new working methods through a sustained review mechanism and even some amendment to Chapter II to bring in the right of recall (an old democratic principle) can both make a radical difference and ensure accountability.

Some spoke of the need for the GA to inspire the Council. There is only one occasion when do so and then also partially on working methods and this was through its Resolution 11 (1) of 24 January 1946 on the process and method of selecting the Secretary General. There is a whole chapter in John Bolton's "Surrender is not an Option" which shows how the selection was based on a national agenda, private agreements, promises, bypassing in real terms not just the non permanent members but even one or two permanent members. In short, the picture that John Bolton paints of the Council's selection process is the most dismal and dysfunctional imaginable. The crushing irony and paradox is that the strongest exponent of the

Council's right to decide its own working methods and opponent of GA oversight and role has proved the necessity of GA oversight and role. He has validated the GA's earlier attempt to play a concrete role in the SG's selection process.

While the GA is adapting to ever lowering expectations, the Council remains dysfunctional. Earlier its reach exceeded its grasp; today its grasp exceeds its reach. Earlier the content was more than the phrase; today the phrase is more than the content. Earlier the substance was more than style; today the style is more than substance. Incidentally, John Bolton on page 255 of his book states that "I did not think that the UN Security Council is doing many of its jobs very well" and on page 344 he admits that the Council is 'massaging problems rather than resolving them'. This is not my phrase, it is his, that problems are being massaged rather than resolved.

Let me now turn to steps that can be taken now and let me begin with Resolution L69 on which many have spoken. Before that permit me to thank some permanent members and members from different regions who have supported expansion of permanent membership as well as the claims of the G-4 and India. The reason why the L69 Resolution was introduced is well known. In spite of repeated efforts, because of the opposition of a tiny minority of countries, it had not been possible to clearly state in the mandate given to the President of the Sixty Second Session of the GA to conduct concrete, result oriented inter-governmental negotiations on the basis of the progress achieved in the Sixty First Session and the positions and proposals of the Member States. L69 led to this unanimous mandate. As a member state (a former facilitator) said, we have reached the bridge and now we have to find the best way of crossing it. If we do not find this way, I am afraid the bridge will remain a 'bridge too far'. One of the permanent members made two important points and we agree with both of these - the first being that any reform that does not address the concerns of Africa will not get our endorsement. As the Bible puts it, the first shall be last and the last shall be first. It is about time that we gave this practical shape in the UN. A continent that has borne so much of the burdens and sorrows of mankind should assume its place of dignity in the Security Council. The second point is the launching of intergovernmental negotiations and defining the basic framework and content so that we know what will be negotiated on. It is precisely with this in mind that we thought that we could assist the President on doing precisely this through a small text that we circulated to all the African countries (since some of them had said that they would like to be consulted before any action is contemplated) and to some other

countries. Some member states have interpreted what Africa and Small States, including SIDS, want. It may be better, for a change, to listen to what they are saying. Many of their representatives, as well as states from other regions, have clearly said in this debate that the practical way is to determine through an objective and transparent method, the elements from all the positions and proposals before the UN, that command the largest support. These elements could also be grouped in alternative packages which could be tested through an objective and transparent method - many Small states and others have referred to questionnaires and straw polls. Another member state (a former facilitator) clearly said that we need a text on which to negotiate. He also spoke of a particular member state as having multiple identities. He did not mention one of these - which is that of an inquisitor.

A member state who took some colleagues from the African group to task reminded me of Col. Pickering's words in the Broadway musical "My Fair Lady": "I'd rather have a new edition/Of the Spanish Inquisition". He excoriated his colleagues for cosponsoring L69 which he said circumvented the Ezulwini Consensus. It is for the African Group to decide on how much proprietary right he has on Africa; we are more interested in how little proprietary right he has on logic. By speaking of expansion of existing permanent members, L69 leaves implicit all their rights and privileges. On the other hand, he spoke approvingly and without comment of the interim model that circumvents both permanence and the veto. He thereby circumvented his own circumvention. He went on to speak of the necessity of well above two-thirds support on which the Ezulwini Consensus is silent. He then spoke of reaching a common understanding between AU, G-4, UFC and S-5 but without touching the Ezulwini Consensus to which he is totally committed and without negotiations to which he is totally opposed. The only way to achieve this understanding would be through a miraculous and mystical communion of minds. As I have said many African states wanted prior consultation. This member state's position is that if we do not consult them before hand, it is bad; if we do consult them before hand, it is also bad. In short, the best thing is to do nothing. He also spoke of representation of civilizations. And we have high respect for all civilizations. His is an ancient civilization and one of its elements was the art of very long term embalming and that is why we have what we today call mummies. I hope he was not suggesting this civilizational art of embalming and mummifying the UN Security Council reform. The mandate is clear - it is for negotiations and not further consultations.

The warmth of debate is a part of hospitality 'like the warmth of the fire'. Some friction is necessary for optimal forward movement. We know this from classical physics. The ship needs the friction of the water to move forward; the train would not run without the friction of the sliding of its wheels on the rails. But if friction is replaced by obstruction, the ship and the train would rust and rot instead of moving forward. The United Nations has been compared unfairly to the Tower of Babel because the diversity of languages and opinions is a source of strength and life giving. But if we misconstrue a clear mandate for negotiations as being for consultations then it would become a real Tower of Babel in the sense of language becoming babble. I can understand that negotiations may be a difficult prospect for some because they mean negotiating through multiple tensions but inaction is politically unacceptable and morally suspect. We have to urgently find a practical way that is objective and transparent of implementing a clear mandate.

All periods of change require an increased charge of energy and I am sure that the General Assembly would be able to provide such energy to comprehensively reform and transform the UN Security Council.

I thank you, Sir.

**659. Statement by Member of Parliament and Member of the Indian Delegation to the UN Sachin Pilot on Agenda Item 53: Follow-up to and Implementation of the Outcome of the International Conference on Financing for Development at the Second Committee of the 62nd Session of the UNGA,**

**New York, November 14, 2007.**

**Madame Chairperson,**

We thank the Secretary-General for the reports on the agenda item "Follow-up to and implementation of the outcome of the International Conference on Financing for Development" under consideration today. We associate ourselves with the statement made by the Chair of the Group of 77.

**Madame Chairperson,**

The recently held High-Level Dialogue of the General Assembly on Finance of Development provided an important opportunity to examine the progress made in the implementation of the commitments of the Monterrey Consensus. The event clearly indicated that despite promises made, progress in financing for development has been slower than expected and many of the development finance objectives set in 2002 have not yet been met. While developing countries have made significant efforts towards good governance and domestic resource mobilization, support by the international community has lagged far behind. Flows of Official Development Assistance are far below target; debt relief has not led to envisaged additional funds for development; private capital flows have not benefited all countries, nor have they been useful for promoting investment in social sectors; and trade-distorting agricultural subsidies by developed countries and limited market access continue to negatively impact developing economies. Most importantly, the issue of restructuring of the international financial architecture has not been adequately addressed. Developing countries continue to lack the necessary voice and participation in international financial and economic policy making and norm-setting. As the President of the General Assembly stated during the High Level Dialogue on Financing for Development, legitimacy and credibility of some institutions now depends on increasing the voice and participation of developing countries in the international financial architecture. We believe that a comprehensive review of the implementation of the Monterrey Consensus must be undertaken at the Doha Review Conference, with particular focus on 'systemic issues'. In addition, the issue of enhancing the follow-up mechanism of the Monterrey Consensus should also be considered at the Review Conference.

**Madame Chairperson,**

The report of the Secretary-General also provides detailed analysis of the various dimensions of the status of progress in the implementation of the Monterrey Consensus. We welcome the emphasis in the report on the need to restructure the international financial architecture. We fully share the concerns raised on the legitimacy and effectiveness of international structures and policy approaches that have the mark of the post-Second World War period. The Bretton Woods Institutions, though impacting developing countries the most, do not have a structure that would permit the effective voice and participation of developing countries. We reiterate the importance of time-bound action on the issue of reform of these

institutions, as well as on the need for oversight by the United Nations on their policies.

We welcome the recognition in the report that private sector investment, often touted as a panacea for lack of development financing, cannot replace public sector investment in infrastructure. Further, that private investment is closely linked to public investment in infrastructure and other competitiveness-enhancing activities. We would add that public investment is particularly important in social sectors and in human resource development. In this regard, the report has correctly noted the critical role of the public sector in development and its indispensable role in sustaining growth. We emphasize the importance of public sector in securing equitable and inclusive growth. We agree with the report that overemphasis on fiscal balance and price stability should not detract from permitting public investment. Accordingly, Official Development Assistance remains crucial for many developing countries.

**Madame Chairperson,**

The report of the Secretary-General notes that developing countries have increased social expenditures, clearly underlining the commitment of developing countries to implement their commitments of the Monterrey Consensus. However, we share the concern about the ability of debt relief measures to provide additional resources to put all low-income countries on a sustainable debt repayment path. We support proposals for discussing what really counts as aid. Official Development Assistance to write off debt arrears, which does not generate new and additional resources, should not count as aid. Further, aid must assist national efforts and strategies. In this regard, the report has correctly highlighted the importance of predictable and stable aid flows. Sudden increase and decrease in aid can have a negative macroeconomic impact, with difficulties in absorption of sharp aid increases and leading to significant portion of aid assisting in reserve accretion.

We also agree that sustaining high levels of employment is an indispensable element of domestic resource mobilization. Accordingly, we need to ensure that international capital flows are channeled to sectors that have multiplier effects on employment generation. Generating employment must be a key goal of development strategies, not merely macroeconomic stability. We particularly welcome the importance accorded by the report to the need for policy space, particularly for undertaking employment oriented macroeconomic policies. In addition, policy space is required for developing

countercyclical funds and instruments as well as in the management of capital flows. Domestic resource mobilization also requires the development of financial systems that can support the financing of productive domestic industry, instead of promoting consumer credit and Government debt. In conclusion, Madame Chairperson, let me emphasize the importance of the international community fulfilling its commitments.

Thank You.

**660. Statement by Acting Permanent Representative at the UN Ajai Malhotra on Agenda Item 121: Revitalization of the work of the General Assembly at the 62<sup>nd</sup> session of the UNGA.**

**New York, November 26, 2007.**

**Mr. President,**

We are pleased to participate in the debate on the revitalization of the work of the General Assembly and associate ourselves with the position of the

Non-aligned Movement as expressed by the delegation of Algeria.

**Mr. President,**

The General Assembly is the chief deliberative, policy-making, and representative organ of the UN. Its revitalization should restore the Assembly to its position of primacy, as per the Charter. It must ensure that the GA addresses itself to the developmental problems confronting the overwhelming majority of UN Member States. A revitalized General Assembly must also set the global agenda, especially on economic and financial issues.

Over the last few years, Member States have agreed on certain measures to rationalize and streamline the work and agenda of the General Assembly and to improve its working methods and that of its main Committees. These efforts have sought to give a sharper focus to its work. They have also led to addressing the needs of the office of the President of the General Assembly, including during a period of transition. Efforts to trim down the heavy burden of papers submitted to the General Assembly have reduced

the volume of such documentation. Such procedural changes mark a useful beginning. However, the General Assembly cannot be revitalized via better coordination or streamlining of procedures alone. Central to revitalization is a focus on substantive measures aimed at restoring and enhancing the role and authority of the General Assembly to the position originally envisaged in the Charter.

**Mr. President,**

The General Assembly can hardly be revitalized while its role, prerogatives and authority are being undermined by encroachment of its agenda by the Security Council. The balance between the principal organs of the UN, envisaged in the Charter, must be maintained and respected. Of special concern is the encroachment by the Security Council on issues that traditionally fall within the GA's competence, such as the process of standard-setting and codification of international law. Of concern also is the holding of thematic debates in the Security Council on issues that frequently fall within the purview of the General Assembly or the Economic and Social Council. Resolution 60/286 reiterated that in addition to the Security Council making its annual report more analytical, it should submit special reports to the GA. It is also important to fulfill this provision while the Security Council considers ways to further improve the quality of its reports to the General Assembly. At the same time we should guard against an over-zealous attitude that may lead to the GA, in turn, intruding into areas that are primarily the core competence of other UN bodies.

**Mr. President,**

It is equally important to implement provisions of previous GA resolutions in the matter. It may be recalled that a substantive area that GA resolution 60/286 attempted to revitalize is the role of the GA in the selection of the UN Secretary-General. It sought to put in place a more inclusive and transparent procedure for the appointment of the Secretary-General, consistent with Article 97 of the Charter. Furthermore, GA resolution 59/313 requested the President of the GA to propose interactive debates on current issues on the agenda of the Assembly, in consultation with Member States. A procedure for ascertaining the views of Member States in deciding the themes for such thematic debates, would help identify issues of current interest to members and avoid duplication of discussions elsewhere in the UN.

**Mr. President,**

In a dynamic and changing world, it is important to focus on the more

substantive aspects of GA revitalization on an ongoing basis. In this context, we look forward to the setting up of the Open Ended Working Group, in line with GA resolution 61/292, with a view to enhancing the role, authority, effectiveness and efficiency of the General Assembly through implementation of previous resolutions and consideration of creative new proposals. In conclusion, we would like to felicitate the distinguished Permanent Representatives of Paraguay and Poland and wish them every success in their important work as co-chairs of the Open Ended Working Group.

Thank you, Mr. President.

**661. Statement by Member of Parliament and Member of the Indian Delegation to the UN Adhir Ranjan Chowdhury on Agenda Item 33: Report of the Special Committee to Investigate Israeli Practices affecting the Human Rights of the Palestinian people and other Arabs of the Occupied Territories at the 62<sup>nd</sup> session of the UNGA.**

**New York, November 13, 2007.**

**Mr Chairman,**

India appreciates the opportunity to discuss the 39th report of the Special Committee to Investigate Israeli Practices Affecting Human Rights of the Palestinian People and Other Arabs in the occupied territories. The report describes the “serious deterioration” of human rights in the Occupied Palestinian Territories and the Syrian Golan. It highlights the people’s despair that their rights will not be defended. While the financial embargo against the Palestine Authority is being lifted— even after wreaking great economic harm and social damage—it is of little comfort because this measure owes more to disunity in the Palestinian ranks. Continued economic hardship and deterioration of the human rights situation only engender extremism, which, in turn, generates violent action and reaction. As history shows, the cycle of violence and counter-violence is self-perpetuating, and ultimately defeats efforts to address complex issues, such as those in the Middle East, through peaceful dialogue. I am goaded to say that for centuries India is preaching that all human beings are equal under the sun and exhorting the human kind “live and let live”.

**Mr. Chairman,**

India unequivocally condemns all acts of terrorism, as well as any provocation and incitement to violence in the strongest terms. Equally, we have always criticized harsh and disproportionate retaliatory measures, and any measures that suggest collective punishment. We believe that the world should collectively exhort all parties to exercise utmost restraint, shun violence and continue the ongoing negotiations to evolve a peaceful solution. The contours of a solution are well-known: the goal is to achieve, in a reasonable time-frame, a sovereign, independent and viable Palestinian State, within well-defined and secure borders, living side-by-side and at peace with Israel. We are hopeful that meaningful forward movement can be achieved in the weeks ahead.

**Mr. Chairman,**

The Report of the Special Committee focuses on the human rights of the Palestinian and Other Arabs in the Occupied Territories. What emerges from the report is a clear statement outlining measurable failure to raise human rights standards of these people under nine essential areas, including the Right to Life.

The list of measures that affect these rights is long, and the lack of measures to address these hindrances is depressing. Thus despite the advisory opinion of the International Court of Justice, Israel continues to construct the illegal separation wall. Indeed, two hundred kilometers of the wall have been built after the Court rendered its opinion. While the wall continues to be built, creating new facts on the ground and alienating more fertile Palestinian lands, restrictions placed on daily life (including upon movement), have been increased and free access to the occupied Palestinian territories have been curtailed drastically.

There is therefore need, as the report recognizes, for the Government of Israel to stop the construction of this separation wall and to stop alienating more Palestinian lands; to stop the expansion of settlements in the Occupied Territories; to restore the freedom of movement for Palestinians, as well as to expand access to and from these territories. Recent reports of a decision to limit crossings in Gaza to one border point would only worsen access and exacerbate shortages. The UN Under-Secretary-General for Political Affairs had underscored the fact that it was "difficult to see how security concerns could justify the hardship" that such measures were causing. Similarly, the use of mass arrests, arbitrary detentions, curtailment of basic

services and disproportionate force must cease. Such steps could only encourage extremists at the costs of moderates on all sides. We also hope to see an early restoration of international assistance, and a rightful share of tax and other revenues, to the Palestinian National Authority. This is essential if it is to provide effective governance to a people who have already suffered far too long.

At the same time, the report notes that the need for all Palestinian parties to comply fully with the requirements of the road map, as elaborated by the Quartet, and to effectively prevent indiscriminate attacks against civilians. Parallel, we see the need for action by all Palestinian groups to resolve their internal differences.

**Mr. Chairman,**

It is not only essential for us to collectively publicize the lamentable situation of human rights in the Occupied Territories, as suggested by the report, but also to find ways of effectively addressing this growing crisis. We cannot but be concerned at the humanitarian crisis, with its potentially-devastating consequences in an already unstable region. We support giving the Special Committee a renewed mandate "in line with current realities". Such a mandate should take into account the deep-rooted frustration of those living in the occupied territories, and the need to address these pestering problems it is too late to do so.

**Mr. Chairman,**

We hope that in the weeks ahead, the Quartet and the regional parties will help de-escalate the situation, bringing an end to the cycle of violence and counter-violence, stop taking actions that alter the situation on the ground, and work to remove restrictions and access controls that contribute to despair and frustration in the Occupied Territories. We also hope to see early infusions of assistance and funding, so that effective governance is delivered. Lastly, we hope to see an early resolution of the divisions within Palestinian society and polity. All of these, taken together, will help create an atmosphere conducive to resuming direct negotiations with a time bound solution that brings peace to this sorely troubled land. With these words, I am concluding my statement.

Thank you, Mr. Chairman.

**662. Statement by Deputy Permanent Representative at the UN Ajay Malhotra on Agenda Item 13: The role of Diamonds in fueling conflict at the 62<sup>nd</sup> session of the UNGA.**

**New York, November 26, 2007.**

**Mr. President,**

Thank you for this opportunity to address the General Assembly on the agenda item "The role of diamonds in fuelling conflict".

**Mr. President,**

Many developing countries are vitally dependent on their natural resources for achieving their development goals. Yet, ironically, these very natural resources have served to cause and prolong conflict in several countries, as a result of the misuse of wealth generated from such resources. Diamonds, in particular, have played a significant role in this regard. In addition to financing devastating armed conflicts, the illicit trade in rough diamonds also impacts negatively on the legitimate international trade in diamonds. It is, therefore, crucial to end the trade in illicit diamonds.

The issue of natural resources fuelling conflict should not be seen solely through the narrow prism of peace and security. Instead, efforts to address this issue must be made through the perspective of an overall development agenda. Moreover, such efforts need to focus not only on the supply side, but also on all parts of the supply chain, including processing, trading, and purchase by the consumer. In this regard, the Kimberley Process is an innovative and useful mechanism. It approaches the problem not merely at the level of extraction, but also from the standpoint of processing and trading. Its certification scheme has been particularly effective in validating and regulating production of rough diamonds, as also on their trade. It fully affirms the sovereignty of States in the process, and is driven by voluntary efforts of its participants. In addition, it has an inclusive approach that extends to the entire international community, including producing, exporting and importing countries, as well as the diamond industry and civil society. For these reasons, major diamond trading and processing countries, like India, have engaged constructively and actively with this Process and support its full implementation.

**Mr. President,**

We welcome the decisions taken at the Plenary of the Kimberly Process held in Brussels earlier this month, which are reflected in the Brussels Communique. In particular, we support the need for strong government oversight of rough diamond trading and manufacturing, with greater internal control. We would also like to convey our appreciation to the European Commission, as Chair of the Kimberly Process during 2007, for its efforts during the year towards strengthening the implementation of the Process, as well as its initiative in the publication of diamond production and trade statistics. We welcome the readmission of the Republic of Congo, as also Liberia and Turkey joining as new participants in the Kimberley Process. We would like to congratulate Ghana for its efforts in the implementation of the Kimberley Process. We support continuing peer review visits, and would also like to thank the Bolivarian Republic of Venezuela for its invitation for a visit next year. We also look forward to the implementation of the Brussels Initiative on diamonds from Cote d'Ivoire.

**Mr. President,**

As Chair of the Kimberley Process for 2008, India will strengthen the Kimberley Process mechanism by building on previous traditions and conventions and will strive to implement the decisions taken during the Brussels Plenary through active association of the Kimberley Process Working Groups and Committees. India will continue to extend assistance to Kimberley Process Members to build effective internal controls on the production, processing and trade of rough diamonds. This is crucial for ensuring growth of the legitimate diamond trade and protection of the livelihood of so many people across the globe. We look forward to receiving the support and cooperation of all participants of the Kimberley Process, civil society and industry representatives. In conclusion, Mr. President, while mechanisms like the Kimberley Process play an important role in breaking the link between illicit transactions in rough diamonds and armed conflict, a lasting solution would have to involve the effective and consensual exploitation of natural resources in a way that benefits society as a whole.

Thank you.

**663. Statement by Minister of State E. Ahamed on Agenda item: 17 & 18 “The Situation In The Middle East” & “Question of Palestine”.**

**New York, November 30, 2007.**

**Mr. President,**

I thank you for scheduling this discussion on an important subject that requires our collective attention to an extent that almost nothing else does: the Question of Palestine, set in the larger context of the situation in the Middle East. This discussion is particularly appropriately timed, as it follows the International Day of Solidarity with the Palestinian people yesterday, and the international conference hosted at Annapolis earlier this week.

**Mr. President,**

India has traditionally followed with close concern the developments in this volatile region. Our delegation has perused with attention the reports of the Secretary-General on the Situation in the Middle East and on the Peaceful Settlement of the Question of Palestine. We have watched with concern as border restrictions, economic sanctions and a restrictive access regime had brought the Palestinian economy to the verge of collapse. We have viewed with alarm the continued vicious circle of attacks, reprisal and counter-attacks, the worsening humanitarian and security situation in Gaza following developments in June this year, as well as the continued violence inflicted on innocent civilians. Moreover, the continued expansion of Israeli settlements in the Occupied Territories, and the relentless construction of the separation wall threaten to create new facts on the ground and fresh grievances in an old conflict. The unresolved issues of last year's summer war in Lebanon, and the long-pending question of the occupation of the Syrian Golan add to a sense of frustration and desperation. All these issues have the potential of exacting an immediate and a long-term impact on the lives of the people, potentially contributing more fuel to an already combustible situation.

It is for this reason that India has consistently urged all concerned to eschew violence and exercise restraint at each of the all-too-frequent instances when violence has broken out, exacerbating sufferings and misery in the region. It is in the interest of the entire international community that a comprehensive and peaceful solution is found at the earliest to the problems besetting the Middle East.

**Mr. President,**

For India, commitment to the Palestinian cause has been a bedrock of its foreign policy since even before our independence. India's solidarity with the Palestinian people and its attitude to the Palestinian question was inspired by its own freedom struggle led by Mahatma Gandhi. In the early years of independent India, this policy was consolidated under the leadership of our first Prime Minister Pandit Jawaharlal Nehru. In November 1947, India voted against the partition of Palestine at the UN General Assembly. As early as in 1975, India recognised the PLO as the sole representative of the Palestinian people. In 1988, it recognised Palestinian statehood and in 1996 India opened its Representative Office to the State of Palestine.

I had the singular honour of having had a most memorable meeting with late President Yasser Arafat in September 2004, at Ramallah, at which I had the opportunity to express India's solidarity with the Palestinian people and support for their cause. In fact, India's empathy with the Palestinian cause and its friendship with the people of Palestine constitutes an integral and time-tested part of our foreign policy. I salute the indomitable spirit of the Palestinian people and reaffirm India's consistent, principled and unwavering support to their cause and their just struggle for a sovereign and independent State of Palestine.

**Mr. President,**

It is widely recognized that the Middle East conflict is essentially political in nature and therefore cannot be resolved by force. India has consistently called upon all parties in the region to fully cooperate with the efforts of the international community in this regard. We have supported the resumption of direct negotiations between the leaders of Palestine and Israel and the establishment through peaceful negotiations of a sovereign, independent and viable State of Palestine, living side by side and in the shadow of peace with the State of Israel. We have supported the Quartet Road-Map and the Arab Peace Initiative. We have also called for comprehensive peace and stability in the region and supported the early resumption of dialogue on the Israel-Lebanon and Israel-Syria tracks. These issues must equally be addressed in order to attain a comprehensive and durable peace in the region.

**Mr. President,**

It is against this backdrop that India welcomes the Joint Understanding

reached by the President of Palestine and the Prime Minister of Israel earlier this week at Annapolis. In particular, India welcomes the direct dialogue between the leaders of Palestine and Israel and looks forward to an early and peaceful resolution of all issues between the two states and peoples. It is also satisfying that the Middle East Peace Process will address the remaining issues on the Israel-Lebanon and Israel-Syria tracks; we believe that the Arab Peace Initiative re-launched at the Arab Summit in Riyadh, Saudi Arabia, in March this year provides a constructive framework to achieve such a comprehensive peace. We hope that post-Annapolis developments will proceed down a path that will enable a negotiated solution of the core issues, leading to the establishment of a sovereign, independent and viable State of Palestine, living side by side and in peaceful co-existence with the State of Israel.

**Mr. President,**

Given the complexity of this task, unprecedented determination, goodwill and capacity to offer and accept compromises and concessions are needed on all sides. It is here that the members of the international community have a collective duty to help in creating a favourable environment within which the principals can take forward the negotiations. India is ready to play a supportive role in this collective endeavour to achieve a just and comprehensive peace in the Middle East.

Thank you, Mr. President.

**664. Statement by Permanent Representative at the UN Nirupam Sen on Agenda item: 77[A] & [B] – Oceans and the Law of the Sea at the 62<sup>nd</sup> session of the UNGA.**

**New York, December 10, 2007.**

**Mr. President,**

I take this opportunity to thank the Secretary General for his comprehensive Reports on the issues relating to ocean affairs and the law of the sea. India attaches high importance to the effective functioning of the institutions established under the United Nations Convention on the Law of the Sea. With a coast line extending four thousand miles and with 1300 islands, we have a traditional and abiding interest in maritime and ocean affairs. Therefore, we follow closely the work of all subsidiary institutions under the Convention, namely the International Sea-bed Authority, the International Tribunal for the Law of the Sea and the Commission on the Limits of the Continental Shelf. We congratulate the Chairman of the Commission on the Limits of Continental Shelf for the efforts by the Commission under his leadership in undertaking the considerations of the submissions. We also thank him as well as the Secretariat for providing detailed information on various issues and constraints arising from the increasing workload of the Commission and the anticipated increase in the number of submissions in the coming years. In this crucial phase of Commission's work, it needs to be ensured that decisions that are taken do not compromise the task with which the Commission has been entrusted under the Convention. Accordingly, we fully support the request made by the States Parties to the Convention for the Secretary-General to take timely measures, before the twenty-first session of the Commission, to strengthen the capacity of the DOALAS that serves as the secretariat of the Commission and to ensure enhanced support and assistance to the Commission in its consideration of submissions. We also support the Commission's request for increased working time for the Commission to meet in a Plenary so as to enable it to examine the work done in the sub commissions.

As regards elections to the Commission and the International Tribunal for the Law of the Sea, we hope that the next meeting of the States Parties would be able to agree on the joint proposal of the Asian and African groups on allocation of seats in these bodies, in accordance with the principle of equitable geographical representation.

**Mr. President,**

The International Sea-bed Authority is currently involved in the development of a legal regime for prospecting and exploration of polymetallic sulphides and cobalt-rich crusts. We appreciate the role of the Authority in the conservation of biodiversity in the 'Area', and in ensuring environmentally sustainable development of seabed mineral resources. The Council of the Authority has finished the first reading of the Regulations on Polymetallic Sulphides. However several issues relating to the protection of the environment, including the time frame during which temporary measures could be taken by the Authority to prevent, contain and minimize the threat of serious damage to the marine environment, are still under consideration. India is totally committed to the protection and preservation of the marine environment but we would caution against attempts to impose an unduly burdensome regime as it would act as a disincentive for any further prospecting or exploration in the Area and defeat the very purpose of setting up the Authority. We also hope that issues regarding the configuration of blocks and geographic proximity of blocks in the allocated areas for exploration can be successfully resolved in the next session of the ISBA.

We continue to follow with interest the reports of groups of scientists collaborating on the Kaplan Project, which could be of help in managing nodule mining and the design of marine protected areas in the Clairion Clipperton Zone. We welcome the setting up of an Endowment Fund by the International Seabed Authority to promote and encourage the conduct of marine scientific research in the international seabed Area. The Fund will support the participation of qualified scientists and technical personnel from developing countries in marine scientific research programmes.

**Mr. President,**

The eighth meeting of the UN Open-Ended Informal Consultative Process on Oceans and the Law of the Sea this year discussed the issue of "Marine Genetic Resources". The symbiotic relationship between the biodiversity of the deep seabed and its ecosystem makes the entire resources of the sea-bed, living and non-living, to be a common heritage of mankind. Therefore it is necessary to identify the risks to this common heritage and agree on a substantive legal basis for the conservation and management of biodiversity and the use of biological and biogenetic resources of the deep-sea bed and subsoil. In this regard we fully align with the G77 position that, all resources of the Area, including the marine genetic resources, in areas beyond national jurisdiction are a part of the "common heritage of

mankind” regulated by the legal regime of Part XI of the Convention and “bioprospection” is essentially a marine scientific research activity that is regulated by Part XIII of the Convention.

In the area of maritime navigation, we view with serious concern the acts of terrorism, piracy and armed robbery against ships and are pleased to note the significant decrease in the number of attacks by pirates and armed robbers in the Asian region through increased national action and regional cooperation. We would also like to emphasize again the importance of the principle of freedom of navigation including the right of innocent passage as well as transit passage through straits used for international navigation. The States bordering straits may adopt laws or regulations relating to transit passage through straits, but such laws should be enforced in a manner that is non-discriminatory and fully consistent with Article 42 of the United Nations Convention on the Law of the Sea.

**Mr. President,**

Over fishing, destructive fishing practices and IUU fishing continue to be great threats to the conservation, management and sustainable use of biodiversity on the high seas. To combat IUU fishing it is essential to give priority to compliance and enforcement measures, including effective port State measures, listing of vessels, and developing and implementing integrated monitoring, control and surveillance packages. It is important to sustainably manage fish stocks and protect vulnerable marine ecosystems and thus to find a balance between sustainable use and conservation.

Thank you Mr. President

**665. Statement by Permanent Representative at the UN Nirupam Sen at the meeting of open-ended Working Group on the Question of Equitable Representation on and Increase in the Membership of the Security Council and other related matters at the 62<sup>nd</sup> session of the UNGA.**

**New York, December 14, 2007.**

**Mr. President,**

I thank you for convening this meeting. I would also like to congratulate the Ambassadors of Chile, Portugal and Bangladesh on their appointment. The seven pillars that you outlined have an important historical iconography. The first is the Bible – “Wisdom hath builded her house; she hath hewn her seven pillars”. The second is T.E. Lawrence’s “Seven Pillars of Wisdom”. In short, the seven pillars are associated with wisdom and with revolt and change, not with conservatism and standing still. And that is how we should use them in practice. Unfortunately, in terms of concrete, actual progress in shaping a reformed Security Council, there is little to show. The 17th century mathematician and scientist Pierre Fermat had discovered the principle of least action; at least Brunelleschi was able to apply it creatively in the construction of the dome of Florence Cathedral. In terms of actually achieving reform the OEWG has discovered the principle of no action – of ‘running very fast in order to stay where we are’.

We remain caught in the quagmire of the OEWG. It has certainly discussed and thrown light on themes and elements. However on actually reforming or negotiating on a structure of reform, it has remained caught in a repetitive cycle. There are some who may want to continue in this manner and have more of the same but this cannot be equated with progress. As for negotiables, these have already been identified over the last fourteen years but the OEWG has not been able to harmonize contradictory negotiables and therefore these remain buried in the quagmire.

The task now, Mr. President, is to harmonize negotiables in order to transform these into a text which can be the basis for negotiations. It is surely illogical to suggest, as is sometimes done, Adapted From that because the G4 proposal which came near to success in the summer of 2005 and was pursued for two years did not eventually work, we should stick to the OEWG which has not come even remotely close to success and has not produced reform in fourteen years. It cannot be expected to do

now what it has not been able to do for fourteen years. It is precisely because of this practical fact that we have paragraph (d) in Chapter IV Recommendations transmitting the report of the OEWG. That is why in terms of this paragraph intergovernmental negotiations have to be held outside the OEWG. We do not see any ambiguity here. As the Permanent Representative of Netherlands put it in a moderate way, while the OEWG maybe part of the process, the process is not necessarily a part of the OEWG. Similarly, if the Facilitators' reports are to be privileged, paragraph (d) would have done so. Or the previous President or you, Mr. President, would simply have begun negotiations on the four Notions of a Way Forward in the conclusions of the first Facilitators' report. Clearly, the reports Succeeded no more than the G4 proposal. More than one third of the membership were opposed to an intermediate solution and those actively supporting it did not substantially exceed this figure. Hence paragraph (d) of the Recommendations transmitting the OEWG report and the last paragraph of your letter of December 6 announcing this meeting. Therefore we have to base ourselves on the progress achieved in the Sixty First Session (which includes the Facilitators' reports) as well as the positions and proposals of the member states. Hence the recommendations are clear; there is no ambiguity.

The task therefore is an urgent search for elements or negotiables. One way is for the member states to formulate elements in groups which may in some cases be 'overarching'. A group that actually formulated elements and tabled these is the group that cosponsored Resolution L69. This comprised Small States and included those who were either members or supporters of groups like SIDS, IBSA, AU, G4 and S-5. Speaking of overarching groups, it may be useful to examine the concept of an arch. In India, we had developed this on slightly different principles long before but in Europe the concept perhaps goes back to Italy or the Romans. The principle here is to use the law of gravity against itself (not to try to break the law as some of my friends may wish to do, like Macavity the mystery cat): mutual pressure of the stones produces and keeps stable the arch. But this is applicable only to intergovernmental negotiations because they are supposed to produce the arch of reform, not to the search for elements which is equivalent to quarrying or cutting the stones: here mutual pressure may only misshape the stones.

In any such group of member states, the weight of numbers behind different opinions (that are included in the group) would shape the final elements that are produced. An essential and necessary corrective is to make such

groups transparent and open ended (in the sense of inclusive and not in the sense of leaving the question open forever, without bringing it to closure). But even after the task force has tinkered with these elements and consulted widely, they would still not have sufficient legitimacy to be a basis for negotiations without being put to the vote to clearly demonstrate initial majority support. Here let me say that at that stage we had advised a straw poll and it is precisely by not testing the Notions of a Way Forward in the first Facilitators' report through such a poll that we lost the chance of privileging it. It is this that deprived the first Facilitators' report of a privileged position.

In any case the normal democratic procedure in any democratic country is to begin with a majority opinion and then, through negotiations, integrate to the maximum extent possible the minority opinion into it. For us here also there is no other democratic way if we are to bring this matter to an optimal and acceptable closure.

The only other way that occurs to us is to begin with Africa. In this context, the Representative of China both in remarks at this meeting and at the previous debate had correctly spoken of acceptability to small states (many of whom incidentally spoke through L69) and to Africa. Africa has been the most excluded continent in decision making councils. It is therefore logical to take the AU position as the basis for negotiations. Let me here emphasize the crucial conceptual difference between something being the final structure and being the basis for negotiations. The AU position may not have majority support as a final structure but we are confident that it could have majority support as a basis for negotiations.

Since you have asked us, Mr. President, to spell out negotiables or elements, for us these remain those we have tabled in L69 and therefore permit me to read these out:

- Expansion in both permanent and non-permanent categories
- Greater representation to the developing countries
- Representation to developed and economy-in-transition countries, reflective of contemporary world realities
- Comprehensive improvement in the working methods of the Security Council, including ensuring greater access to island and small states
- Provision for a review.

You will notice that regional representation is missing from this list. This is not a slip of the tongue. It is deliberate. On June 22, 2007, there was a Summit meeting of the European Union. This Summit decided on a new EU Foreign Minister or High Representative for Foreign and Security Policy who would be backed by an EU External Service and chair EU Foreign Ministers' meetings. However, it was decided that France and UK would retain their permanent seats and there was nothing on a regional EU seat. Why did those EU states who are members of the Uniting for Consensus not ensure a regional rotating EU seat at the June 22 Summit? It is clear that even the EU, the most integrated region, is not ready for such representation. The first Facilitators' report came to the same conclusion that this is not the time for regional representation. Therefore there is no place for regional representation in the list of negotiables or elements. The representative of a member state who spoke earlier, on the one hand said that we should adhere to the Facilitators' reports and on the other hand contradicted himself by arguing in favour of regional representation. The meaning of the African Union text is also clear – they are looking for permanent permanent seats: it cannot be otherwise given the emphasis on there being no discrimination in respect of the powers and privileges of old and proposed new permanent members. Some of our friends on the other side therefore are torturing texts before we even have a text.

If I may be permitted an illustration from Chemistry, we look to your leadership Mr. President to choose the right democratic method, a choice and method that would facilitate the emergence of a crystal from the watery solution of the last fourteen years rather than one that keeps it weak and diffuse.

I thank you, Sir.
